2. How to control Chrome quickly by command
3. Summary of useful Windows 7 shortcuts

How to browse Chrome web by voice

Step 1:

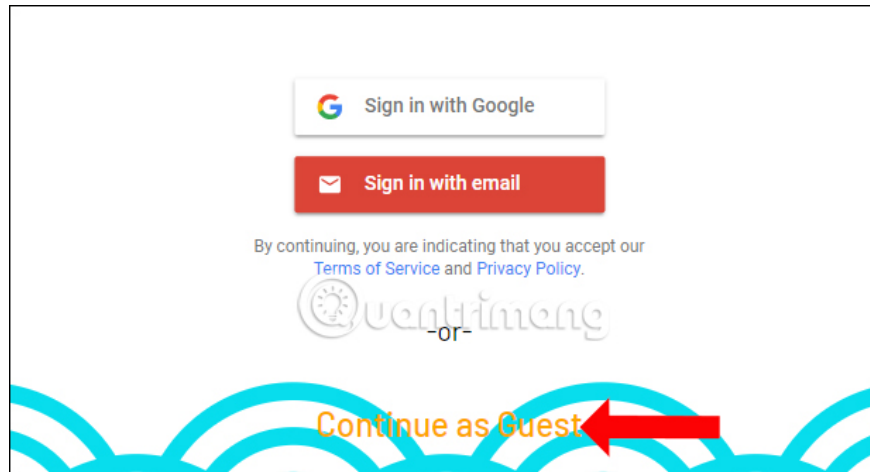

You download the LipSurf utility under the link below and install it on Chrome browser.

1. Download the LipSurf utility on Chrome

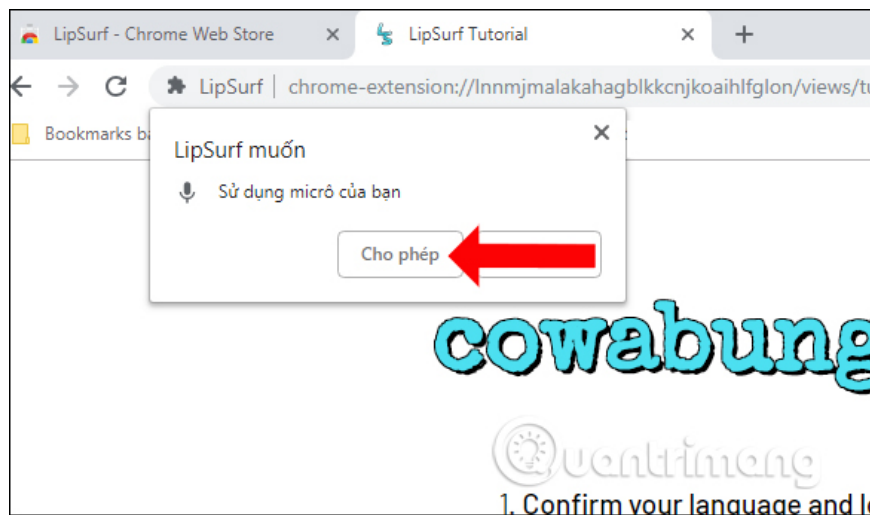

Step 2:

After the installation is completed, it will display the utility homepage. Users will be asked if they want to log in to their Google account for use, or use as a guest account.

Step 3:

To use the utility, you need to agree to **use the microphone** on the browser, press **the Allow button** .

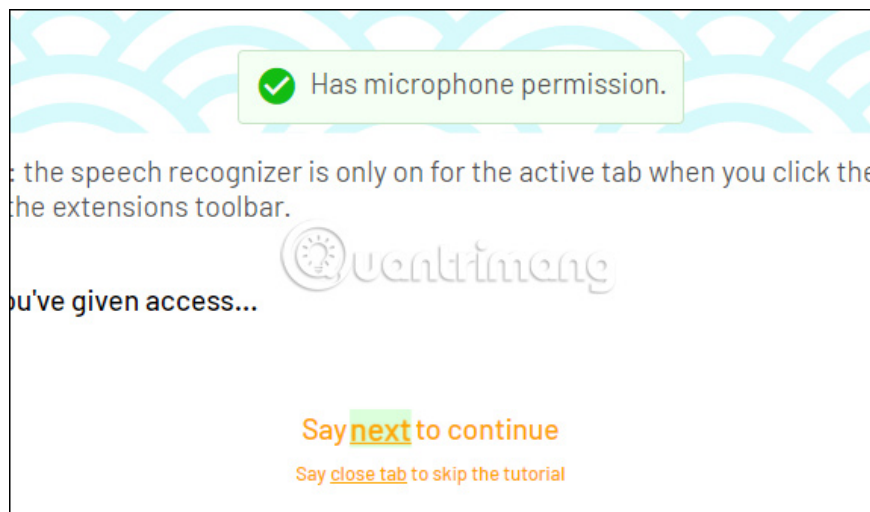

Next, the user will see the languages ??that the utility supports to use in the browser. By default English (English - US) has been selected.

