How to block ads when surfing the web

1. Block ads on the browser with extension
 1. 1. Block ads on Google Chrome
 2. 2. Block ads on Firefox
 3. 3. Block ads on Microsoft Edge
 4. 4. Block ads on Safari
 5. 5. Block ads on iPhone
2. Clear history, turn off browser cookies
3. Anonymous access

Block ads on the browser with extension

1. Block ads on Google Chrome

You install **Adblock for Chrome** by clicking **Add To Chrome**:

1. Link to download Adblock Plus for Chrome browser.

In addition to blocking normal ads, Adblock also blocks some other things like **malware** , **removing buttons of Social media** or **Disable tracking** . However, if you don't like to block them, you can press **Off**.

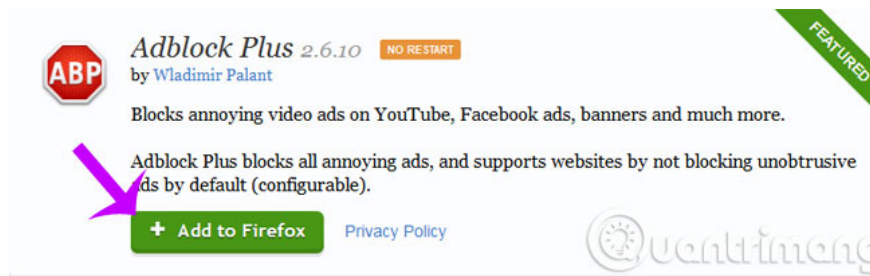

After adding successfully, Adblock will automatically remove all ads, pop-ups that are available on the website you visit without complicated tweaking.

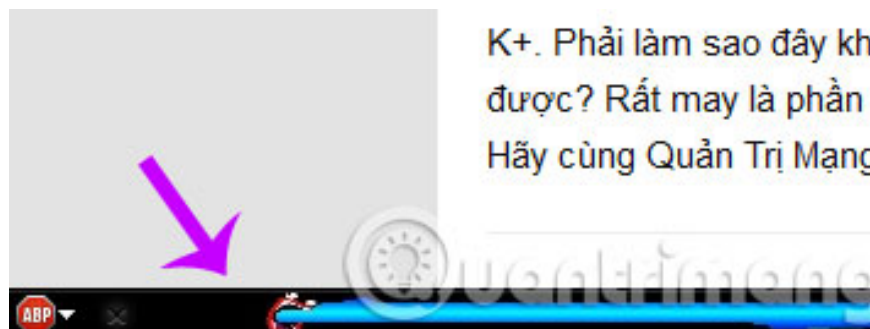

2. Block ads on Firefox

Similar to Chrome, you also install **Adblock for Firefox**, click **Add to Firefox**:

1. Link to download Adblock Plus for Firefox.

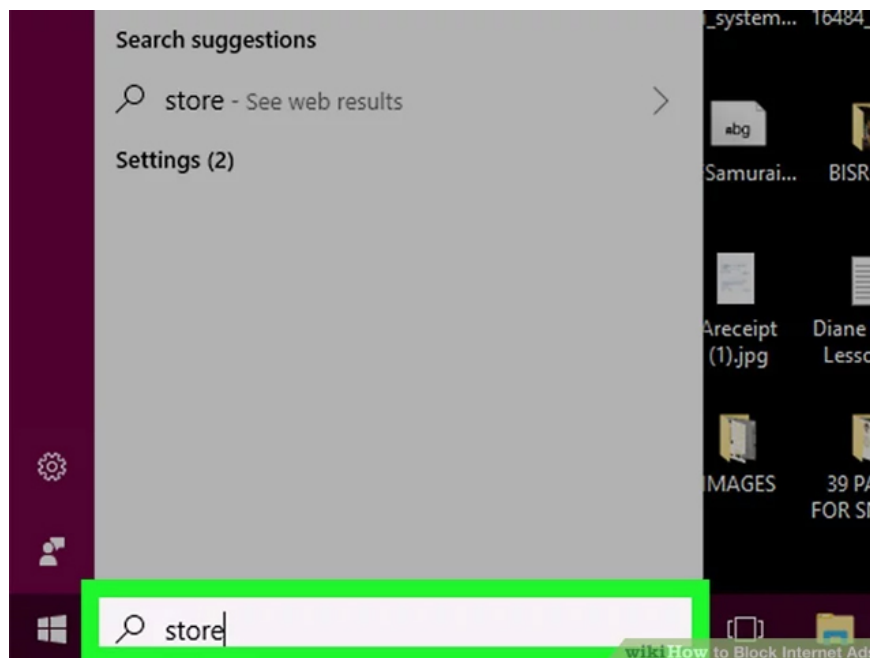

When the installation is completed, you turn off Firefox and reboot, the footer will appear AdBlock icon

