

How to backup, backup iPhone messages quickly and easily

How to backup, backup iPhone messages quickly and easily. We want to transfer, backup messages from iPhone to new iPhone without knowing how? Invite you to find solutions to the above problem by following the article below!

We want to transfer, backup messages from iPhone to new iPhone without knowing how? Invite you to find solutions to the above problem by following the article below!

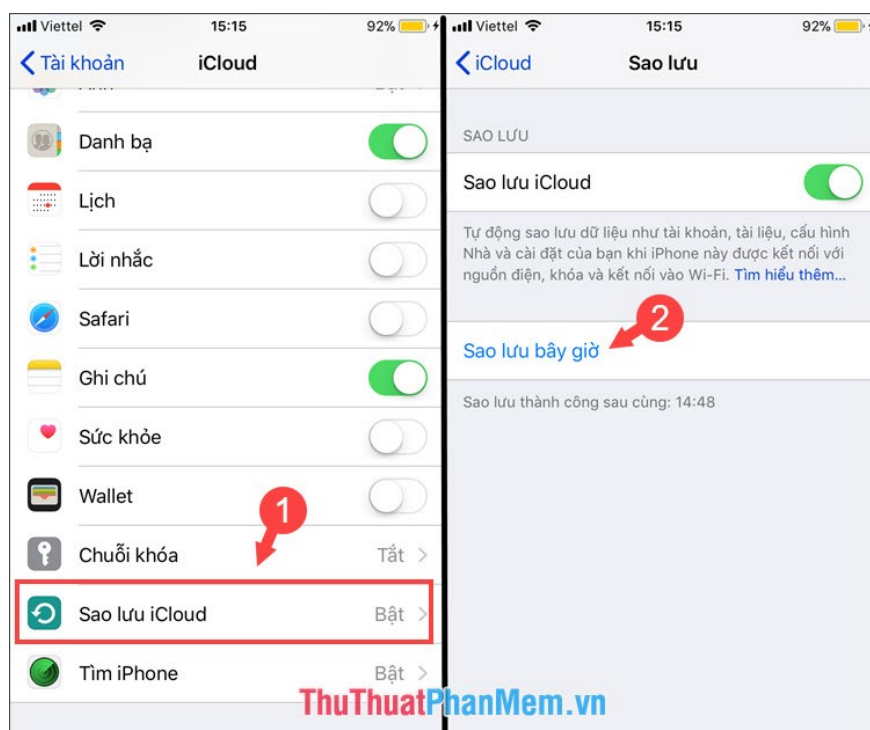

1. Backup, Backup iPhone messages using iCloud

Step 1: Go to Settings => Account & Password => iCloud .

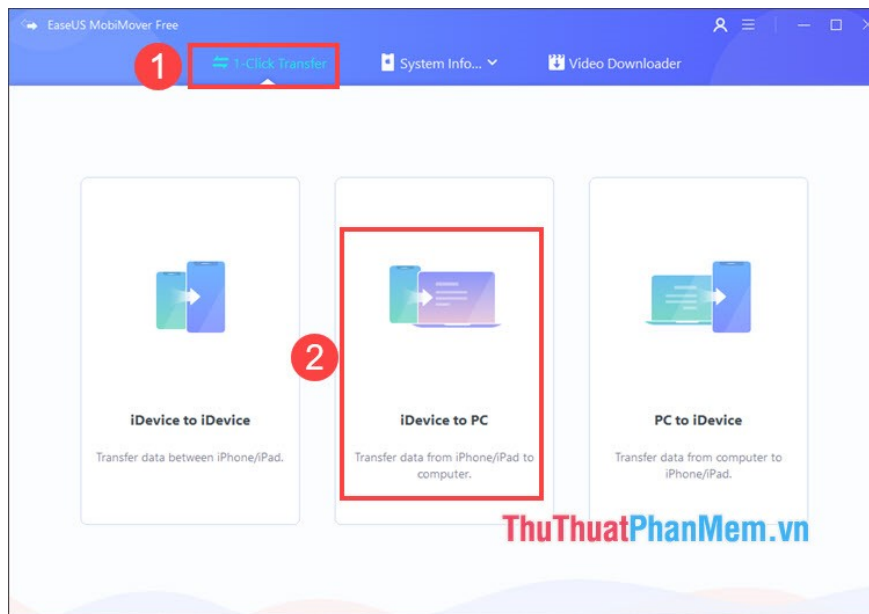

Step 2: Choose **iCloud Backup** => **Backup now** to backup everything. We can now sync messages to another iPhone by entering the synced iCloud account on the old device.

