You want to insert an image into Word but do not want that image to stand out as a blur for the writing, so you want to find a way to blur the image in Word. So, please refer to the following article to learn how to blur images in Word.

Here TipsMake.com share to you how to blur images in Word, invite you to follow.

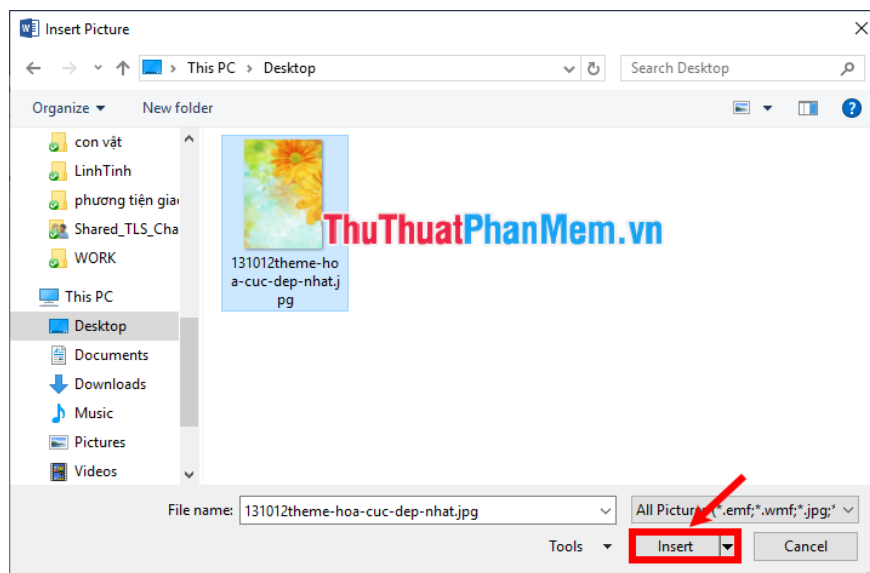

## Method 1: Blur images in Word

**Step 1** : Insert the image into Word.

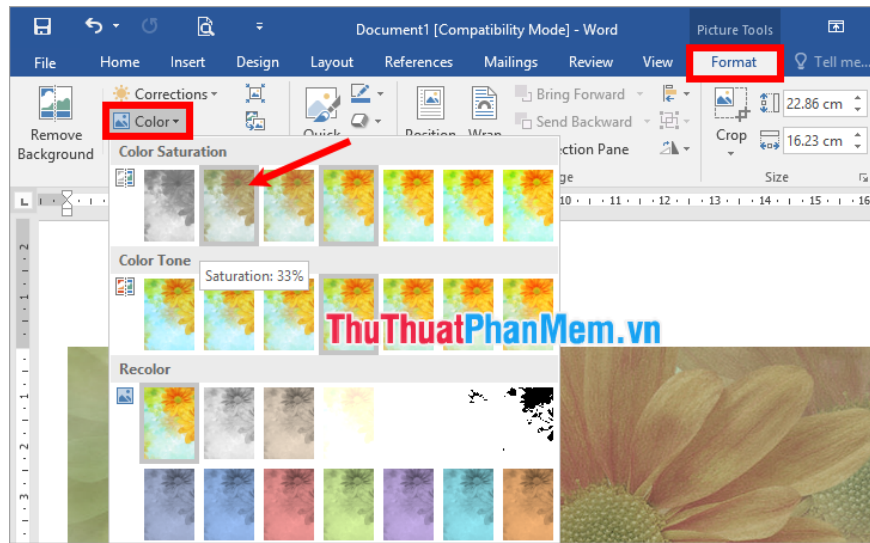

First you choose **Insert -> Picture** .

