

How to block websites with bad content on Safari for iPhone and iPad

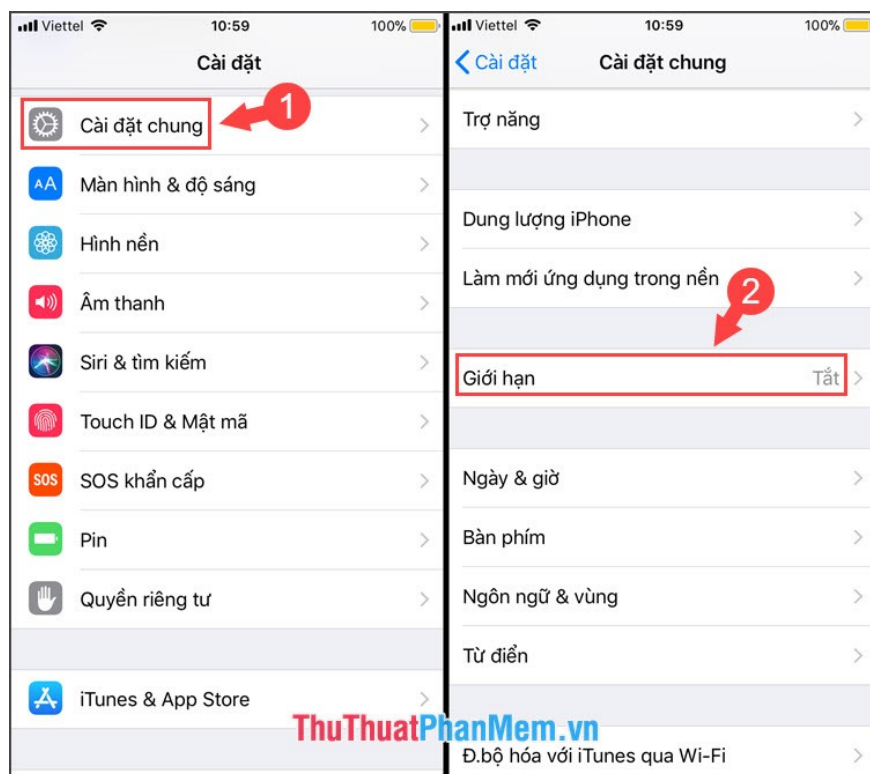

How to block websites with bad content on Safari for iPhone and iPad. Content websites are the biggest worry when parents use entertainment devices such as iPhones and iPads for children. However, we can control this content if we know how to prevent it with a few small settings in the article.

Content websites are the biggest worry when parents use entertainment devices such as iPhones and iPads for children. However, we can control this content if we know how to prevent it with a few small settings in the article.

