

How to allow Pop-Up window to be displayed in Microsoft Edge

When it comes to pop-ups, the type of notification that automatically pops up when visiting a website, most of us will immediately associate annoyances. But sometimes, in Microsoft Edge, you need to enable pop-ups for some websites to work properly.

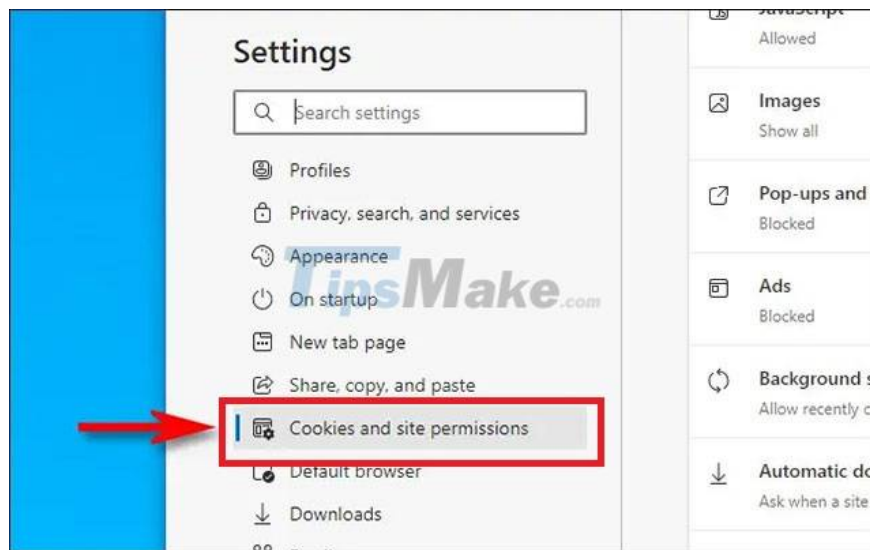

Let's learn how to enable pop-ups on all websites or only certain websites in Microsoft Edge browser for Windows 10 or Mac right here.

How to enable pop-ups on every web page in Edge

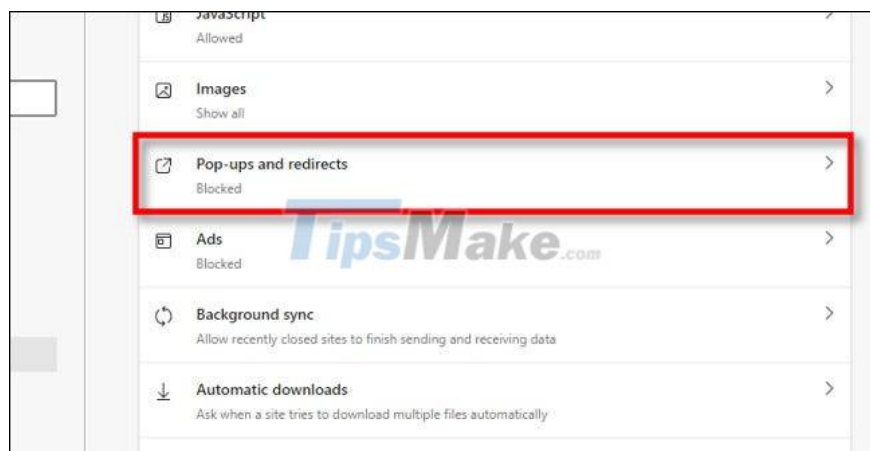

First, launch the Microsoft Edge browser on your Windows 10 PC or Mac. In any tab, you click the three-dot icon in the upper-right corner of the screen to open the system menu. In the list of options that appear, click 'Settings'.

In the Settings tab, look to the left menu and click on 'Cookies and Site Permissions'.

Then, scroll down to the ' **Site Permissions** ' section and click ' **Pop-Ups and Redirects** '.

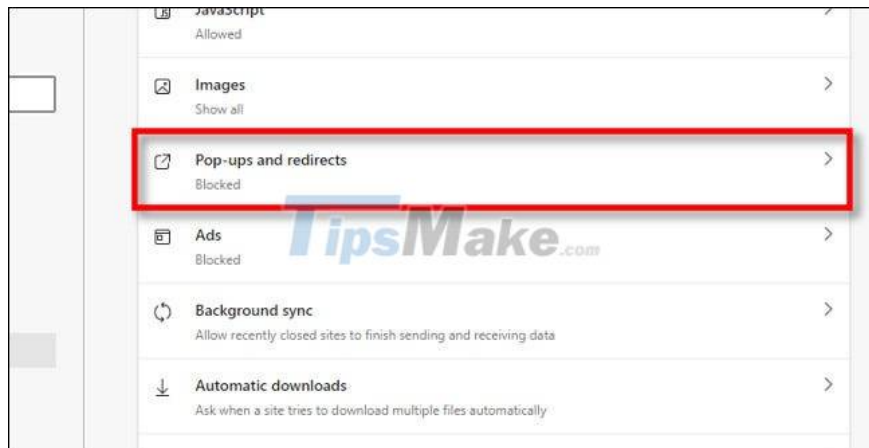

In the ' **Pop-Ups and Redirects** ' settings, click the switch next to the ' **Block (recommended)** ' option to turn it off. This will allow pop-ups to display freely on all the websites you visit in Edge.

