

How to adjust the iPhone Control Center interface

Tweak Glacier will customize the Control Center interface on iPhone, switch to background blurring.

To change the look of the iPhone home screen we can use many different applications, but with the Control Center to change the interface there are very few applications that support implementation. However, if your iPhone or iPad is installed with iOS 11 and above and jailbroken, you can install Glacier tweaks.

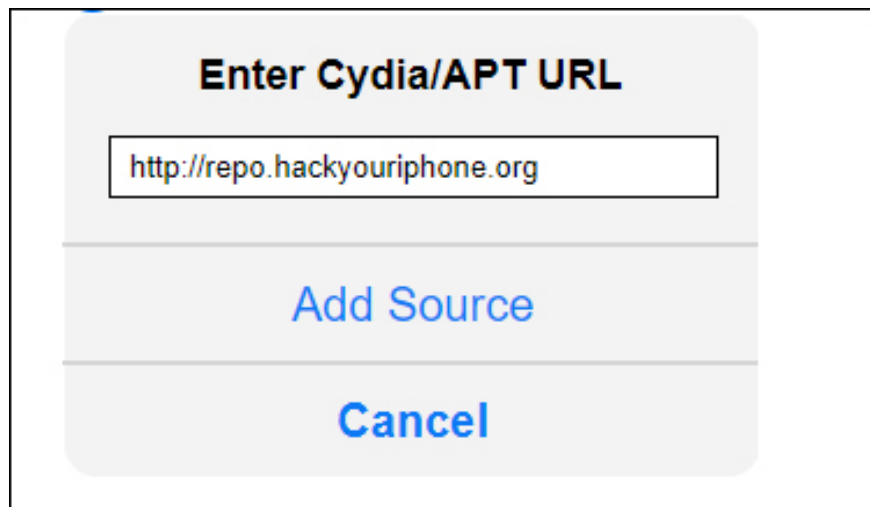

This tweak will proceed to customize the interface of the Control Center to transparent, no frame by default. Besides, the tool modules will also be hidden, no longer classified into different tool groups. The following article will guide you how to install Glacier tweaks on iPhone.

1. How to adjust the Control Center iOS 11 interface
2. How to adjust the level during the virtual Home button on the iPhone
3. How to customize the theme on iPhone

