

How to change language for apps on Android

Besides setting up language changes for applications on iPhone, you can also choose another language for applications on Android without affecting the system language or other applications.

Besides setting up language changes for applications on iPhone , you can also choose another language for applications on Android without affecting the system language or other applications. After setting up, you will use the application with the new language you choose and the phone language remains the same. Below are instructions for changing the language for applications on Android.

Instructions for changing language for applications on Android

Step 1:

You click on **Settings** on Android and then **click on System** . Then you continue to select **Languages ??& input** to adjust the language on your Android phone.

 Search settings

App security, device lock, permissions

 **Location**
On - 9 apps have access to location

 **Safety & emergency**
