

How to Block Devices on Spotify on Android

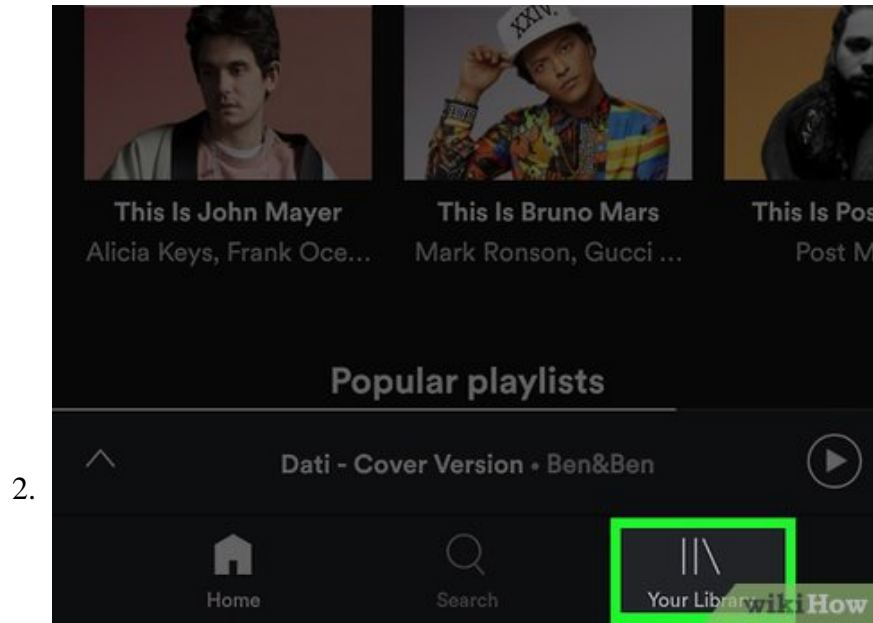

Spotify is a website and app music-streaming service that allows you to have multiple devices connected to your account so you can listen to music between your home office and living room without missing a beat. There are times, however,...

Method 1 of 2:

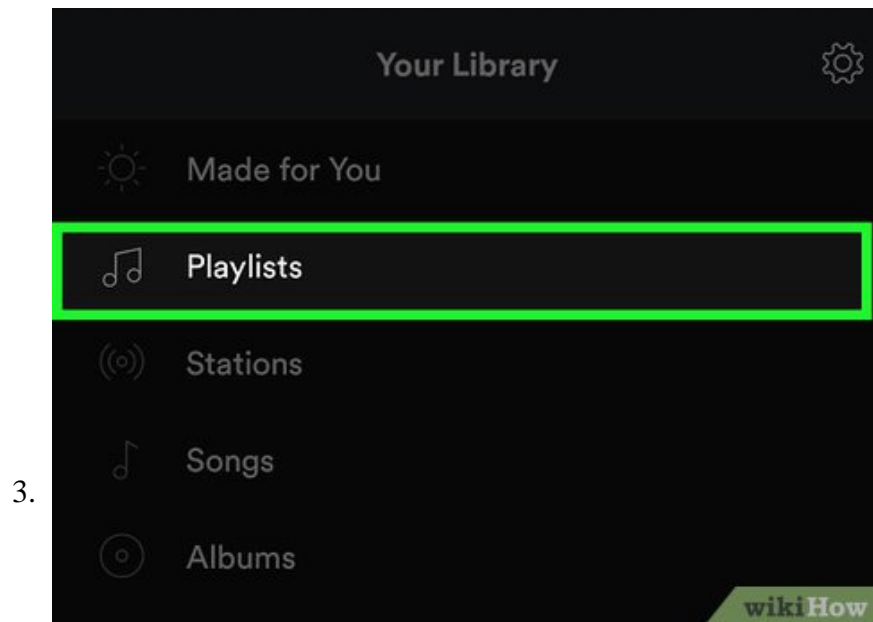

Downloading Music and Going Offline

Open the Spotify app. This looks like a green circle with three black curvy lines inside. You can find this app on either your home screen, in the app drawer, or by searching.

