

# How to blur, reverse Facebook Messenger messages

The Protect Message utility will hide the message content on Facebook Messenger so that others cannot read it.

When you text on Facebook Messenger computers in public places like offices, it can be very easy for people to eavesdrop on messages. If so, we can use the Protect Message utility to hide the message content on Messenger, by being very interesting like reversing the message or blurring the message content. In addition, the utility also has many options to hide other details in the messaging interface on Messenger. The following article will guide you how to hide messages on Facebook Messenger.

## Instructions to avoid being peeked into Messenger messages

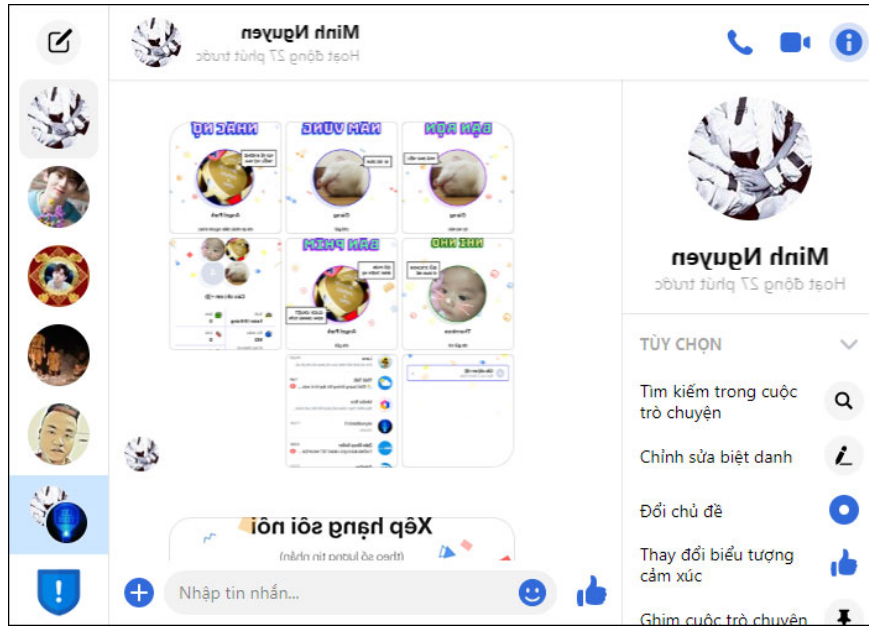

### Step 1:

We download the Protect Message utility for the browser by following the link below.

Download the Protect Message Chrome extension

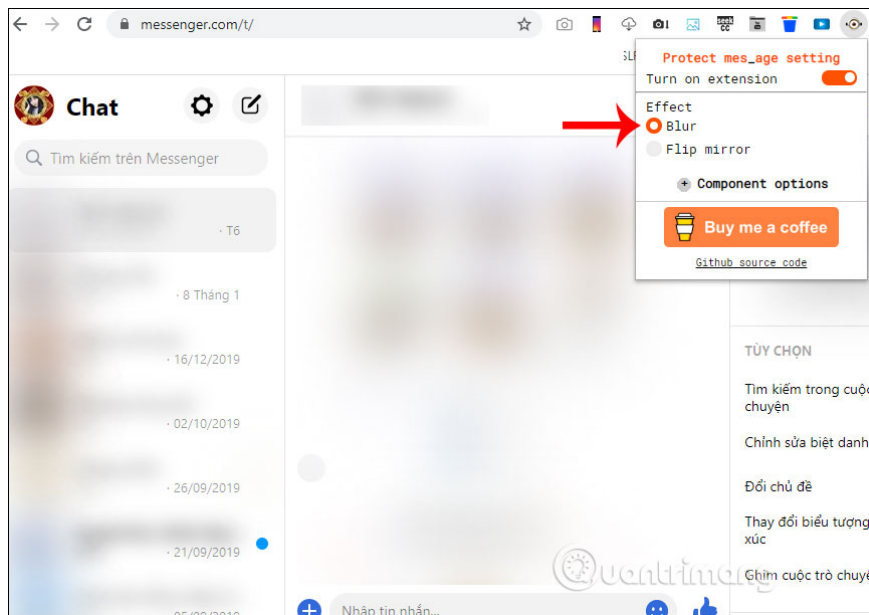

As a result, we will see **the message content is reversed** as shown below. Extensions are constantly working on Chrome, and when we don't hover over the content, the text is reversed. To view the content, just hover over the Messenger interface.

Note that the Messenger chat list on the left will also be reversed and separate from the content. So if you want to see the right chat list section on the left, you need to hover on that part.

### Step 2:

In addition to reversing text, you can also **blur the message content** . Click on **the utility icon** and **select Blur** to blur the chat. The result of the chat is dimmed as shown below.

