

How to block ads on WPS Office

WPS Office is an office toolkit similar to Microsoft Office, but there are often ads that appear annoying to users. So how to turn off advertising on WPS Office?

Besides the popular Microsoft Office office tools for users, there are many office software released later, including WPS Office.

WPS Office provides users with full set of office tools including Writer, Spreadsheets and Presentation, similar to Word, Excel and PowerPoint. WPS Office also provides a full range of features to edit documents, slide out or create a spreadsheet. However, using WPS Office is sometimes a bit uncomfortable because WPS Office ads appear in the lower right corner of the screen. Although the ads were turned off, they still reappear. If so, please follow the following article of Network Administrator to completely disable ads on WPS Office.

How to disable ads on WPS Office

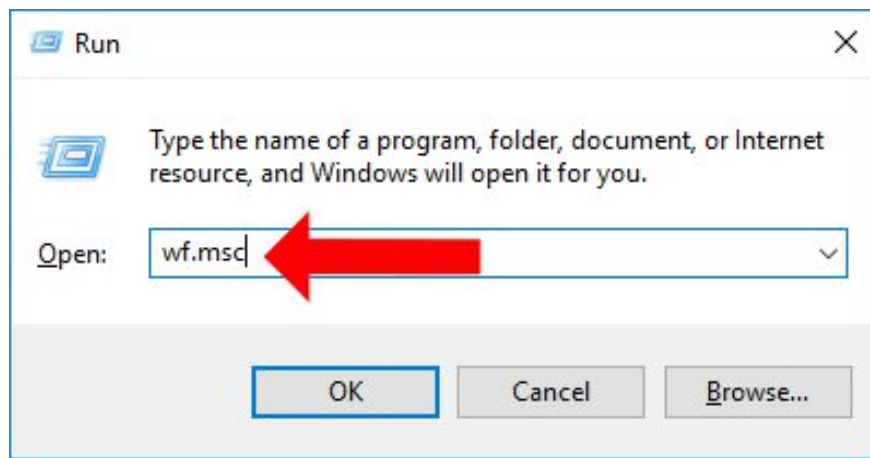

1. Download WPS Office Free software

We will have 2 ways to turn off advertising on WPS Office, by turning off wpscloudsvr.exe or blocking wpscenter.exe.

Method 1: Turn off wpscloudsvr.exe

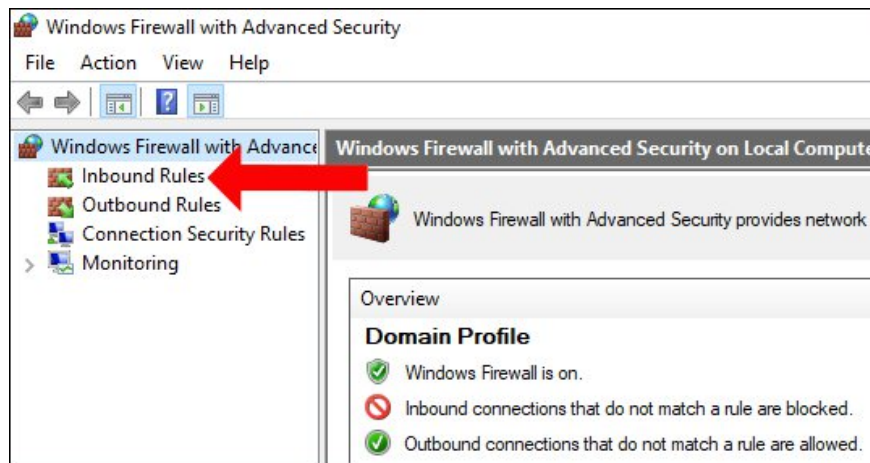

Step 1:

Press the Windows + R key combination to open the Run dialog box and then **enter the keyword wf.msc** and click OK.