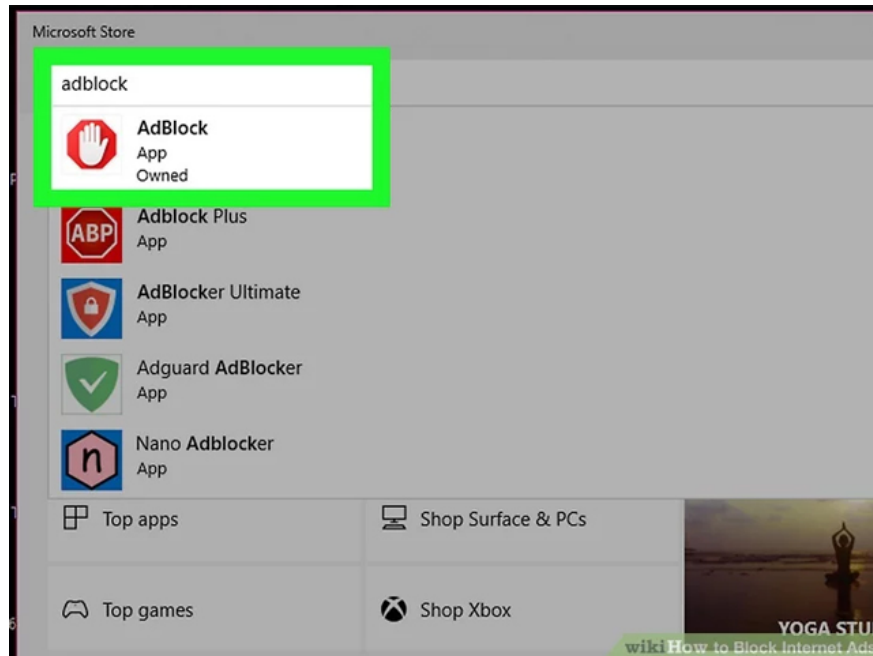

From now on, AdBlock Plus will automatically detect pop-ups and conduct blocking.

3. Block ads on Microsoft Edge

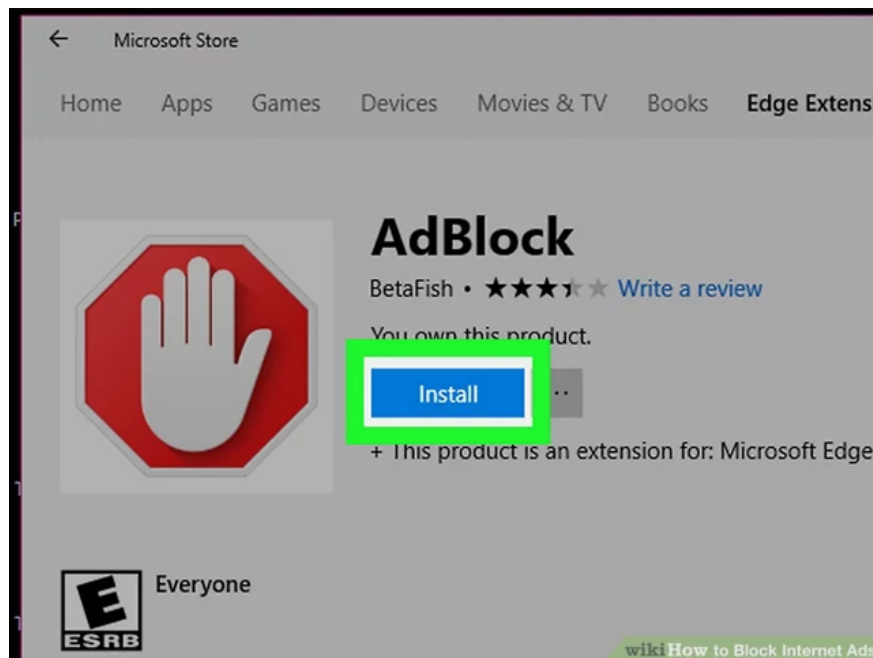

Click on the Windows icon in the lower left corner of the screen to open Start, then type **store** to search the Store application.

Click **Store** , it looks like a bag at the top of the Start window to open it. Search for AdBlock extension by clicking on the search bar at the top right of the window, then typing **adblock** .

