

How to change DNS Freenom World on Windows

DNS Freenom World is a new DNS from Freenom provider, which helps users to access web speed faster and access anonymously without saving history.

One of the ways to speed up Internet access is to change DNS on the computer. DNS stands for Domain Name System, which establishes the correspondence between IP address and domain name. Simply put, it is when you access a website that will be converted to an IP address, with the aim of easily identifying each other on the network.

There are many DNS for users to choose, such as DNS Google, DNS VNPT, DNS Singapore, DNS FPT, . These DNS will help Internet access to be more stable, speed up access to websites such as Download Youtube videos, or visit blocked Facebook or other websites. In addition, there are many new DNS such as DNS Freenom World also help users speed up web access, anonymous access does not save IP address information.

Freenom is a provider of domain names and DNS addresses, supporting businesses to easily build their website content completely free of charge.

1. The best, fastest DNS list of Google, VNPT, FPT, Viettel, Singapore
2. Change DNS and how to use DNS to be able to surf faster
