

# How to adjust YouTube video default quality

YouTube video quality depends on the transmission line and we will adjust it to 720p, 1080p. So how to change the setting of YouTube video quality?

YouTube video has the option to adjust video quality, usually 480p and users will need to reset it to 720p, 1080p based on the speed of the Internet connection being used. The number of videos that support 4K quality is not much. So what if you want to adjust the quality of YouTube video yourself? Adjusting Automatic 4K / HD for Youtube will help you do that. The following article will guide you how to adjust YouTube video quality.

1. How to download Youtube videos offline, watch Youtube videos offline
2. Add a tool to download high quality YouTube and Facebook videos
3. How to change the speed of playing YouTube videos

## Instructions for changing YouTube video quality

### Step 1:

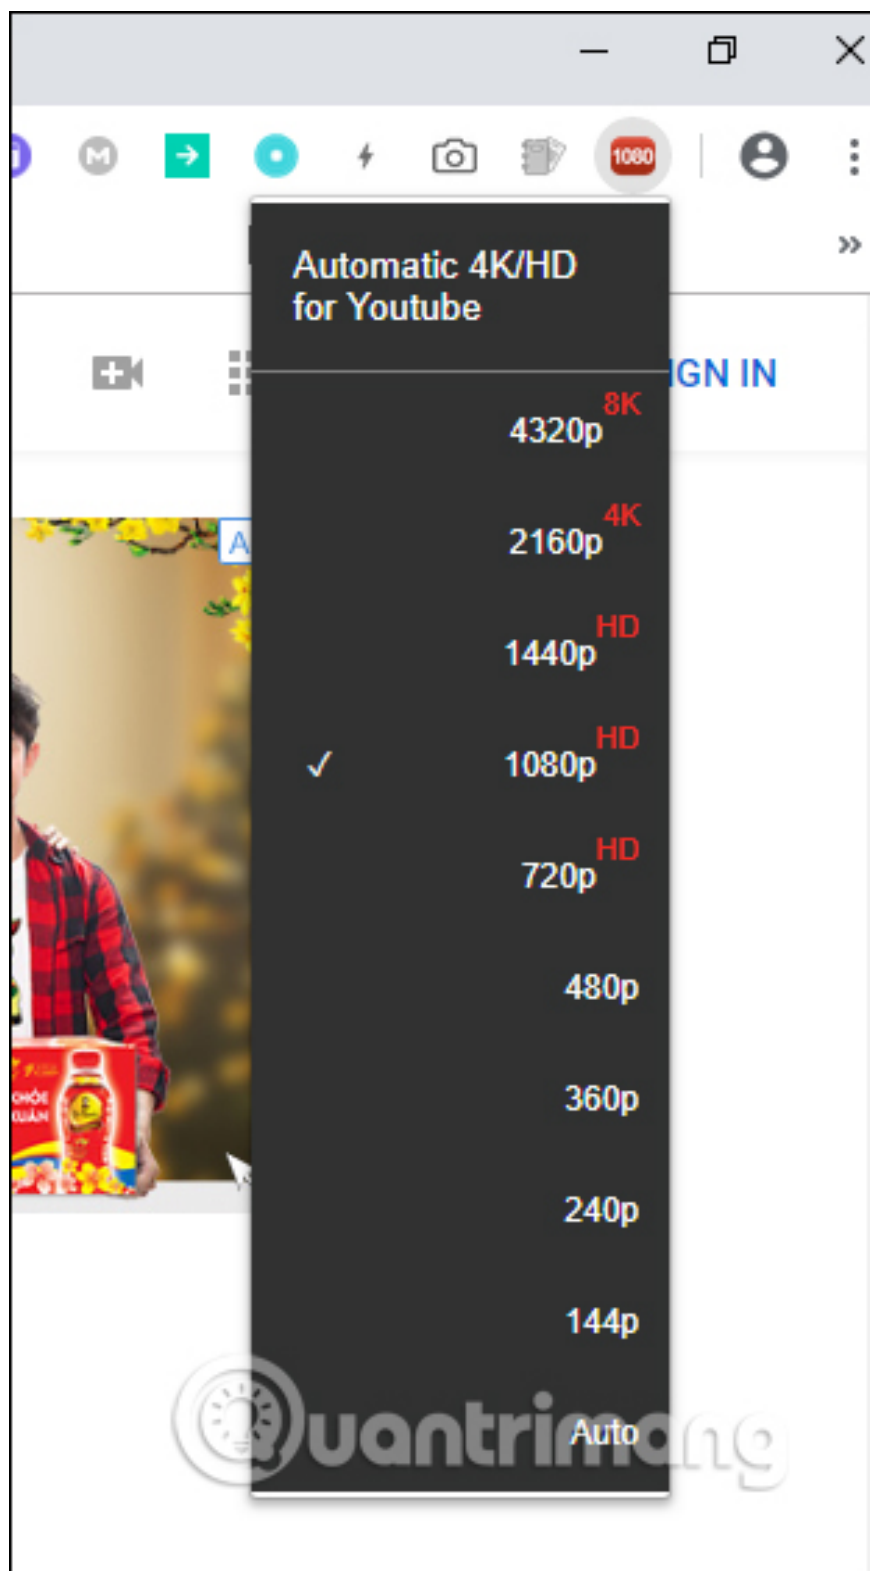

Users click on the link below to install the Automatic 4K / HD for Youtube utility on Chrome browser.

1. Download the Automatic 4K / HD for Youtube Chrome utility

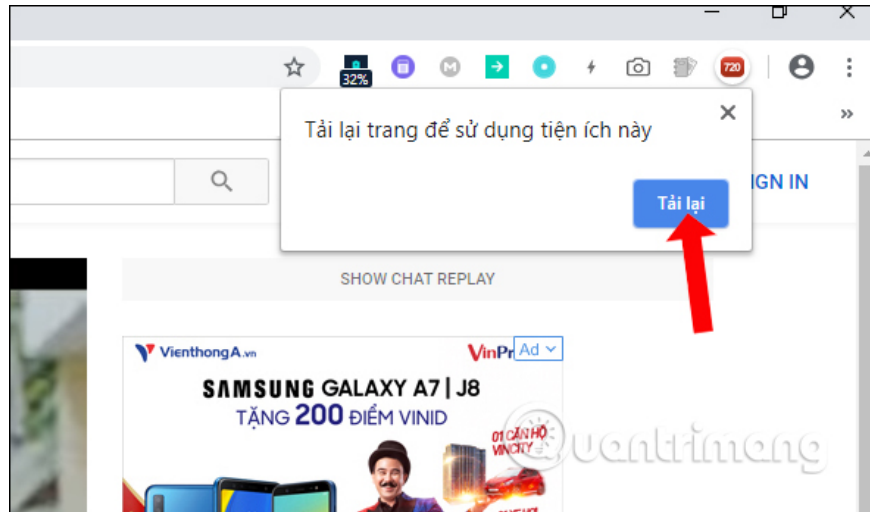

### Step 2:

Access to YouTube and then click on the widget icon at the end of the address bar. This will display a list of optional quality for videos, as well as the current video quality.

The highest is 8K with 4320p and the lowest is 144p. We can choose Auto to automatically adjust the video quality according to the speed of the computer connection. After selecting, reload the video to apply the new quality.

Once you've selected a new resolution for the video, the quality of the default YouTube video on the web is always played in this standard.

Thus, besides YouTube's available video quality, the Automatic 4K / HD for Youtube utility has many other qualities to choose from. With high quality videos, your computer needs a high configuration, as well as a fast and stable connection speed.
