

How to change Samsung screenshot format

If you are a Samsung Galaxy user, you can customize the screenshot settings to ensure what format the file will be saved in.

If you are a Samsung Galaxy user, you can customize your screenshot settings to ensure that the file is saved in the correct format. Changing the screenshot format can significantly improve image quality and reduce file size. Here is a guide on how to change the Samsung screenshot format.

Instructions for changing Samsung screenshot format

Step 1:

Open Settings on your phone, then scroll down and tap **Advanced Features** to open advanced features.

Settings

Location requests

Safety and emergency

Medical info • Wireless emergency alerts

Accounts and backup

Manage accounts • Smart Switch

Google

Google services

Advanced features

Labs • Side button

Digital Wellbeing and parental controls

Screen time • App timers

Apps

Default apps • App settings

General management

Language and keyboard • Date and time

Accessibility

Vision • Hearing • Dexterity

In the new interface, users **click on Screenshots** to adjust the screenshot mode on Android phones.

Side button

Multi window

Motions and gestures

One-handed mode

Screenshots

Show contacts when sharing content

Looking for something else?

Floating notifications

Reduce animations

Swipe to call or text

Step 2:

Now you will click on **Format** to change the screenshot format of Samsung Galaxy phone.

We will choose between JPG and PNG format for Samsung phone screenshots.

< Screenshots

Show toolbar after capturing

Delete after sharing
Automatically select the Delete after sharing option when you share screenshots or Smart select captures.

Hide status and navigation bars

Save original screenshots
This lets you revert to the original screenshots after editing them in Gallery, but it uses more storage space.

JPG

PNG ✓

Save screenshots in
Internal storage/DCIM/Screenshots

Samsung allows users to choose two popular image formats, PNG and JPG (JPEG), to take screenshots. However, on some other Android phones, the default screenshot format is JPG, while others default to PNG and there is no option to change it.