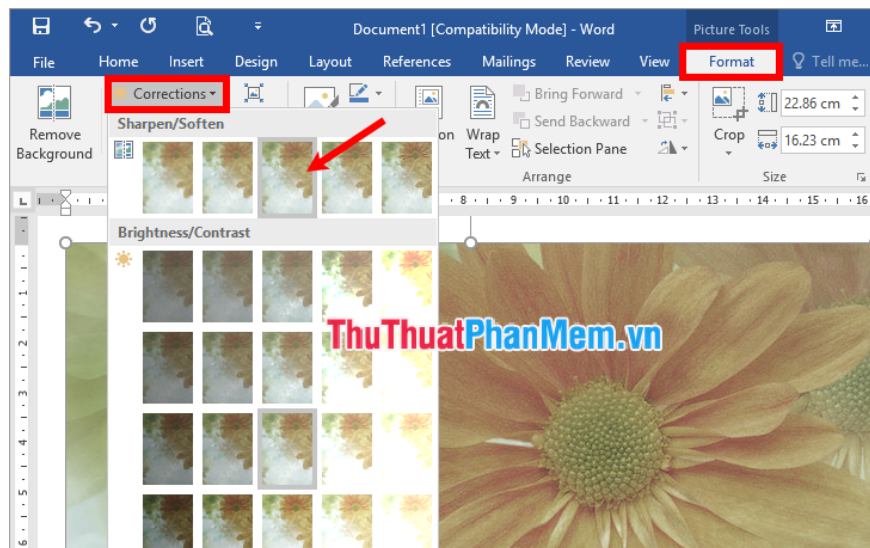

The **Insert Picture** window appears, select the images you want to insert into Word and select **Insert** .

**Step 2** : After inserting the image to change the opacity of the image you select the image and select **Format** -> **Color** -> select the **blur** you want.

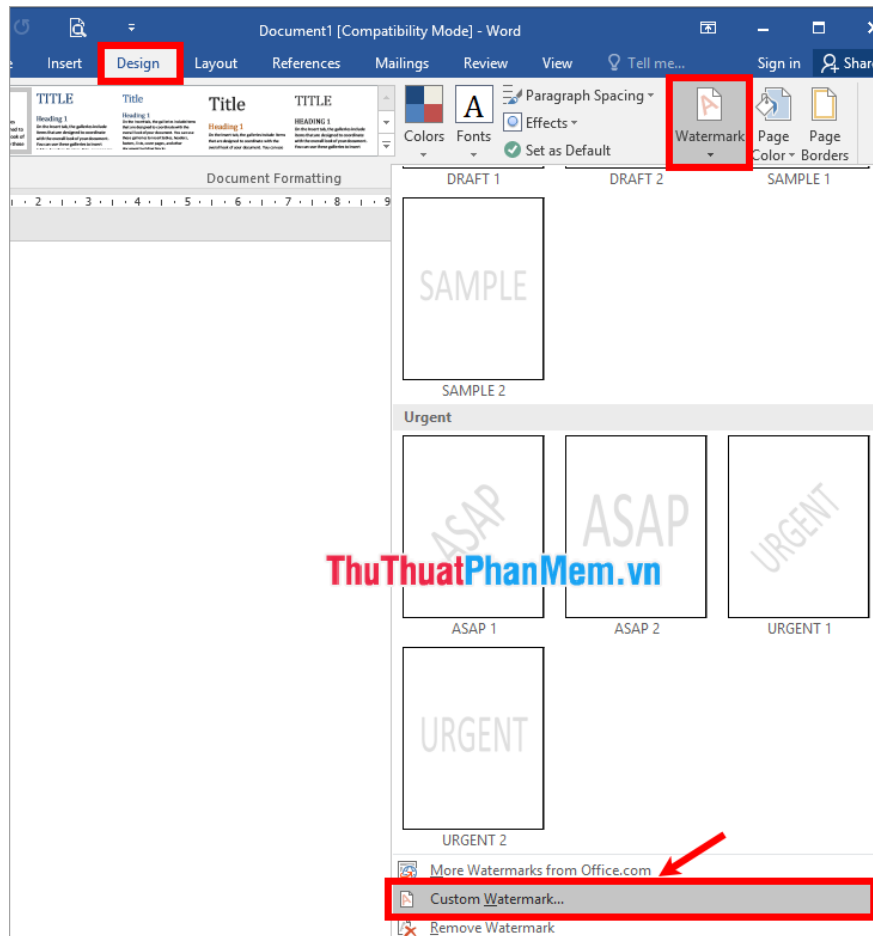

**Step 3 :** To change the brightness of the image you select **Format -> Corrections -> choose the brightness** you want.