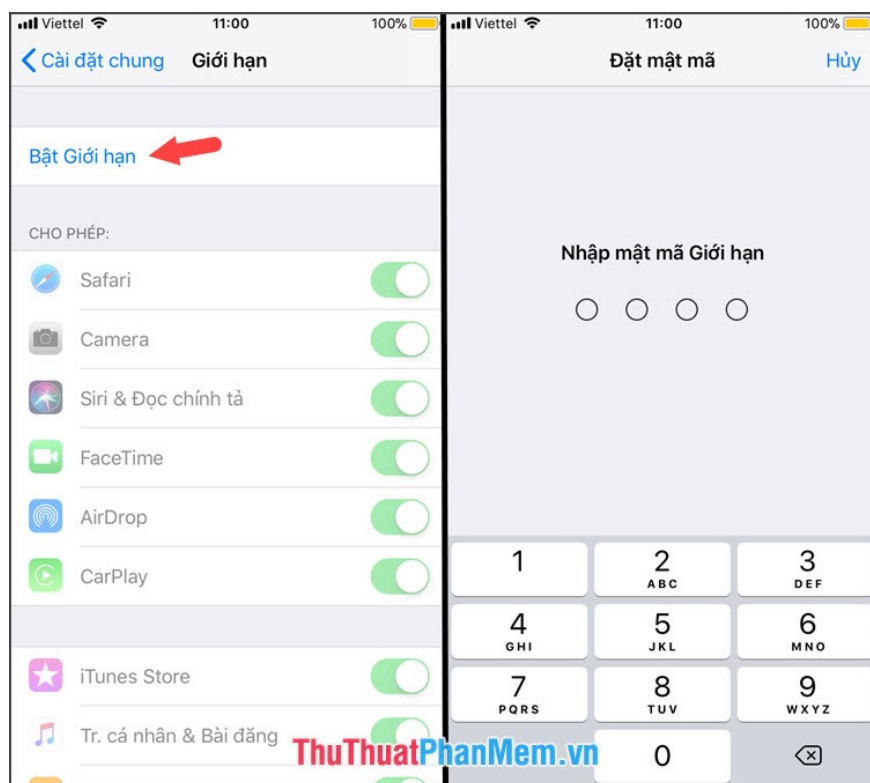

1. How to block websites with bad content on Safari by Limit

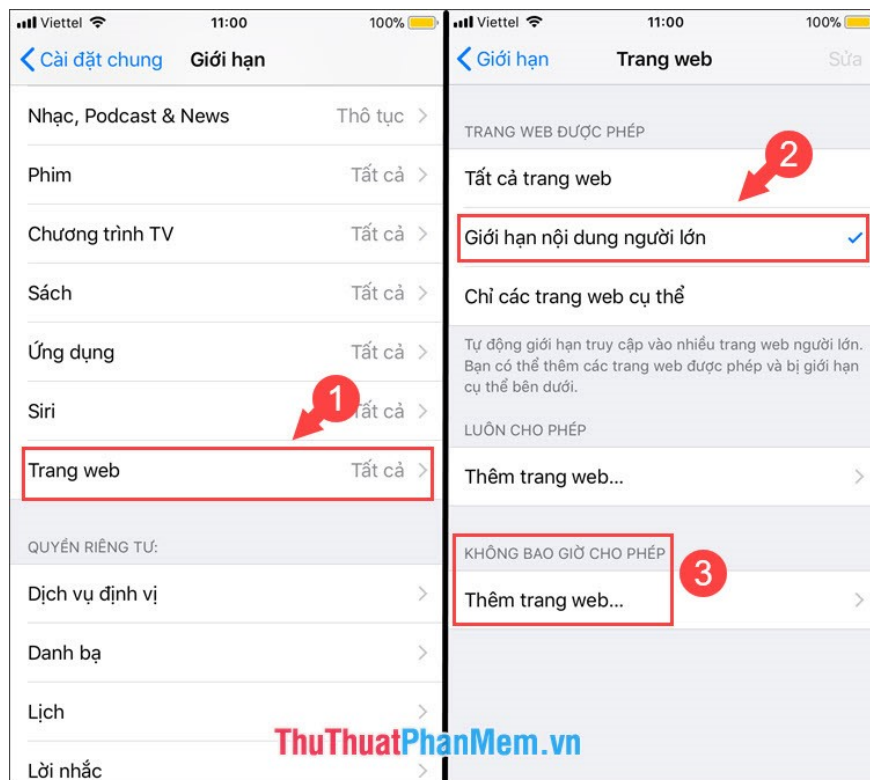

Step 1: Go to **Settings** => **General settings** => **Limits** .

