

How to change the background color in Photoshop

Changing the background color in Photoshop can be used with existing photos or new images.

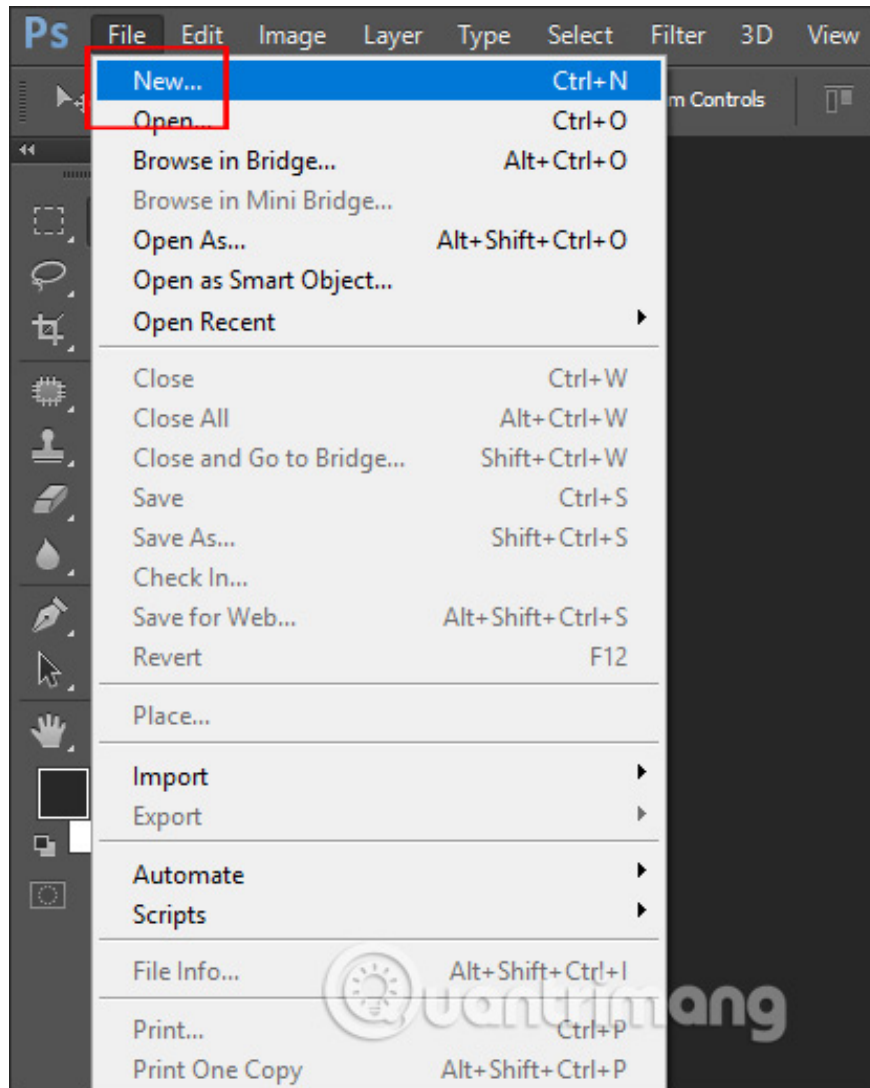

When working in Photoshop, many people want images that are easier to see, so they need to change the background, not on a black or light gray background. To change the background in Photoshop, there are many different things to do, change the background with available images or new files, even if you want to delete the image background in Photoshop is very simple and easy. The following article will show you how to change the background of Photoshop images.

1. How to smooth edges in Photoshop
2. How to delete text on photos in Photoshop
3. "Magical" photo wallpaper removal applications you should try
4. How to use Photoshop CS5 - Part 16: Delete any object from the image

1. Change the new background color in Photoshop

Step 1:

We open Photoshop as usual and click on **File** , **select New** to open the new image file, or press Ctrl + N.