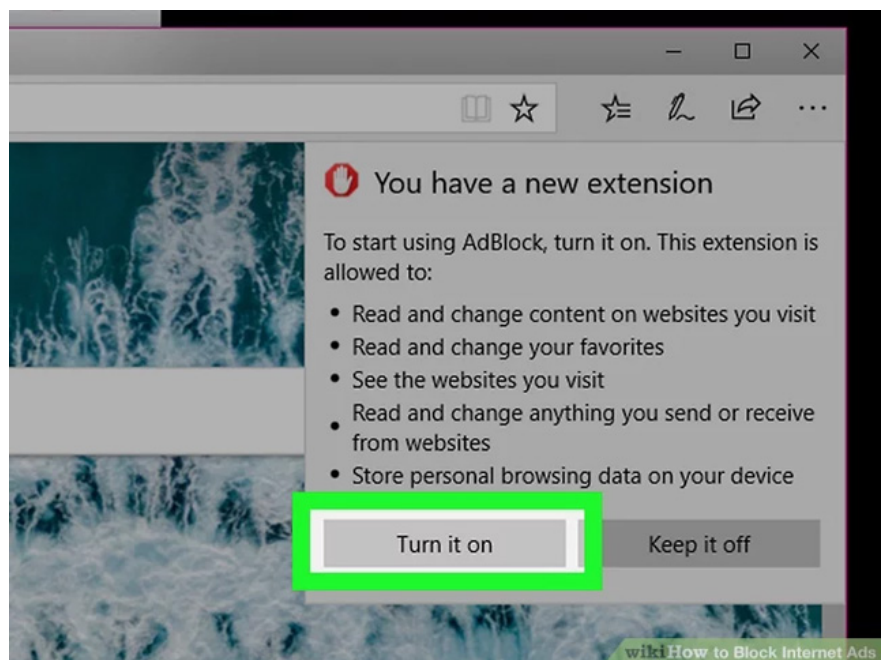

Click **AdBlock** , it has a stop icon with hands on it to open the AdBlock page. Click the **Get** button to download the application to your computer. If you've already downloaded Adblock, this button will be **Install** .

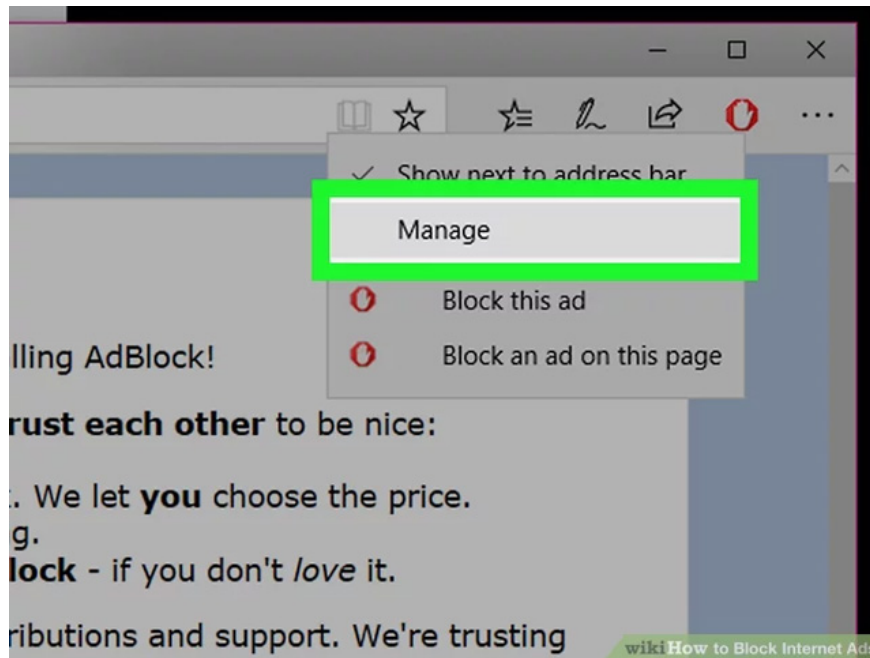

Click the **Launch** button (this button appears instead of the **Get** button when AdBlock finishes loading).

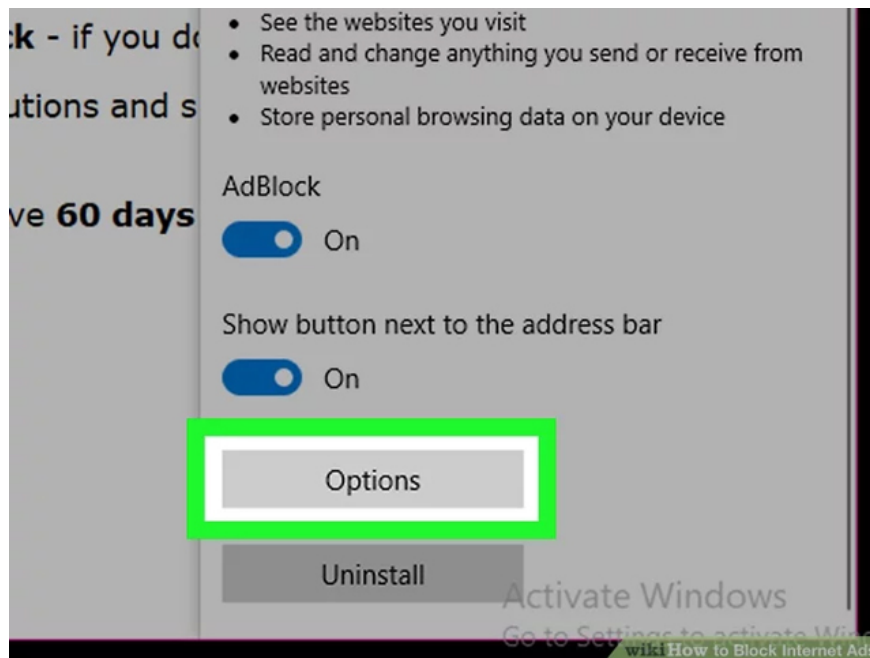

Select Microsoft Edge when the window pops up, then click **OK** at the bottom of the window. If Microsoft Edge opens without notice, skip this step. Then click **Turn it on** when prompted.

