

# How to change countries on Microsoft Store

Changing countries on Microsoft Store will help you download apps or cheaper games in different Store areas.

Along with Google Play, the App Store, Microsoft Store is an application store developed on Windows, downloading games and applications to Windows computers or Windows Mobile devices. Each country will have a Store with different app content and prices. Changing the country on Microsoft Store will help you download games or applications at lower prices according to the manufacturer's notice.

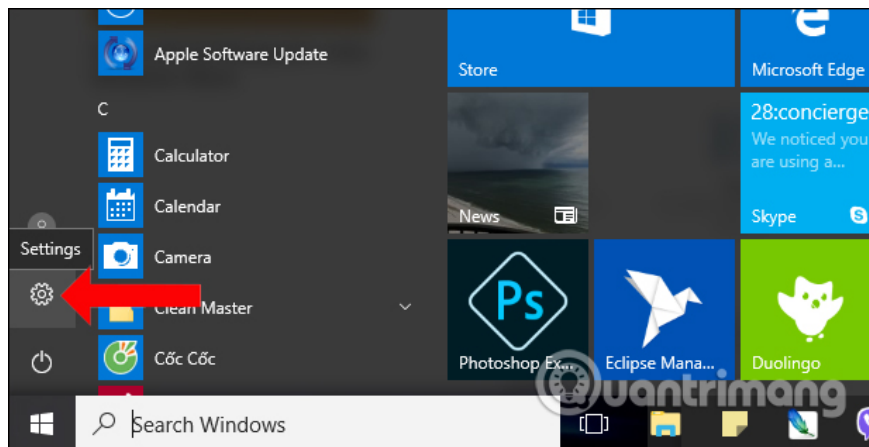

Not as complicated as changing the country on the App Store, to change the country on Microsoft Store is much simpler. The following article will guide you how to change the country on Microsoft Store.

## Instructions for changing countries on Microsoft Store

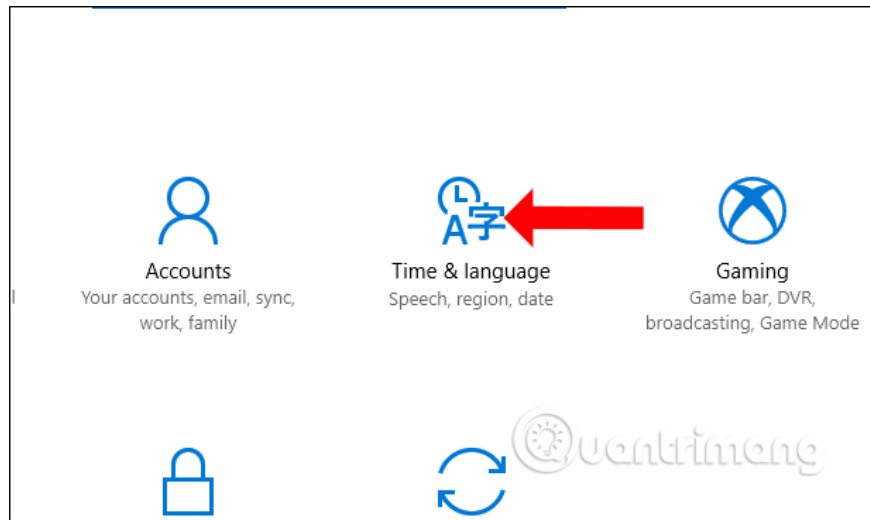

### Step 1:

You go to the Start button and click on **the Settings icon** . Or you can press Windows + I key combination to open the Windows Settings interface.

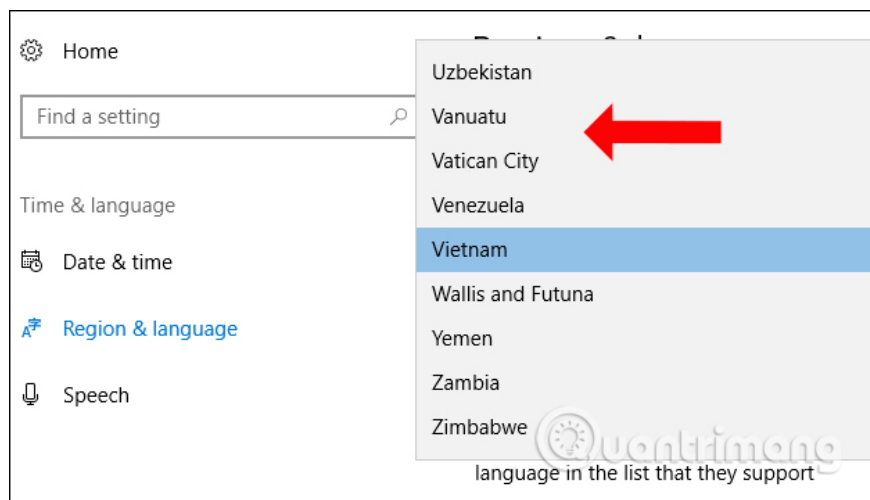

### Step 2:

In the next interface click on the **Time & Language** setting group.

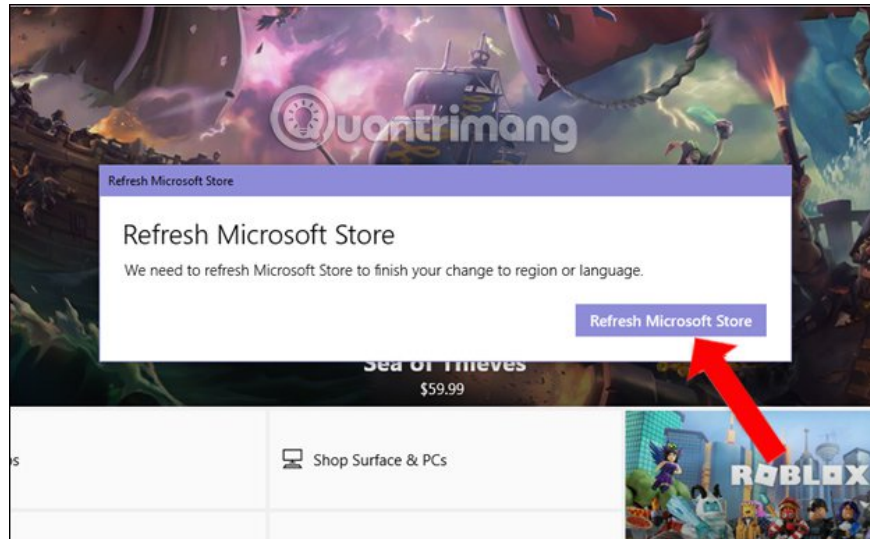

### Step 3:

In the list on the left of the interface select **Region & language** item. Next you look at the content on the right of the Country or region section, select the country to switch to.

When you return to Microsoft Store, you will see a message asking to reload the Store for the changes to take effect, click **Refresh Microsoft Store** . The content is changed according to that country and the amount of application downloads, if any, also changes.

As such, you can download games or applications on Microsoft Store if your country does not support, or at a cheaper price by changing the country on Microsoft Store. The content on the Store after the change will be displayed for Store in that country.