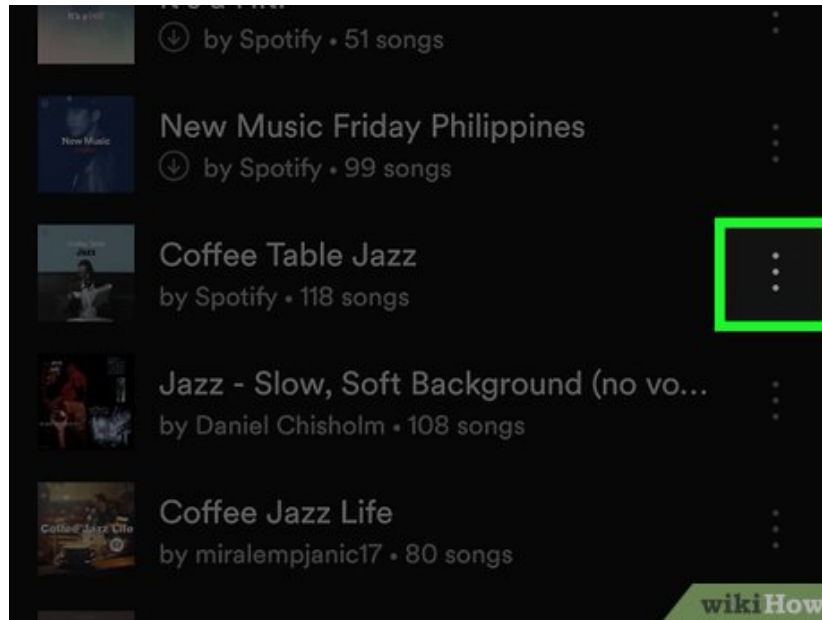

Tap **Your Library**. This is located in the lower right of your screen.

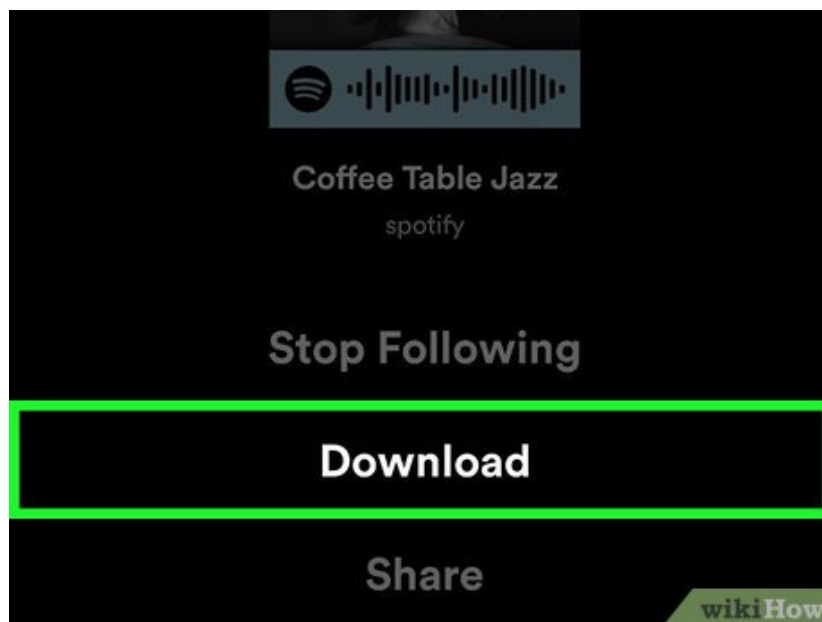

Tap **Playlists**. A new screen will load with all your playlists.

4.

