

How to Browse the Internet Using the Terminal in Linux

Have you ever wondered how to view web pages in a command line in Linux? Start with step one to learn how to do it, using two different tools. Go to the terminal and type this command .

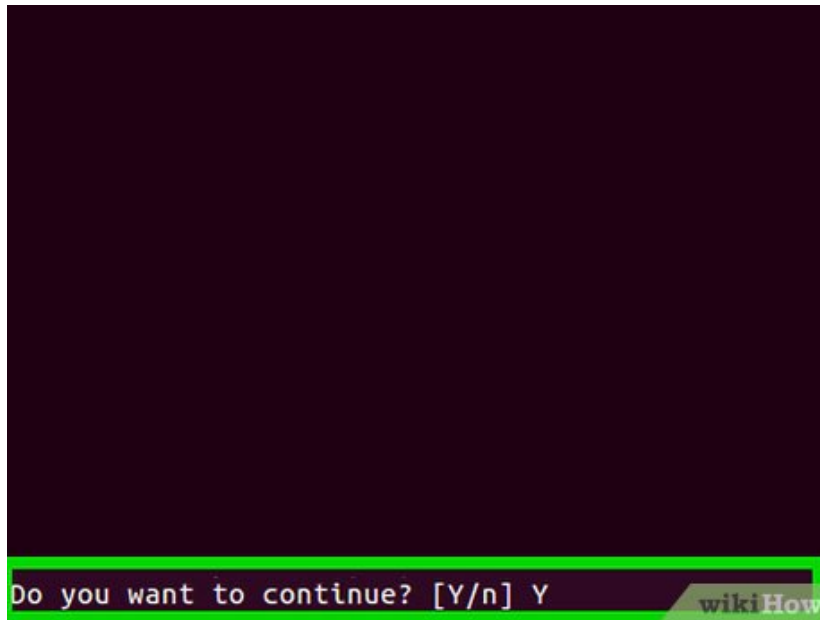

Method 1 of 2:

Using W3M

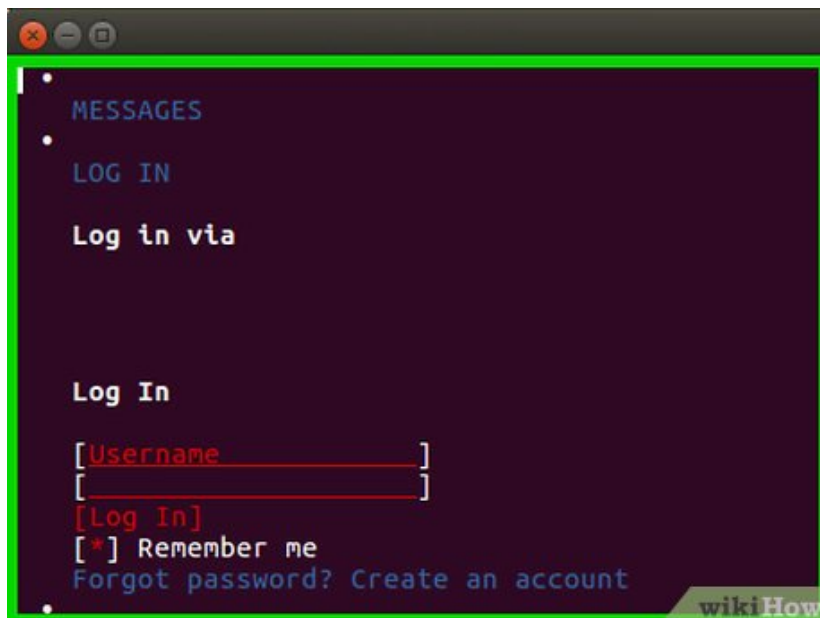

Go to the terminal and type this command `sudo apt-get install w3m w3m-img` .

2.