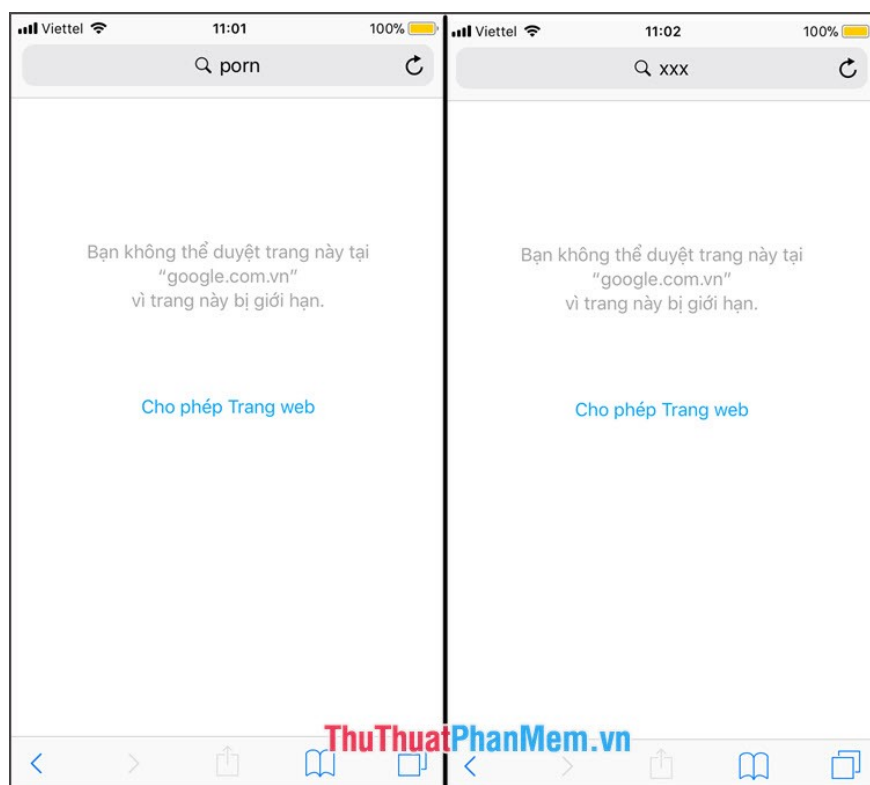

Step 2: Click on **Turn** on **limit** and set the **limit** password as you like.

Step 3: Go to **Website** => **Limiting adult content** . We can add a few other sites with bad content if you know the block list in the **Never allow** section .

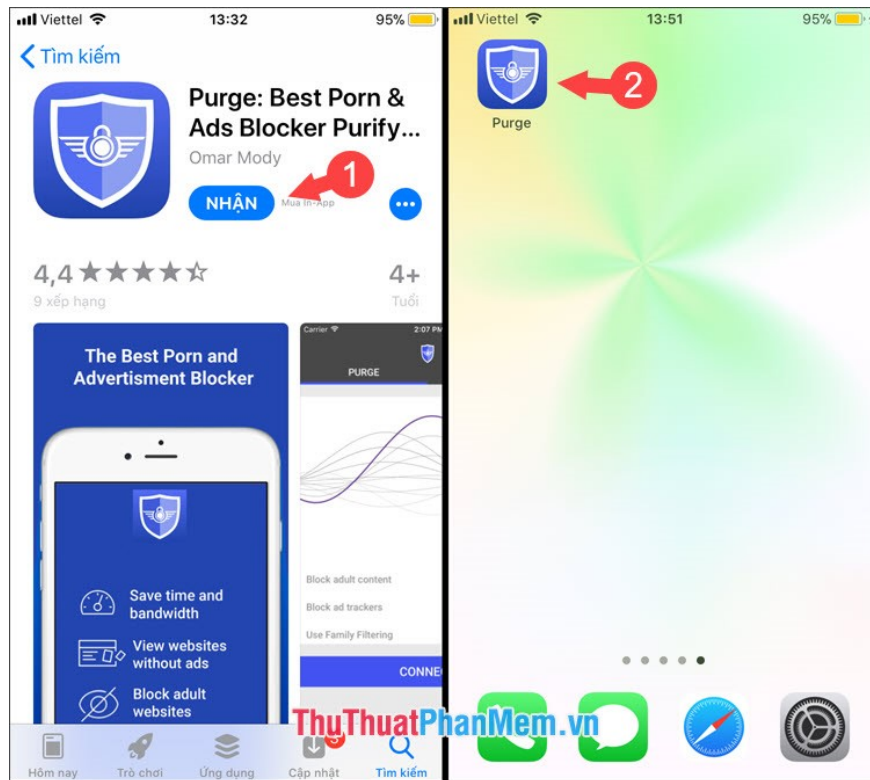

Step 4: We try to check by going to **Safari** and searching on Google for sensitive keywords like " xxx, porn . ", the result will be blocked as shown below is successful.