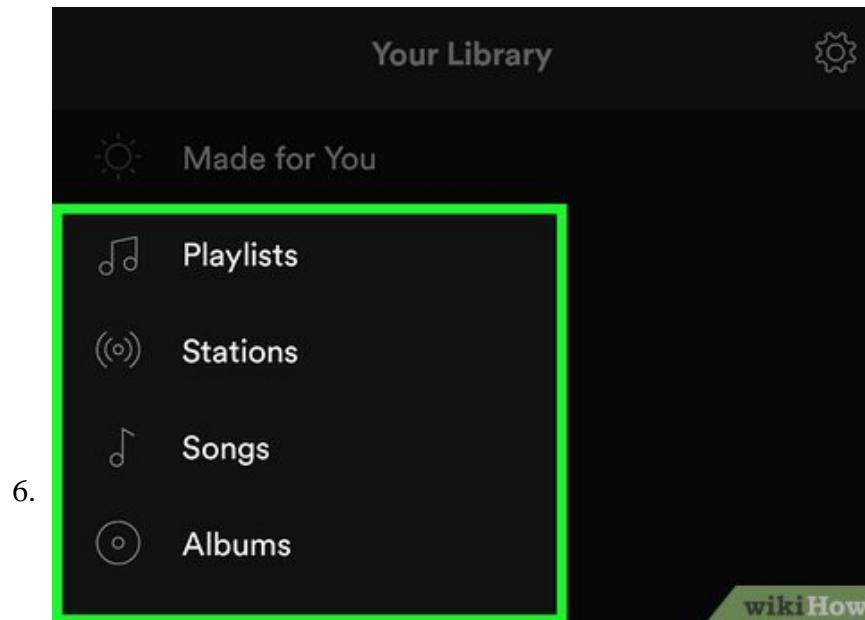

Tap **?** next to a playlist. A new page will pop up with options for that playlist, including the options to Share and add to Home Screen.

5.

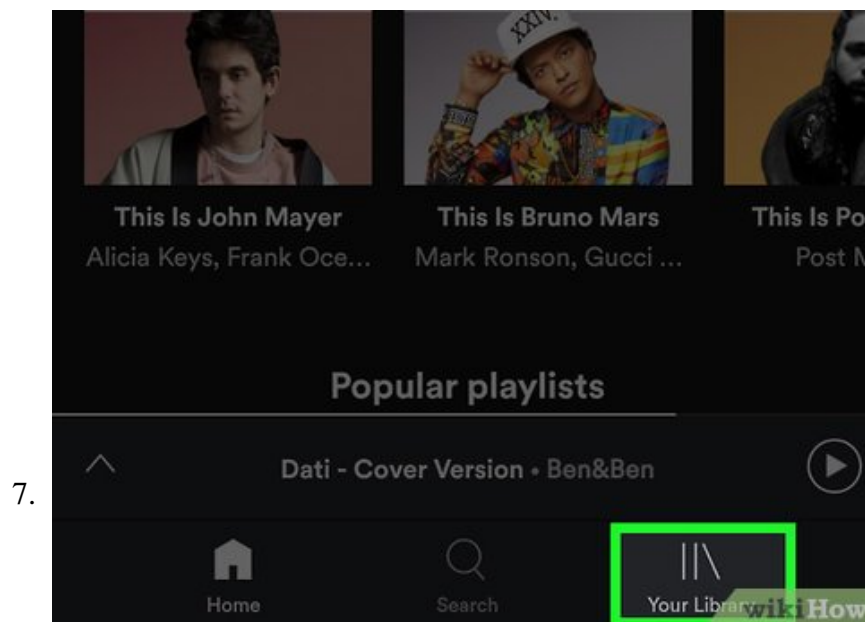

Tap **Download**.

