

# How to build the DTCL Secret Team DTCL season 3

The direction to build the DTCL season DTCL Season 3 is quite flexible because this squad can combine well with many different races.

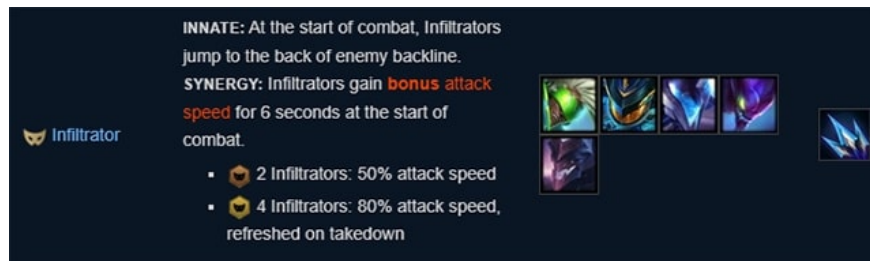

The Secret Secrets in the Arena 3 of Season 3 act similarly to the Assassins in Season 1 and Season 2. But this time you will have many options for the top to keep the enemy team busy attacking offensive while the General Mat Tham will be active in the back row.

In general, the Secret Detective will have the ability to survive and deal great damage in the team. Also the DTCL Season 3 Secret Team is quite easy to build because you don't need a lot of Secret Team in the team.

In the guide to building Secret Team squad below, you will be selected the strongest synergies and DTCL champions in Season 3 to work together to create one of the strongest DTCL squad 10.6.

## The speed systems combine well with the Truth of the Secret Arena 3 season

### General Secret Detective

Secret Detective automatically jumps behind enemy formation, gaining an additional 50% attack speed for the first 6 seconds of the match. Similar to the Assassin generals Season 1 and Season 2.

Buffs synergies instead of getting critical damage like the Assassins, then the Secret Detective has the ability to receive additional attack speed every second. When all 4 Secret Secrets are applied, the effect will refresh every time the enemy is defeated.

1. **2 Secret Detective:** Activate an additional 50% attack speed
2. **4 Secret Detective:** Activate an additional 50% attack speed + restore effect after defeating the target

### General Tien Phong

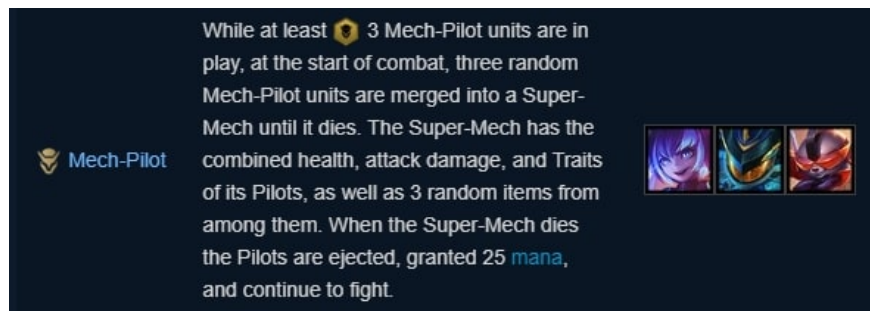

Pioneer is not only good at his tank duties, but also has the ability to control and deal very good damage to the front lines of the enemy. Especially Wukong can stun the enemy team and it will be a good opportunity for Jhin as well as Shaco.

General Tien Phong will gain additional armor.

1. 2 Pioneer: Increases Armor by 70
2. 4 Pioneer: Increases Armor by 300

## General Giap

The only link between Secret Ages and Armor is Fizz. And you can combine the Giap generals into Super Armor for the frontline position.

Pilot's synergy buff effect: At the start of a fight, 3 Co Giap heroes can merge into a champion, called Super Armor and will survive until destroyed.

## Dark Star General

The secret generals if combined with Dark Star will give a huge amount of damage. Especially if you already have Jhin and Shaco in hand.

When a Dark Star dies, the damage increase effect and stack effect will be transferred to the nearest Dark Star hero with bonus damage:

1. **3 Dark Star:** 50% bonus damage
2. **6 Dark Star:** 80% bonus damage

## Advantages of the Secret Team

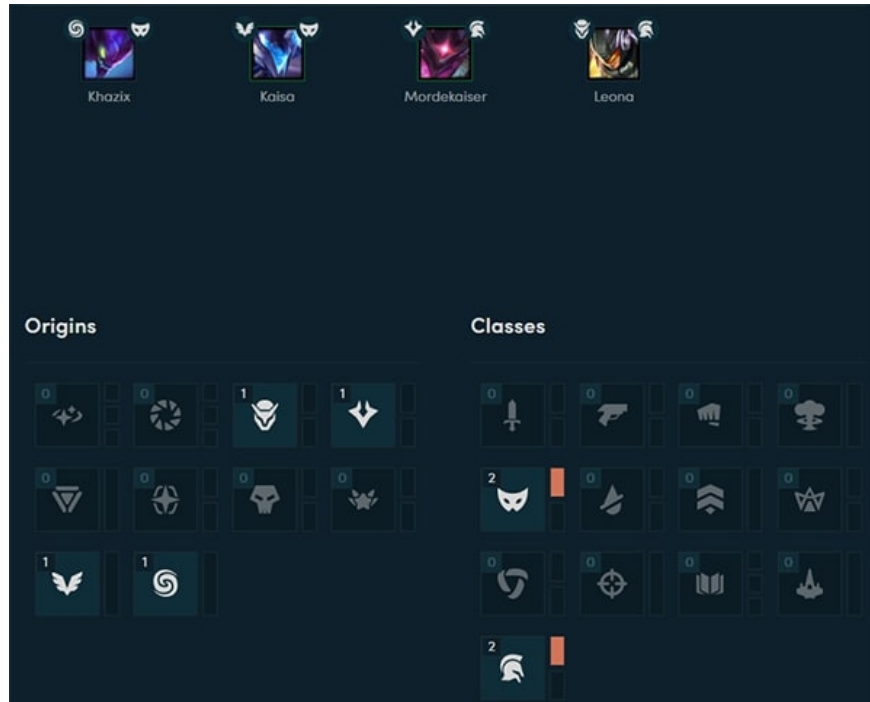

1. It is easy to get the winning chain at the beginning of the game because being able to get the synergy buff is not too difficult.
2. If you go up to 3 stars for champions that are cheap against your team, you will have a good tanker.
3. Huge damage from Shaco and Jhin
4. Can combine with many other tribes.

## Weaknesses

1. In the late game, if the main generals cannot be found, the chance will be weak.
2. Need Gold Shovel to complete the squad.

## How to build a squad of Mat Tham early in the match

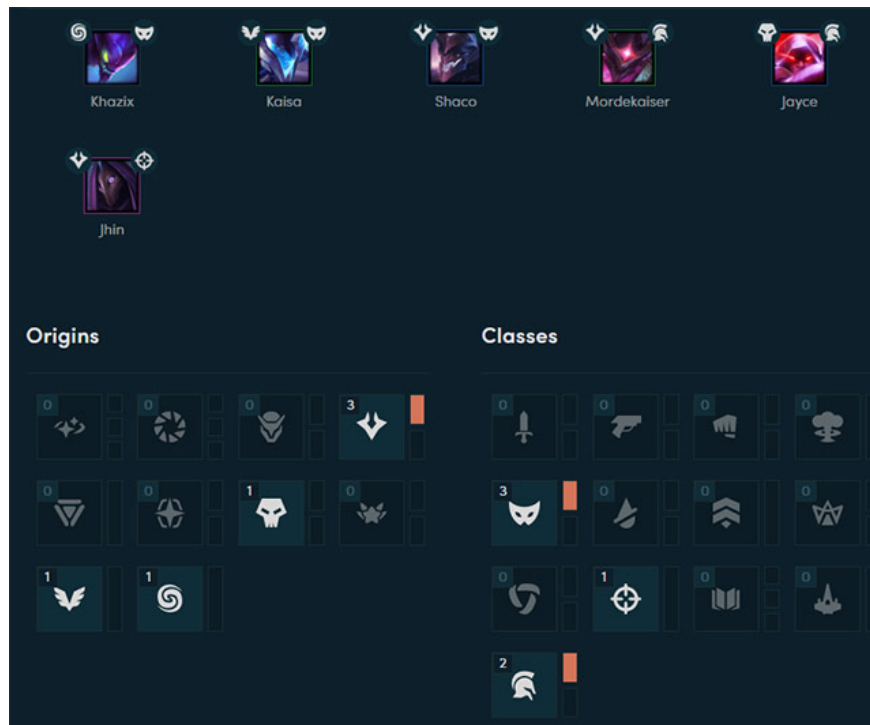

In the early game, you can use cheap generals to have buffs synergies. You can recruit Leona and Mordekaiser to add armor to Pioneer and turn to build Dark Star later.

In general, this phase, the damage and resistance of your team is quite balanced. Just loading Leona, Mordekaiser, Kai'Sa and Kha'Zix is enough for the team.

If you do not see Mordekaiser or other proactive champions. You can take Rumble and Annie to be at the top and then find Fizz to pair into Super Armor as a tanker later.

