

How to bring Icon to the desktop in Win 10

How to bring the Icon to the desktop in Win 10. Bringing the application's icons to the Desktop will help us launch the application quickly without having to search in the start menu. This article I will guide you how to put icons to Desktop in Wi

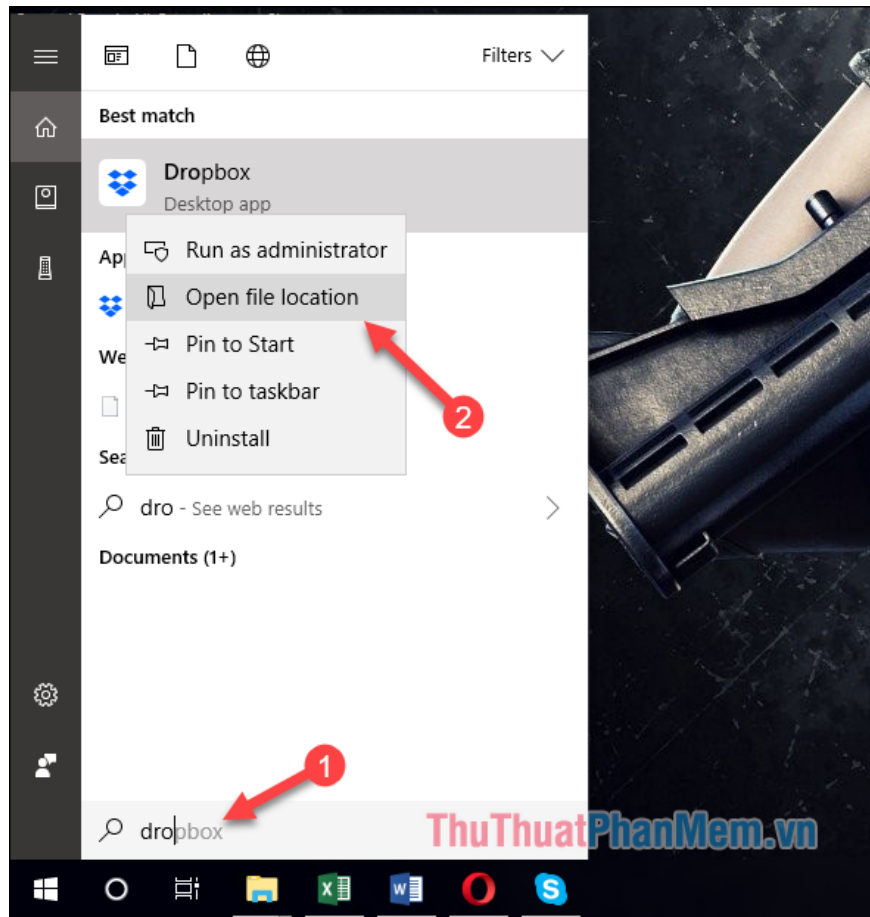

Putting the application's icons on the Desktop will help us launch the application quickly without having to search in the start menu. On each version of the operating system, the way to bring the icon to the screen is different. In this article, TipsMake.com will guide you how to introduce icons to Desktop in Windows 10, please follow along.

Method 1 : Very simple, you just need to open the Start menu to find the application that needs to bring the icon to the screen, hold the mouse button on the icon of the application and drag and drop to the Desktop is done.

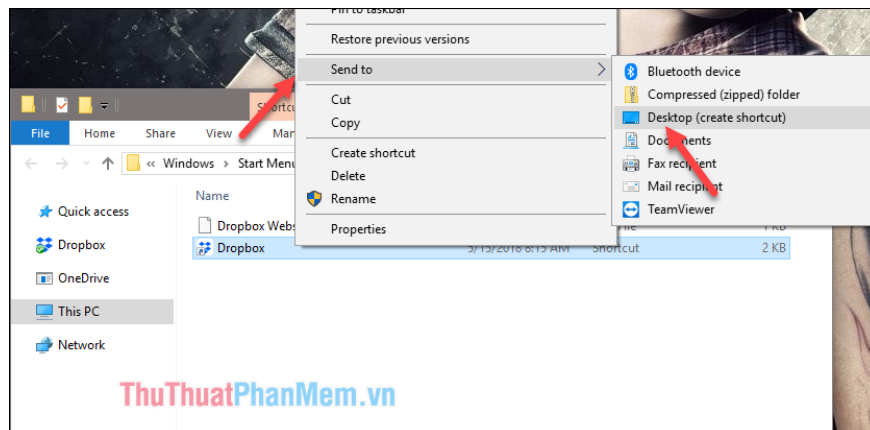

Method 2: In case the application you want to bring the icon to the desktop is not in the start menu or cannot be dragged and dropped by the mouse, how do we do it?

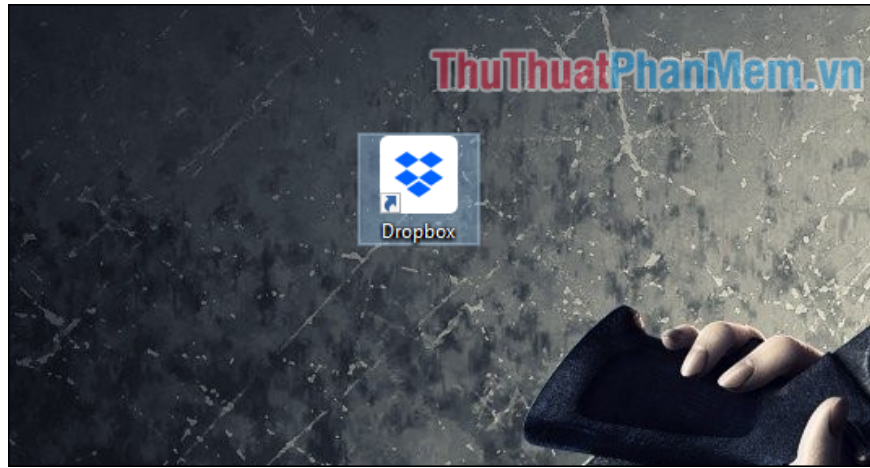

Step 1 : Open the search feature, then enter the application name, when the desired application results, right-click and select **Open file location**.

Step 2 : You will be taken to the directory of that software, then right-click on the application's icon and select **Send to -> Desktop (create shortcut)**

Thus the icon has been launched on the Desktop:

Above are the 2 easiest ways to help you put the icons of applications on the Desktop, hope you will find the article useful. Good luck!