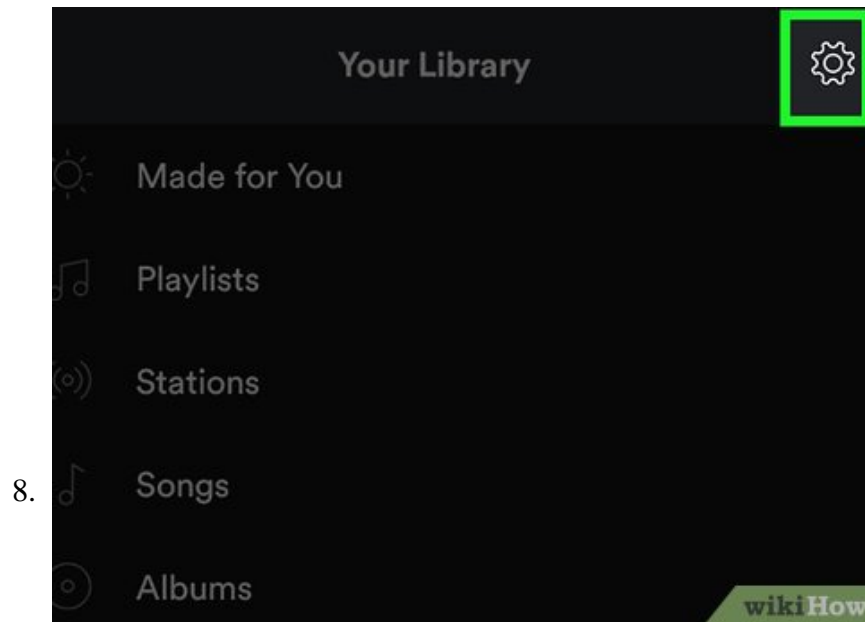

Download all of the playlists you want access to.

1. You can go through the menu of music in Your Library, including Albums, and Artists, to download.
2. You cannot download stations, individual songs, podcasts, or videos.

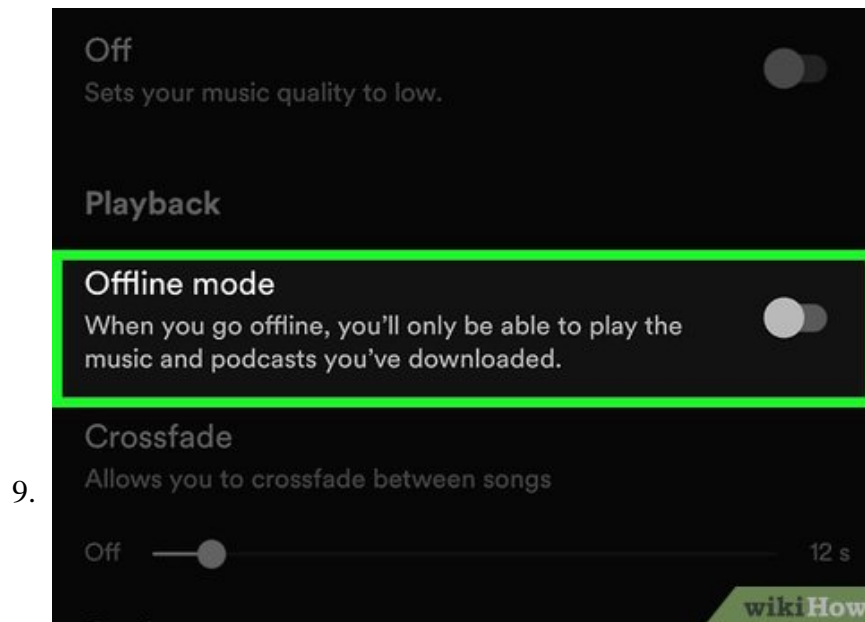

Tap **Your Library** to navigate back to the main Library page.