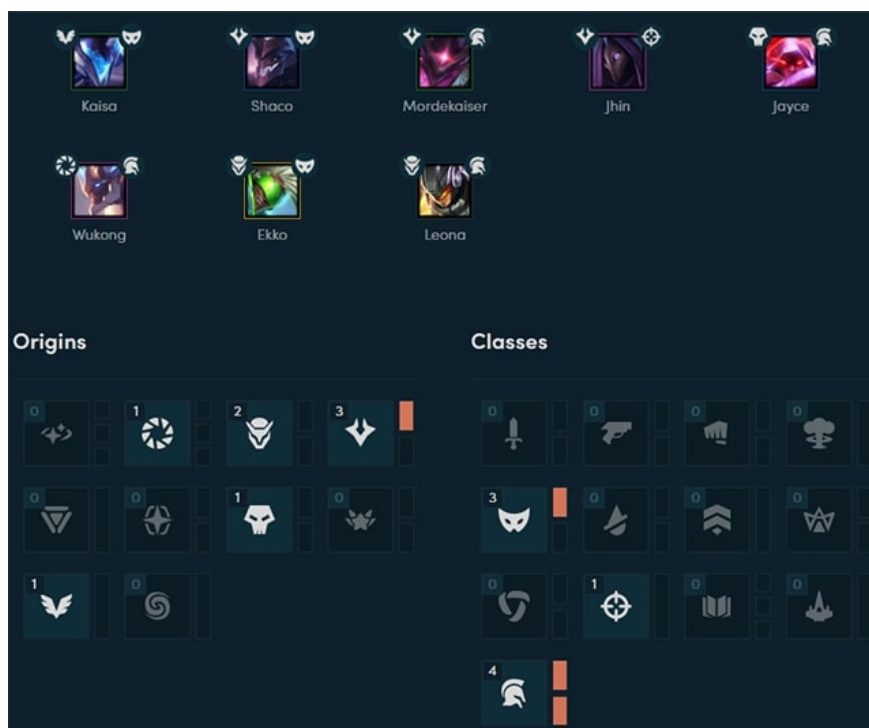

## Mid-Battle

Now you have 3 Dark Star combined with 3 Secret Detective accompanied by 2 Pioneers for the team. It can be said that the above lineup is not an ideal combination, but if you try to save and level up quickly in the early stages, you can see Wukong and Jhin appear at this stage.

By then, you will have more options to complete your squad with 4 Secret Detective - 4 Pioneer with the Golden Shovel. Or in the direction of Secret - Body Armor like above.

## Endgame

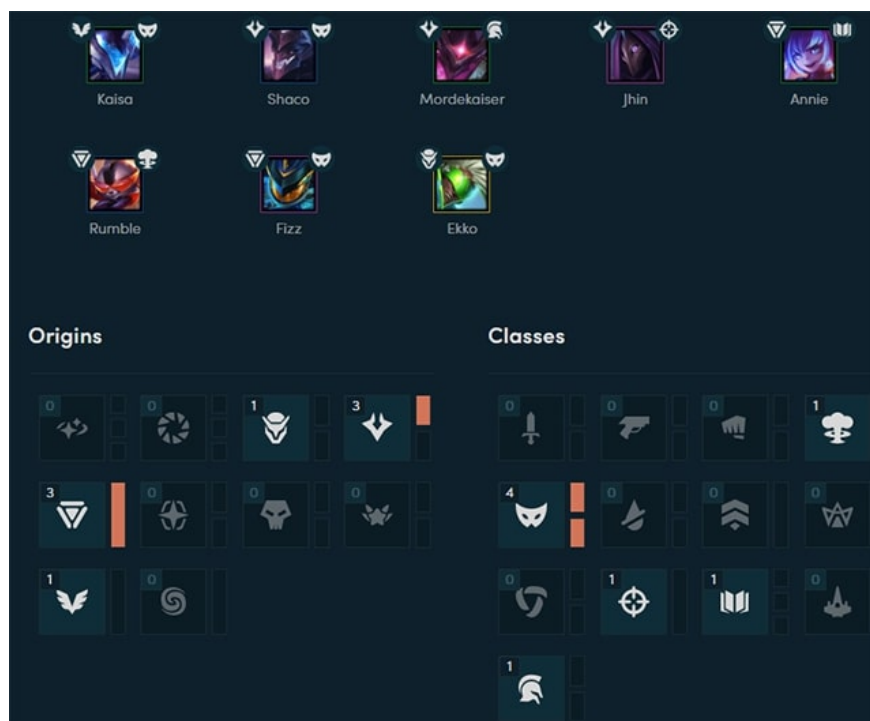

Now you will have the following generals:

1. 4 Pioneers: Wukong, Jayce, Leona, Mordekaiser.
2. 3 Dark Star: Mordekaiser, Shaco, Jhin.
3. 3 Secret Secrets: Shaco, Kai'Sa, Ekko

This is the final squad if you decide to follow 4 Pioneer - 4 Secrets provided you have the Secret Claws, the speed of Secret Secrets combined with the damage of Dark Star and the control of Pioneer causing the enemy team to wait for death.

However, most of the main damage champions in the team only attack a single target. Therefore, if you do not get 3 stars so that at least 2 champions in the resistance line are Leona and Mordekaiser, it will be a bit difficult for the defense to hold for the champions to do their damage.

Also, prioritize equipping Shaco as this will be the main carry in the team. And he is also one of the most damaging champions in the current version DTCL 10.6.

And if you earn Super Armor, then just finding Ekko is enough of 4 Secret Secrets. At this point super armor will play the role of a top tanker and both a good damage dealer. Despite the lack of control like the 4 Pioneers above, Super Armor will hold well so that the main damage generals in the team "pay" the remaining champions on the field.

Equipping you should prioritize building damage items for Shaco. In addition, if there is defense, throw it to the generals in the resistances such as Dragon Claw, Angel Armor, Blood Armor, Thorn Cloak, Magic Scarf .

Shaco: Blood Sword / Infinity Sword, Spear of Shojin / Angelic Staff, Angel Armor.
