

How to block Siri from showing app suggestions on iPhone

Although your information is fully encrypted and secure, Apple allows you to change the settings to manage Siri's Search and Proposal based on your needs.

Siri offers personalized recommendations for search, news, photos and other information according to your browsing history, messages, contacts and information from 3rd party applications. Virtual assistants This smart will sync information on your devices so you can quickly get relevant information. Besides, it also sends this information to Apple to help display more relevant results for iOS users. But if you are concerned about privacy, you can turn off Siri's Recommendation or prevent individual apps from showing in Search and Siri Suggestions in iOS 11 on iPhone and iPad. .

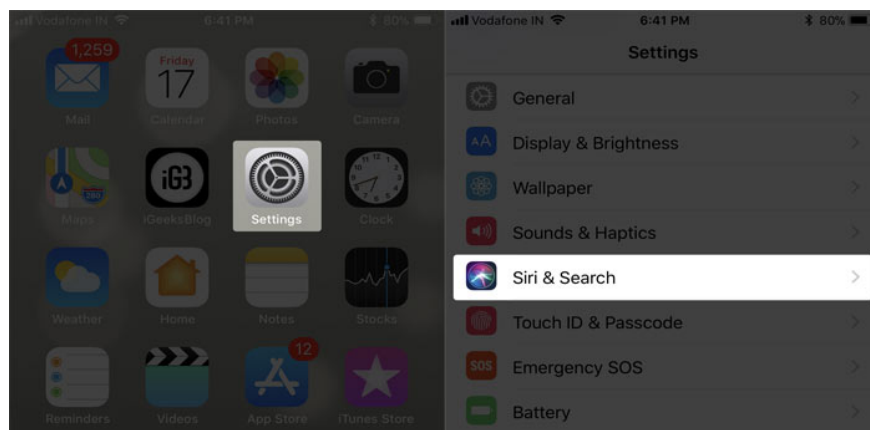

1. Turn off these annoying features immediately on iOS 10
2. How to activate Hey Siri on macOS Sierra

Although your information is fully encrypted and secure, Apple still lets you change the settings to manage Search and Siri Suggestions based on your needs.

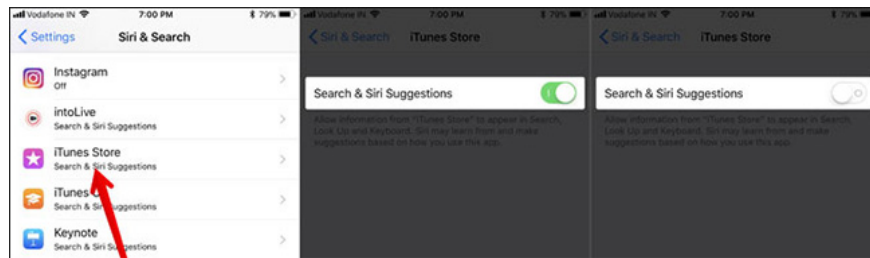

How to block an app from appearing in Siri's Proposal

As mentioned above, you will be able to prevent individual applications from showing up in search results and suggestions. When you disable any application, its information will not appear in Search, Search, and Keyboard, etc.

Step 1. Go to Settings ? Siri & Search.

Step 2. Now, find the application you do not want to show in search suggestions and Siri. And then touch the off button

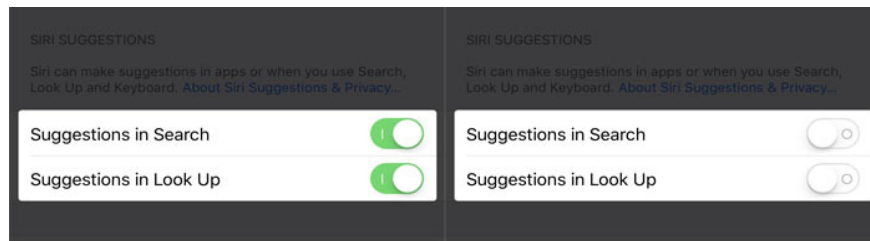

How to turn off Siri's proposal

If you don't want to use the Siri suggestion anymore, you can disable it with the steps below.

Step 1. Go to Settings ? Siri & Search.

Step 2. Touch the shortcut button next to Suggestions in Search and Suggestions in Look Up

