

How to buy a good hair dryer and the cheapest price 2018

How to choose a hair dryer is delicious, good and cheap, you know. Following META will suggest you some information to choose the best, cheapest dryer now!

Hair dryers are essential equipment in every modern family. Hair dryers in addition to drying hair, many unexpected features you may not know. So how to choose to buy cheap hair dryers but still ensure quality.

Principle of operation of hair dryer:

Hair dryers have the same principles as other types of appliances such as electric cookers, filament bulbs . When electricity flows through the resistor coil will be heated and radiate a lot of heat to create wind to help dry hair and devices. suffered.

Buy quality hair dryers to protect your hair

Use of hair dryer:

1. Remove the glue of the sticker: just use a dry-hair dryer, the hot air will peel off the glue and you can easily remove the label without leaving a trace.

2. Adjust the frame size: heat the two ends of the frame and adjust it to fit the head. Just use this way for plastic frames that are not too expensive.
3. Clean the wax: use a hair dryer to dry the wax back, then use a clean cloth to finish.
4. Make ice cream cupcake cake: use a hair dryer around the cream on low temperature and low speed. Remember to choose the cool mode of the dryer so that the ice cream does not melt. The cream will be shiny and look better.

Criteria for choosing the best hair dryer:

Design style:

There are currently two types of dryers that are a folding handle and a straight handle. Each type will have its own advantages, you can choose the right type. This type of folding dryer will be handy to carry on, but it will not be as stable as a straight dryer. Straight hair dryer is more bulky but it will be stable, without affecting the power cord, safe to use.

Some stick dryers are still stable, such as: Panasonic EH-ND30 1800W hair dryer, Panasonic Hair Dryer EH-ND21-P645.

Choose to buy a good hair dryer to prevent fiber and hair tangles

Speed ??adjustment switch:

The design of the machine comes in two forms: a switch, or a rotating electric lock. Switches will be easy to replace and suitable for everyone.

Modified form of electric lock with modern design, speed control, but components are difficult to replace and easily damaged.

In addition, you should choose a machine with many temperature levels or different drying modes. The dryer has a lot of drying speed in suitable situations such as fast or slow drying, weak or strong hair . The dryer meets demand, at least two cooling and drying modes are required.

Choose to buy a hair dryer with adjustable mode to use it properly

Noise test:

For individual dryers, not professional drying, noise will not be loud. If the device has a loud, shrill, or a sense of entanglement, it is often easy to be damaged by a motor, or it is jamming something inside. Therefore, do not buy hair dryers like this.

Buy a machine with safety and overheating parts:

You should choose the type of dryer that has an overheating device for safe use. The protection against overheating will stop the heat blowing immediately when the temperature is too high to avoid burns or damage to hair due to high heat. In addition, there is a limit to fire and explosion, damage to the components burned by high heat.

Should choose the type with superheat to protect the hair

Material of the machine:

You should choose a shiny, scratch-free case, strong connection, no leaks.

Components, screws need to be fully used with safety. Check the drying mode control feature to see if it works normally. The control buttons, lights must be used well, the words, patterns on the body are not blurred, not easy to erase.

Operation capacity of the machine:

You should choose a hair dryer as high as possible. Because prolonged exposure to hot wind can cause hair to dry out. Large capacity helps you shorten the time to dry hair, better protect hair. You should choose a hair dryer with a capacity of over 1,000W.

Select genuine products:

You need to learn and choose genuine, branded products to ensure safety when using. Select products of brands such as Panasonic, Philip, and Bluestone . to not cause drying, hair fibers. Buy genuine products you will have a warranty card, and specifications for easy use.

The above are suggestions to buy cheap, good medium-sized hair dryers suitable for many users.

How to use a safe hair dryer:

1. Carefully read the enclosed user guide.
2. Before drying your hair, it is recommended to dry your hair to limit split ends and long-term exposure to dry your hair.
3. The optimal drying temperature is 57 - 58 degrees Celsius, you should adjust to the hair protection and always maintain at this temperature.
4. Move the drying position continuously without drying for too long.
5. Using a styling dryer will help the drying process be more efficient.
6. Avoid using the device too long, only use a hair dryer for about 10-15 minutes.
7. Clean the machine regularly to make sure it is always running smoothly.