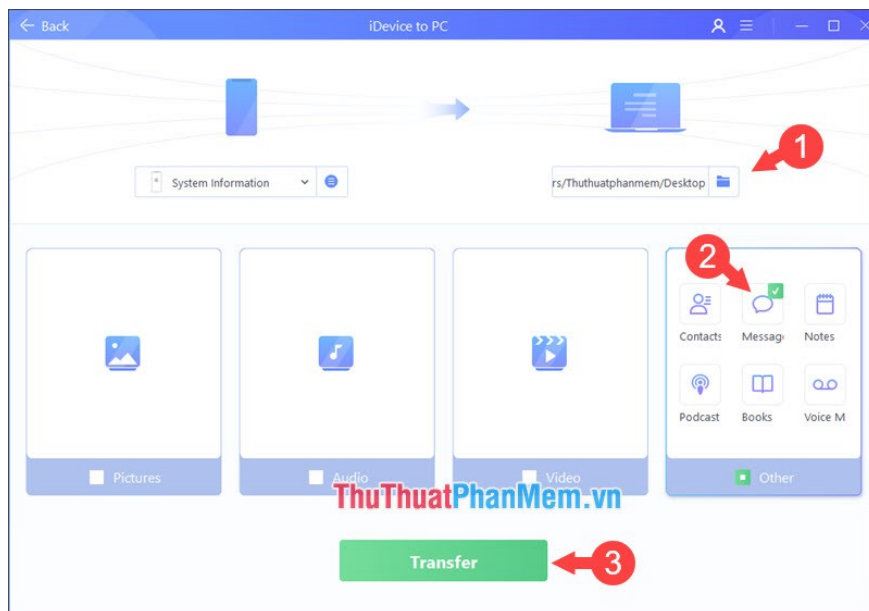

2. Use EaseUS MobiMover Free software

You can download **EaseUS MobiMover Free** here!

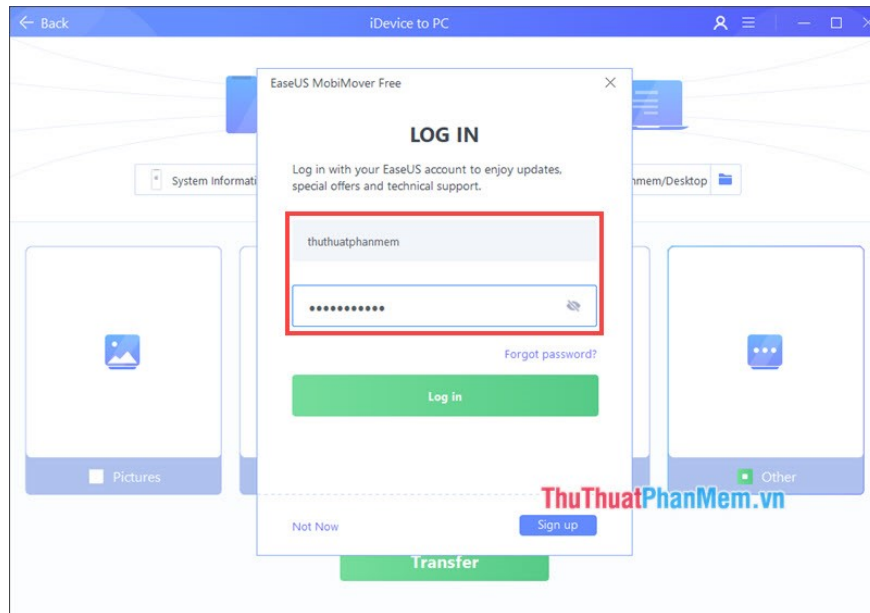

Step 1: After downloading the software, connect iPhone to PC and launch the software. You choose item **1-Click Transfer => iDevice to PC** .

