

How to change Cydia iPhone home page interface

To change the Cydia interface, we can install some tweaks in the article.

The Cydia homepage interface through the upgrade of the iOS operating system remains unchanged and is defaulted to such colors and page content. For those who use jailbroken iOS devices, Cydia is an indispensable tool and regular access, so they feel Cydia's interface is too outdated. Tabs such as Sources (Source), Installed (Installed Tweak), Search (Search tweak) do not bring more information to the user, or the colors for the tabs, the background is too simple.

If the user wants to change the look of Cydia, you can use some tweaks in the article below. These crystals will change the inherent interface of Cydia as more information needed about popular jailbreak sites, color choices for menu or background, . Depending on the need to use that we change re-factor as you like. The following article will guide you how to use the tweaks to change the Cydia interface.

1. How to know if your iPhone is jailbroken?
2. How to change the Settings interface on iPhone
3. How to change iPhone audio editing interface
4. How to change the iPhone status bar without jailbreak

1. How to change Cydia interface with Renovare tweak

Step 1:

Refining Renovare free download on Cydia from BigBoss repository for iOS 11 devices that have been jailbroken. You go to Cydia to search or click the link below to install.

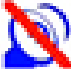

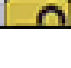

1. <http://apt.thebigboss.org/onepackage.php?bundleid=com.kushy.renovare>

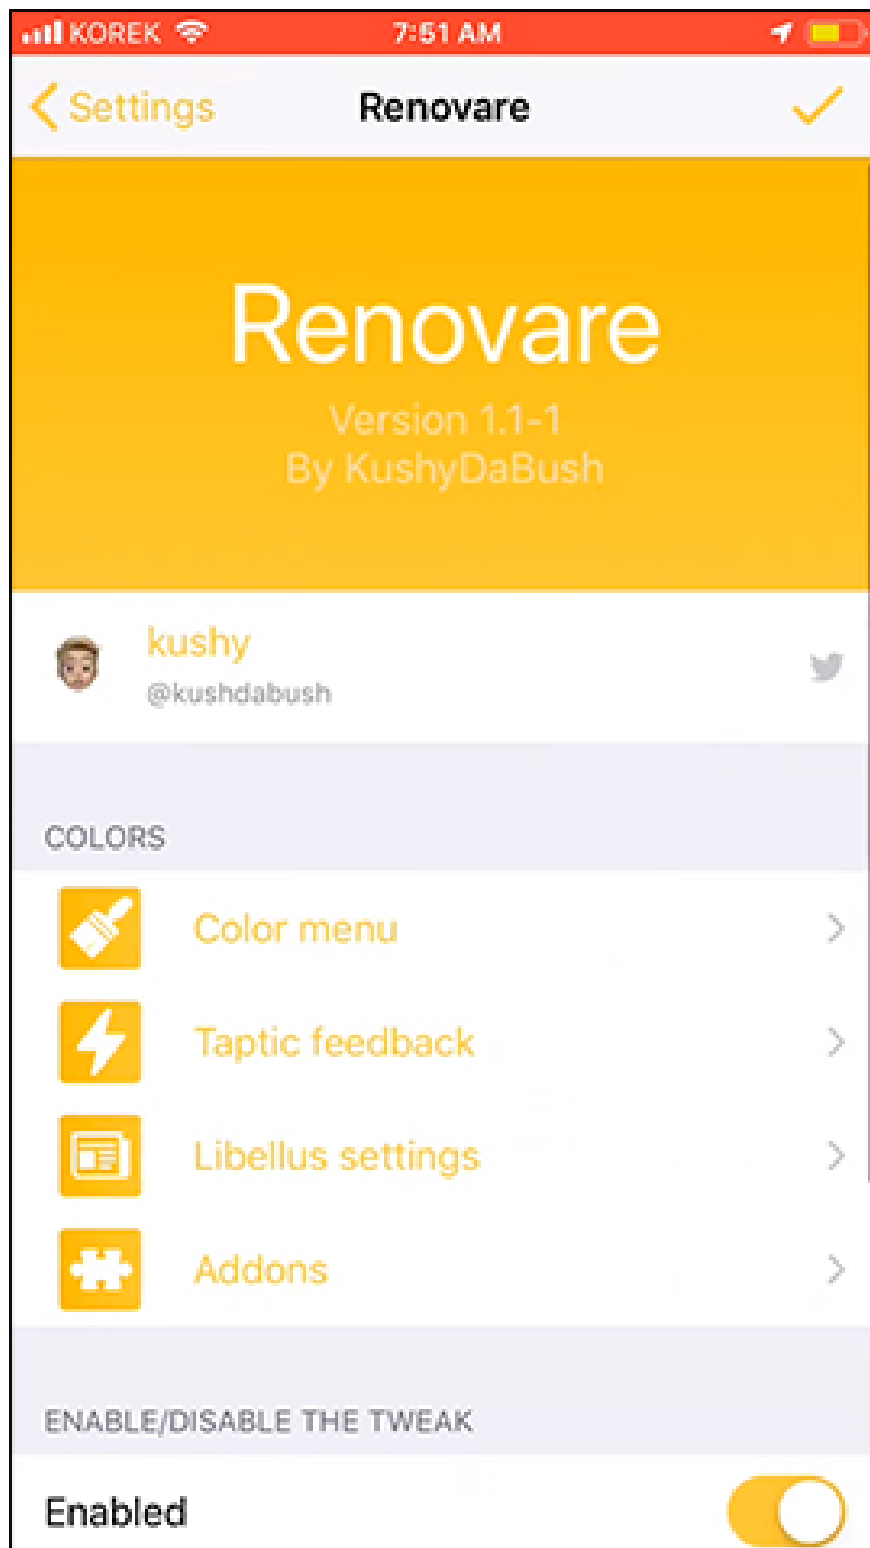

Step 2:

After installation is complete, go to **Settings** and then click on **Renovare tweak** to change the settings again. First, users will see the main custom item Color with 4 different items.

1. Color menu: Configure the menu color.
2. Taptic feedback: Configure tactile feedback.
3. Libellus: Configure the attached Libellus tweak. Libellus is also a tweak to change the Cydia interface, but in terms of information and content, instructions are shown in section 2 below.
4. Addons: Additional installation options.

