

How to change computer wallpaper quickly - simple - easy operation

Changing your computer wallpaper helps customize your desktop interface to your style - creating excitement when working, increasing excitement when playing games! For those of you who are new to computers, see the instructions on how to change your computer wallpaper below from HANOICOMPUTER!

Through many versions, the operations to change the computer wallpaper seem to have not changed. Similar to old versions such as Windows 7 or Windows 8, on Windows 10 you just need to right-click on the image you want to set as wallpaper and select Set as desktop background. And if you want to install more features for the wallpaper, the settings section will give you more options.

How to change desktop wallpaper directly from image

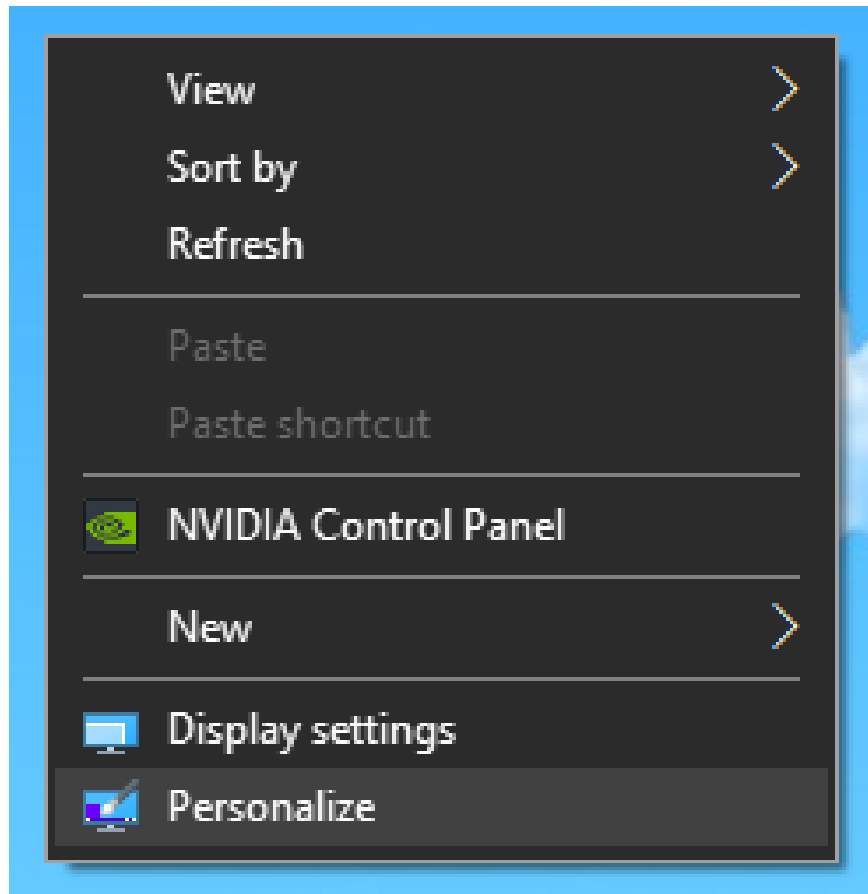

If you want to change your computer wallpaper quickly, this is the way that most people use. Simply, you just need to right-click on the downloaded image that you want to set as the wallpaper for your laptop - computer and select Set as desktop background. After completing this operation, your desktop wallpaper (Wallpapers) will be changed immediately.

How to change computer wallpaper in Settings with many customizations

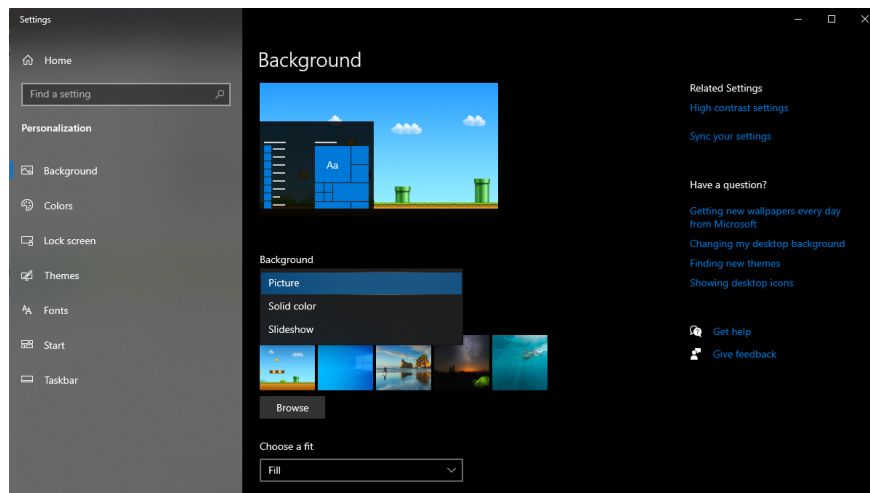

Instead of using available images, in Settings we will have more options if you want to use color wallpapers, set the image mode you want to display, or change multiple wallpapers according to the set time.