Instructions to install Glacier iPhone tweak

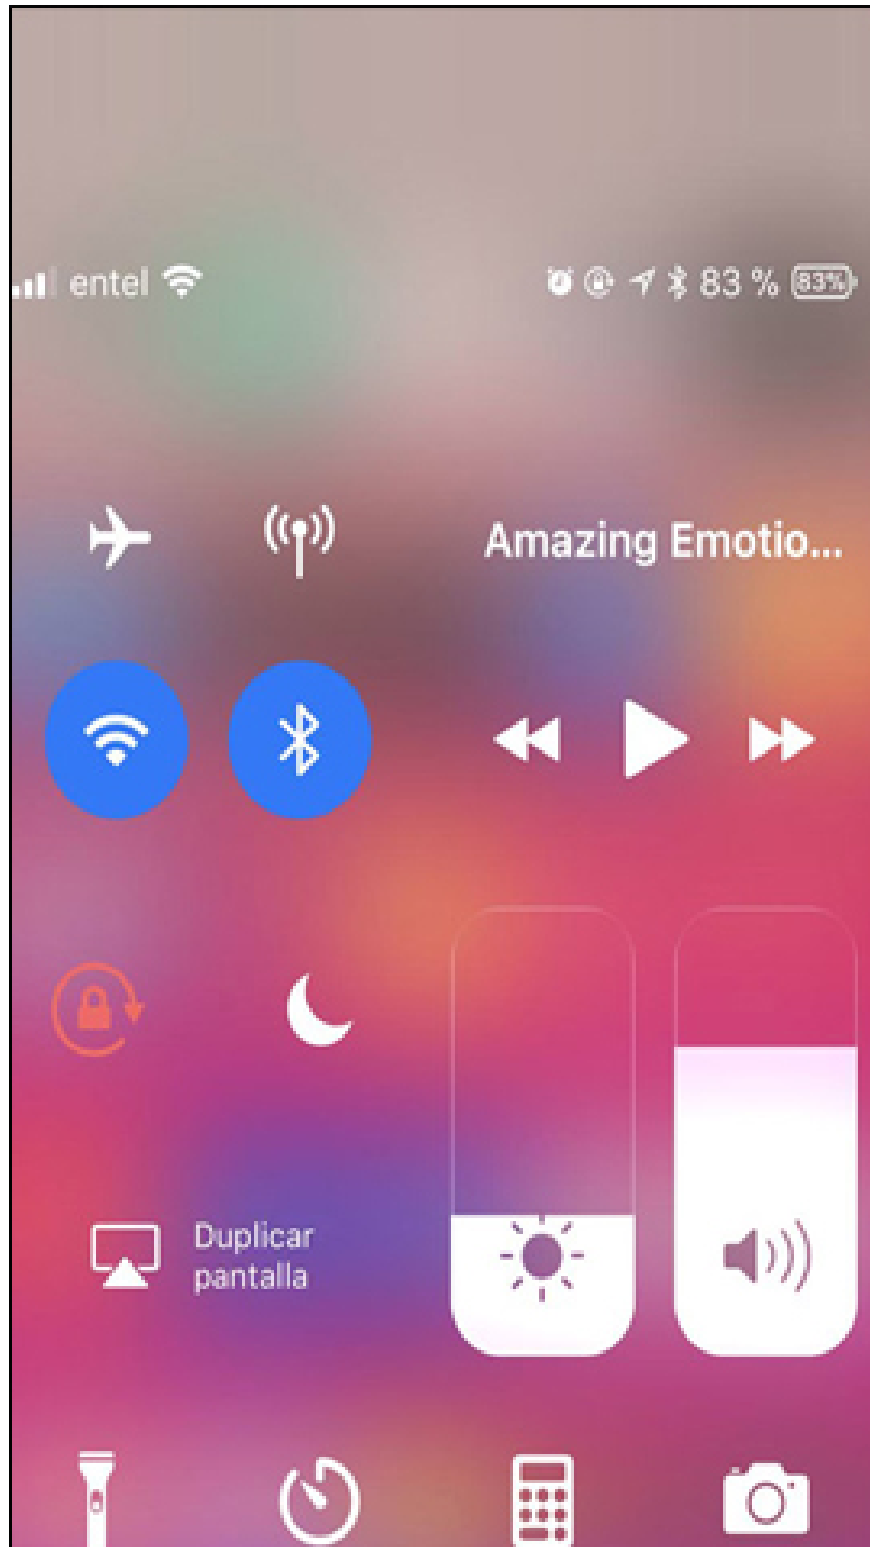

Step 1:

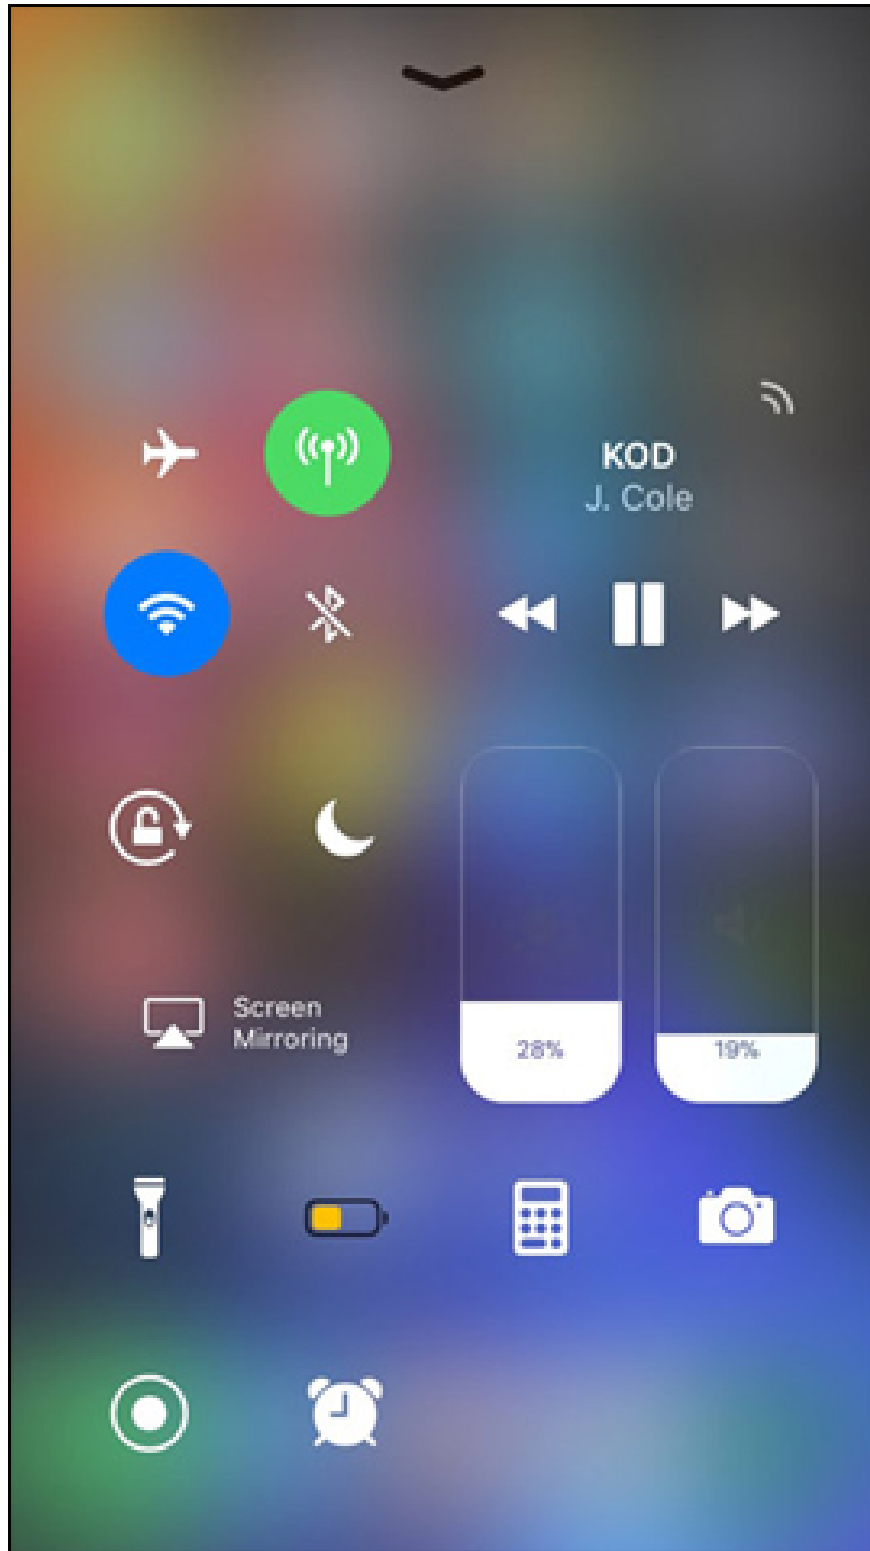

Go to Cydia and click on the Sources tab to add <http://repo.hackyouriphone.org/> . Then search for Glacier tweaks and install on the device.

Step 2:

After the installation is complete and the device resprings, the Control Center interface will automatically be changed so that users do not need to access the Settings to adjust. The Control Center interface will change as shown below.

Refine Glacier without any settings, but any changes will be immediately applied to the Control Center interface after installation. The Control Center interface will be simpler when the modules are hidden.