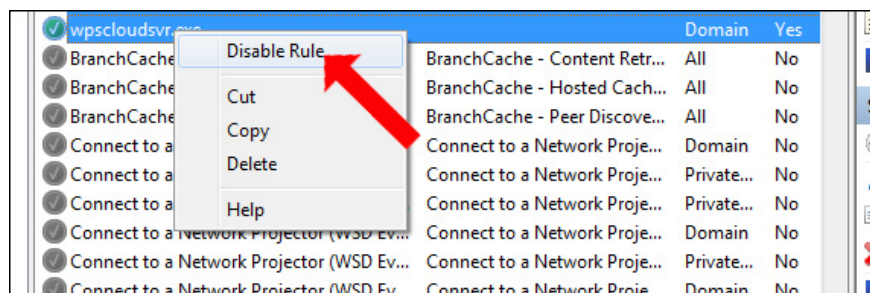

Step 2:

Appears the Windows Firewall with Advanced Security interface, find the **Inbound Rules** section .

Step 3:

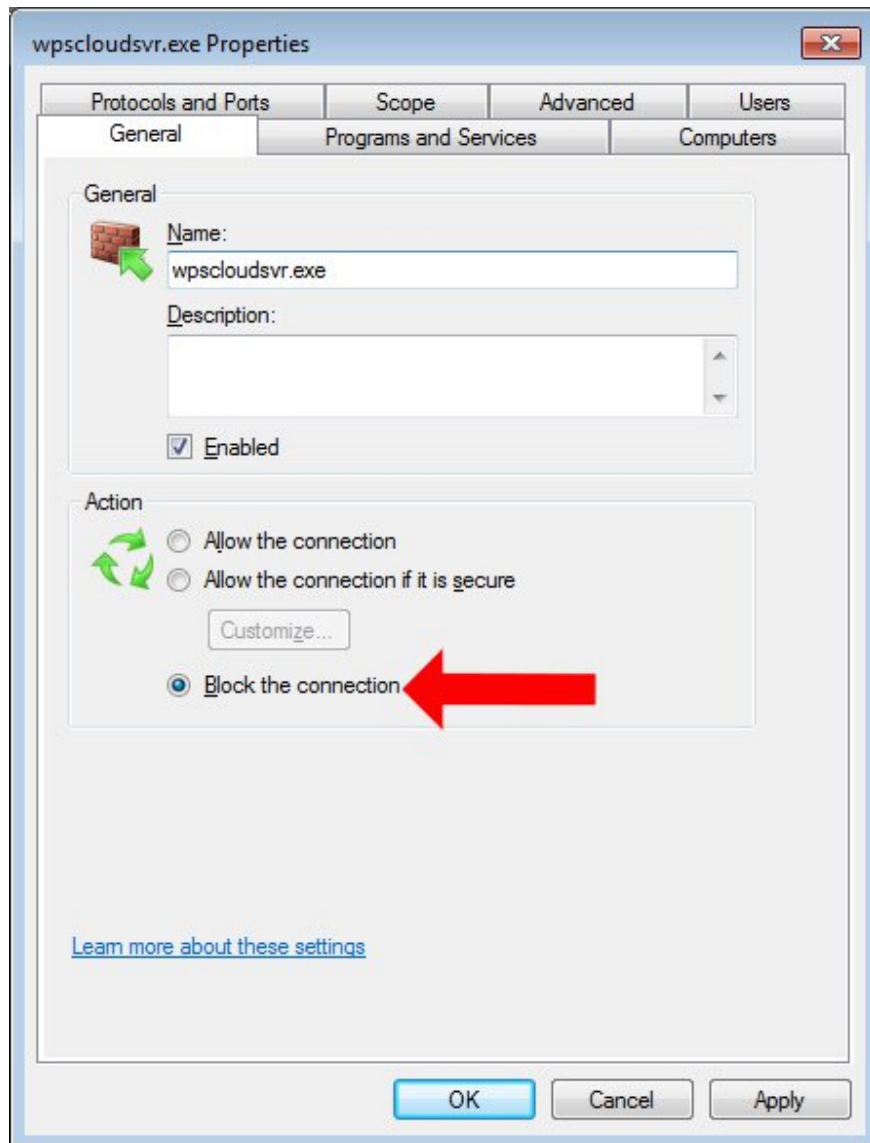

In the list that appears, find the **wpscloudsvr.exe** file , right-click the file and select **Disable Rule** .