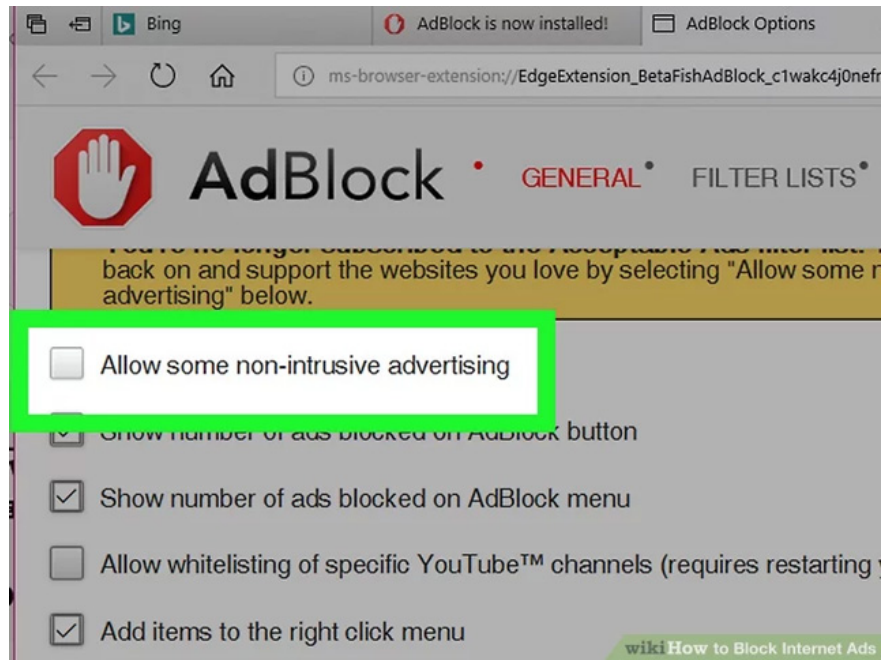

Right-click the Adlock icon on the upper right of the Edge window to open the drop-down menu. Click **Manage** in the drop-down menu to open the AdBlock add-on page.

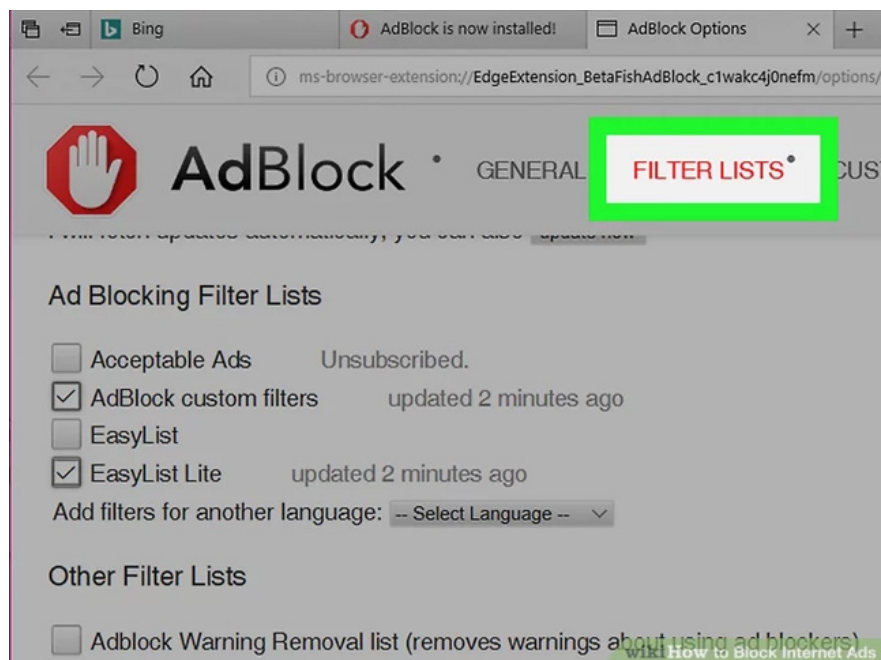

Click **Options** to open the Adblock Options page.

