

# How to blur an image online with Photoshop Online

How to blur an image online with Photoshop Online Photos that remove fonts are often used by photographers thanks to the blur tool (Blur) to create accents for the characters in the image. This article, Thuthuatphanmem.vn will guide you how to blur photos with tools

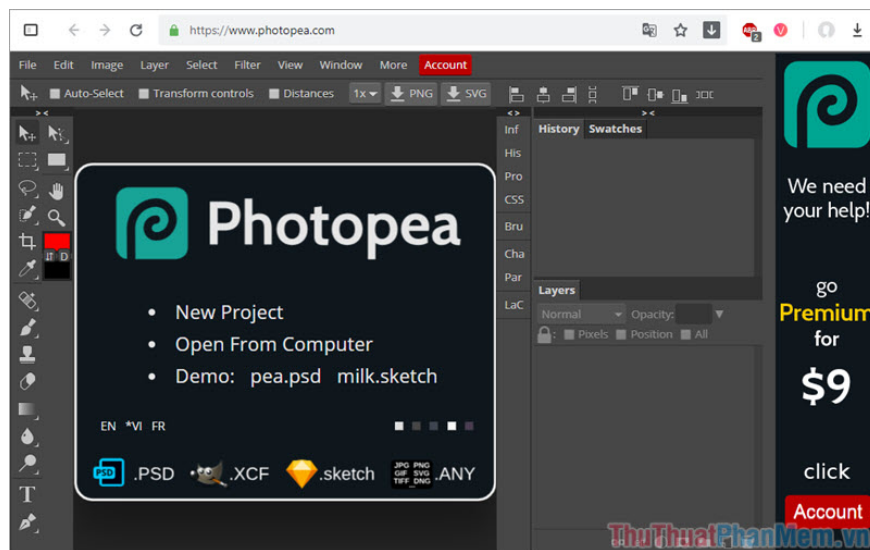

We often know Photoshop software on PC. However, with the strong development of the Internet and the HTML5 standard in the browser, we can use Photoshop right on the computer browser without having to download and install it.

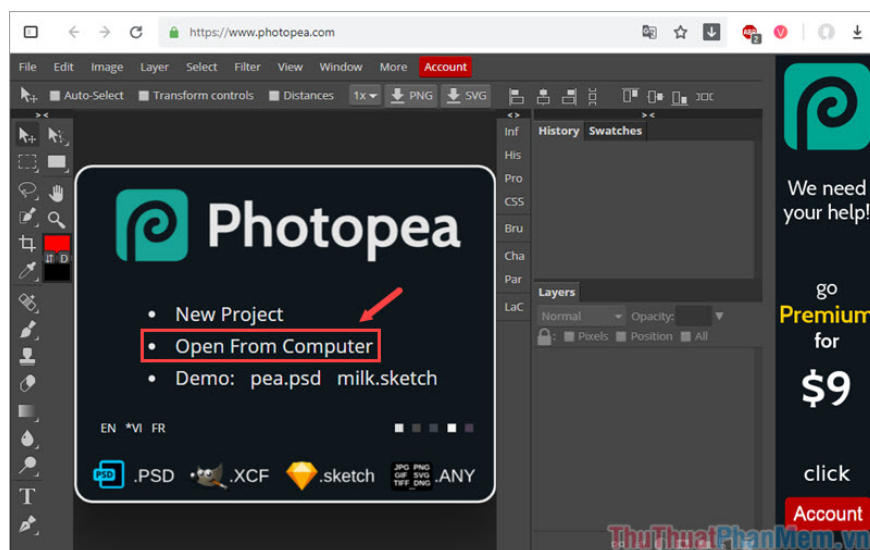

Photos that remove fonts are often used by photographers thanks to the blur tool (Blur) to create accents for the characters in the image. This article, Thuthuatphanmem.vn will guide you how to blur photos with Photoshop Online tool.

**Step 1:** There are many websites that integrate Photoshop Online editing software, here I will choose Photopea because the website loads quickly and the interface is simple. You access the following address:

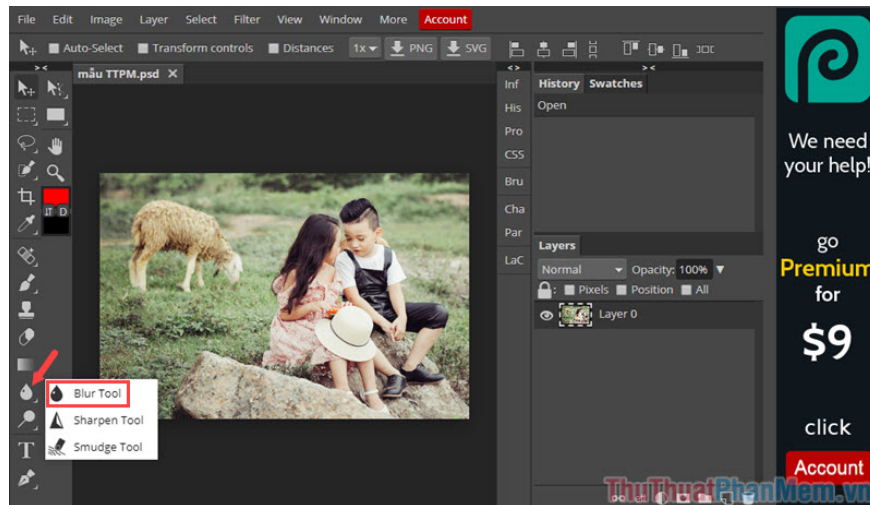

<https://www.photopea.com/>

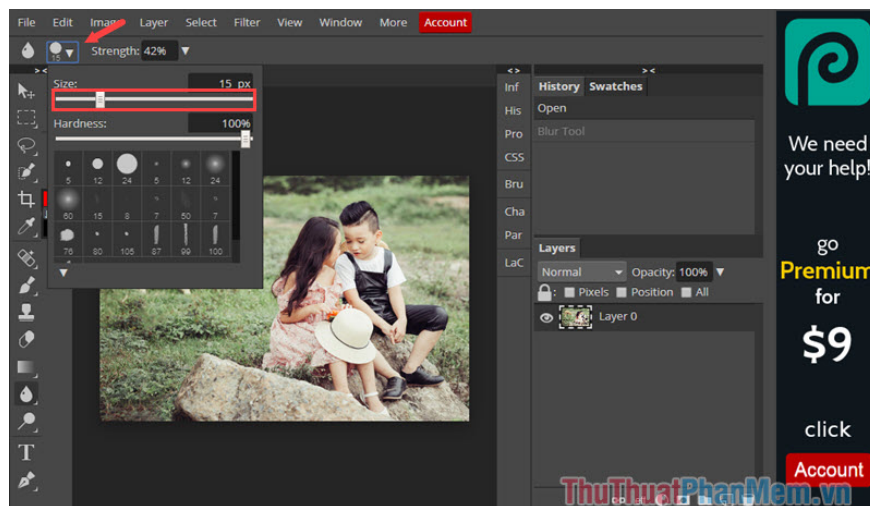

**Step 2:** Click on **Open From Computer** to upload photos from your computer.

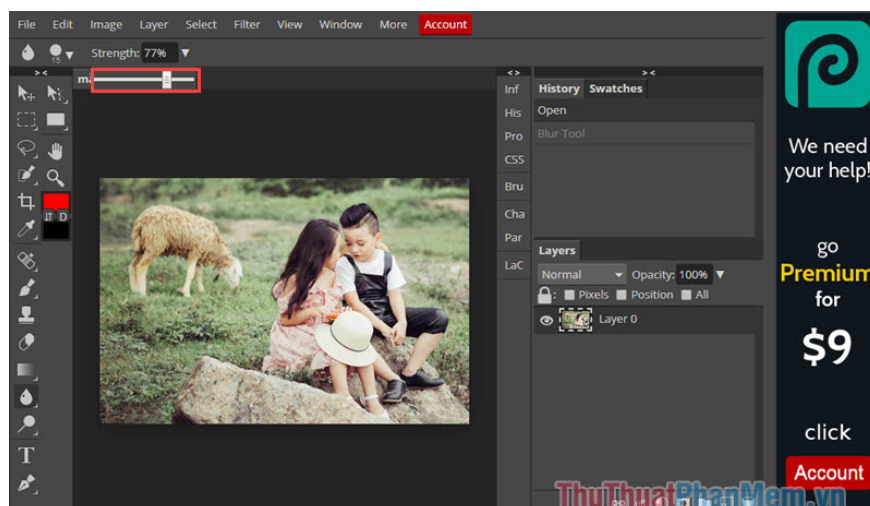

**Step 3:** Click on the water drop icon in the toolbar and select **Blur Tool**.

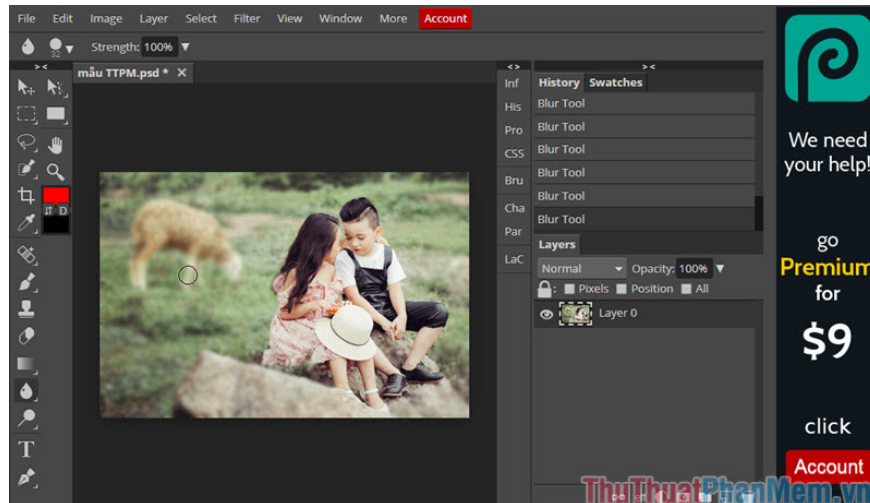

**Step 4:** Adjust the size of the blurred image area as shown below by sliding the cursor in the **Size** section to the left or to the right to make it smaller or larger.

**Step 5:** Go to Strength and slide the scroll bar left or right to adjust the level of light or dark.

**Step 6:** Hold the left mouse button and move all the positions that you want to blur.