Step 4:

Continue right-click on the file and **select Properties** . Switch to the new interface, at the **General tab**, select Block the connection. Click **Apply** and OK to save this change.

So you blocked ads when you opened WPS Office.

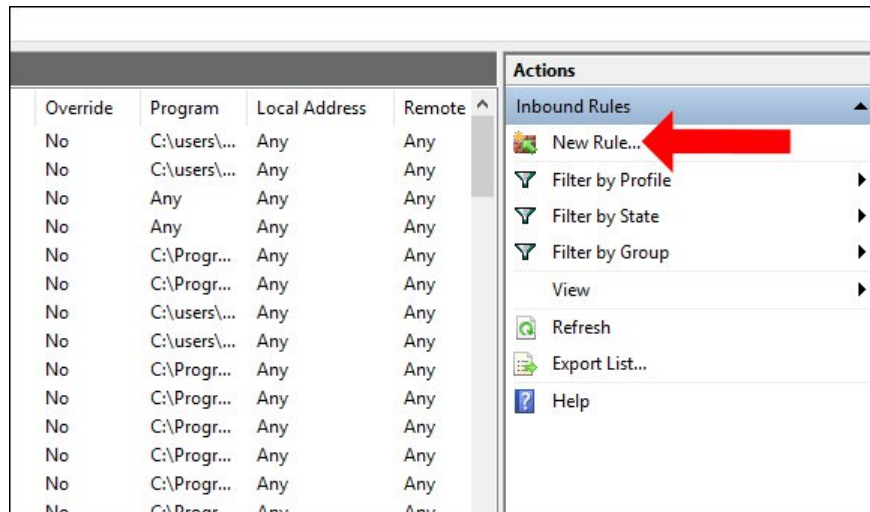

Method 2: Block wpscenter.exe

If you do turn off wpscloudsvr.exe and the ad still appears on WPS Office, it can be combined with wpscenter.exe blocking.

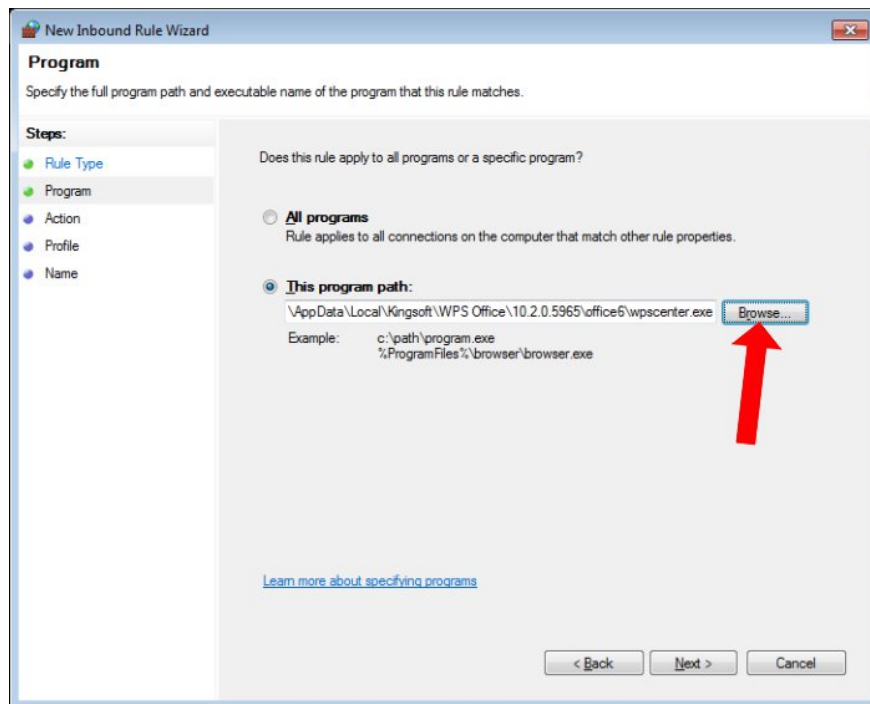

Step 1:

You also open the Windows Firewall with Advanced Security interface, then select the **New Rule** right corner of the screen.