Tap

next to **Offline Mode**. Changing

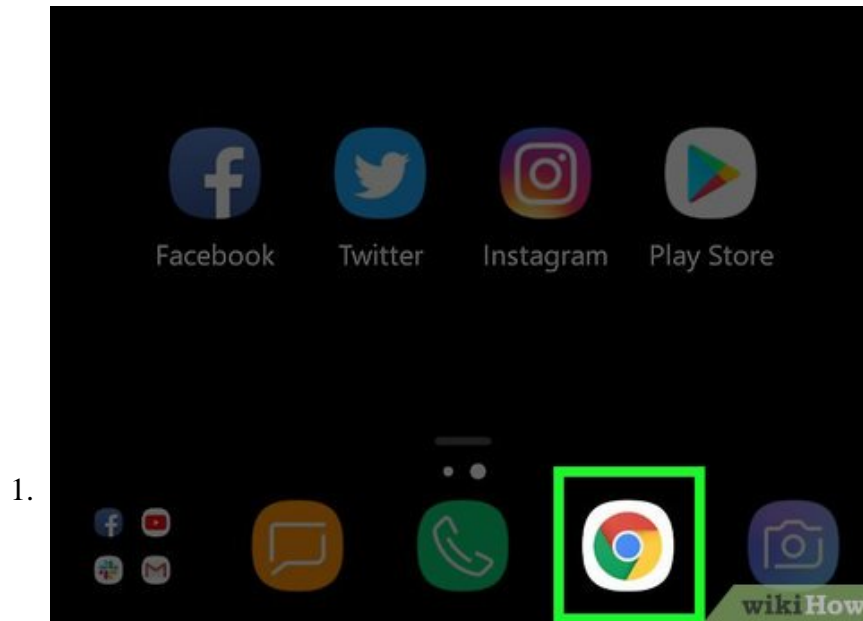

to

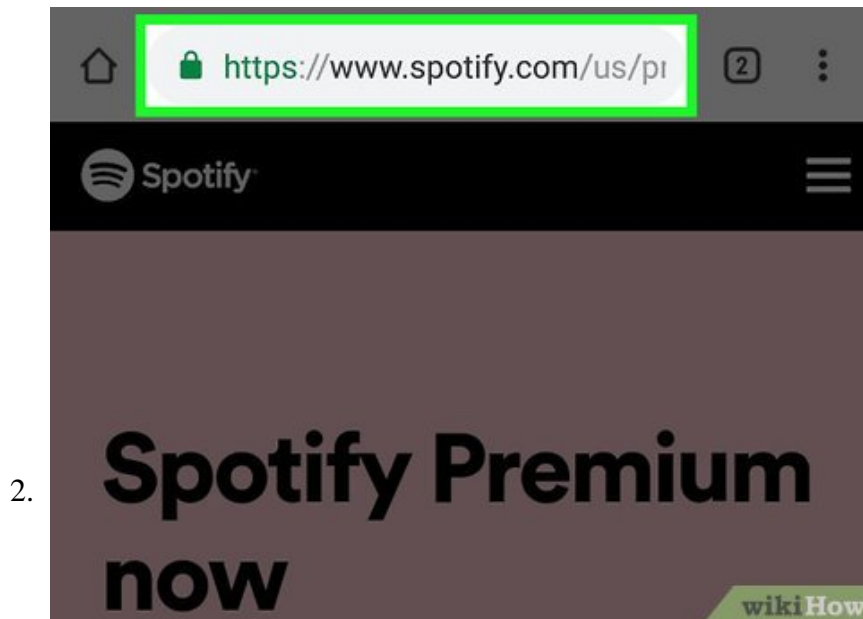

will turn on Offline Mode. This will allow only downloaded music to play on the device, preventing other devices from playing your music.

Method 2 of 2:

Removing All Devices

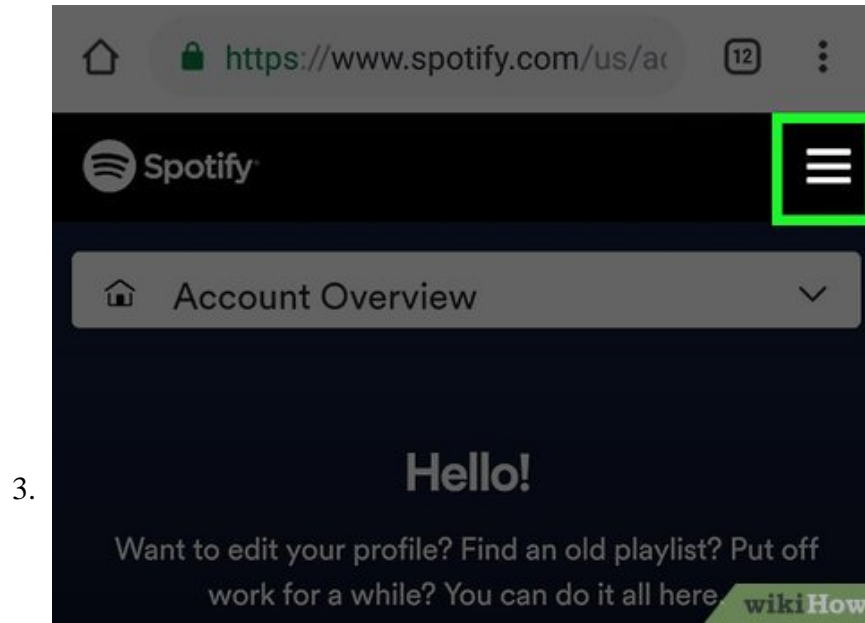

Open a web browser on your phone. Popular browsers include Firefox and Chrome.