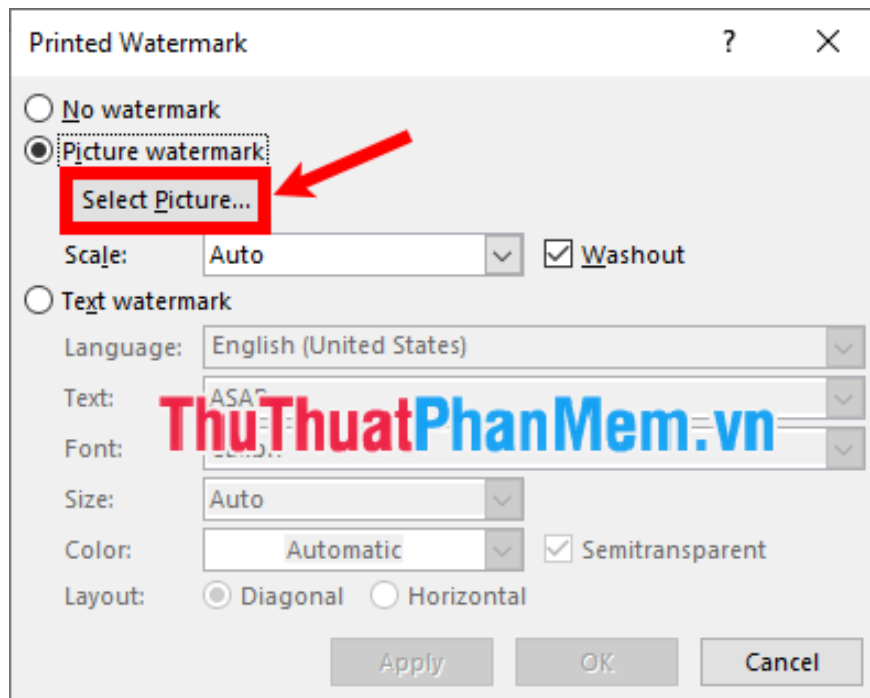

## **Method 2: Insert watermarks in Word**

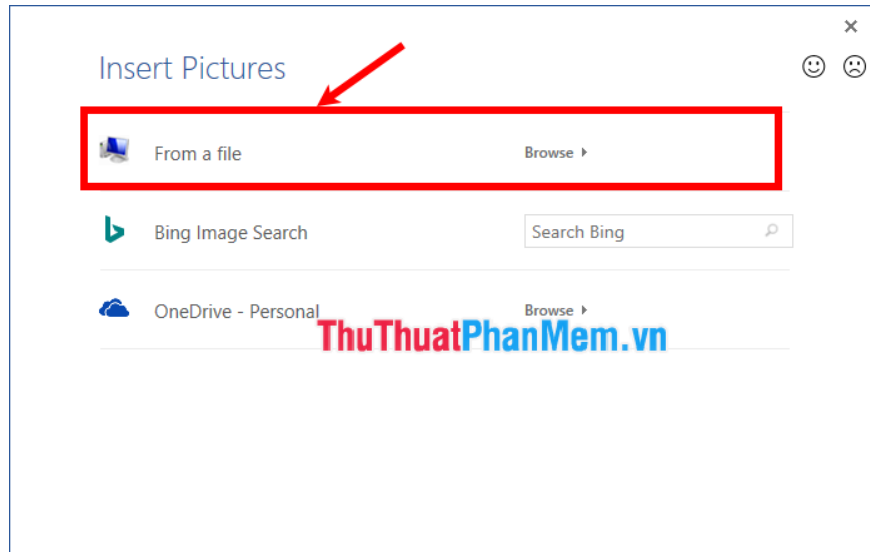

**Step 1 :** Choose **Design -> Watermark -> Custom Watermark**.

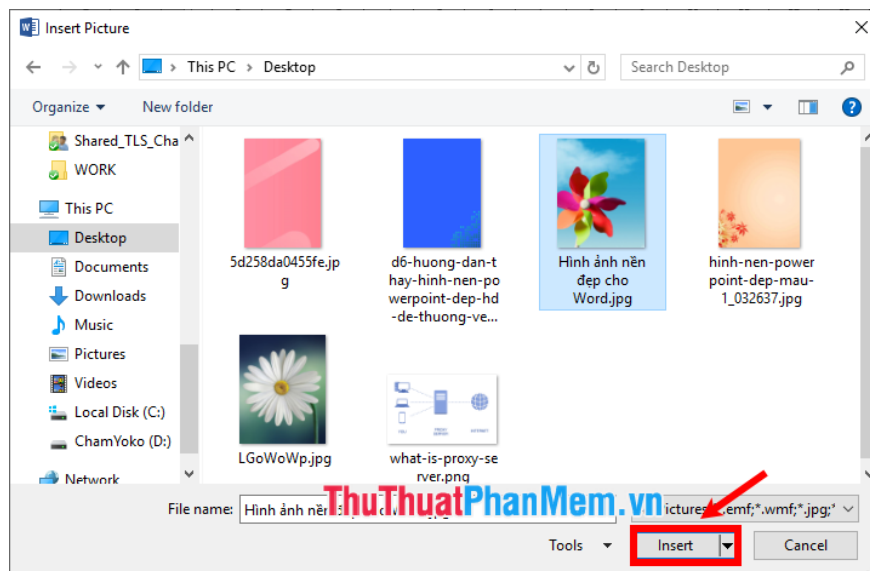

Step 2 : The **Printed Watermark** window appears, select **Picture watermark** and select **Select Picture**.