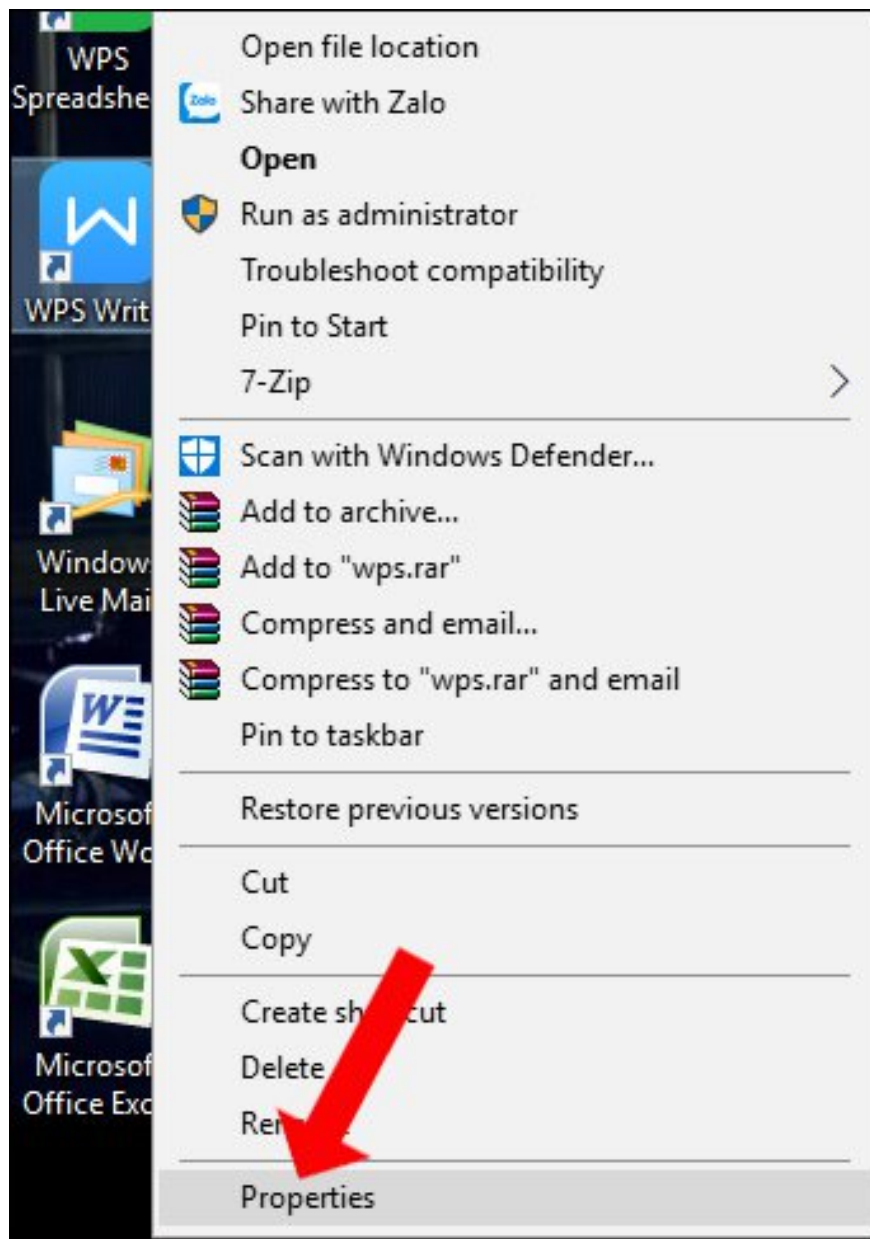

Step 2:

