

# How to browse 2 websites at the same time on Microsoft Edge

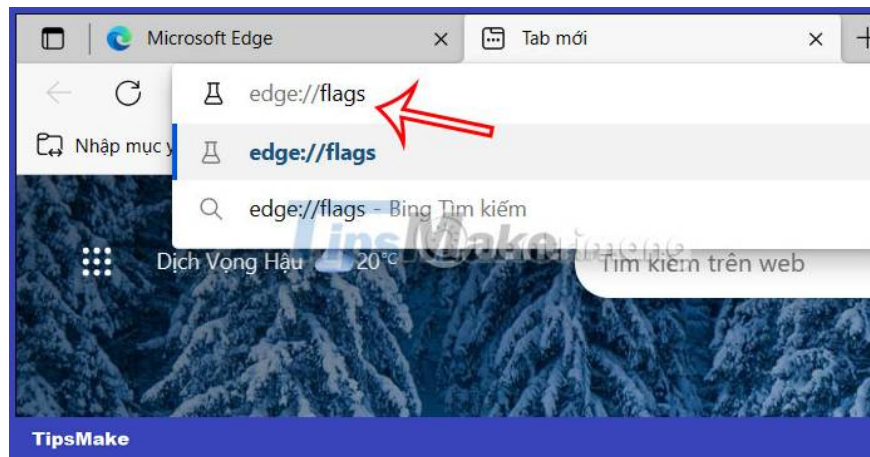

Microsoft Edge browser has just added the Split screen feature, split the screen to browse 2 websites at the same time.

Currently, Microsoft Edge browser is the first browser with a split-screen feature on your computer so you can open 2 web pages at the same time, supporting more convenient and easier work such as document matching. . The following article will guide you to enable browsing of 2 websites at the same time on Microsoft Edge browser.

## How to enable browsing 2 websites at the same time on Edge

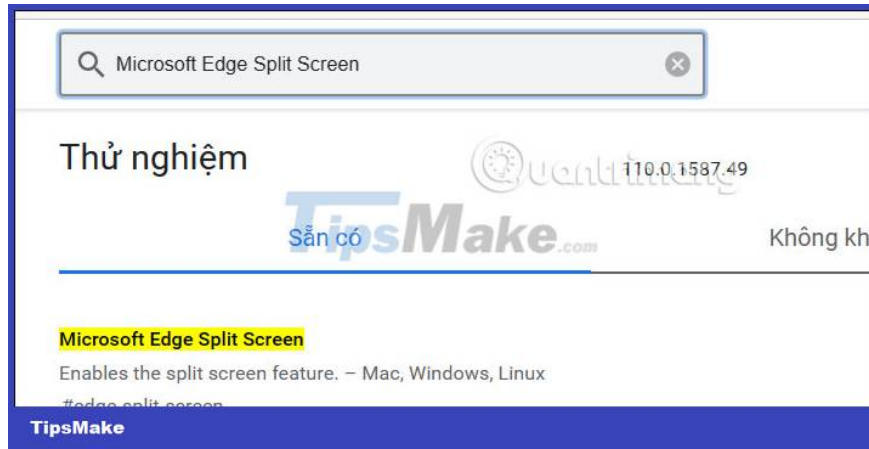

### Step 1:

In the Edge browser, **enter edge://flags** in the address bar and then press Enter to access.

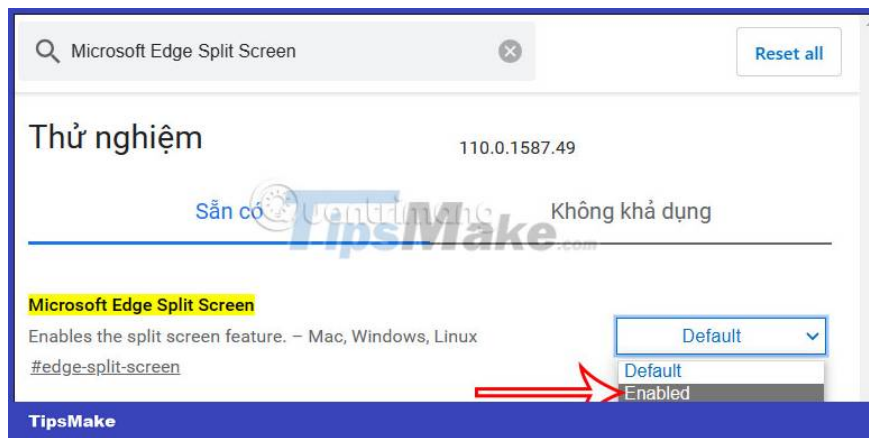

### Step 2:

Switching to the new interface, users **enter the Microsoft Edge Split Screen keyword** to find the flag as shown below.

