

How to block apps running on Android?

Applications running in Android are both memory-intensive and fast-consuming. Therefore to save battery and memory of your Android device, you should block these applications.

Applications running on Android are one of the reasons your Android device is getting slower and slower. Even these applications consume memory, and they consume battery power very quickly. So in order to save battery and memory and make your device work faster, you should block these applications.

1. Which applications should disable or uninstall?

Applications running in Android are both memory-intensive and fast-consuming. Therefore to save battery and memory of your Android device, you should block these applications.

To see which applications are running and how much memory your device consumes, you can enable **Developer Options** then access information under the Running Services option.

Phone memory

	System	768 MB of RAM
	Apps	547 MB of RAM
	Free	1.5 GB of RAM

App RAM usage

	Dropbox 1 process and 2 services	12 MB 10:11:17
	WhatsApp 1 process and 2 services	86 MB 10:11:49
	Perfect AppLock 1 process and 1 service	30 MB 10:11:42
	Android System 1 process and 2 services	2.1 MB 10:11:43

To see which applications are running in the background, consume a lot of your device's battery, go to **Settings** > **Battery** .

2. How to block applications running on Android?

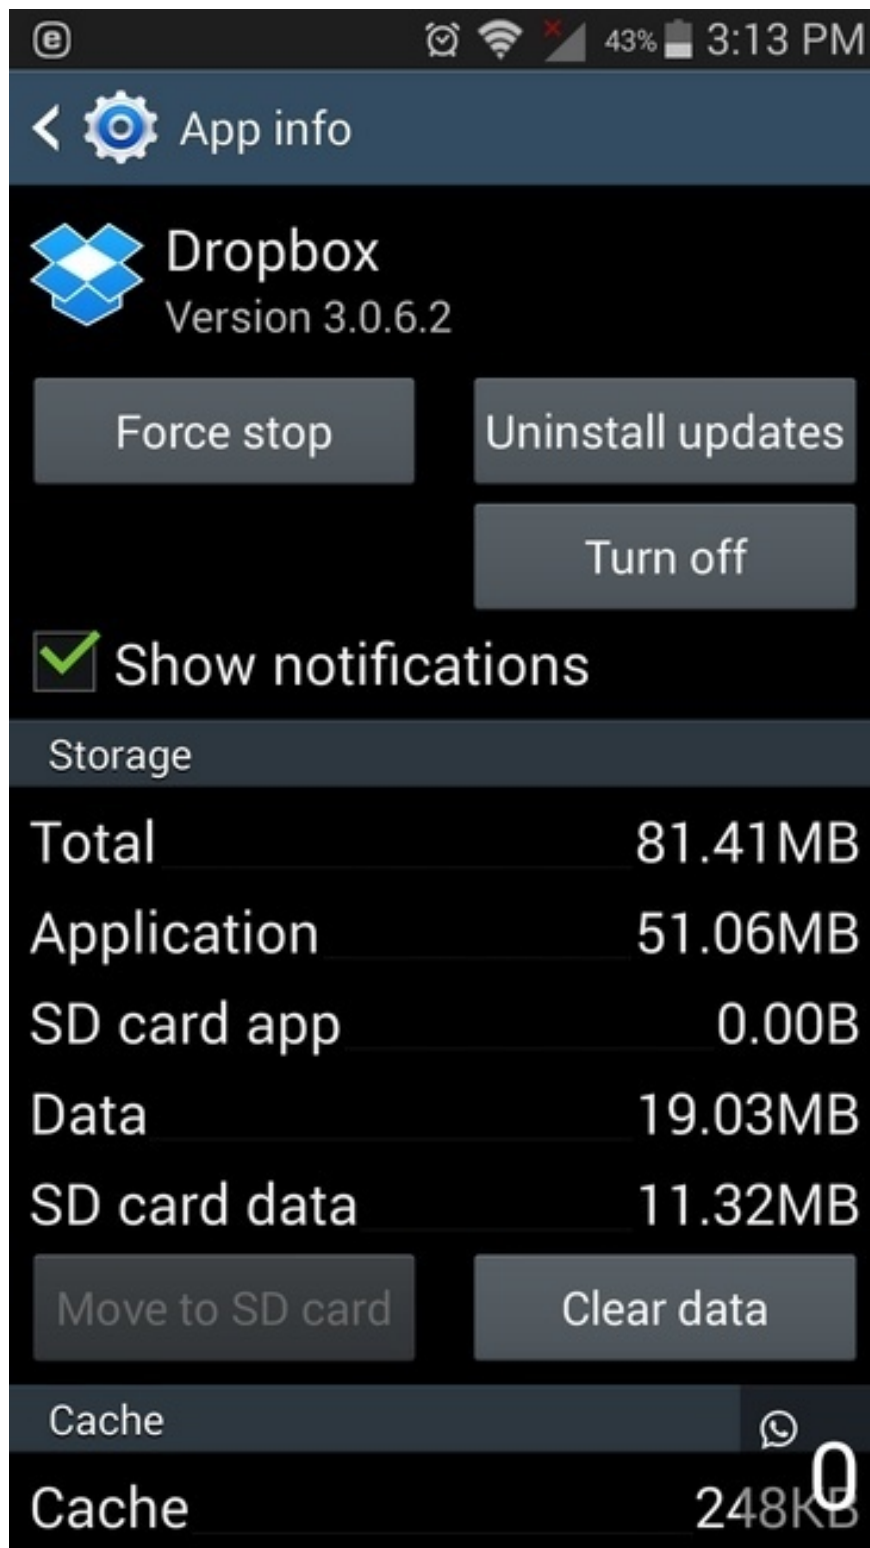

If you want to block applications running on Android, you can refer to some of the following:

Uninstall the application : Go to **Settings** > **Apps** (apps)> Select the application you want to uninstall> **Uninstall** (uninstall).

Or the simpler way is to click on the application icon and select **Uninstall** or move to the trash

If your device runs Android Lollipop, you can easily close the recent application by clicking on the **Recent Apps Navigation** button on your phone (on the right side of the Home button), then surfing left or right to Close the application you recently run.

Force Stop: You can block Android-based applications by Force Stop. Go to **Settings** > **Apps** (application)> select the application you want to block then Force stop the application.

3. Using the 3rd application

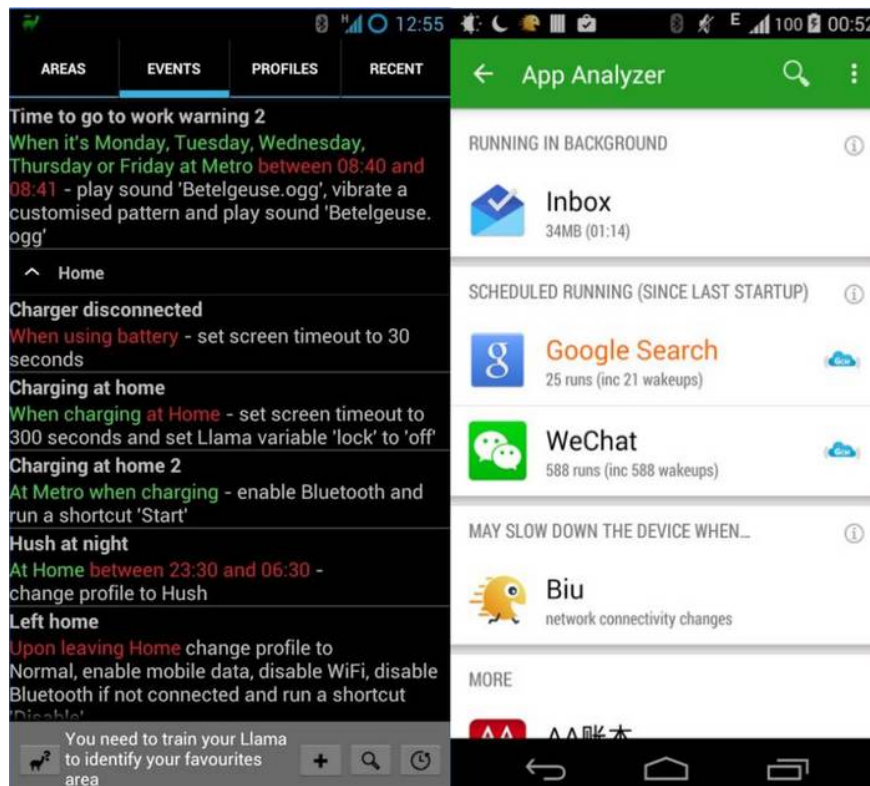

You can download and install some apps like Greenify and Llama to block Android-based apps.

Download the Greenify app to your device and install it here.

Download the Llama app to your device and install it here.

The Greenify application helps users identify and set inactive applications to a deactivated state when you are not using it.

With the Llama app when you switch to another application, you can turn off an active application that cannot be run on Android.
