

How to adjust the screen brightness of Windows 7 on computers and laptops

If you are new to computers, adjusting the screen brightness of Windows 7 is a bit difficult. In this article, the software tips will guide you how to adjust the brightness of Windows 7 screen on computers and laptops.

The current Windows 7 operating system is still widely used because of its useful features and simplicity. Windows 7 operating system today still supports users with full features for users. If you are new to computers, adjusting the screen brightness of Windows 7 is a bit difficult. In this article, the software tips will guide you how to adjust the brightness of Windows 7 screen on computers and laptops.

1. Use the keyboard

If you use a Laptop, there are usually keys to increase and decrease the screen brightness on Laptop's keyboard. You press directly on those keys to adjust the screen brightness on the computer. Most of the keys to adjust the screen brightness on your computer will be on the row of **auxiliary** keys **F (F1 -> F12)** .

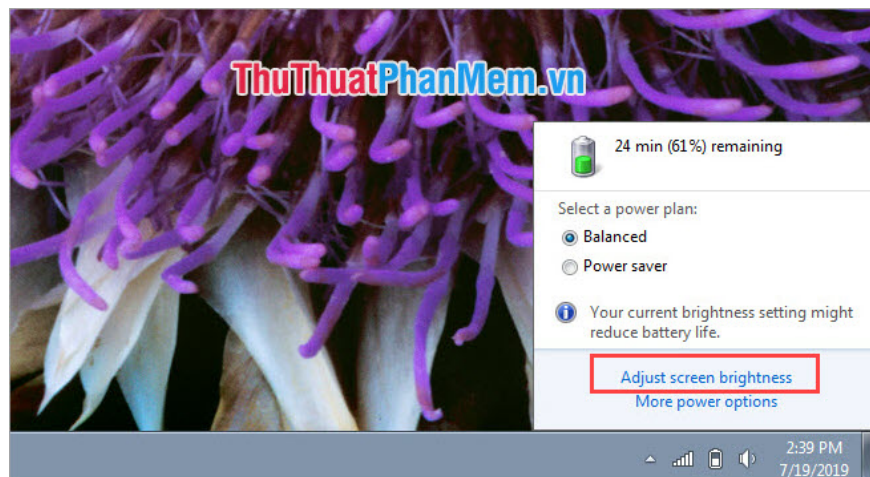

If you press the key to increase or decrease the brightness on the keyboard can not adjust the brightness on the screen, then you press the **Alt** key to use.

Combine brightness adjustment on Windows 7: **Alt** + Brightness up / down key.

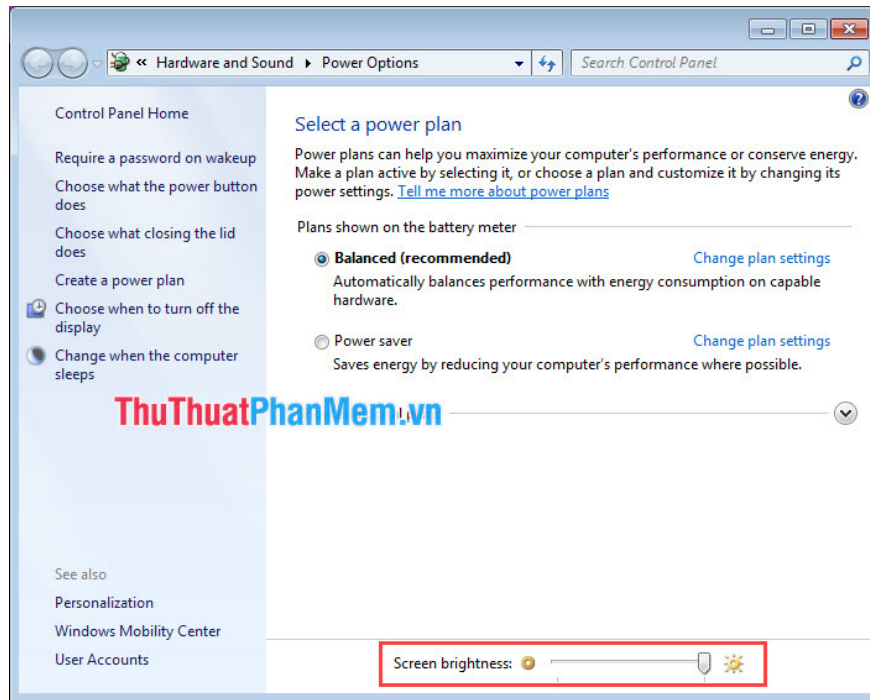

2. Adjust via the Power function

On the Taskbar of Windows 7 there are many icons to help us with different quick actions.

