Google Traffic is an extremely useful traffic jam monitoring feature added by Google Maps to help users avoid traffic jams at rush hour. This feature has been available for a long time and is getting better and better, it can be seen clearly through the Google Maps interface. Currently, Google Traffic has a little change compared to the initial period. Here, we will learn about how to update traffic jams with the latest Google Traffic.

1. How to find the way to Google Maps for motorcycles
2. Instructions to prevent Google from tracking your location
3. Avoid tolls and save money with the Google Maps GPS feature

## Instructions for avoiding traffic jams with the latest Google Traffic

1. Download Google Maps for Android
2. Download Google Maps for iOS

Google Traffic operates based on aggregating anonymous positioning data and the movement speed of devices at the same road section at the same time. To use the latest Google Traffic, you do the following:

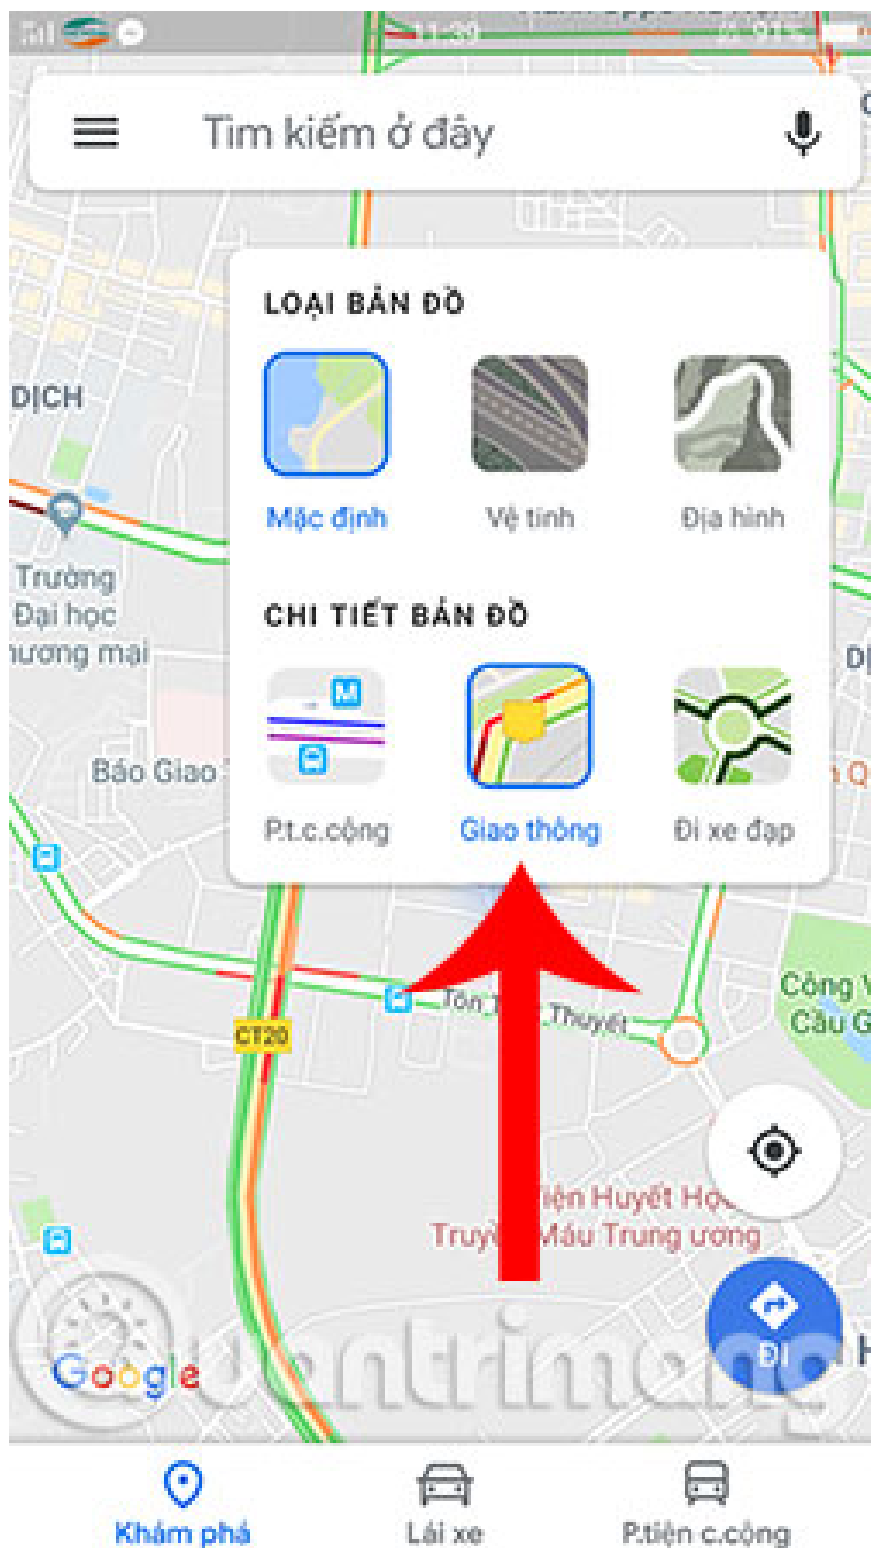

### Step 1:

First of all, you need to update Google Maps to the latest version according to the link above. Then, launch the application and click on **the layering icon** on the right corner like the picture.

## Step 2:

Next, to be able to monitor the traffic situation, select **Traffic** . Immediately, the Google Maps map on the phone will display green for any road that is well ventilated and the more crowded roads and traffic jam, the darker the red will be.

Google Traffic updates quite precisely the congestion situation on routes in major cities like Hanoi and Ho Chi Minh City. With the latest Google Traffic 2018, you will easily avoid traffic jams with Google Maps at rush hour and find the best way to get better traffic.

I wish you all success!