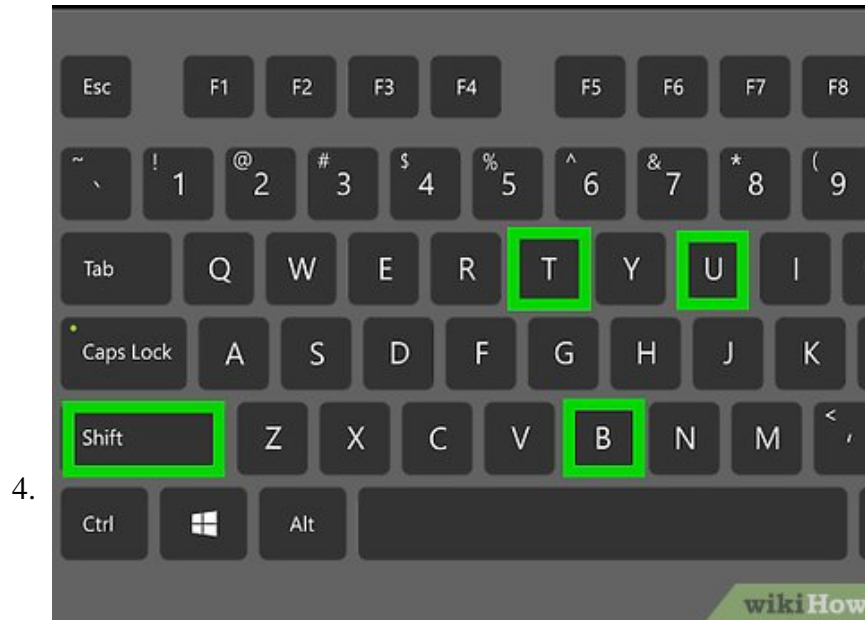

Type **Y** when asked to confirm. Now wait; it's just a matter of 3 MBs.

3.

Whenever you want to open a web page, go to the terminal and type `w3m wikihow.com`, with your destination URL in the place of `wikihow.com` as needed.

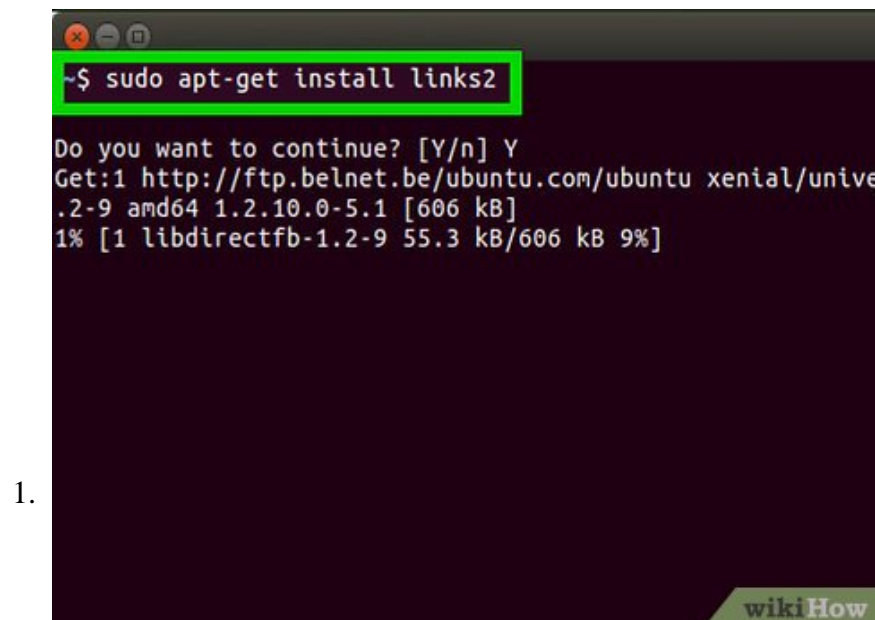

Navigate around the site.

1. Use `? Shift + U` to open a new web page.
2. Use `? Shift + B` to go back to the previous page.
3. Use `? Shift + T` to open a new tab.

Method 2 of 2:

Using Links2

Go to the terminal and type this command `sudo apt-get install links2`.

2.

```
~$ sudo apt-get install links2
Do you want to continue? [Y/n] Y
Get:1 http://ftp.belnet.be/ubuntu.com/ubuntu xenial/univer
.2-9 amd64 1.2.10.0-5.1 [606 kB]
1% [1 libdirectfb-1.2-9 55.3 kB/606 kB 9%]
```

Type **Y** when asked to confirm.

3.

```
~$ sudo apt-get install links2
Do you want to continue? [Y/n] Y
Get:1 http://ftp.belnet.be/ubuntu.com/ubuntu xenial/univer
.2-9 amd64 1.2.10.0-5.1 [606 kB]
1% [1 libdirectfb-1.2-9 55.3 kB/606 kB 9%]
```

To browse a website, wikiHow in this case , type **links2 wikihow.com** .