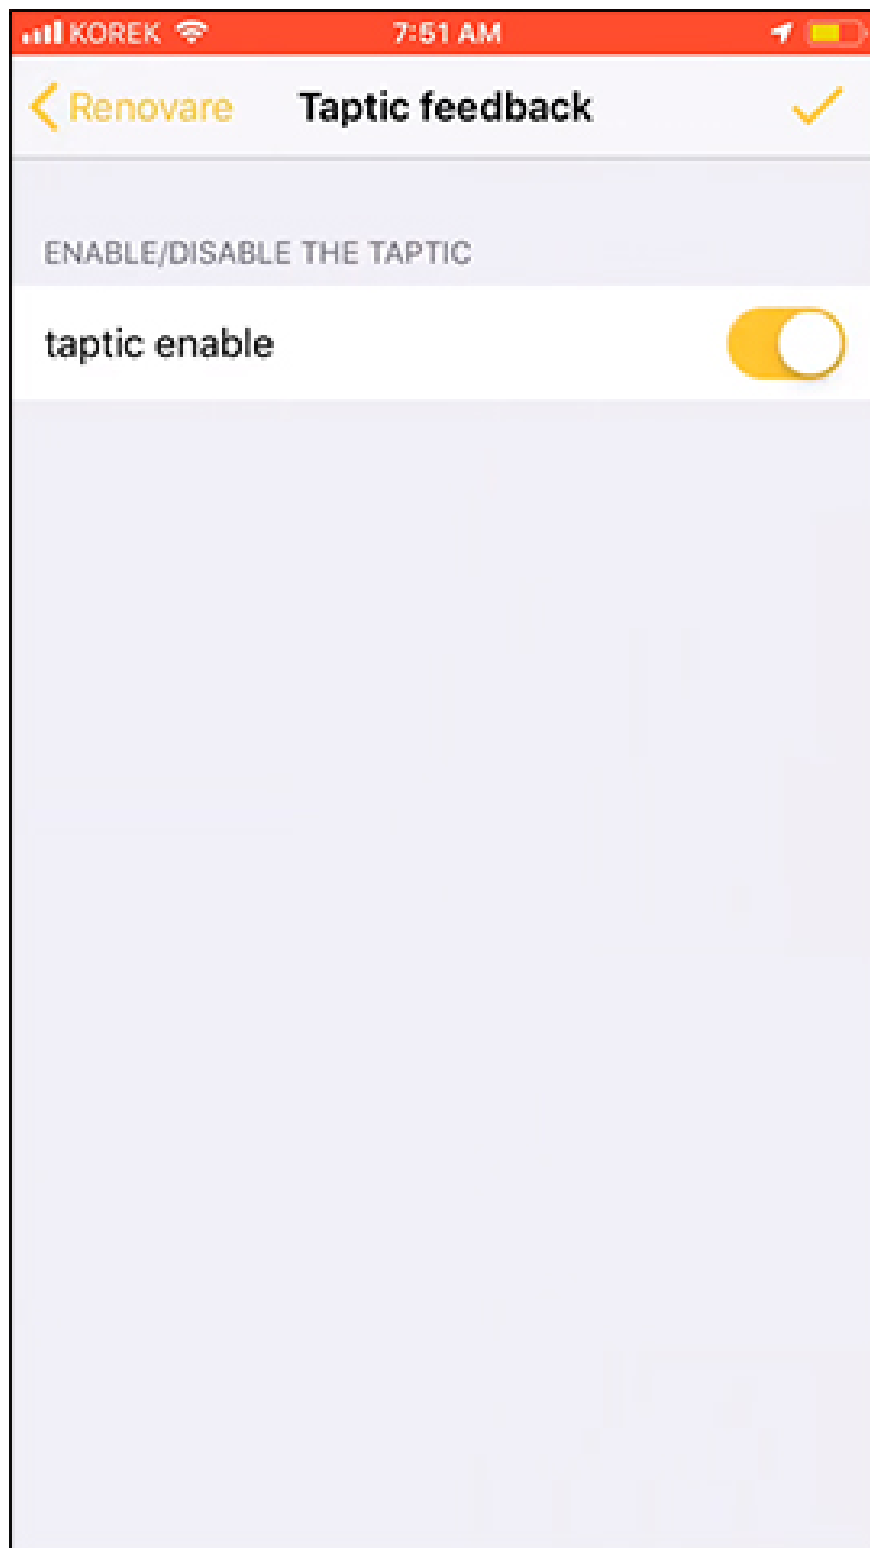

Settings

-  ModernDepictions >
-  NoLowPowerAutoLock >
-  NoTrackingPlus >
-  PencilChargingIndicator >
-  PullToRespring
-  renovare >
-  ShortcutEnabler >
-  Slyd >
-  SnowBoard >
-  Sonus12 >
-  SwipeForMore >
-  Tweak Count 2 >
-  >