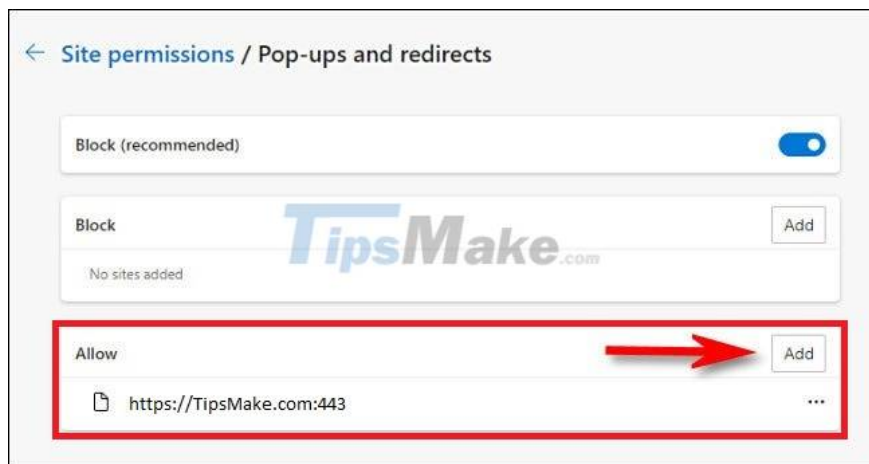

How to enable pop-ups on specific websites in Edge

If you only want to allow pop-ups to be shown on specific websites you visit in Edge, just do the following setup.

First, launch Microsoft Edge and click the three-dot menu button in the top right corner of the screen, then select '**Settings**'. Next, click on '**Cookies and Site Permissions**' in the right menu and select '**Pop-Ups and Redirects**'.

This time, we won't make any changes to the '**Block (recommended)**' option. Instead, keep scrolling to the bottom of the page, click the '**Add**' button in the '**Allow**' section.

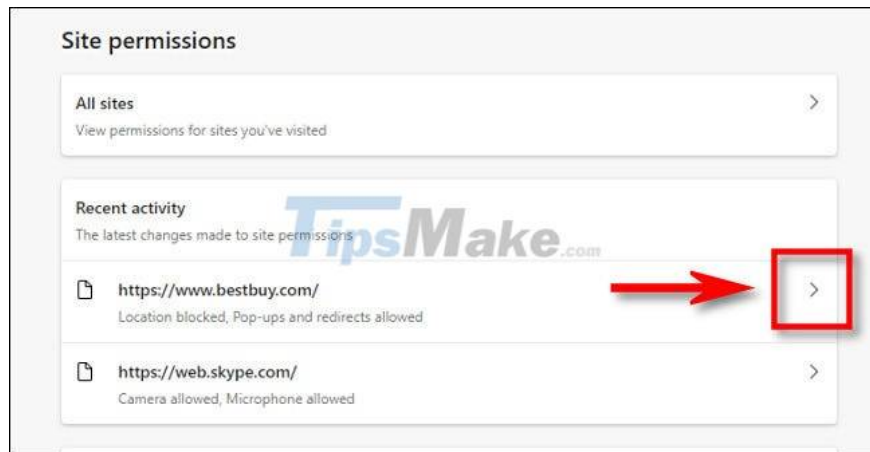

Immediately a dialog box will appear on the screen, enter or paste the URL of the website you want to allow pop-ups to appear, then click '**Add**'.

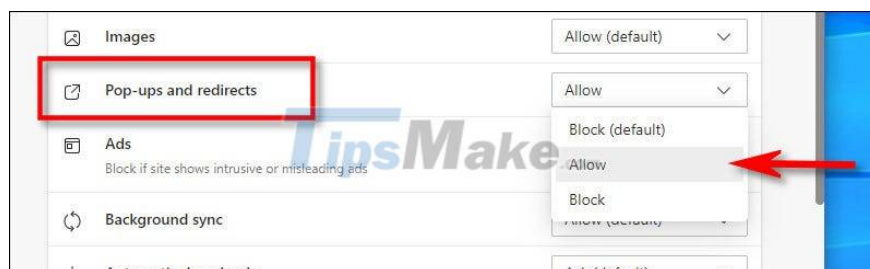

Repeat this process with any other websites that you want to allow pop-ups to appear on.

Alternatively, you can also go to **Settings > Cookies and Permissions** , then look under ' **Recent Activity** '. Click the arrow next to the address of the website for which you want to allow pop-ups.

On that site's ' **Site Permissions** ' page, scroll down and set the ' **Pop-Ups and Redirects** ' option to ' **Allow** '.

Your changes will be saved automatically, so once done, just close the Settings tab. You will now see a pop-up window showing up on all of the above allowed sites.
