

# How to change iPhone icon very simply without Jailbreak

Changing iPhone icons is very simple and we do not need to jailbreak the device, affecting the system. We can use many applications to change iPhone icons or websites that support changing iPhone icons.

Changing the iPhone icon is very simple and we do not need to jailbreak the device, affecting the system. We can use many applications to change the iPhone icon or online websites that support changing the iPhone icon. These applications will not interfere with the iPhone system and the implementation is also very simple. The following article will guide you to change the iPhone icon.

## How to change iPhone icons with X Icon Changer

### Step 1:

We download the X Icon Changer application for iPhone from the link below to proceed with the installation on iPhone.

### Step 2:

Then at the application interface, the user will **enter the name of the application whose** default icon you want to change. You can find the application below, or enter the application name in the search bar to find it faster.

We can change the iPhone icon for the settings application or the system default application.

### Step 3:

Switch to the design interface for the application icon you choose. Below the user will see some **new icons to replace** if you like, or we click on Photo to upload our own photo.

In addition, we can also **rename** this application if we want, by **clicking on the pen icon** to change the application name.

Once you have changed the iPhone app icon and name, **click OK** in the top right corner.

Photo

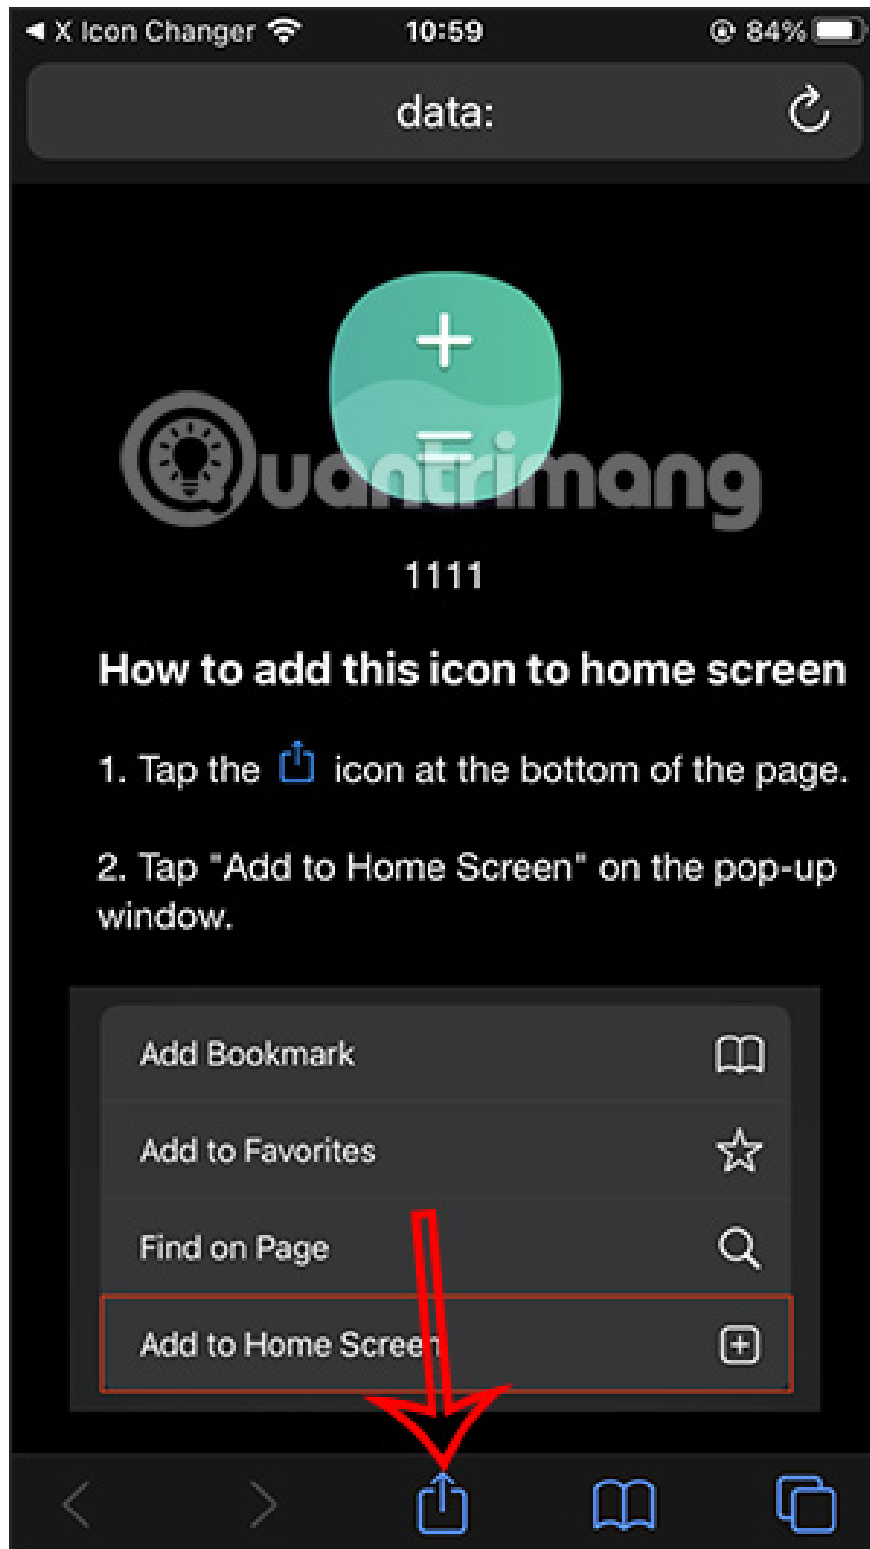

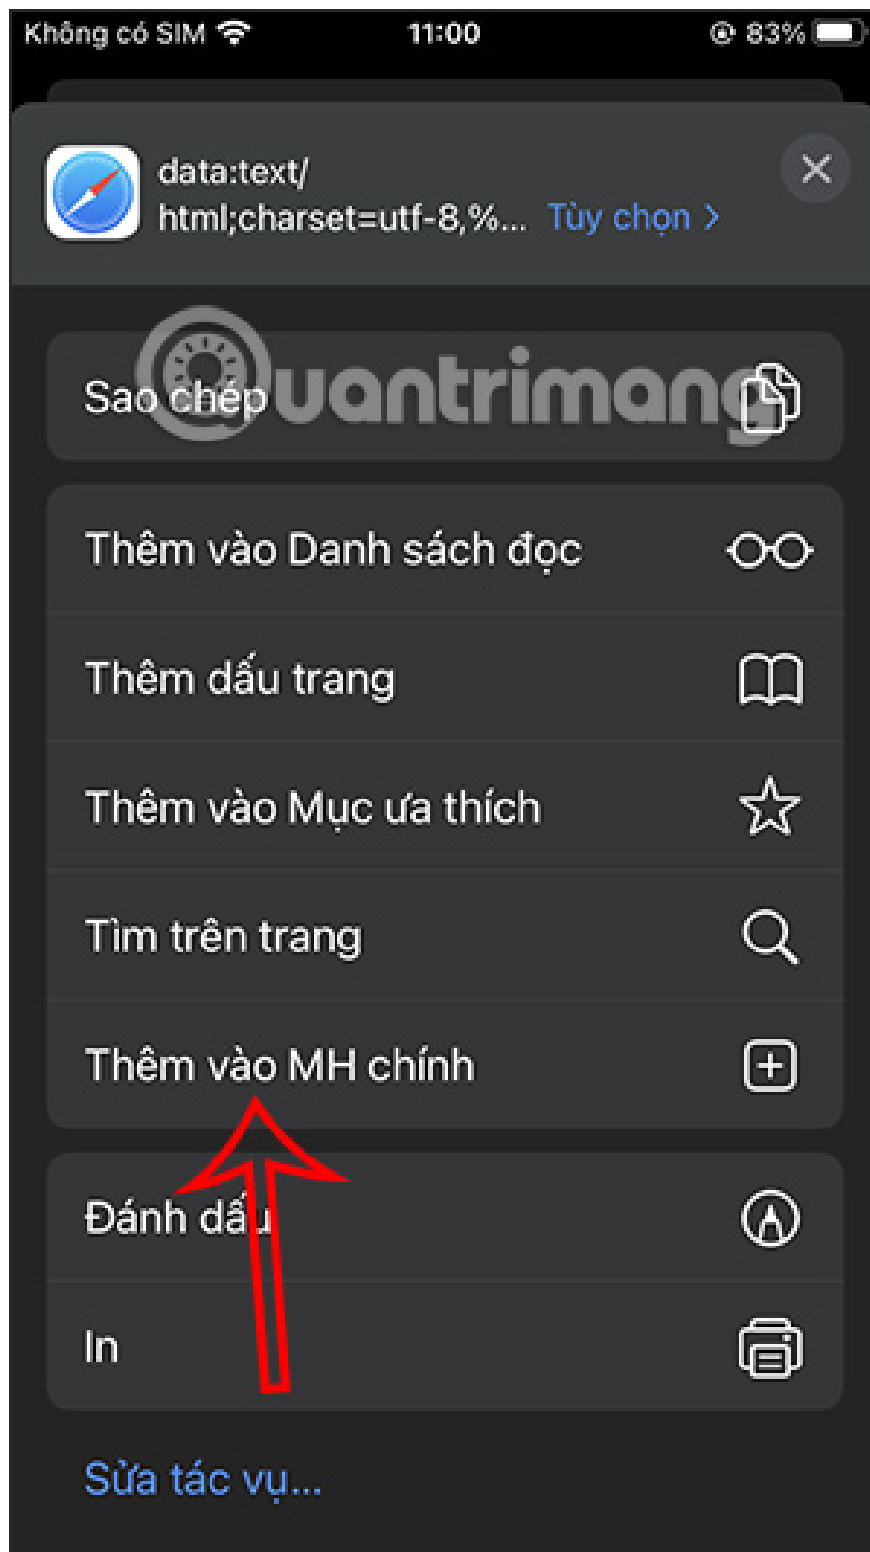

#### Step 4:

At this point, the user will be redirected to the new interface on the Safari browser, where you will click on **the arrow icon in the middle of the page** below.