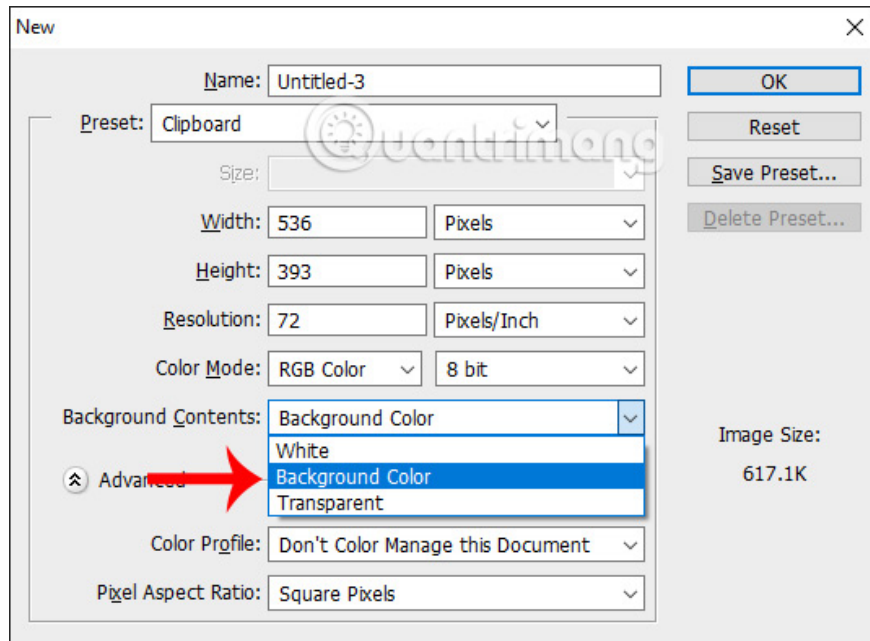

Step 2:

In the new interface displayed, in **the Background Contents section** we select 1 of 3 types of backgrounds with:

1. Transparent for transparent background color (colorless).
2. White for white background.
3. Background Color uses selected background colors.

Next we name the new file and **click OK** to display the new wallpaper for the image.

As a result, we get a new file with the selected background style, here is a red-colored color wallpaper.

Step 3:

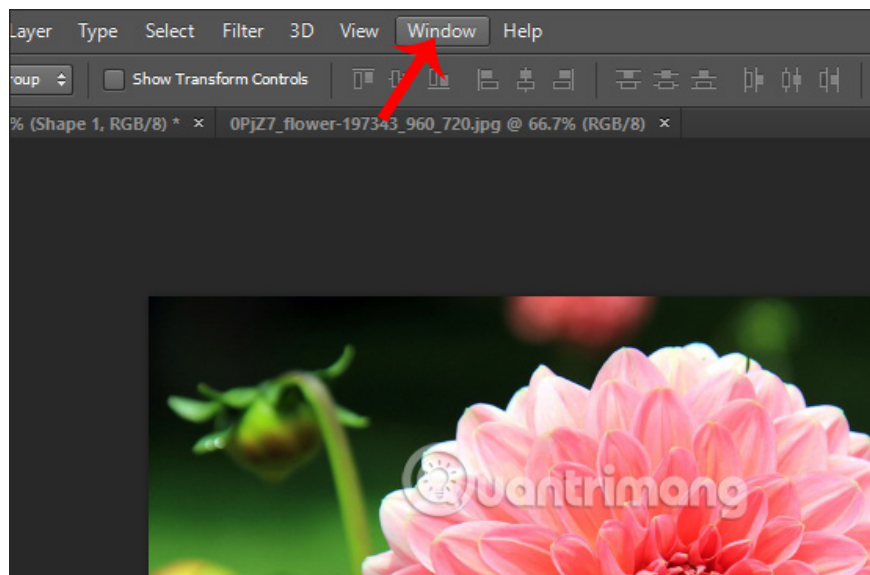

If you want to **change the background color**, in the color icon, select the **box Set background color** to change the color.