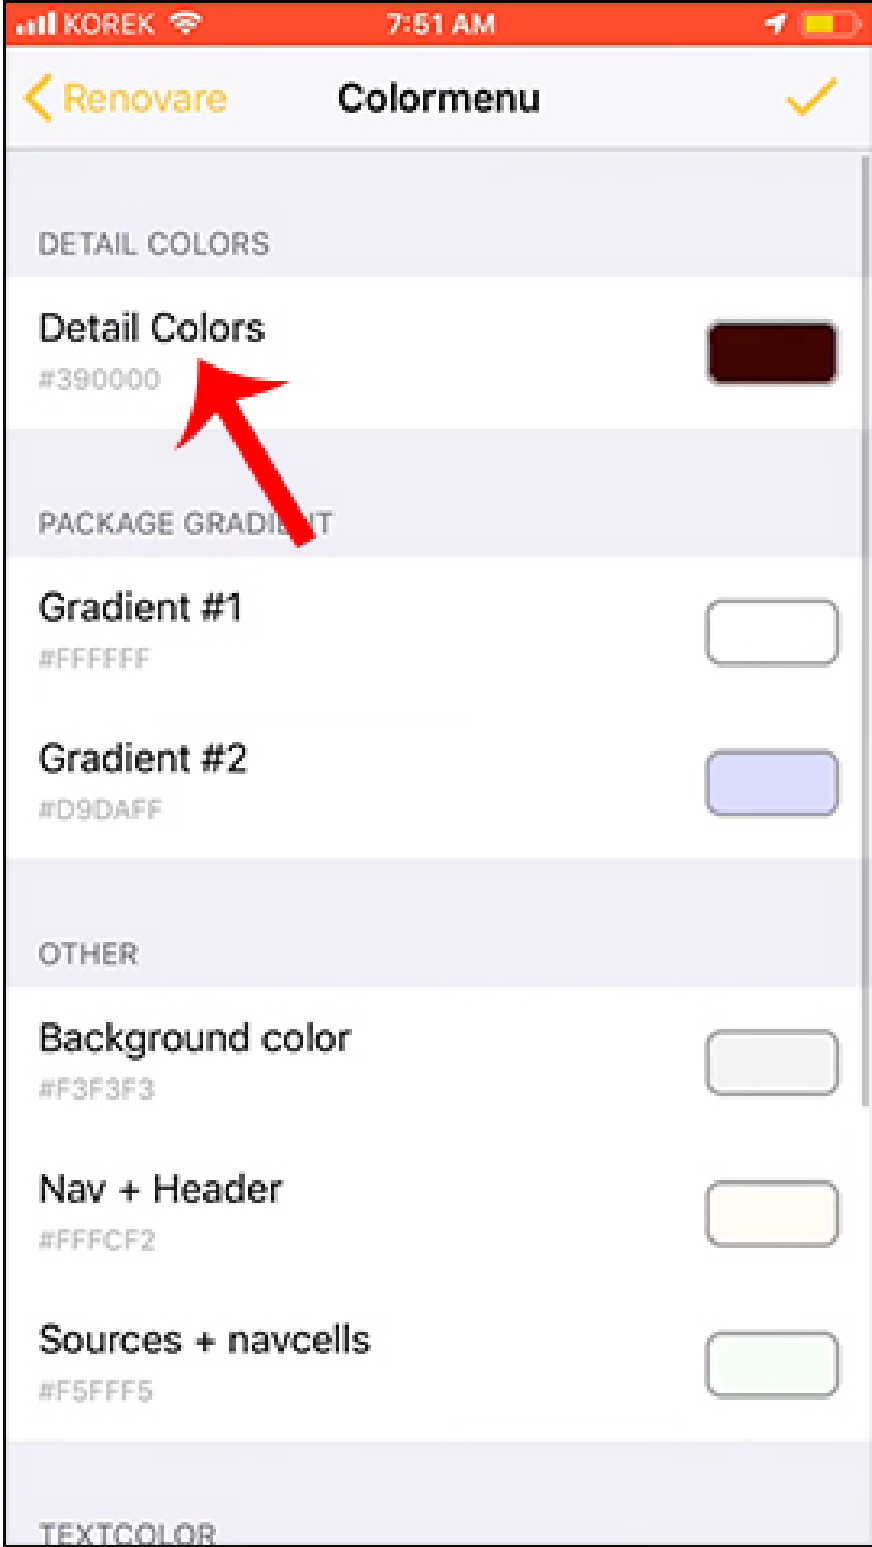

Step 3:

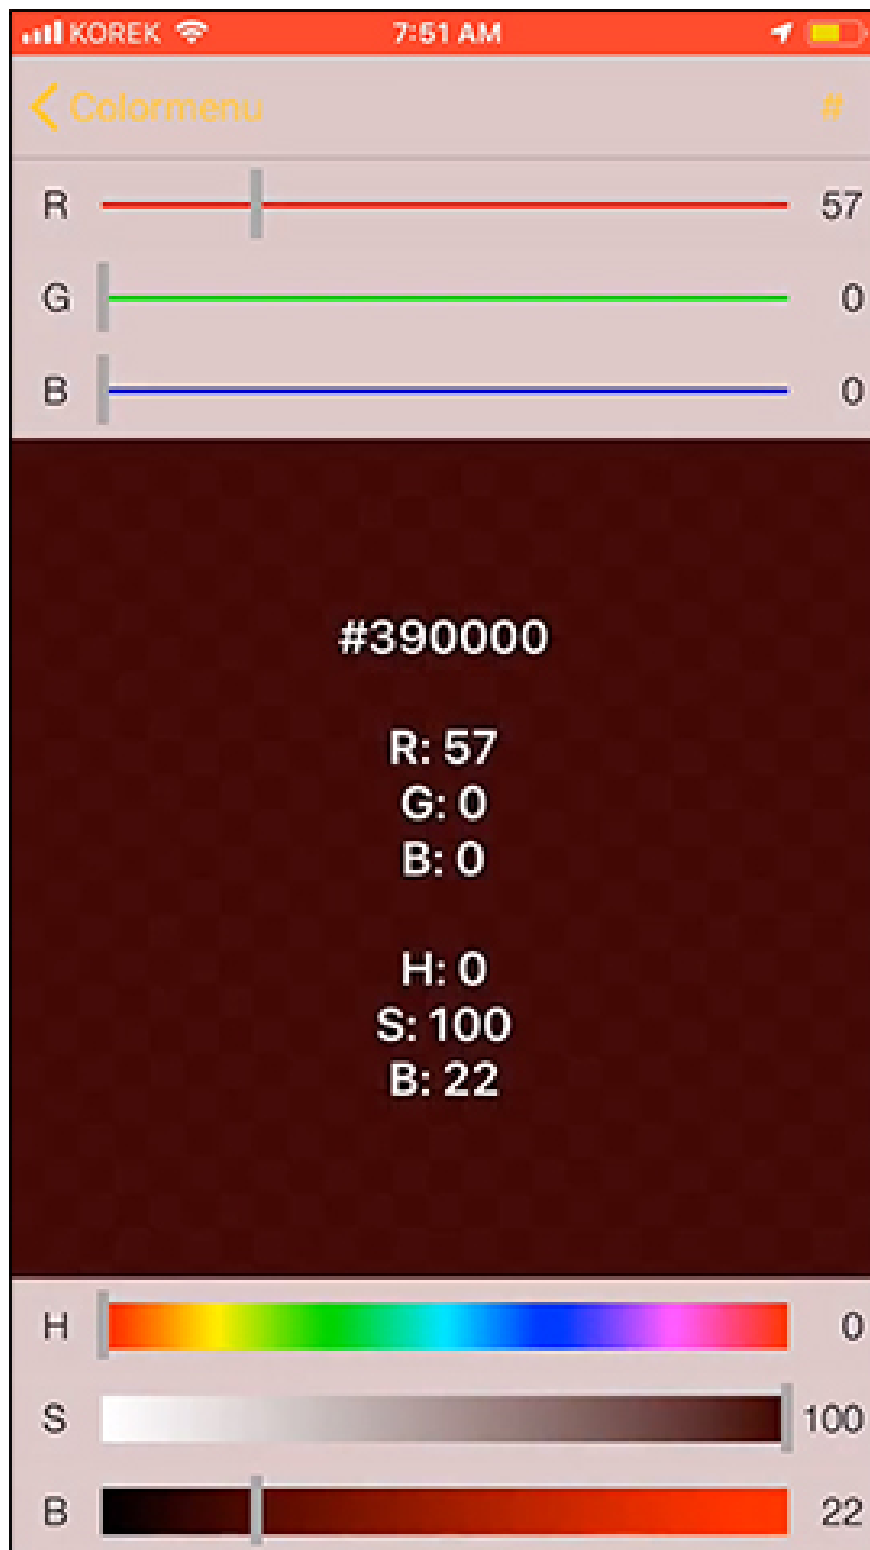

When clicking Taptic Feedback, tactile feedback can be turned on or disabled. The default is turned on when configuring the settings.

Step 4:

Next click on **the Color menu section** to edit colors for elements on the Cydia interface. In the color options interface, click the Detail Colors section to customize the color for Cydia. Display the color picker interface with different color adjustment bars.

Next we change the colors for the parts at **Package Gradient** .