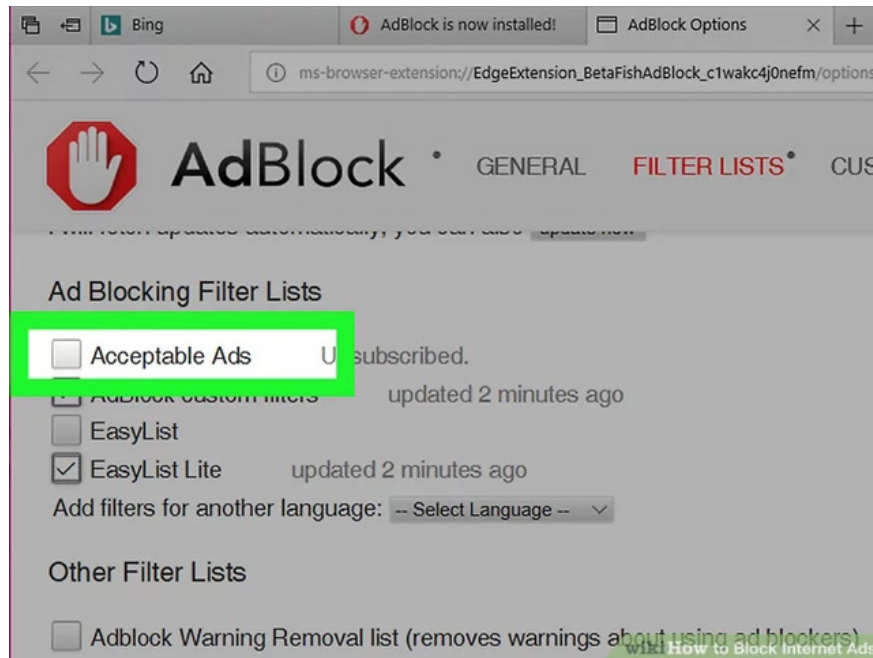

Uncheck " **Allow some non-intrusive advertising** " to remove ads from Adblock's whitelist.

Click the **FILTER LISTS** tab at the top of the page.

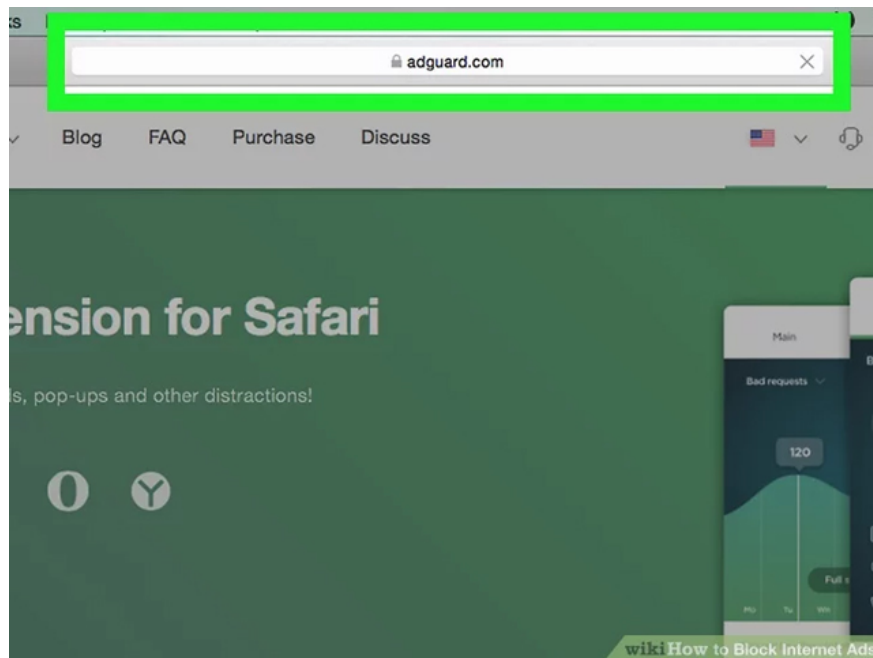

Uncheck " **Acceptable Ads** ". Depending on the version of AdBlock you use, this option may have been unchecked. You can choose some other options in Filter Lists but choosing too many options is not effective, otherwise slowing down the browsing speed.