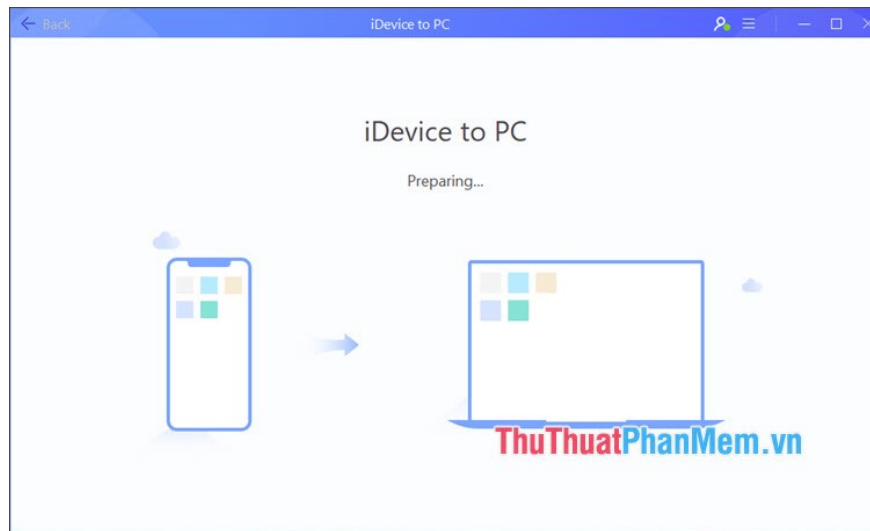

Step 2: Click on the image of the folder (1) to choose where to save the file. Deselect unnecessary things and tick **Message** (2) in the **Other** section . Then press **Transfer** (3) to transfer the message to your computer.

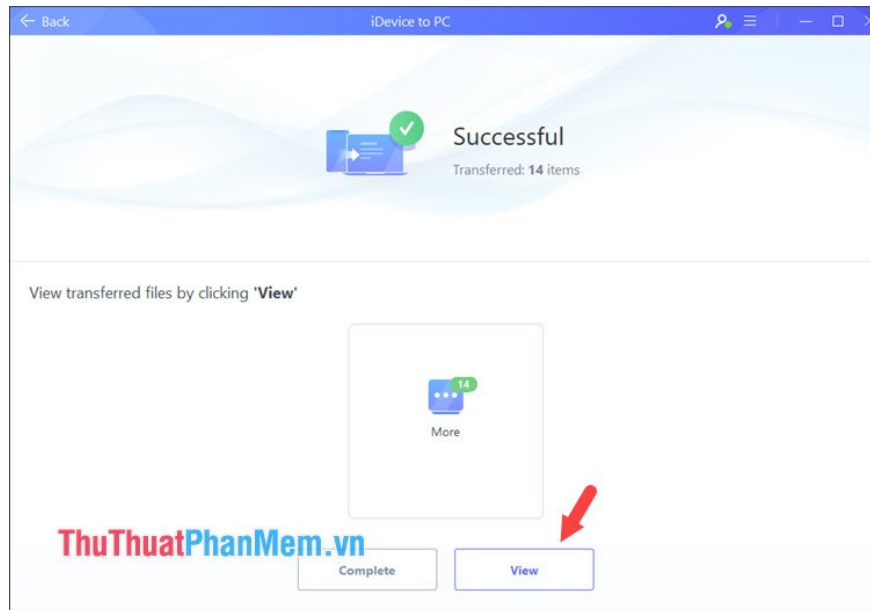

Step 3: Log in to your EaseUS account, if you do not already have an account, you can click **Sign Up** to register your own account.