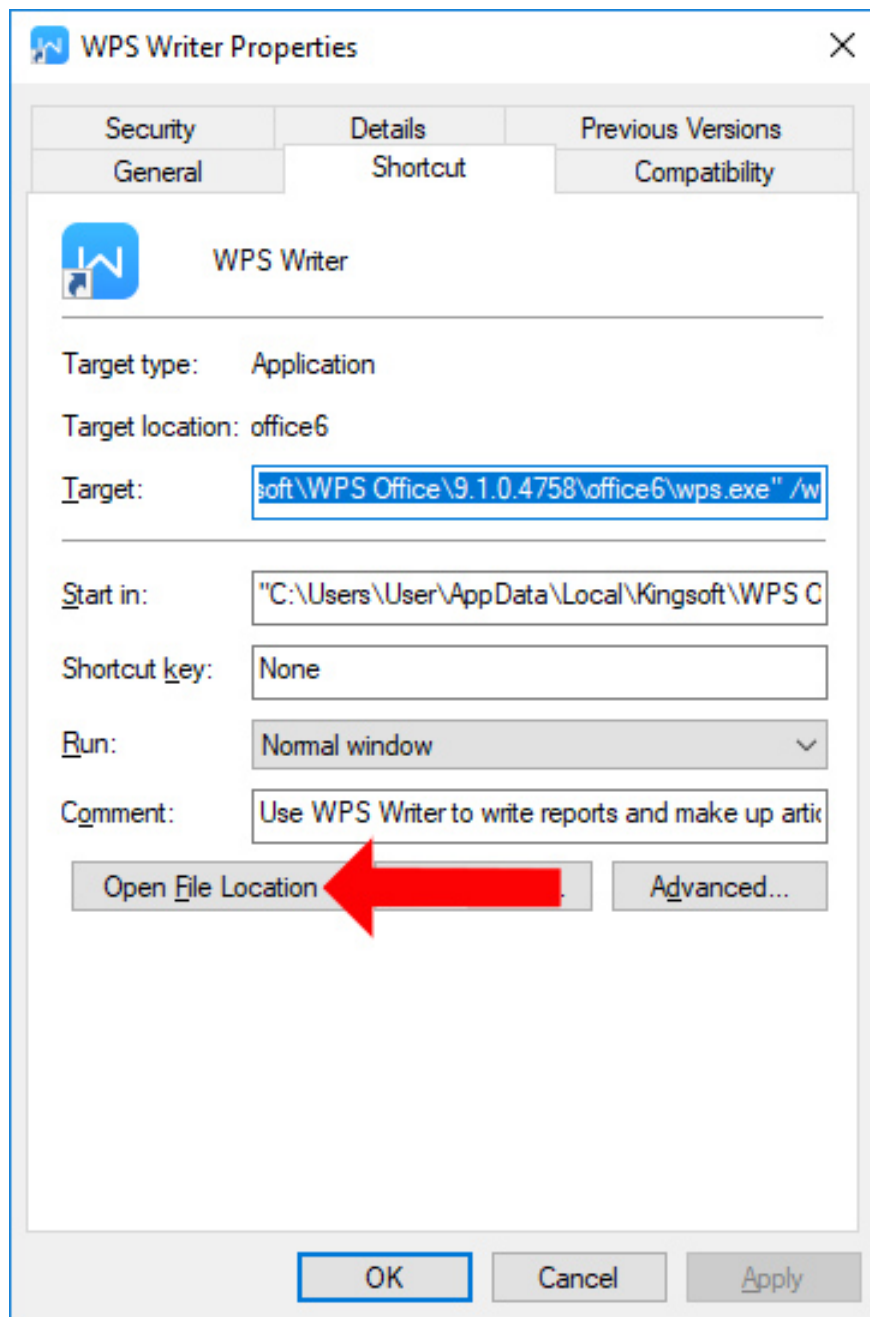

A New Inbound Rule Wizard window appears. On the Program tab, click **Browse** and select **the path to the WPS folder** , then select the **wpscenter.exe** file .