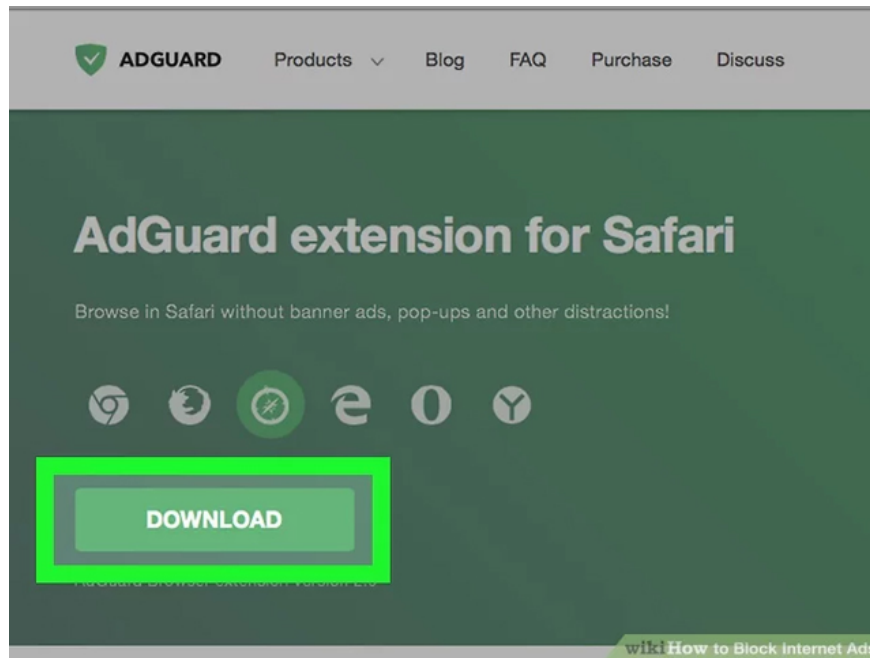

4. Block ads on Safari

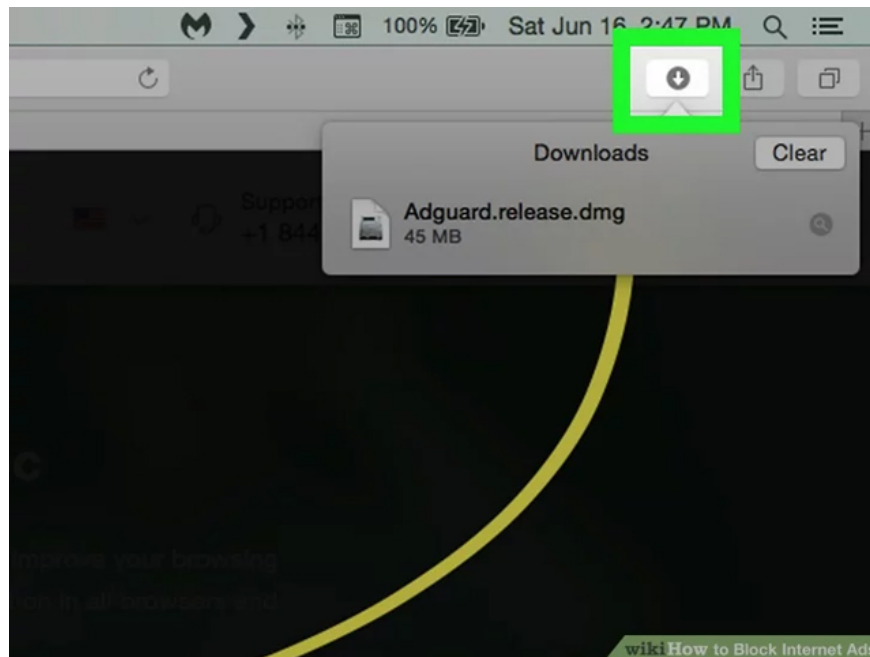

Open Safari, access the AdGuard extension page. Although AdGuard is a paid service, its browser extension is free to use on Safari.

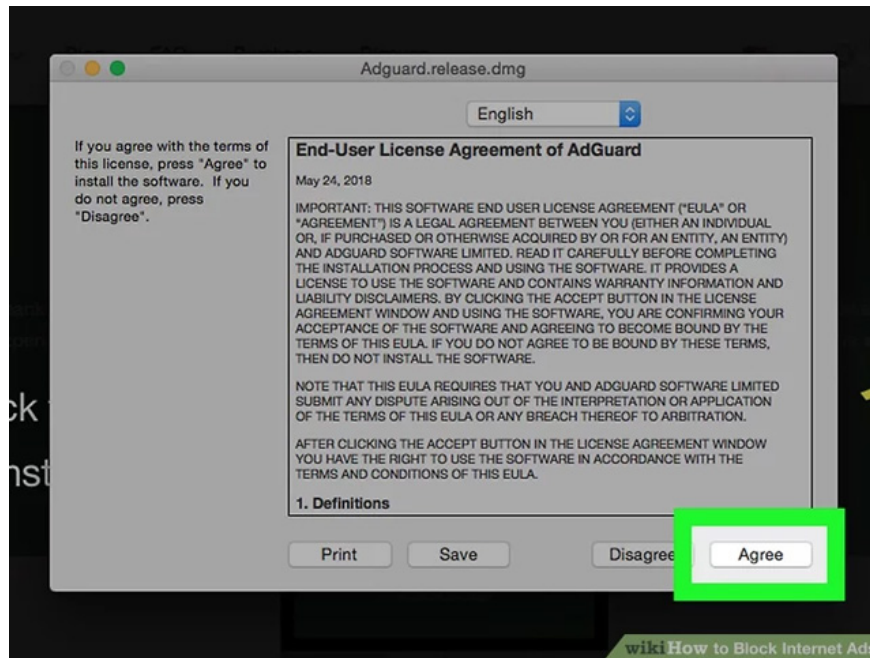

Click **DOWNLOAD** in the upper left corner of the browser window to start downloading the extension to your Mac.