Step 1: To open Settings to set up your computer wallpaper, right-click on the Desktop screen and select **Personalize**.

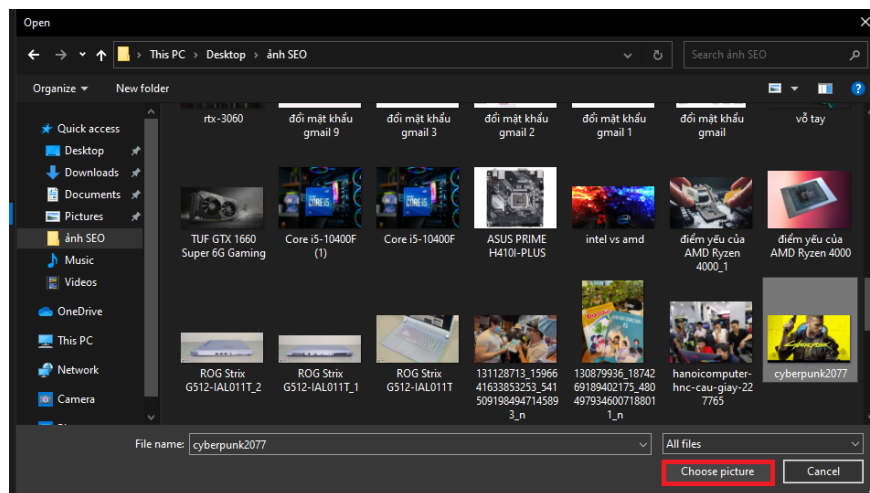

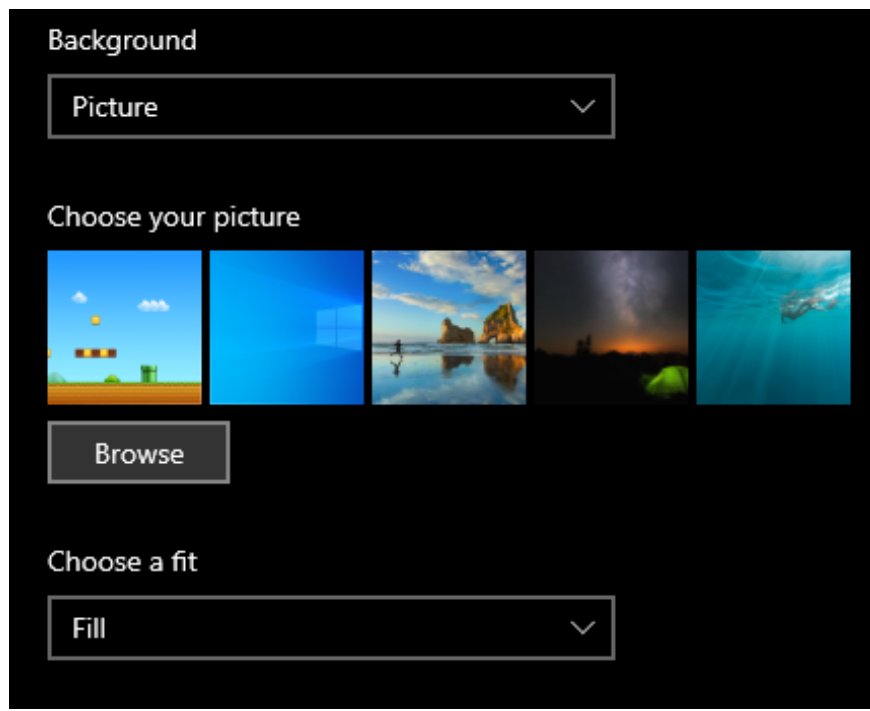

Step 2: In the Settings section, we have many customization options for the Background:

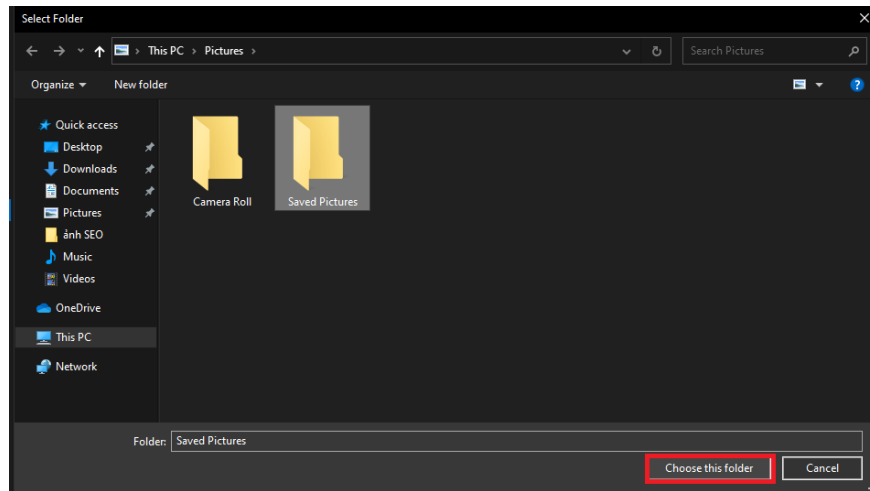

1. Solid (color image)
2. Picture (selected image)
3. Slideshow (images displayed in slide format)

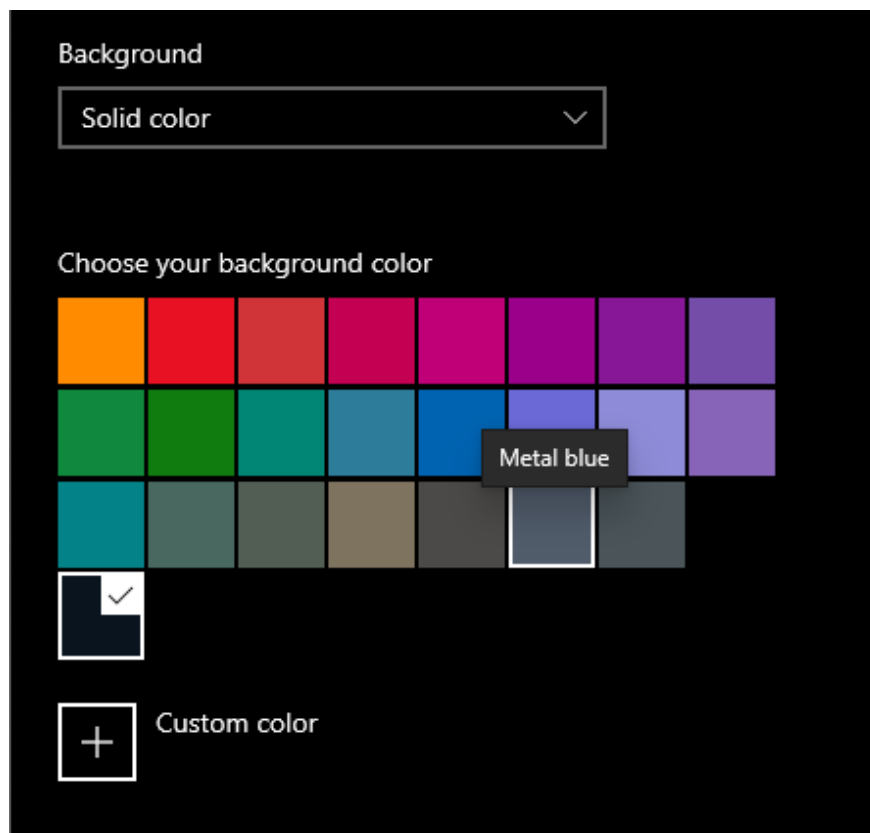

Step 3: If you choose Picture format, you need to set the path to the selected image stored on your computer by clicking the **Browse** button > Select image then click **Choose picture** to change the wallpaper for your computer or laptop.

Step 4: If you want to display multiple images as desktop screen, select Slideshow mode. Similar to displaying one image, in this step we need to link to the folder containing the images you want to set as wallpaper (you put all the images in 1 folder) then select **choose this folder**

And finally, if you want to set your wallpaper by color, the Solid Color option will help you do that.