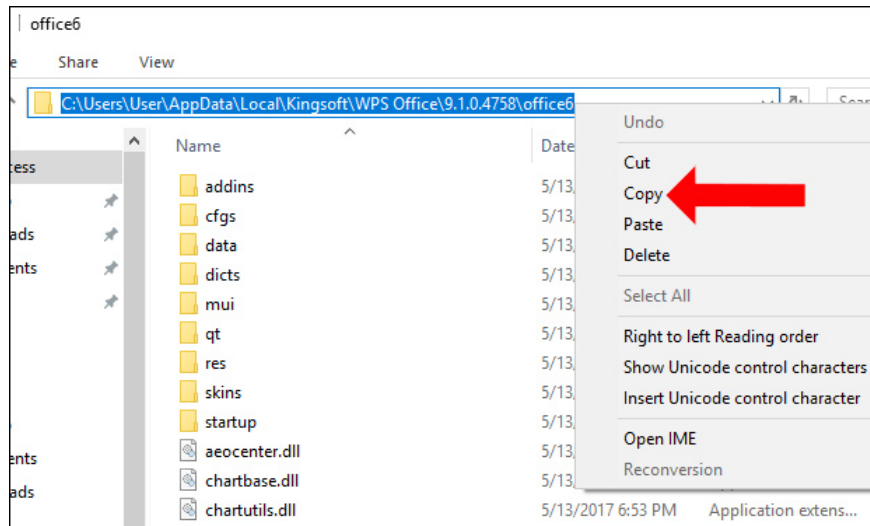

In case the user cannot find the folder, you can return to the screen, right-click the **WPS Writer** icon or any WPS Office tool and select **Properties** .

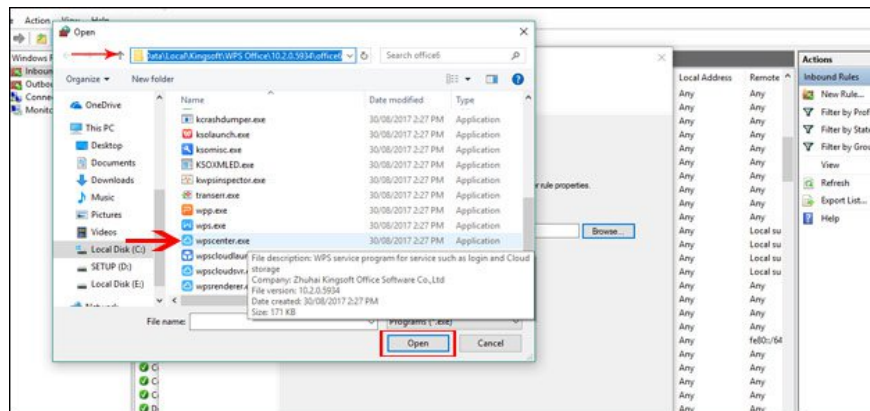

A new interface appears, at the Shortcut tab you select **Open File Location** .

When you open the folder on your computer, click on **the folder path** and click copy the link.