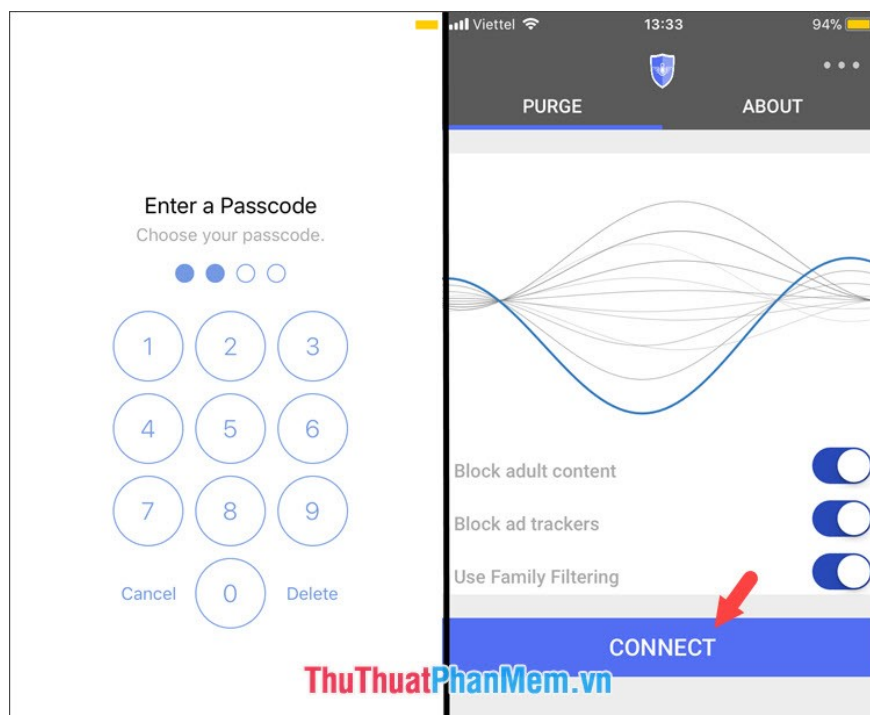

2. How to block websites with bad content on Safari for iPhone

Step 1: Go to the **App Store** and download the Purge app: **Best Porn & Ads Blocker Purify** . or visit the following address <https://itunes.apple.com/us/app/purge-best-porn-ads-blocker-purify-youtube-kids/id303399377?mt=8>