Click the Download icon arrow in the upper right corner of the Safari page, then double-click the extension name.

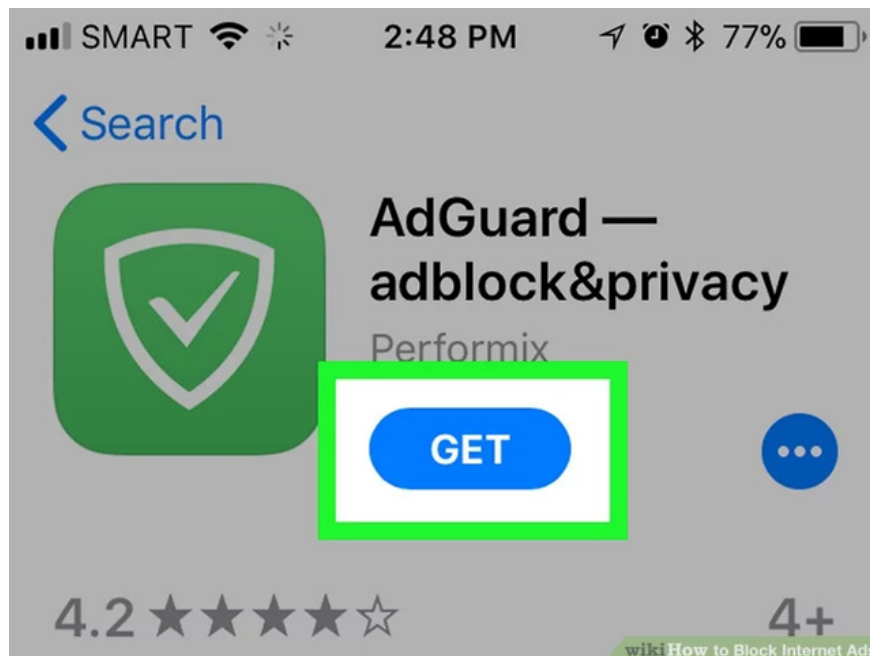

Select **Agree** to accept the agreement to install this extension.

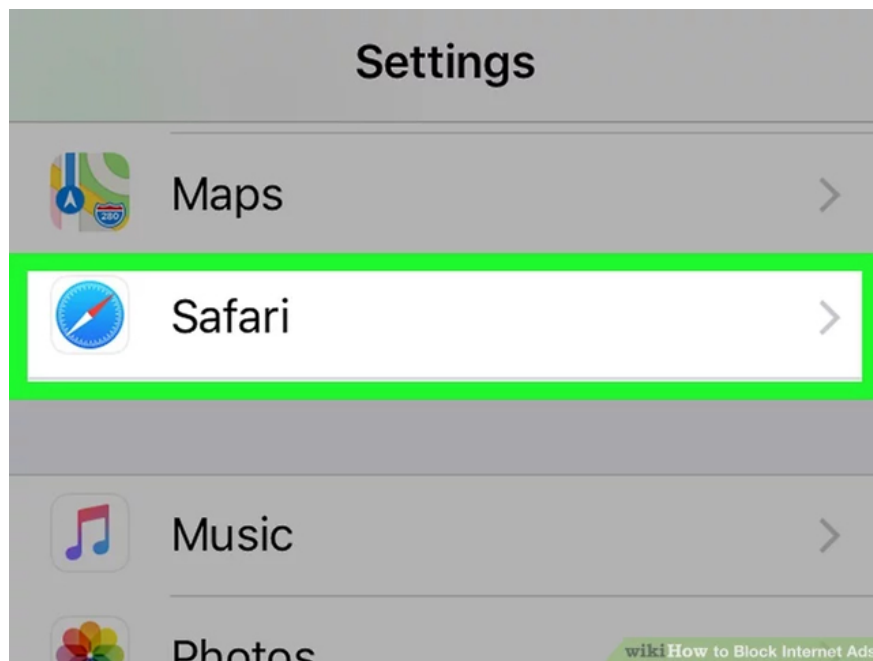

Wait for AdGuard to install in Safari. You need to make some instructions on the screen to install. When AdGuard is installed, you do not need to change any settings at all. But if you want to change AdGuard settings, click **Safari**> **Preference**> **Extensions** and click on **AdGuard** on the left hand of the page, then edit the settings on the main page.

