

How to Change Skins in Minecraft PE

One of the most popular ways to customize the Minecraft game is to change the skin (appearance) of the character the player owns. If you want to change the skin without jailbreaking your device or using the Block Launcher application, you need Minecraft PE 0.11.0 or higher.

For iOS devices

Download Minecraft PE 0.11.x+

Download the application to change Minecraft PE skins: <https://itunes.apple.com/us/app/skinswitch-for-minecraft/id524911308?mt=8>

Open the app, search for the skin you love, then click "Wear Skin".

Just like that! The operation you need to perform is extremely simple thanks to the built-in skin support feature.

For Android devices

Make sure you have Minecraft PE 0.11.x+ installed

Search for "Skins for Minecraft" on Google Play and click on an app you find.

Install and open the application.

Click on the skin image that you feel most comfortable with.

Click the "Download Skin" button.

Open the Minecraft game and you will see that your character's skin has been changed!
