

# How to build Fischl - Princess of Sin in Genshin Impact

Although only a 4-star hero, Fischl's real power is as terror as the current 5-star heroes.

Fischl - The Princess of Sin is one of the most popular and easy to find archers in early Genshin Impact with his skill set Fischl is a versatile option that can coordinate well with a variety of compositions.

Usually gamers often build Fischl in the direction of support to take Lightning elemental damage in coordination with Fire-type dps to form an Overreaction, but actually, outside of support, Fischl can be one of the The strongest main damage with the ability to deal tons of instant damage.

Let's take a look at how to build Fischl in this main damage direction.

## Fischl's top priorities

Fischl is one of the most popular archers today in Genshin Impact with a very special skill set with the elemental skill Night Bird (E) which summons the black crow, Oz and continuously strikes. elemental damage to enemies' heads and his rage ability Shadow Illusion (Q) allow Fischl to move quickly in Oz form and deal Lightning damage to enemies along the way.

However, the rage skill only deals damage once, so it is usually only used for Fischl to extend range as well as choose the right position to deal long-range damage.

Therefore, if you want to build Fischl in the direction of support, gamers need to maximize skill (E) to deal elemental damage to the main Fire-type damage such as Diluc, Klee then stuffs the skill. And if you want this

haughty princess to become the main damage player, you should prioritize to maximize Normal Attack to maximize physical damage.

In addition, gamers need to prepare early from Little Dang Thao (collected in Mondstadt), Arrows (From Archer Hilichurls), Tu Tinh and Lightning Prism (Original Lightning) to break through the character. As for Thien Phu (Talent), the Lecture, Instructions, Philosophy of 'Poetry' are the most important materials to enhance the strength of the Sinful Princess.

## Equipment and Sacred Relic

Fischl's main weapon is a bow, but depending on the will and dignity of the gacha, gamers can use the Bow of Lightning with ample damage if he wants Fischl to be the main damage or the Tay Phong Bow with the ability to recharge. Quick element makes Fischl easy to use fast elemental skills and rage. Thereby, the Palace of Lightning will need a large amount of Light / Lava / Ice Pillars of the Frozen Forest and Tay Phong Palace will need Chains / Iron Ropes / Lion's Fangs to break through weapons.

Lightning Bow is the best and easiest option to find in a 4 star bow set

In addition, the Holy Relic is also one of the difficult problems that gamers have to consider when playing Fischl and most gamers choose the Holy relic of War to start.

Then, if you want Fischl in the direction of support, the Rite of the Ancient Seven and the Like Thunder Wrath are the two most popular options, but if the gamer needs a powerful vegetarian archer, equip her. a set of Blood-stained Martyrs of the Closing Ceremony of Enlightenment Ceremony or Knight.

Besides, if you want to go in the direction of Hybrid, you can combine 2 items of Giac Du Sy and 2 items like Thunder Wrath or 2 Giac Gladiators 2, Relic 5 stars more than Cuong Chien (4 stars).

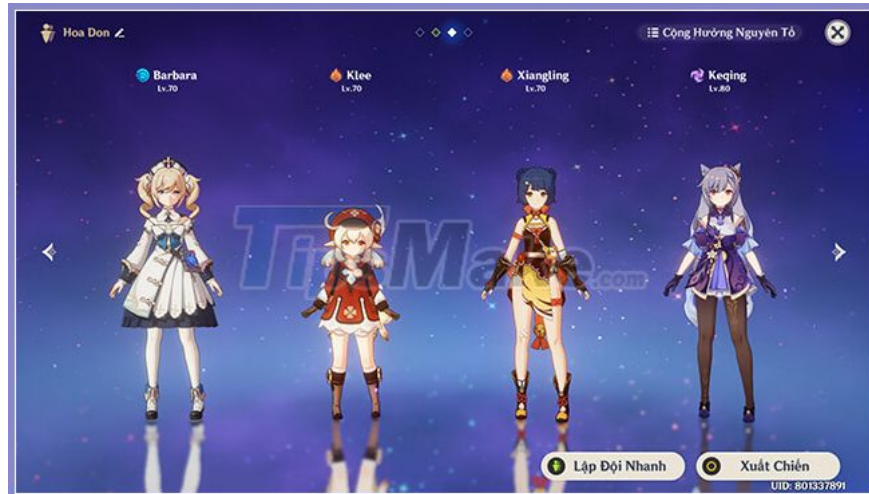

In addition, if the damage and crit ratio can be balanced, the Fischl Relic Fischl's critical damage will be a real nightmare with damage not inferior to Keqing (5 stars) Venti (5 stars)