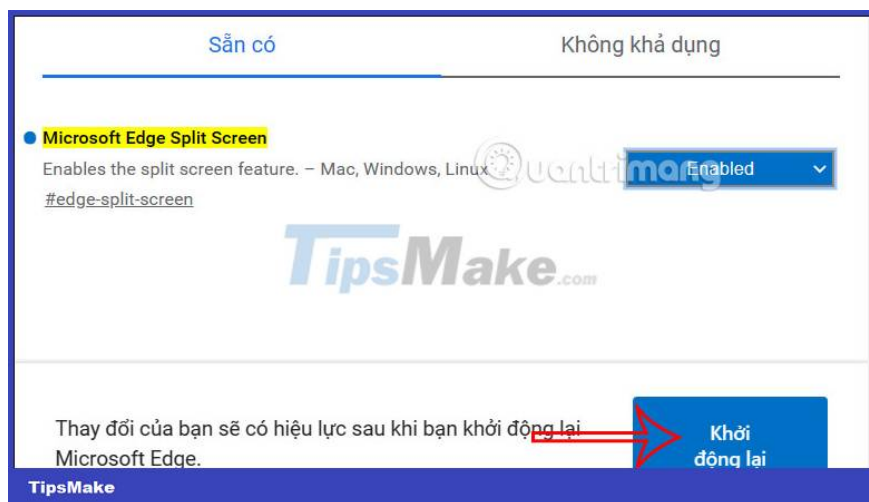

### Step 3:

At this point, users will switch this flag to **Enabled mode** to enable this feature on Edge browser.

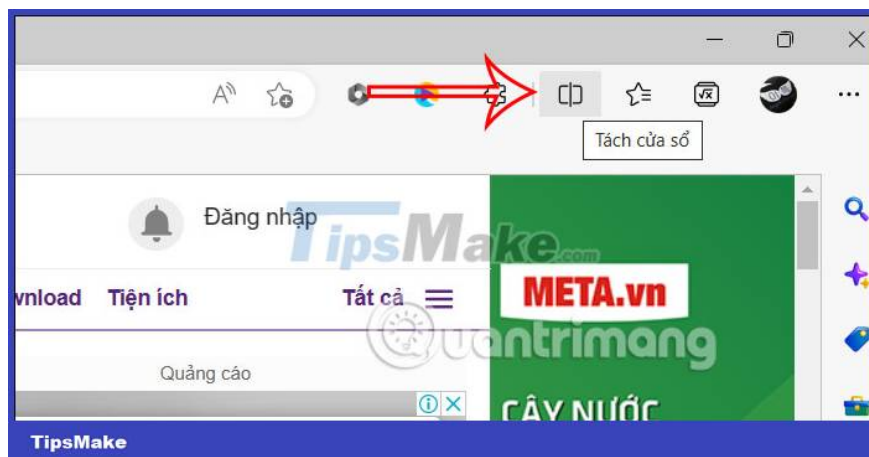

The user will then need to **restart the Edge browser** for the flag to be enabled and working in the browser.

