

How to block ads on Safari with AdBlocker?

AdBlocker? is an ad blocking application on Safari, which also supports other useful features.

Browser blocking applications, or browser-based ad-blocking software, allow users to surf the web more freely, without being bothered by ads. AdBlocker? is an ad blocking application on Safari, plus many other features. The application provides an interface with content blocking settings, video spontaneous disabled on YouTube, etc., and users can choose to apply it to each site. While surfing the web on Safari, we can use the Mange button to quickly bring the website to the Whitelist Ads list, without blocking ads if desired. The following article will guide you how to use AdBlocker? to block ads on Safari.

Step 3:

When surfing the web on Safari, there are 3 default features that are blocking ads, not being tracked from other websites and blocking anti-Adblock programs.

Then click on the application to change the settings for the application. Click **I am ready to start** to use the application. Next you will see options to block content that AdBlocker? provides to users.