Step 4:

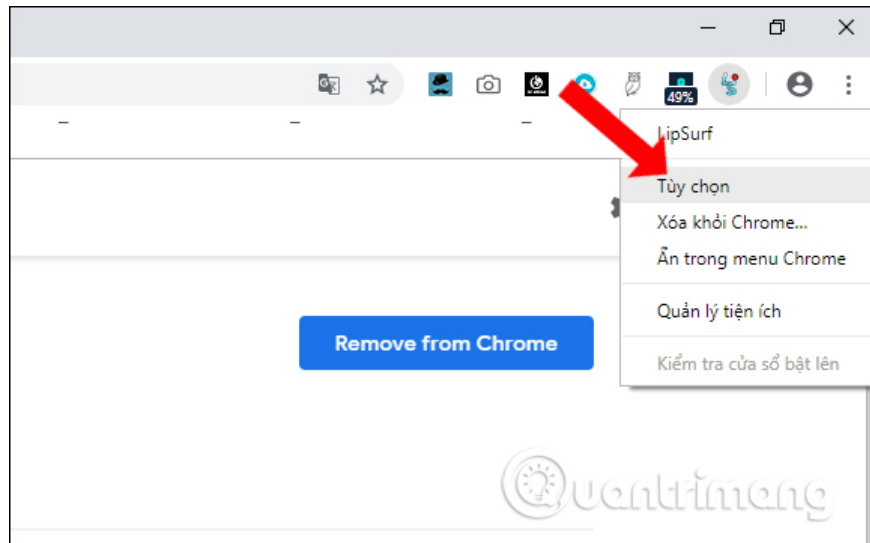

Now **tell Next** to test the utility's voice control capabilities, and switch to the next page.

The following pages will show how to use the voice commands while browsing the web. We can see later in the Options section.

Step 5:

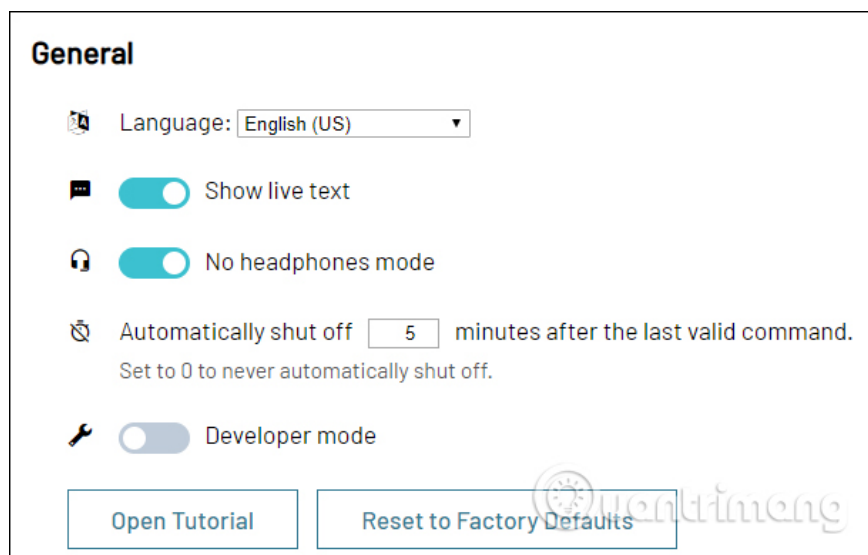

To view the voice commands when browsing the web, **right-click the utility icon** , click **Options** .

Step 6:

In the new **General** interface you will have some settings when using the utility. Users will be given the option to automatically turn off LipSurf. The default will be 5 minutes, or may increase or decrease depending on the user.

If you want the utility to work continuously, switch to 0.

The commands are divided into different groups. In websites visited on Chrome, users will have a number of common usage commands.

1. Auto scroll / Automatic scroll: Automatically scrolls the page.