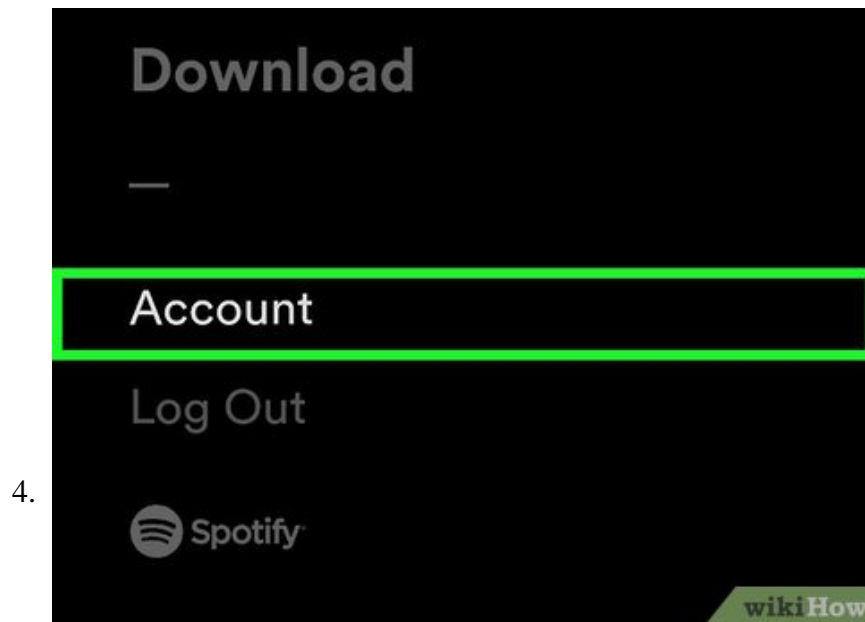

Navigate to spotify.com.

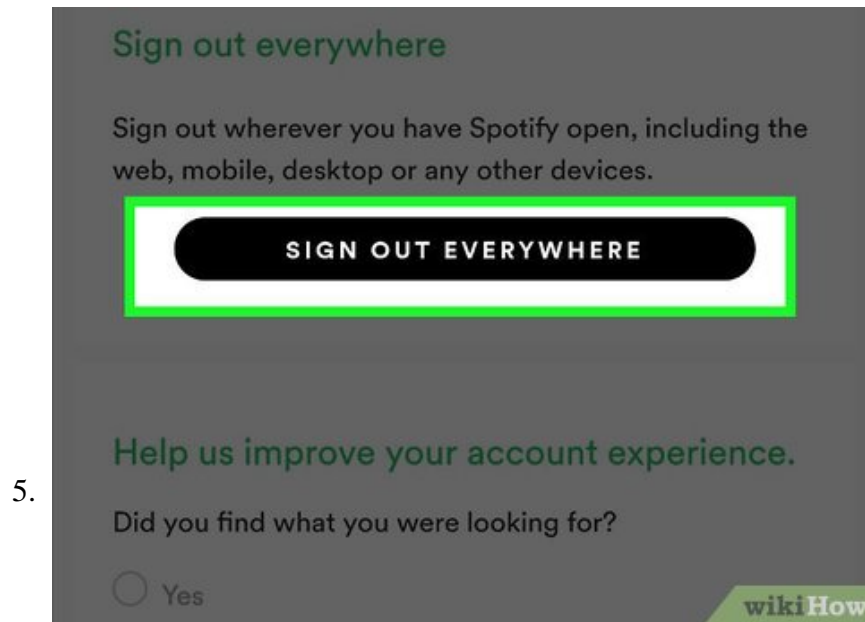

1. Log in if prompted.

Tap **?**. This is in the upper right corner of your screen. A menu will slide out from the side.

Tap **Account**. Your Account Overview will open.

Tap **Sign Out Everywhere**. All devices signed in to your Spotify account will be logged out.

1. You will have to login with your email and password or linked Facebook account on each device to access Spotify.
