

How to block a specific WhatsApp chat

To secure private WhatsApp messages, users can lock individual chats, avoiding private messages being exposed.

WhatsApp chats that users lock will be carefully secured, using a fingerprint lock method so that the content of your messages cannot be read by others. This feature is quite similar to the feature of hiding chat on Zalo with a security code. The following article will guide you to lock the chat on WhatsApp.

Instructions to lock WhatsApp chats

Note, the WhatsApp chat lock feature currently only applies to the Android version.

Step 1:

At the WhatsApp interface on Android, users **click on the chat you want to lock** . Then click on the opponent's **WhatsApp account name** .

Step 3:

You continue to block other chats you want. All locked WhatsApp chats are managed in a separate interface.

At the interface of chats on WhatsApp, you will see **the Locked Chats section** if you scroll down . Accessing there will see the locked chat on the application.