2. Change the background in the Layer

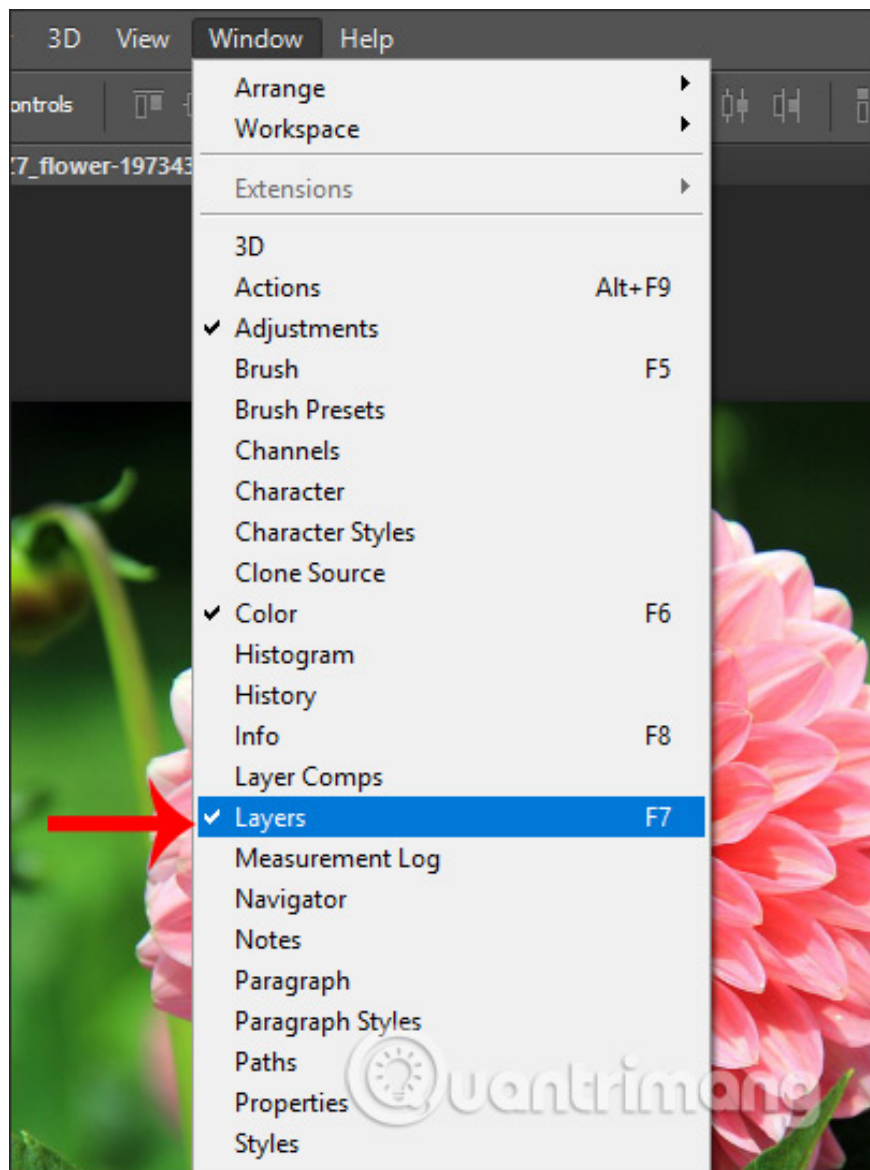

Step 1:

We open any image on Photoshop, then click on the **Window** tab on the toolbar.