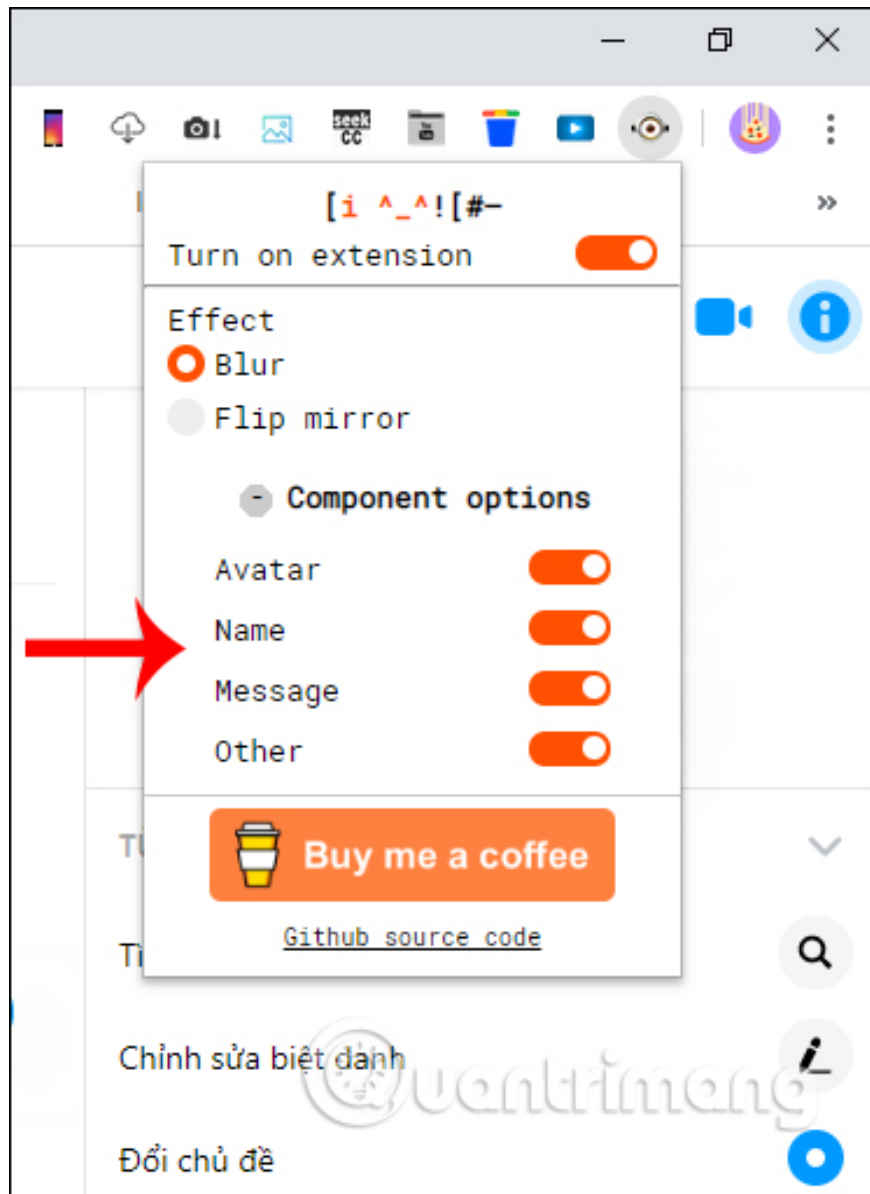

### Step 3:

Also when clicking **Component Options** will see many other options to protect the account.

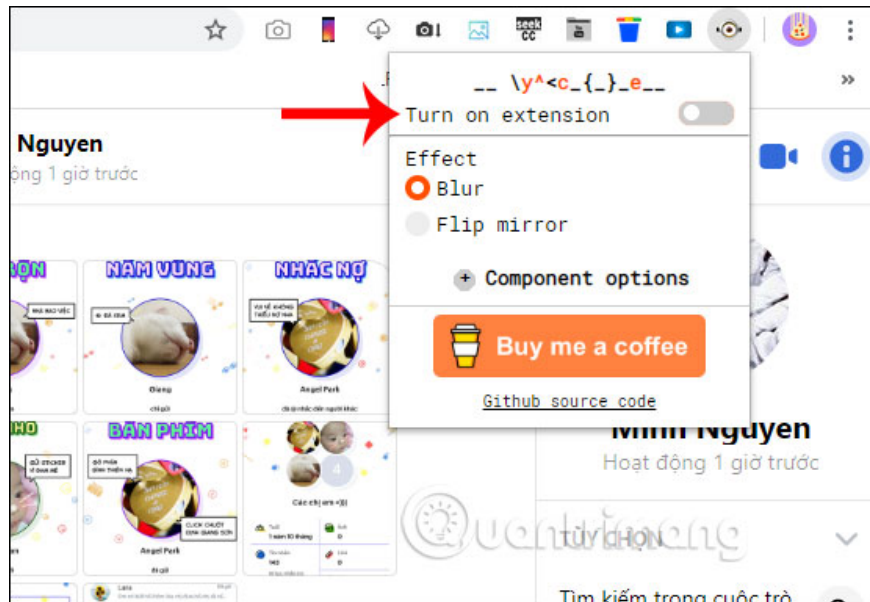

1. Avatar: Blur or turn over the avatar of the account that sent you the message.
2. Name: Blur or reverse the name of the message account for you when selected.
3. Message: Blur or rewrite the message sent to you when selected.
4. Other: Blur or flip the images and videos you receive in the message when selecting.

If you want to hide any content, just slide the circle button to the right is okay.

#### Step 4:

To turn off the Protect Message utility that does not work in the browser, we will **turn off the Turn on Extension mode of the utility** .