## Fischl's ability to overcome and coordinate the squad

Basically when fully equipped with weapons, Holy Relic and has a destiny 4 onwards, Fischl can completely be a safe choice to clean up the secret when it can both cause physical damage and Lightning, both able to recover through the Wrath skill (the bow of the face of 4 each time Fischl uses Fury after the end heals her by 20%).

Therefore the best formation to coordinate with Fischl must have 2 Fire elements to activate a 25% increase in attack power, Moi recommends the following prime formations and gamers can flexibly change depending on dignity turned Gacha.

### Lineup Thuy Hoa Loi:

With this formation, the main damage factor is still Fischl, but with good support from Bennett combined with Fire main damage Diluc or Klee and recovery of Barbara or Qiqi, this will be a comprehensive lineup. and best optimized for Fischl's raven-drop combo.

At the same time, gamers can flexibly replace other Fire elements more easily such as Amber, Xiangling if the conditions for Gacha to not allow.

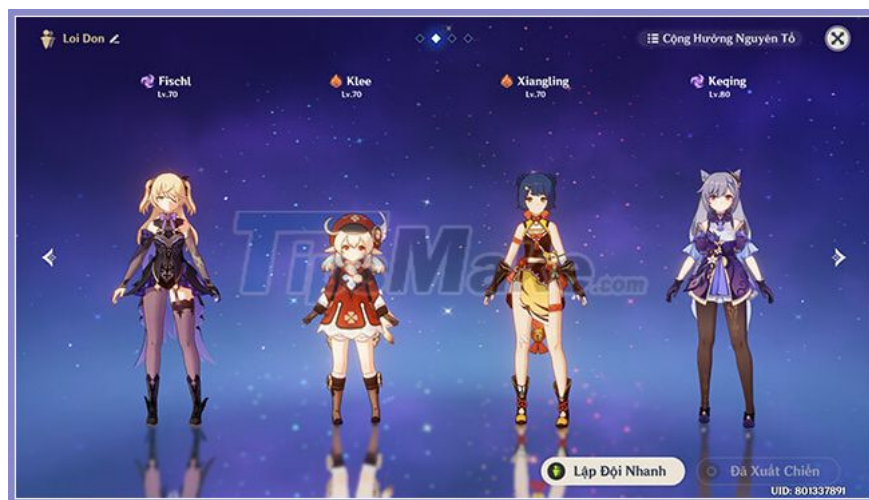

### Lineup Phong Hoa Loi:

Fate is also an important factor for Fischl to reach the threshold of strength no less than 5-star seniors

Similar to the Thuy Hoa Lei formation, the Phong Hoa Loi formation is more inclined to attack wide and elemental skills more when diffusing the Overload effect (Lightning + Fire) combined with recovery from Jean or Venti. However, this is also a team that requires more dignity when Jean and Venti are both difficult 5-star heroes at the moment.

### Lineup Lightning Fire:

Basically, this is a comprehensive optimal damage and elemental lineup with 2 buffs from 2 Fire and 2 Lightning, and gamers can easily coordinate 2 Fire like the Water Fire or Thunderstorm formation. But since there are quite a few heroes that can be used in the position of Lightning support right now, if you play this formation Fischl should be in the support position.

Also, despite optimizing buffs and bonus damage thanks to elemental reactions, the 2 Fire 2 Lightning lineup is quite poor in recovery, so this is almost an all in gamble and only gamers. Full confidence in his new skill can play this squad.

## Epilogue

Fischl can fully assume the position of main damage and is the perfect choice to bully Dragons, Wolves every week. However, in order to optimize this girl's power and replace the other 5-star main damage, gamers need to raise their destiny, and Fischl's Holy Relics is also extremely difficult to build without. Early preparation combined with the luck of upgrading the 5-star Sacred Relics.

Therefore, gamers need to carefully consider the situation as well as resources before deciding to choose the Princess of Sin to follow in the upcoming 1.1 version.