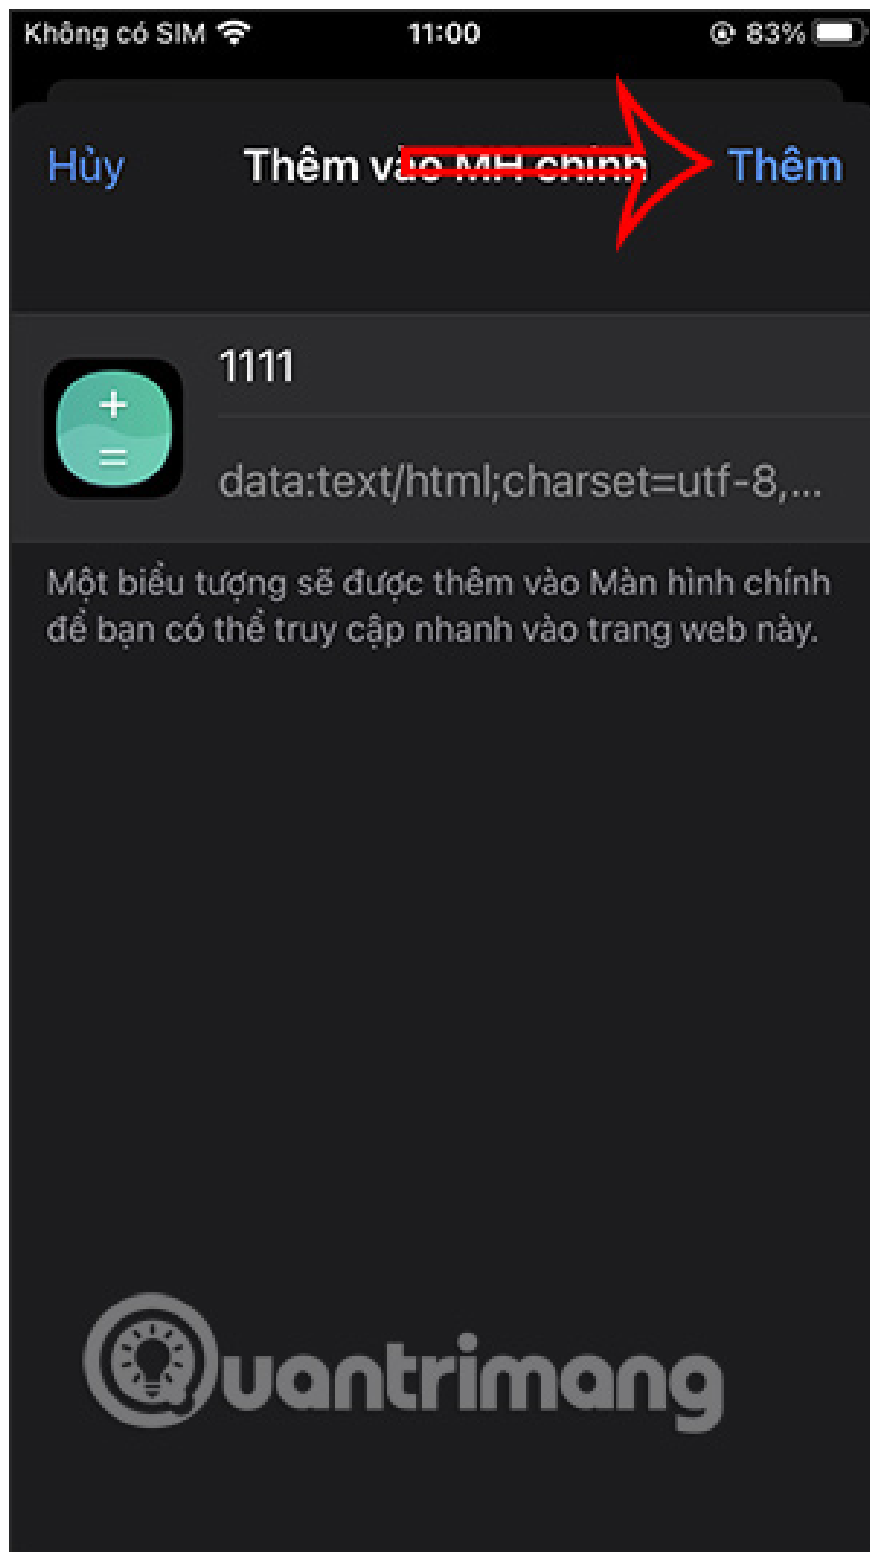

Displaying an interface with a lot of options, we click on **Add to home screen** .

**Step 5:**

Continue to **press Add** to complete the operation of adding this icon to the screen on iPhone.

As a result, you will see a new app icon on your iPhone with the new app name. When you tap on the new icon, it will also open the original app interface.

X Icon Changer will create a virtual application with the icon and name you set, linked to the original application and operate independently as a bookmark. The original application still appears on the iPhone with the default name and icon. Then you can hide the original iPhone application in a folder.

Note that the default icons you download from the App Store will remain the same, and when you click on these icon sets, you will see the transition effect to the main application.

These are exactly like the widgets you usually see on the home screen of Android phones.