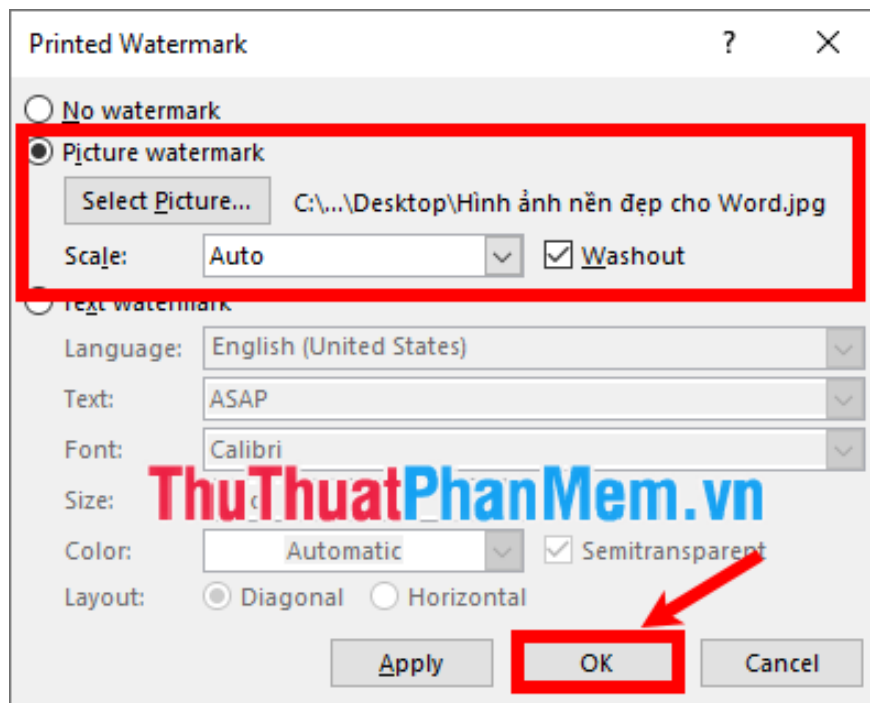

**Step 3** : In the **Insert Pictures** section , you can add images on your computer ( **From a file** ) or you can search for images on the web via Bing tool ( **Bing Image Search** ) or images stored on OneDrive. For example, if you want to add images on your computer, select **From a file** .

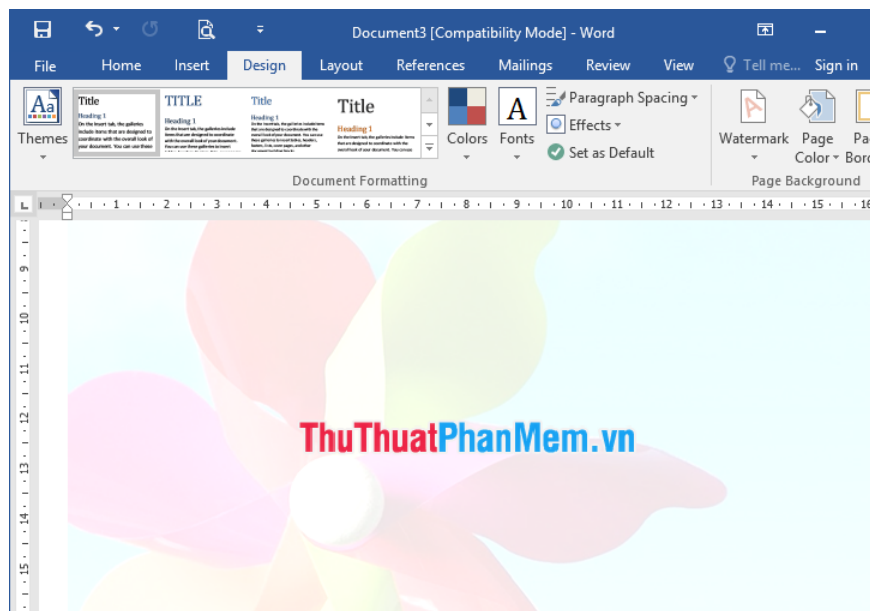

The **Select Picture** window appears, select the images you want to add to Word and select **Insert** .

**Step 4** : Next to select the width of the image you choose in the **Scale** , tick the **Washout** check box to blur the image and click **OK** to add the watermark.

So you have added blur in Word.
