3. Instructions to transfer iPhone screen to gray to save battery

## Instructions to change iPhone screen rotation wallpaper

### Step 1:

Currently, Rotatewall has been **downloaded for free from BigBoss** compatible with iOS 9 and above. We just need to click on Search and then enter the keyword Rotatewall to search and install the fine tuning.

### Step 2:

After installing, adjust the user access to **Settings and** then select **Rotatewall tweak** . Start tweaking by pushing **the horizontal bar at Enabled to the right** .

Then in Album of different orientations **select the background photo album** for Landscape display (Horizontal) and Portrait (vertical). In each display type, there will be a photo album on the device, or an album from the application installed on the device.

Click on the album to use the wallpaper.**Note to users** you should choose 2 different albums for 2 types of display. This will prevent the image from being broken or blurred when rotating the camera horizontally or vertically. Images in each album will show good quality and are compatible with each screen display dimension.

Finally **click Respring** for changes to be applied.