< Colormenu

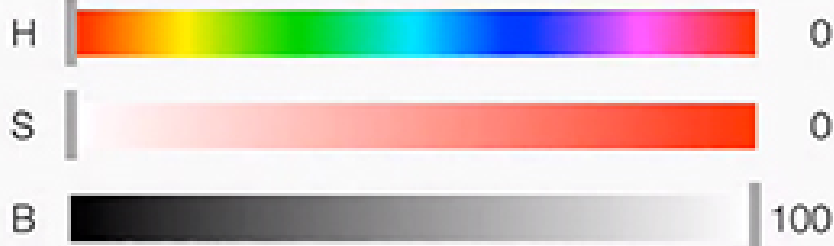

#

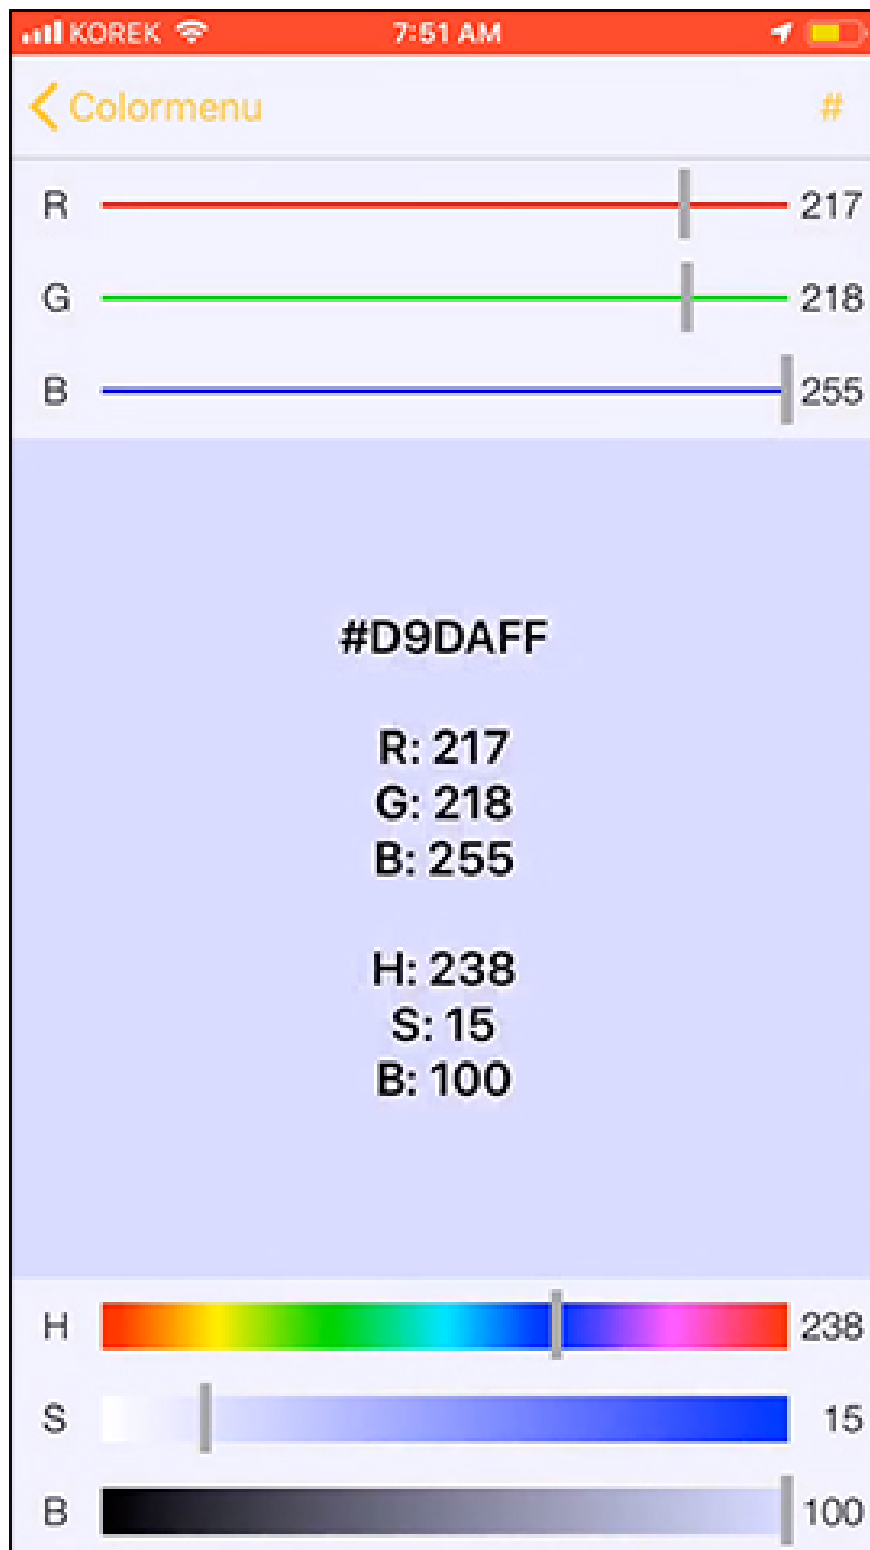

#FFFFFF

R: 255
G: 255
B: 255

H: 0
S: 0
B: 100

Step 5:

Continue to scroll down below, there will be some color correction items in Other sections such as Background color correction, Header color correction, Text color correction, .

After changing, click on the **check mark in the upper right corner** and click Yes to reload Cydia.
