

How to block Story Telegram to avoid disturbing

The Telegram Story feature is sometimes bothered by people you don't want to see the Story. Although the feature of blocking Friends' Telegram Stories is to hide their Stories, if you do not want to use this Story feature, you can block Telegram Stories completely.

There will be no default option to block Telegram Stories, but you can also try some methods according to the article below.

Delete synchronized Story Telegram contacts

Telegram Stories will be shared with people in your contact list, close friends in contacts, members in groups or channels, etc. Telegram Stories shared from your friends are often displayed at the top. So you can stop Telegram from accessing your contacts to not show the Stories they post.

Step 1:

At the Telegram interface, we click on **the 3 dashes icon** in the top left corner. Next, display the options, click **Settings** .

Step 2:

Switch to the options interface for Telegram, click on **Privacy and Security** . You will then see **the Contact management section** to adjust. You need to click **Delete Synced Contacts** to delete synchronized contacts on Telegram.

Next **press Delete** to delete the synchronized contacts on Telegram.

Use third-party applications

Some third-party applications such as Telegram X or Plus Messenger, etc. allow you to access your Telegram account without having to install the main application.

These third-party applications will have some more limited features than Telegram, for example not displaying Telegram Stories. So if you don't want to use Story Telegram, you can use 3rd party applications to use it.

Hide friends' Telegram stories

Hiding a friend's Telegram Story helps us not receive notifications about someone's Telegram Story. Their Story Telegram content will be saved to the new management location.

Turn off Story Telegram notifications

This feature will not block any Stories, but we will not receive notifications when someone posts a Story.

Step 1:

First, we also click **Settings** to access the settings interface on Telegram. Next, users click on **Notifications and Sounds** to adjust notifications and sounds.