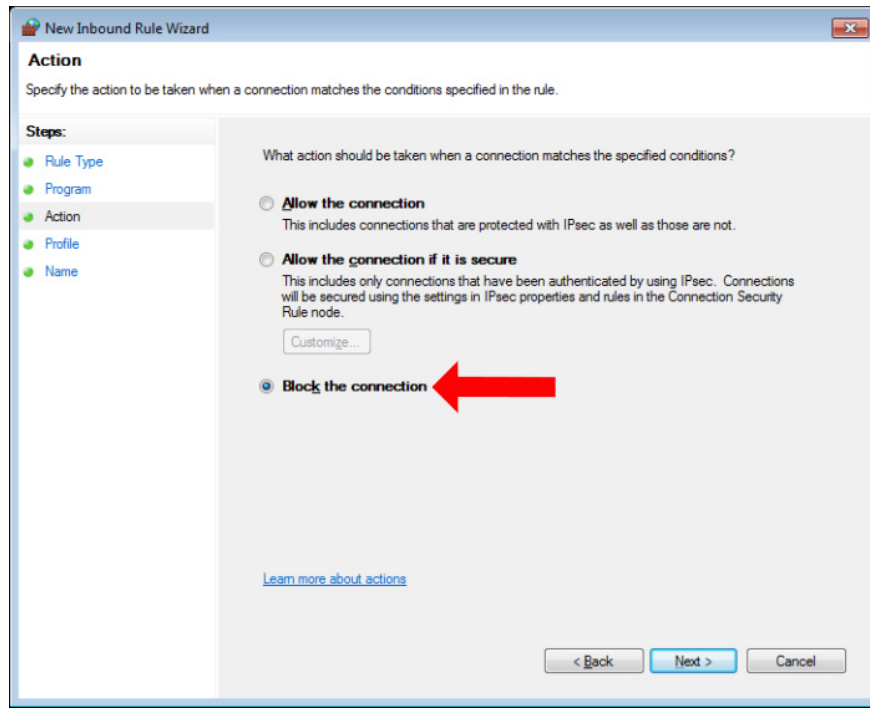

Back in the New Inbound Rule Wizard interface, the Program section select **Browse** and paste the previously copied WPS folder link into the address frame and press Enter. Appears folders to select the **wpscenter.exe** file and click **Next** .

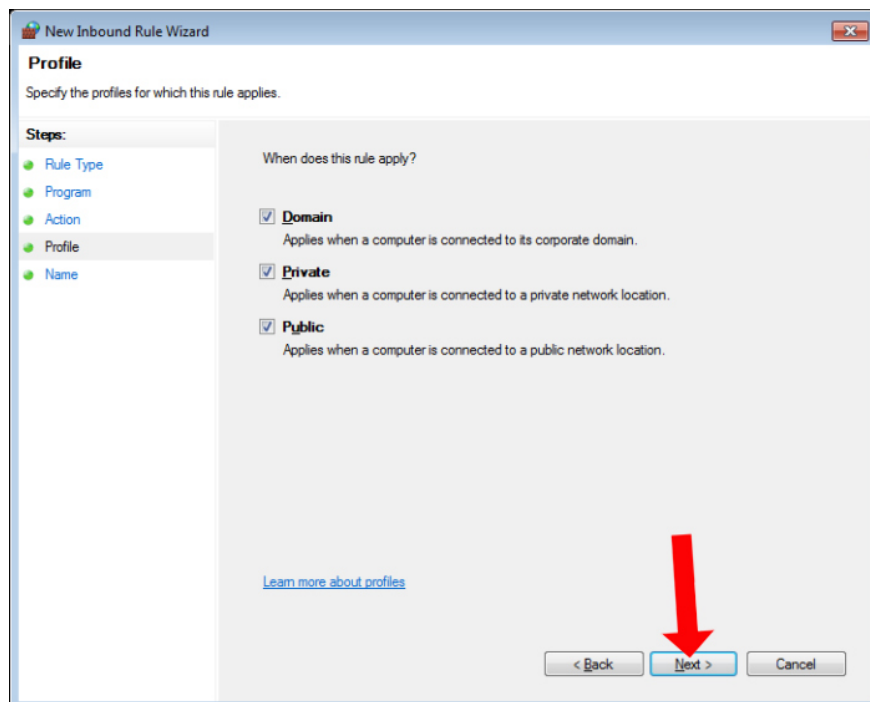

Step 3:

Switch to **Action** , select **Block the connection** and click Next.