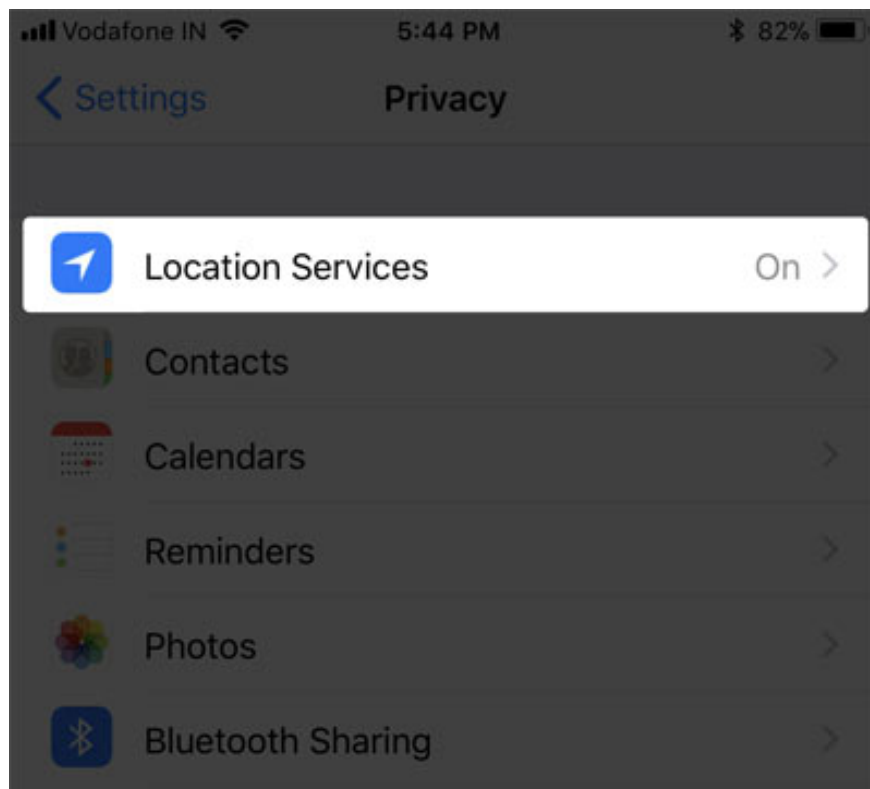

Once completed, Siri will not provide suggestions when you search for everything. Besides, your data will not be sent to Apple.

However, Siri will continue to display applications installed on your device in search. It only prevents virtual assistants from learning your interests and sending data to Apple. If you do not want applications to appear in the search results, turn them off using the instructions mentioned above.

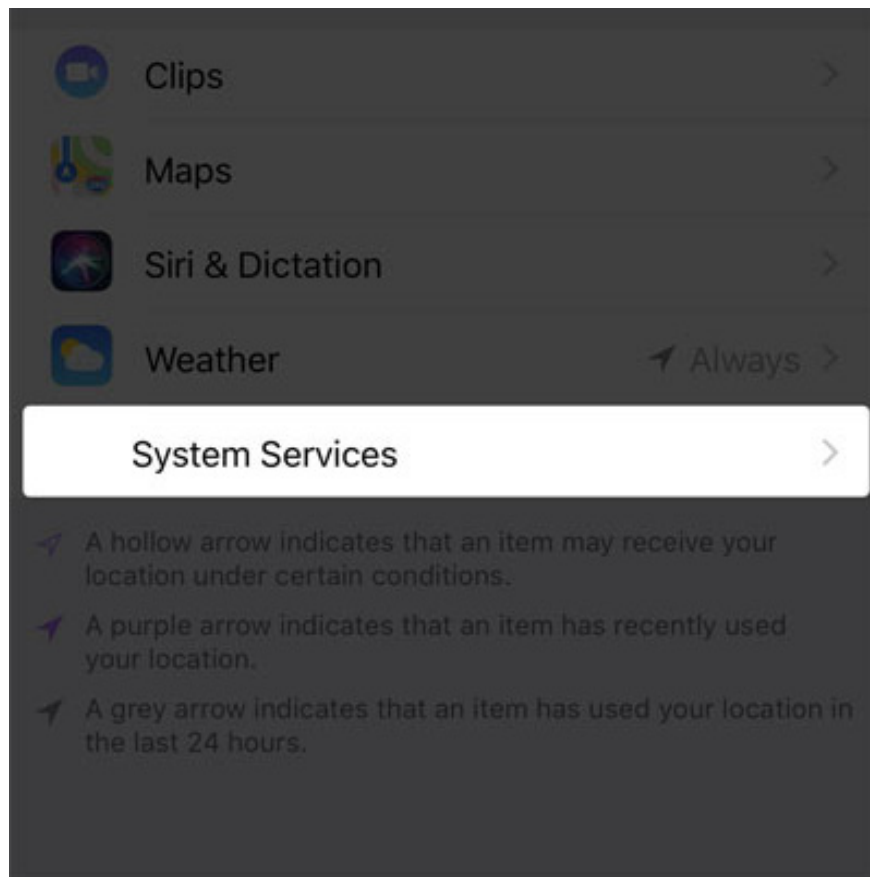

How to block Siri Suggestions from sending your location to Apple

Siri's proposal sends your location to Apple to provide more relevant search results. But if you don't want to use this feature, turn it off.

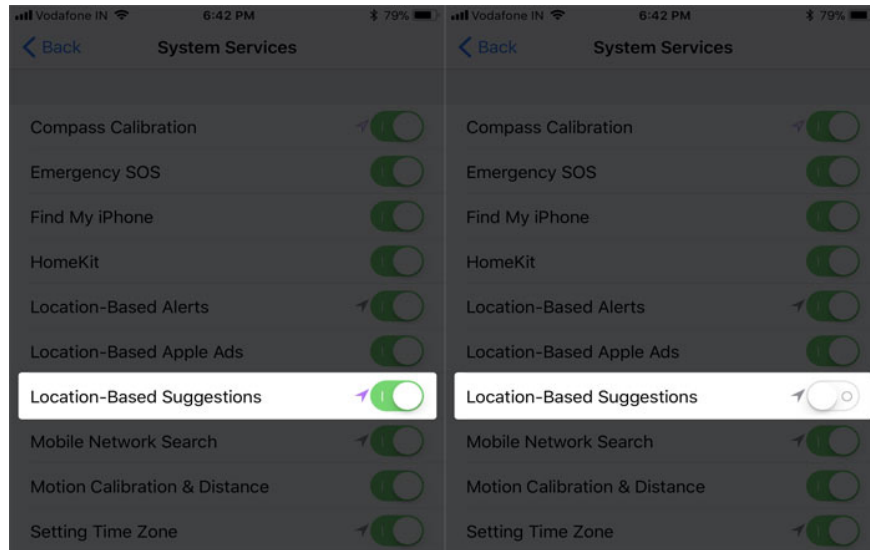

Step 1. Open the Settings application and select Privacy ? Location Services.

Step 2. Click **System Services** .

Step 3. Turn off the switch next to **Location-Based Suggestions** .