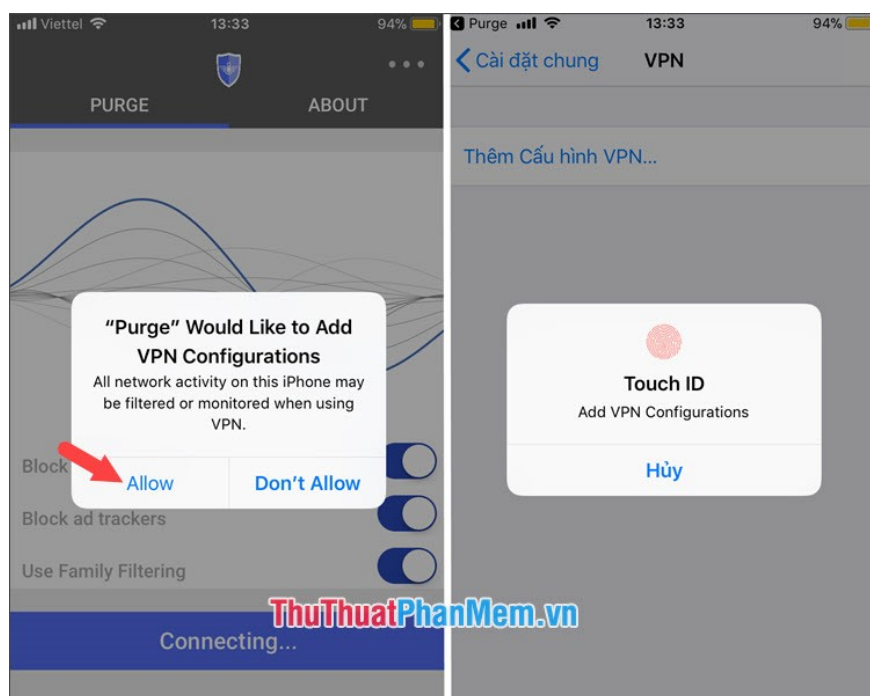

After downloading, you tap on the application icon and start setting up.

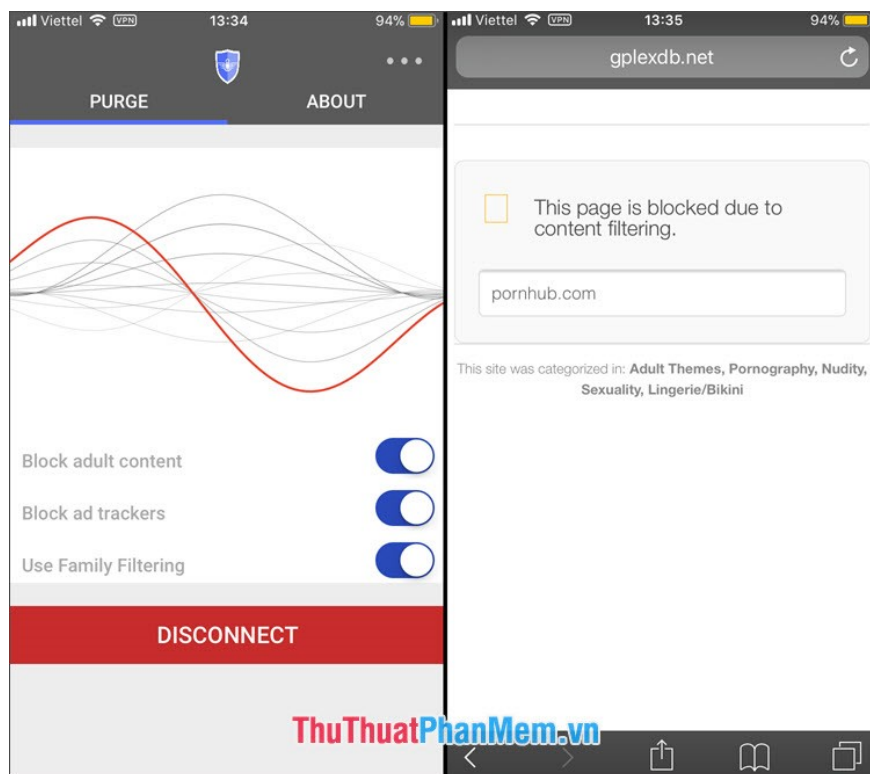

Step 2: You set the **Passcode** protection for the application, then you click **Connect** to make the application connect to the server.

Step 3: The noticeboard allows us to add **VPN** configuration , click **Allow** to add. Your phone will ask you to use **Touch ID** or password to confirm and add a VPN configuration to your device.

Step 4: After the VPN icon appears, you can open Safari and try to access an " *adult* " website to test this feature. As shown below, we see when accessing the " *adult* " website and the browser will automatically redirect with the words **This page is blocked due to content filtering** .

With two ways to block websites with bad content on iPhone, we can safely give iPhone and iPad to our children for entertainment. Good luck!