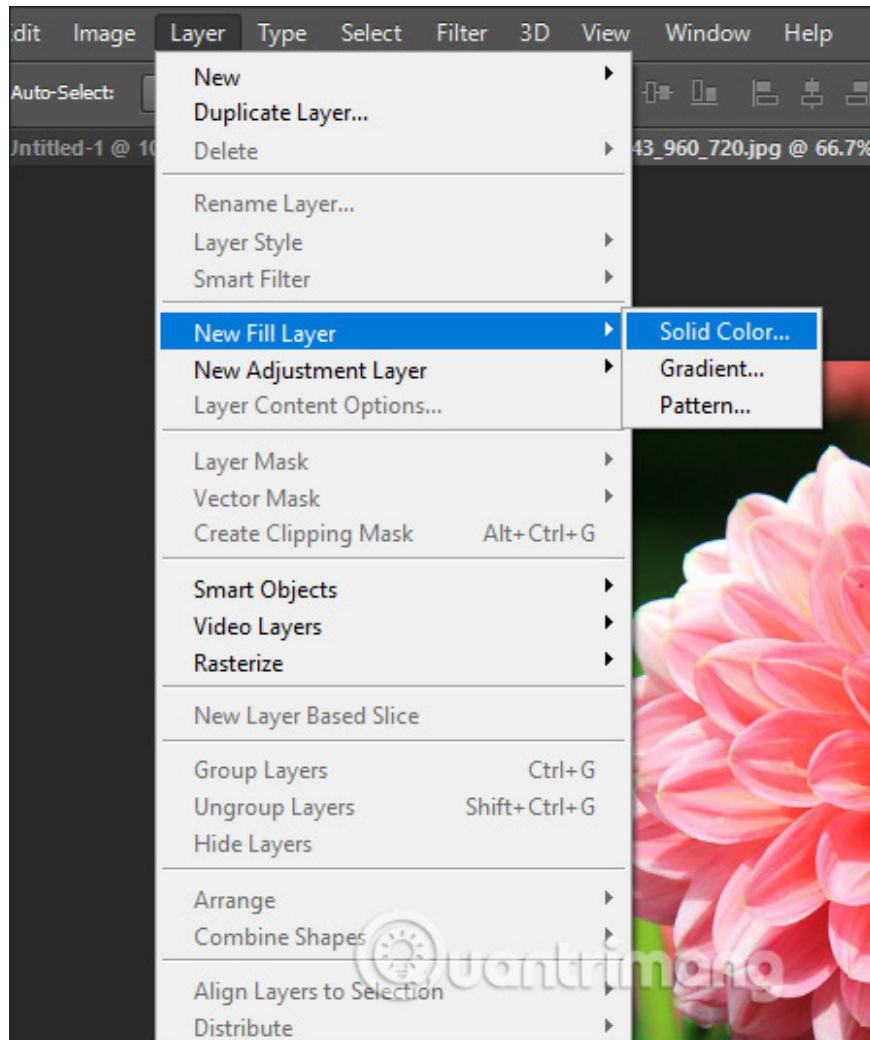

Step 2:

Displaying the menu list of Window, we click **the Layers item** to display the layer bar on the right side of the screen.

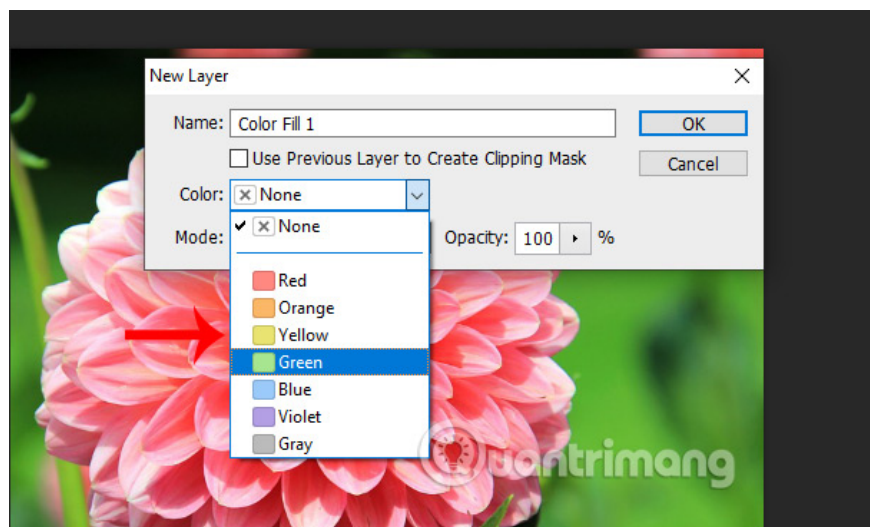

Step 3:

Click on Layer then select **New Fill Layer** , select **Solid Color** . in the displayed list.

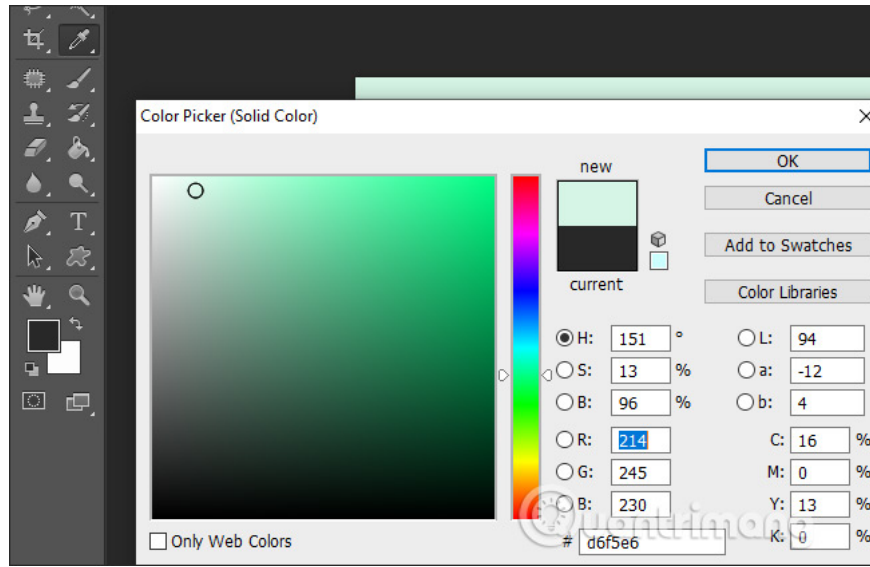

Step 4:

In the new interface click on **Color** and then **select the color** we want to use. Click **OK** to continue.