Step 1: Click the **Power** icon on **Windows 7** and select **Adjust screen brightness** .

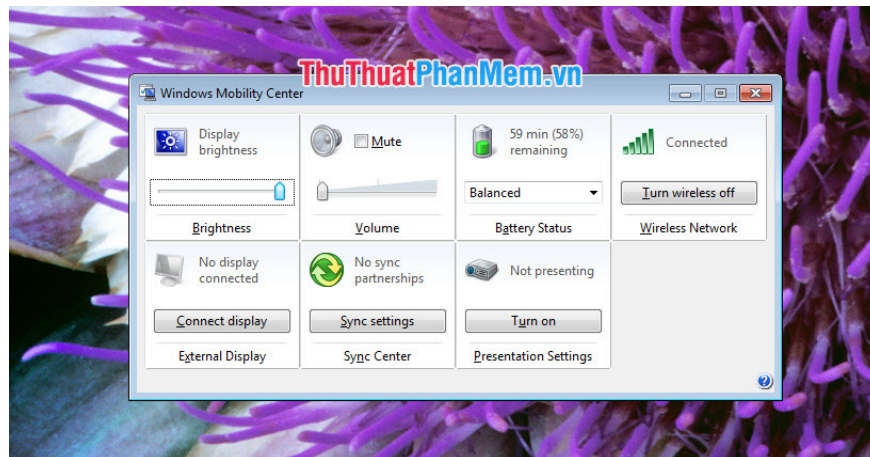

Step 2: Here will appear **Power Options** window . Adjust the brightness via the **Screen Brightness** bar at the bottom.

3. Adjust the brightness via the control menu

On Windows 7, there are many combinations of shortcuts to control your computer. One of the great shortcuts is the **Mobility Center** shortcut .

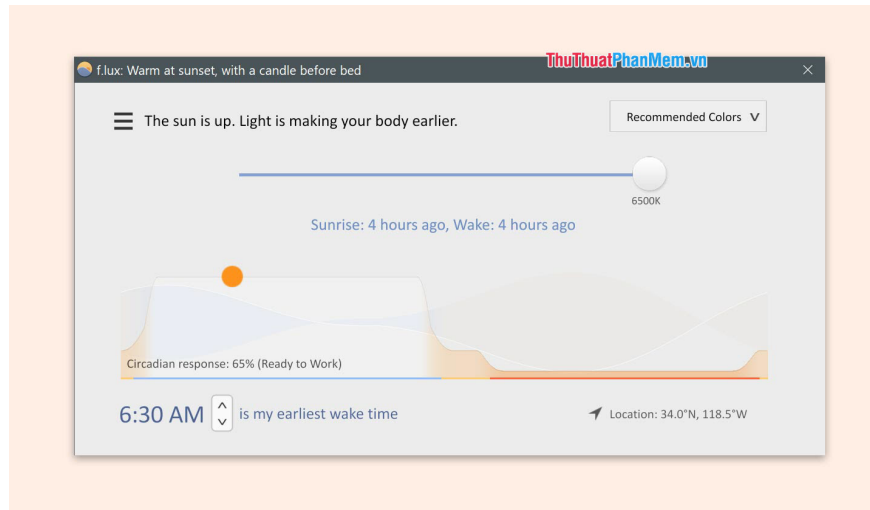

You press **Windows + X** to open **Mobility Center** . Here you can adjust the brightness on your computer screen and a lot of different features are controlled through here.

4. Using the 3rd software (F.lux)

If you want to customize the screen of your computer more like changing color temperature, adjusting brightness quickly, you should use F.lux software. This is a very good support tool for the screen of Windows 7.
