

How to always open Android apps full screen on Windows

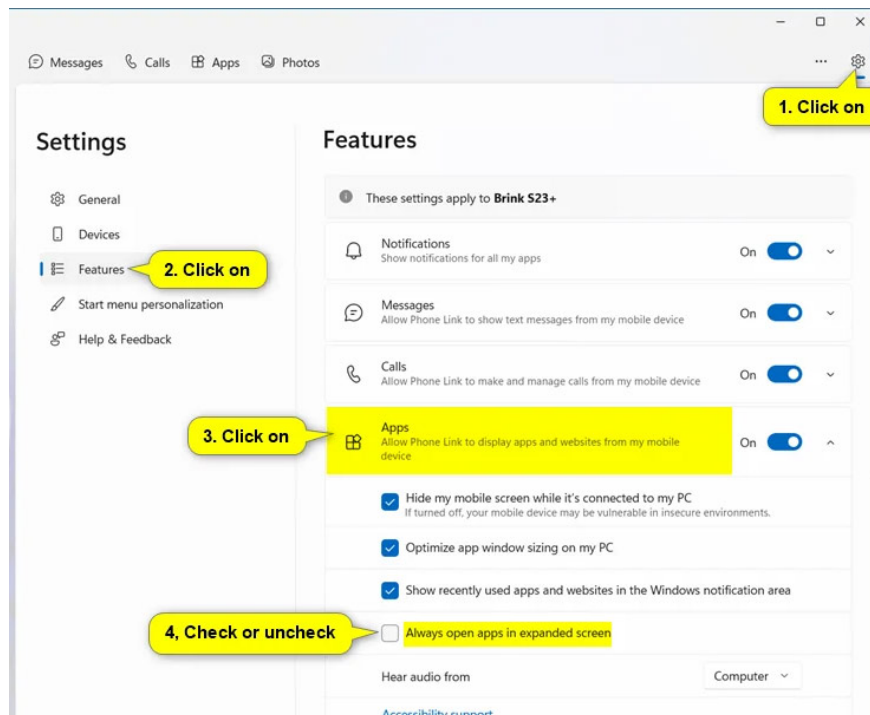

Starting with Phone Link app version 1.25091.39.0 and above, you can view Android apps in extended screen mode on your Windows PC.

When the Phone Link app on your PC is linked to your Android phone, you can instantly access Android apps installed on your mobile device right on your Windows 10 or Windows 11 PC. Starting with Phone Link version 1.25091.39.0 or later, you can view Android apps in full screen mode on your Windows PC. Here's how to enable this feature.

How to open Android apps full screen on Windows

Open the Phone Link application on your computer and click on **the gear icon** . Next, **select Features** and click on **Apps** to make adjustments.

Now you just need to **select Always open apps in expanded screen** to always open Android apps in wide screen on the computer.

As a result, when opening an Android application on your computer, you just need to click on **the expand icon** to open the application on Windows wide screen.