5. Block ads on iPhone

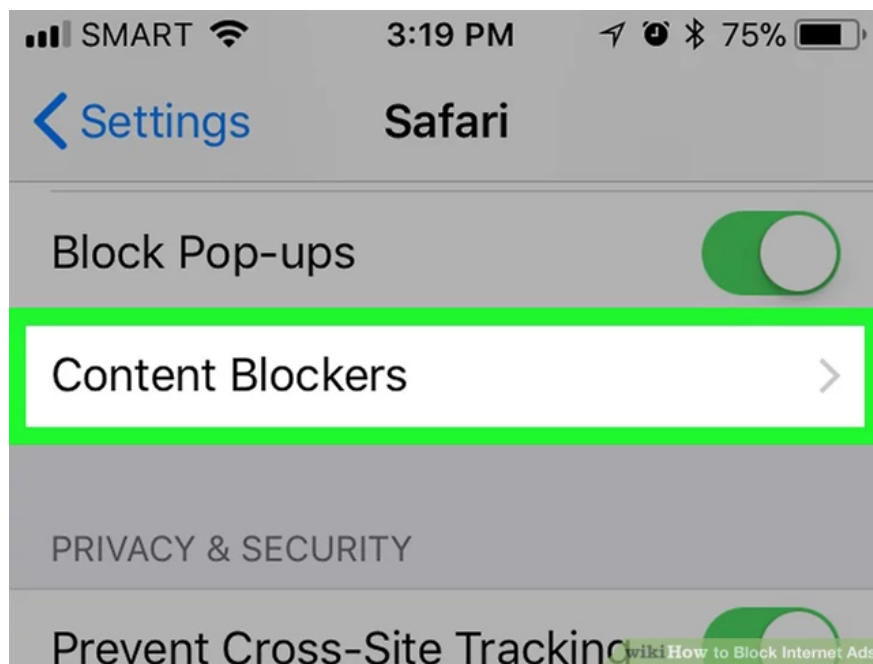

Open the App Store and search for AdGuard and touch **Get** to download to your phone.

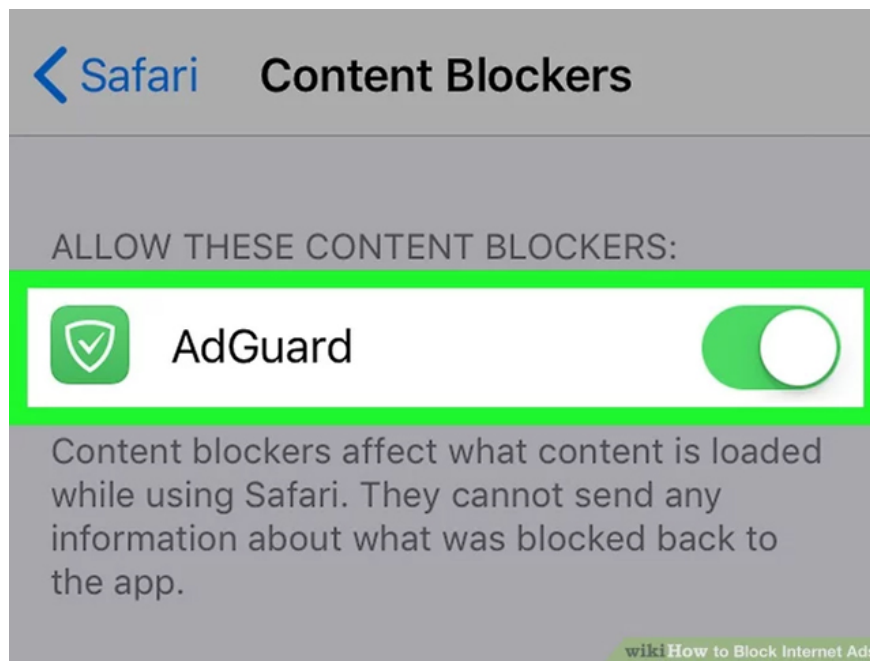

Open the **Settings** app, scroll down and touch **Safari** .

Touch **Content Blockers**.

Click on the " **AdGuard** " switch to turn green. The iPhone's Safari browser will use AdGuard's filter to hide ads when you browse the web.

Clear history, turn off browser cookies

Delete any trace that shows your previous searches like history, browsing data, cache and cookies. Next, disable or limit widget tracking, including favorite services like Facebook. Also, make sure you delete the third-party advertising cookies. Then, take some time and check your browser with the online privacy and security tester.

2. View and delete browsing history in Microsoft Edge browser

Anonymous access

Most popular browsers like Chrome, Edge, Firefox, Internet Explorer, Safari and Opera have private or anonymous browsing features. Enabling this feature means your browser will ignore cookies, including ad tracking cookies. Your computer will not record your browsing history, almost like you have never online.

When your browser is in private browsing mode, it displays a special icon. In Firefox, it's a mask; in Chrome, it's a little spy; and in Edge is "InPrivate".

Although advertising causes you distractions, content creators receive revenue from it to provide you with free online content. So if you see some ads you are contributing to content developers to continue to provide meaningful, interesting content for readers.
