

# How to adjust the iPhone folder interface

To change the folder design on iPhone, we can install CoolFolder tweak with jailbroken devices.

The folder interface on iPhone will be designed by default rounded rounded square style, with the background color available. In the case of iOS 11 installed jailbreak, we can change the folder interface, by setting the CoolFolder tweak. This tweak will offer different options for users to change the design for the folder, such as changing the background color, changing the roundedness for the folder border, . The following article will guide Read how to install CoolFolder tweak on iPhone.

1. Change keyboard color with Laetus - Tweak on iOS 11