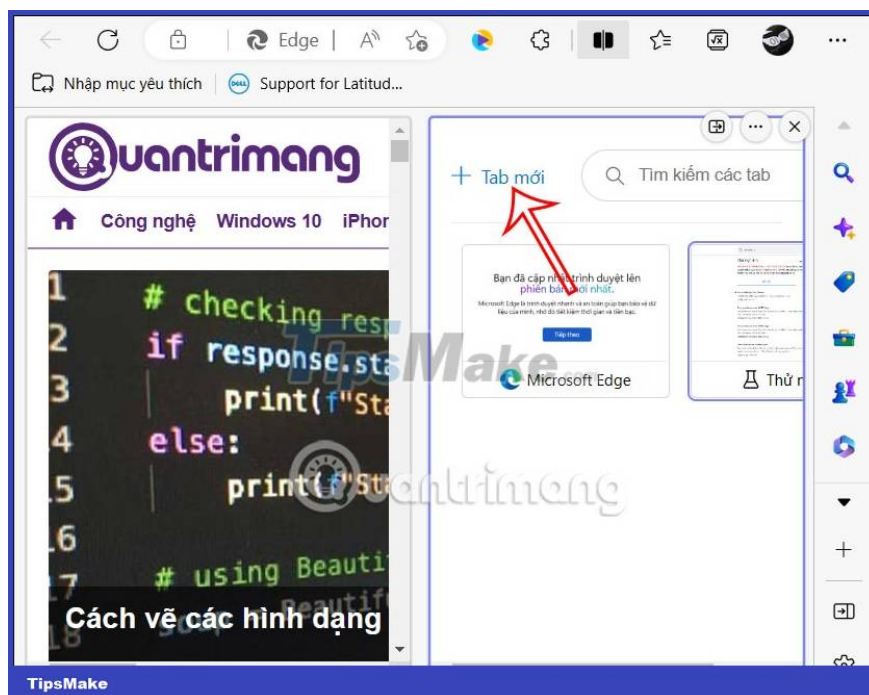

### Step 4:

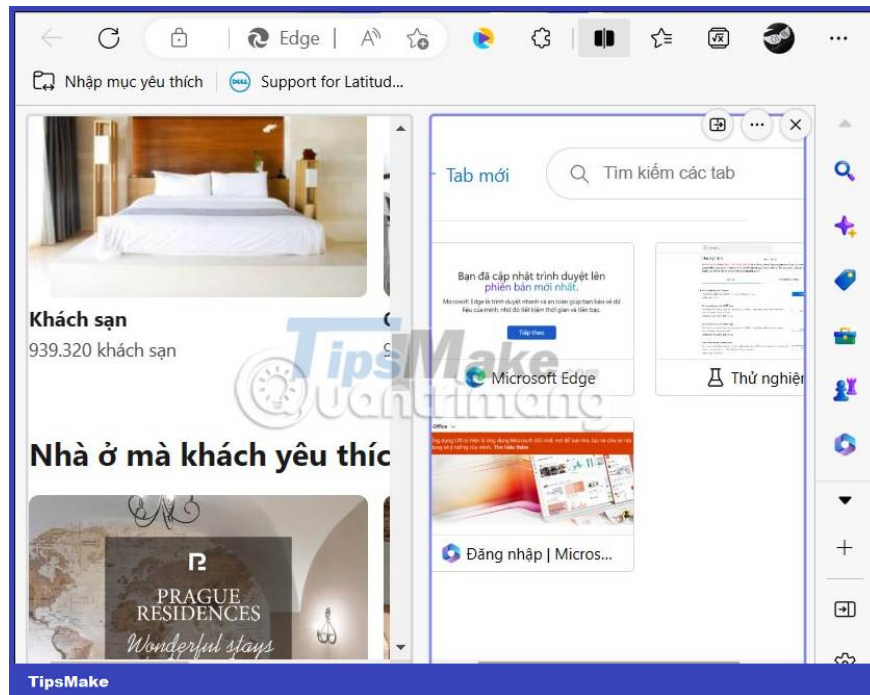

Now you open a web page as usual on the browser and then click on the **Split window icon** in the address bar as shown below.

Immediately after that, the Edge browser interface was split into 2 with one side being the website you opened earlier, the other side to proceed to open another website. Next **click on New Tab** to enter the website that the user wants to access at the same time.

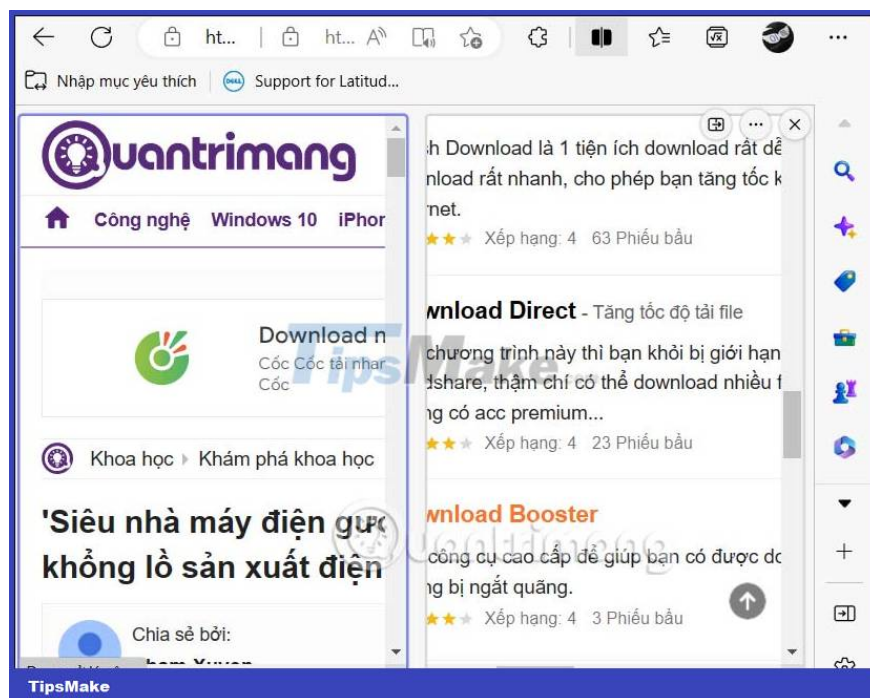

Or if you have multiple website tabs open in your browser, when you click on the split window icon, you can select one of the websites you want to use at the same time.

