

How to adjust the speed of playing Facebook Android videos

Fast Playback application for Facebook Videos will adjust the speed of playing videos on Facebook Android depending on the needs of users.

YouTube has the option to adjust playback speed, fast forward or slow the video playback, but not all websites have this option. If users want to change the speed of playing Facebook videos, they can install Fast Playback application for Facebook Videos on Android device. This application has a very simple usage, providing options to speed up or slow down the speed of playing videos on Facebook. All videos you have viewed on Fast Playback are saved in a separate section on the application interface for review. By default, the speed of increase or slow down the playback speed of the application is 0.25x but we can change this setting. The following article will show you how to adjust video playback speed on Facebook Android.

Step 3:

Display the application selection interface, click on **Fast Playback** to open Facebook videos on this app. Soon we will see the video playback interface at **normal speed of 1x** and the video mute by default.
