## **This method helps you:**

- Easily turn off ads on Google Chrome
- Get a link to a website to turn off ads

YouTube is the world's largest video sharing website, so it's not surprising that many companies, businesses, and websites of all sizes place advertisements on it. However, it can be time-consuming and annoying to constantly watch videos while having to close these ads. The only way to deal with these annoying ads is to block them. Below, we will guide you on how to block these ads .

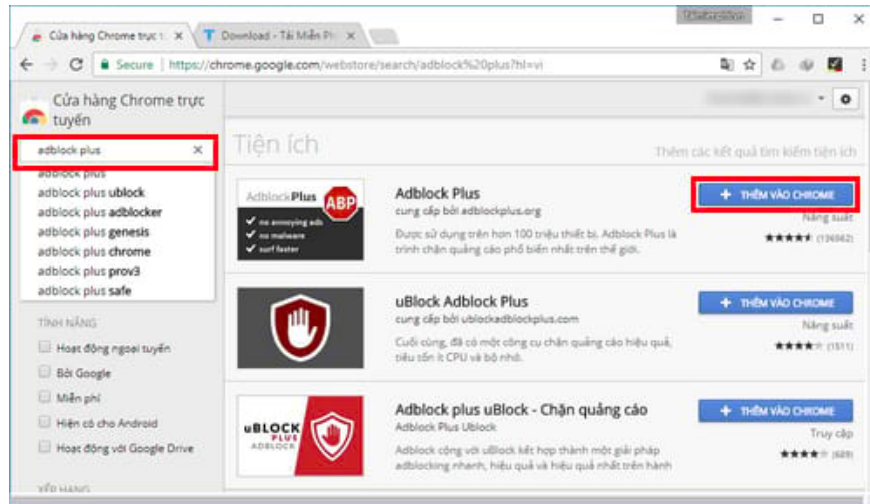

Turn off ads on Google Chrome while browsing the web.

This article will guide you on how to block these ads so they no longer appear on YouTube and bother you on the Google Chrome browser.

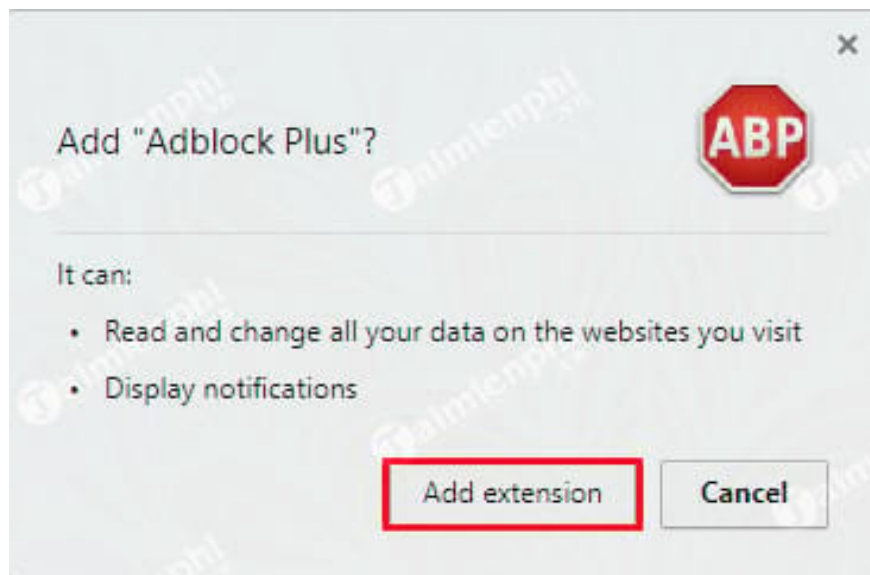

## Block YouTube ads on Chrome

*Step 1:* To block ads on YouTube using Chrome, first access **the Chrome Web Store**.

*Step 2:* In the search bar, type "**Adblock Plus**" to find this extension. Then, click "**Add to Chrome**" for the extension you find.

A pop-up window will open > click on **Add Extension** to install the extension on Chrome.

After successfully installing the add-on, try accessing YouTube to watch any video to see if there is any difference. All ads added to the video, as well as ads appearing outside of it, have been automatically removed.

If you're using IE 11, you should block ads in IE to get the fastest browsing speed and, more importantly, to avoid ads containing dangerous viruses when accessing websites.

Currently, YouTube supports an autoplay feature for videos. If you don't like it, you can turn off autoplay on YouTube to avoid watching unwanted videos.

Additionally, you can check out **9 hidden features on Google Chrome** that you may not know about to better use the Google Chrome web browser.

Chrome is currently the most widely used web browser, not only globally but also among Vietnamese users. A difficulty for Vietnamese users is having to type Vietnamese with diacritics when browsing the web. If you ever encounter a problem typing Vietnamese on Chrome, you can refer to the following guide on how to fix the issue

of not being able to type Vietnamese on Chrome for the best solution.