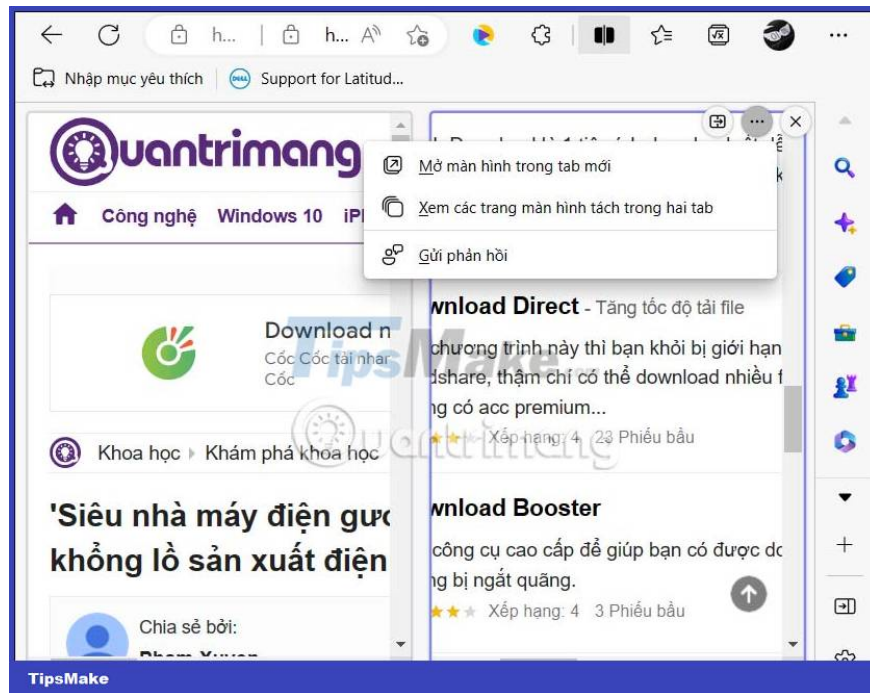

### Step 5:

After the browser screen has been split, you can browse the web as usual. The approved website will appear on the other website. You just need to click on the website to browse.

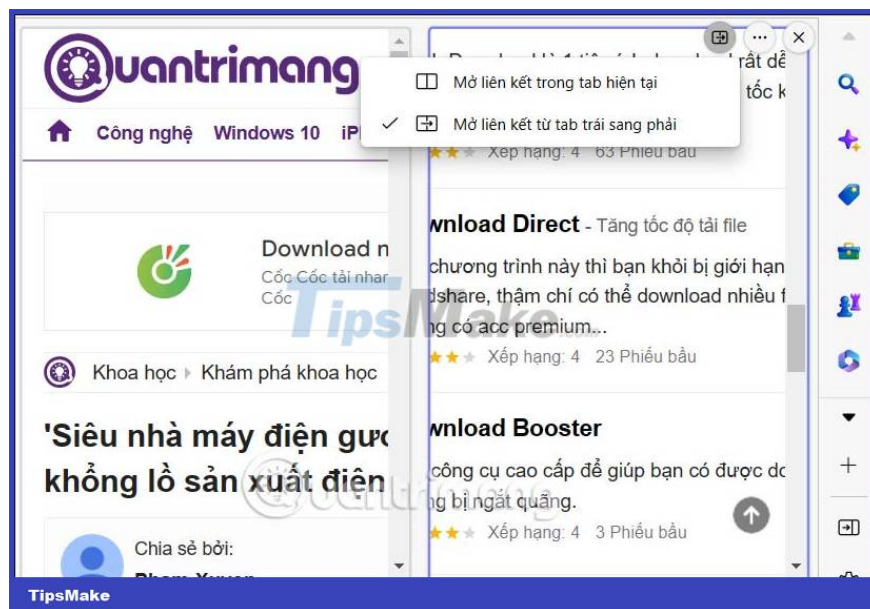

### Step 6:

When you click on **the 3-dot icon** in each open web page in 2 screen mode, you will see an option as shown below.

If you press the split screen icon, there will be an option below.