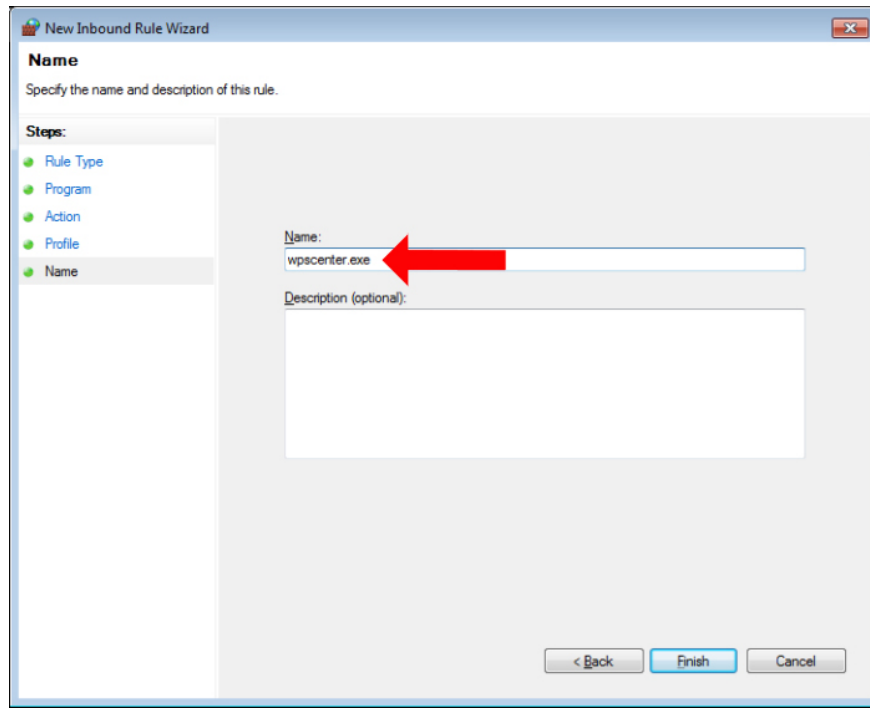

Step 4:

Continue to click on **Profile** section, then user selects all 3 options Domain, Private, Public and then click Next to continue.

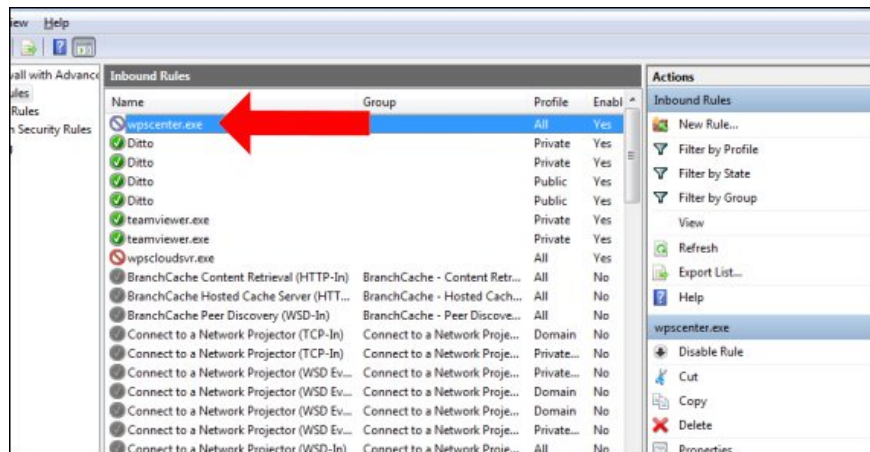

Step 5:

Finally, go to Name, at **the Name bar**, enter **wpscenter.exe** and click Finish to finish.

Finally, when you return to the Windows Firewall with Advanced Security interface, you will see that wpscenter.exe is blocked as shown below.

In this way, you will no longer worry when using WPS Office to encounter an advertisement status. If you do method 1, but the ad status appears, you should combine way 2 to completely disable ads on WPS Office.