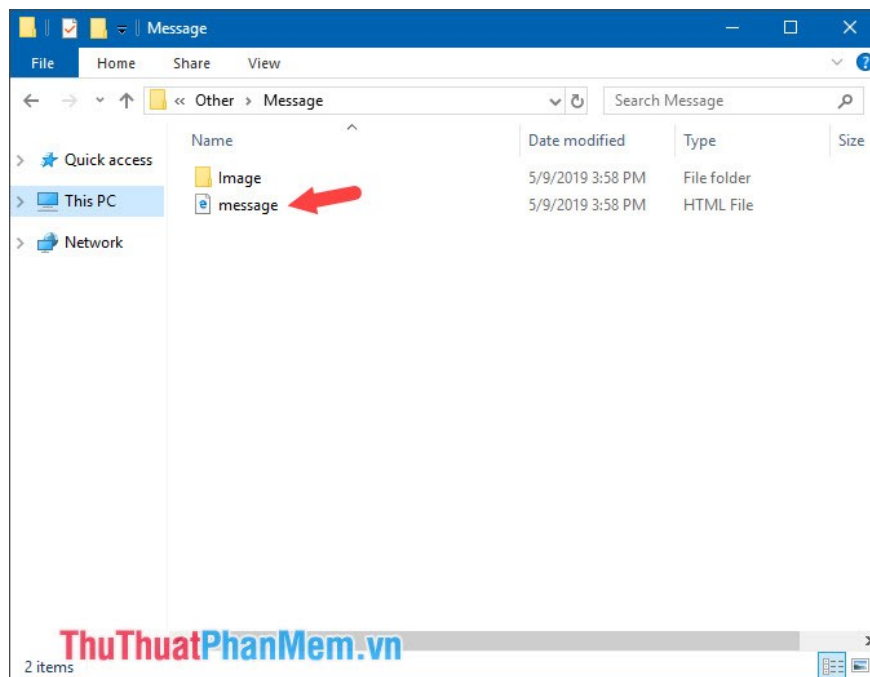

Step 4: We wait for the software to transfer messages from iPhone to PC.

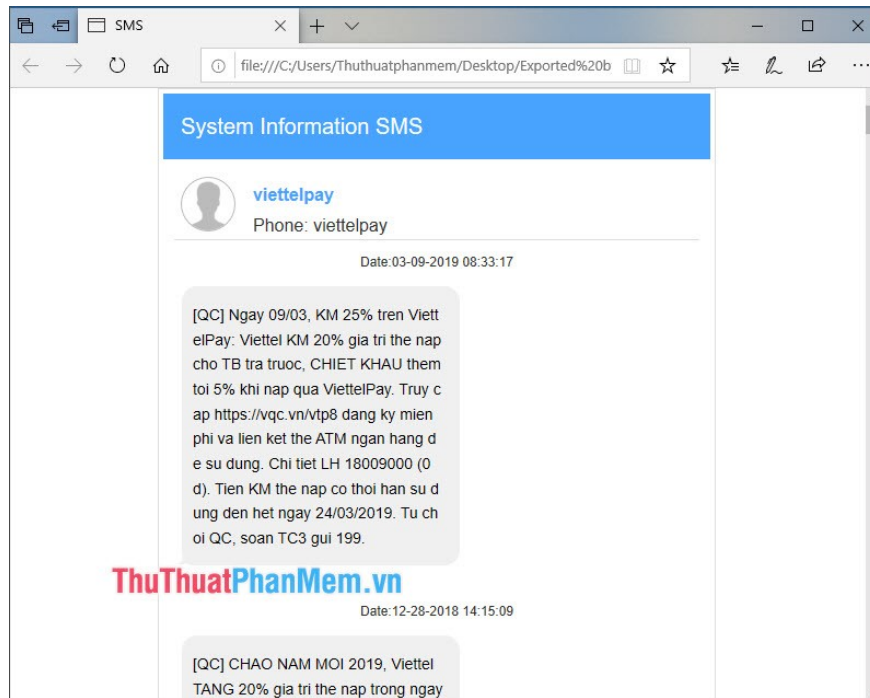

If the **Successful** message appears, it is successful. You click **View** to open the folder containing the message saved on the PC.

Step 5: In the **Backup** folder, there is an image folder and a **.html** file message . We proceed to open that html file in a browser to view the message.

And the result as shown below is successful.