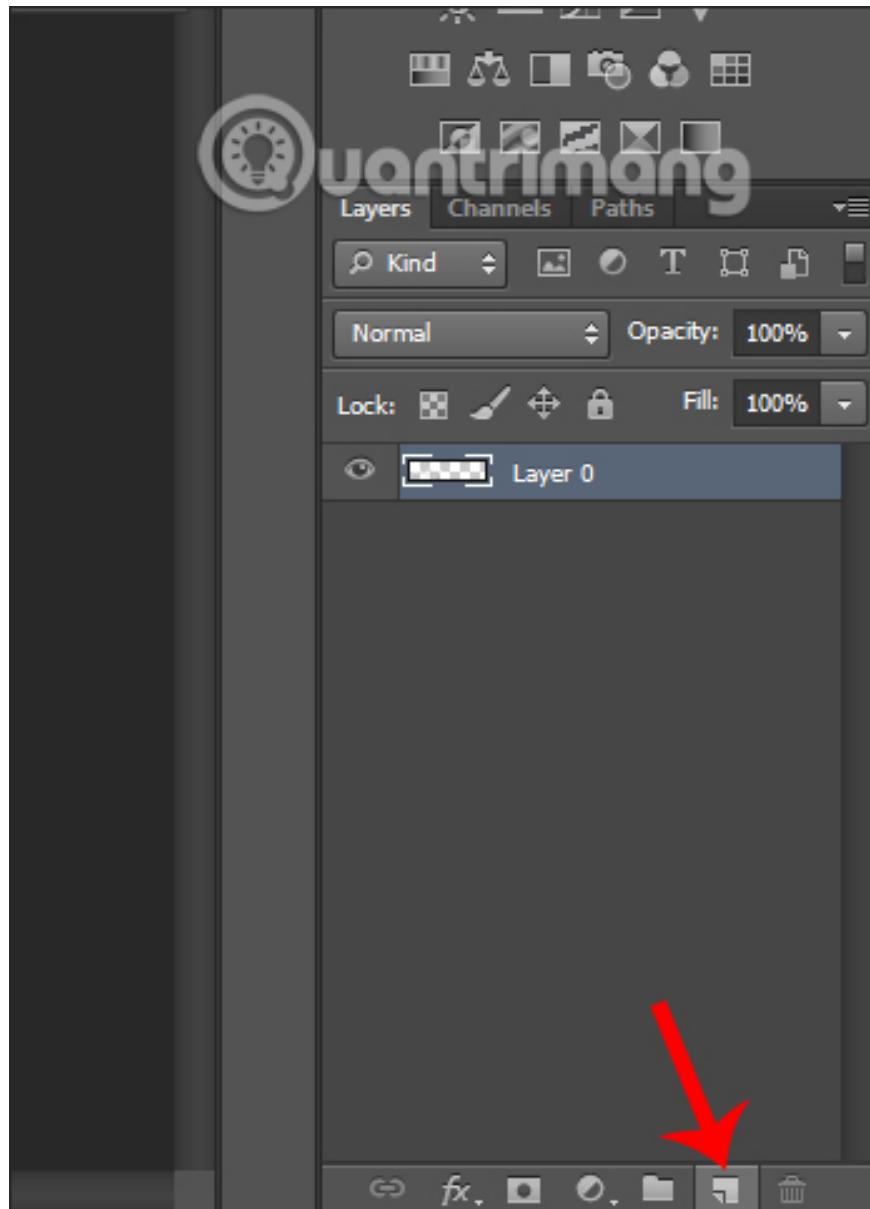

Step 5:

Display the palette interface, users adjust to the color level you like, by clicking on the color gamut you want. Click Ok to save.

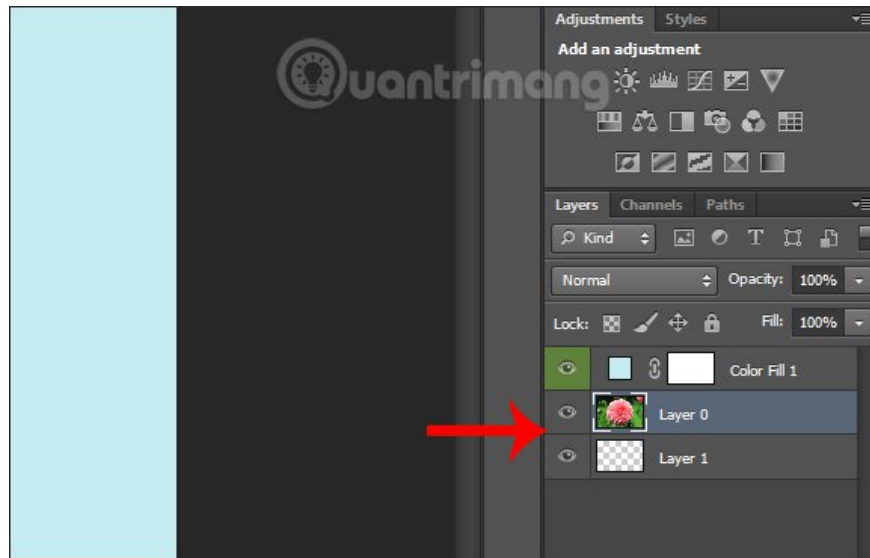

Step 6:

Look to the bottom right, click on **the icon to create a new layer** as shown. Immediately display a new layer.

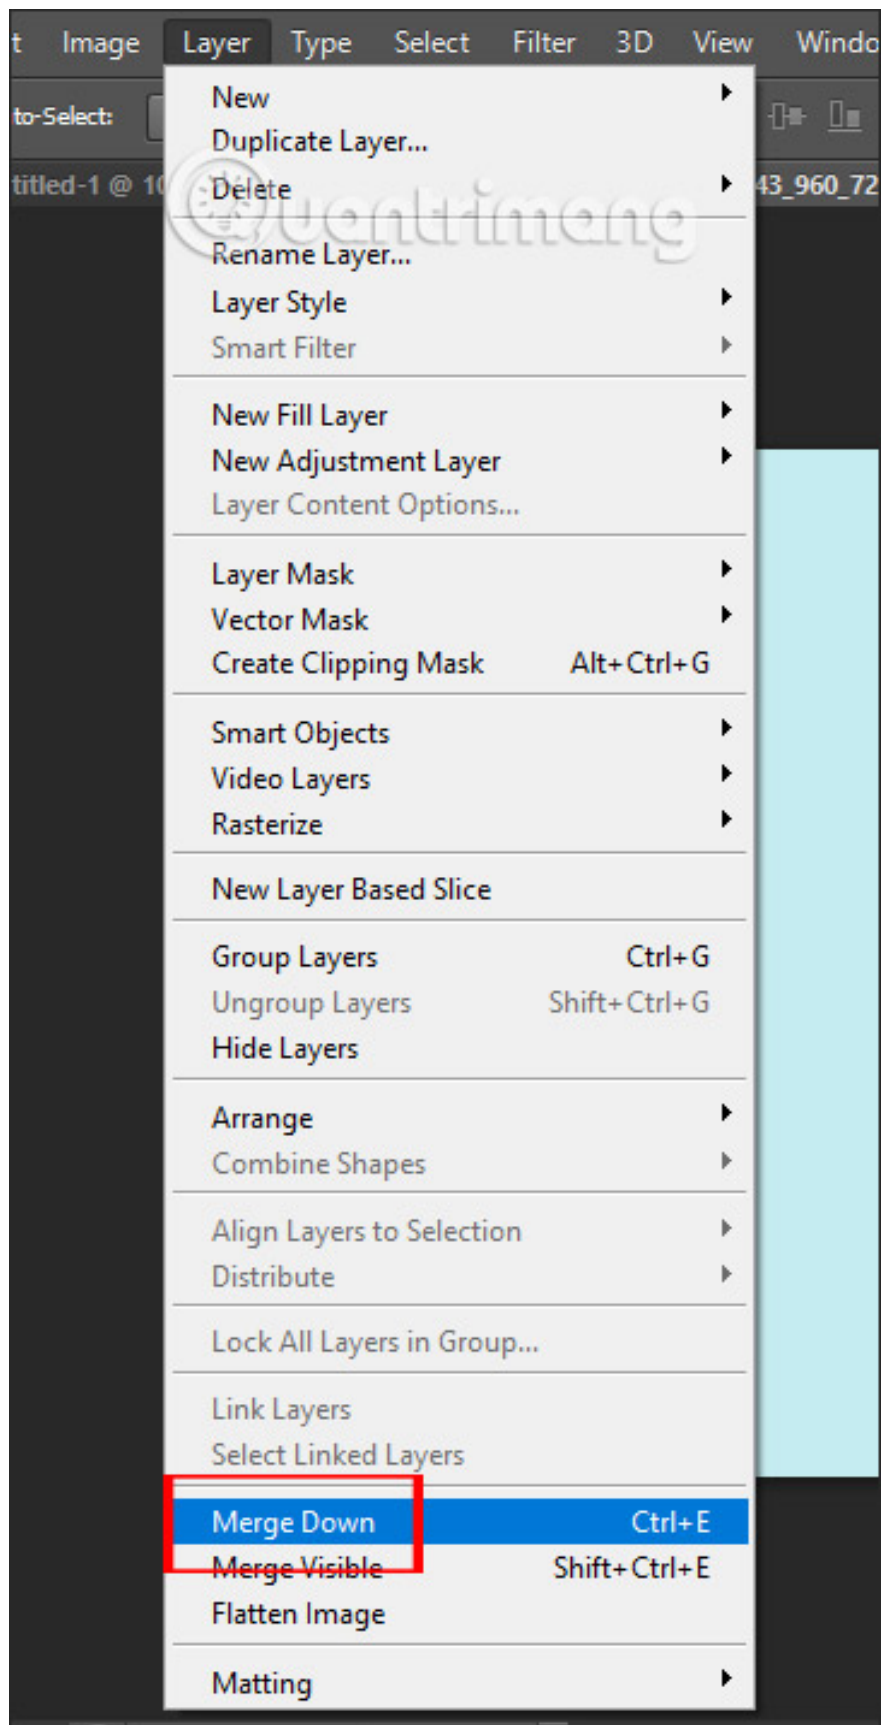

We will **drag this new layer below the layer 0** as shown.

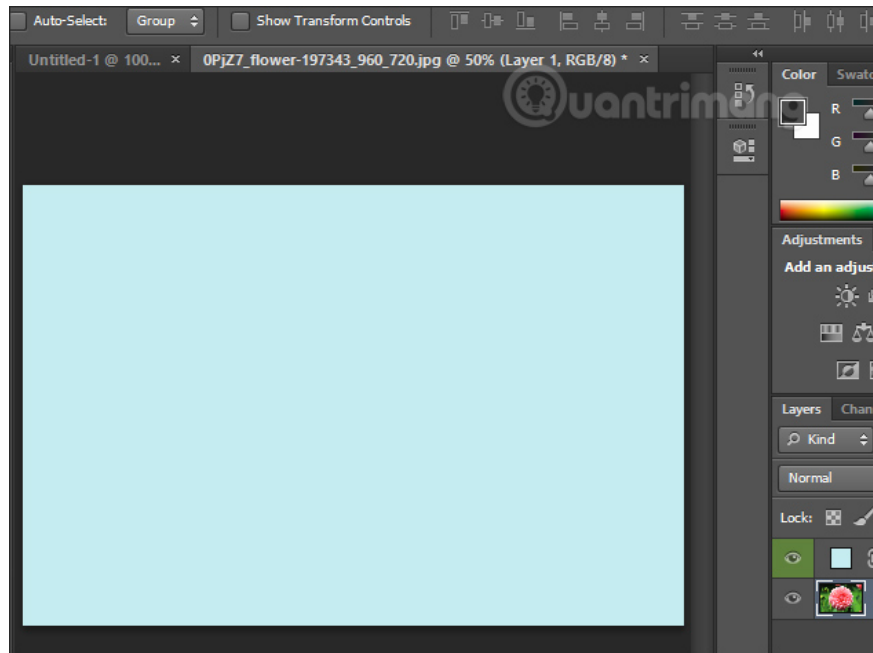

Step 7:

Click on **the Layer item** at the top of the interface and **select Merge Down** to change the color for the background layer we have chosen.

The wallpaper result has been changed to another color.

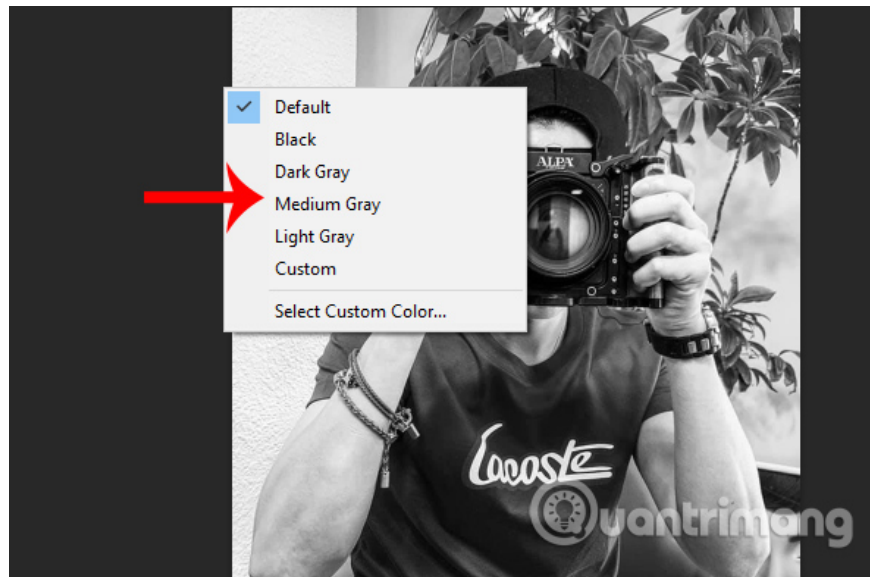

3. Replace the background in Photoshop's Workspace

Step 1:

We also open any image on Photoshop. Then click **the magnifying glass icon** to get a better view of the workspace in the image. Workspace is a dark border around the image in the Photoshop window.

Then **right-click** to display a list of the selected colors for the wallpaper as shown below.

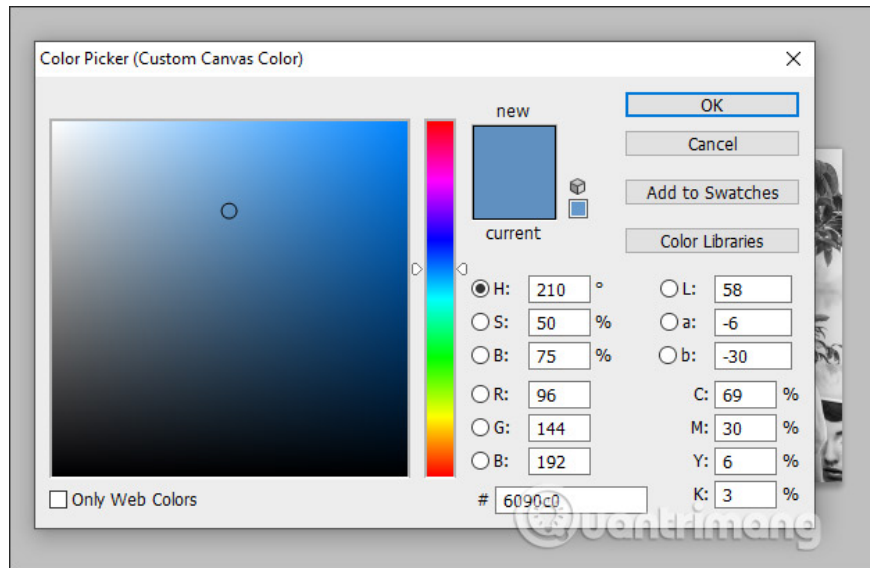

Step 2:

We click on the background color to change. The wallpaper result has been changed as shown below.

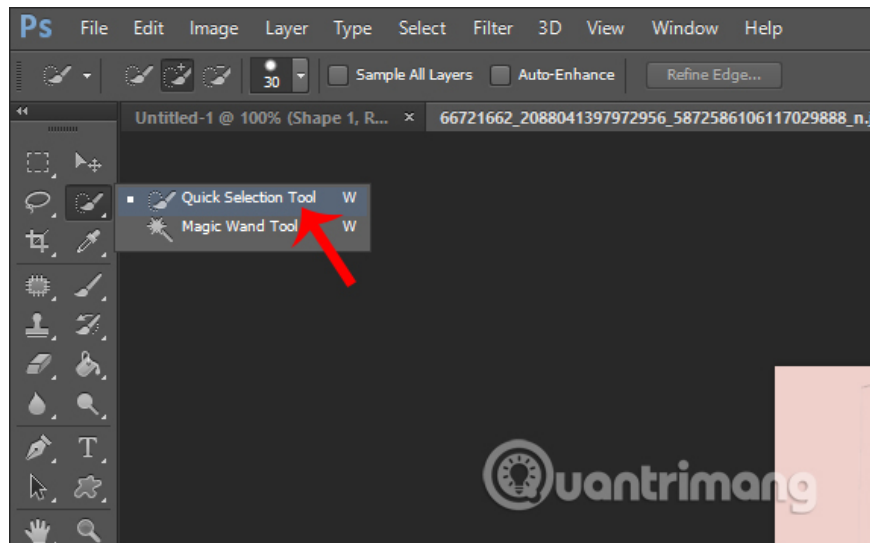

The result of the background color has been changed with the color you selected in the list. If you want to add another color, click **Select Custom Color** . Display the color palette for us to select and click OK to apply.

4. Change the background for the existing image

Step 1:

Open the image you want to change the wallpaper, then click **the Quick Selection Tool icon** to create a quick area.

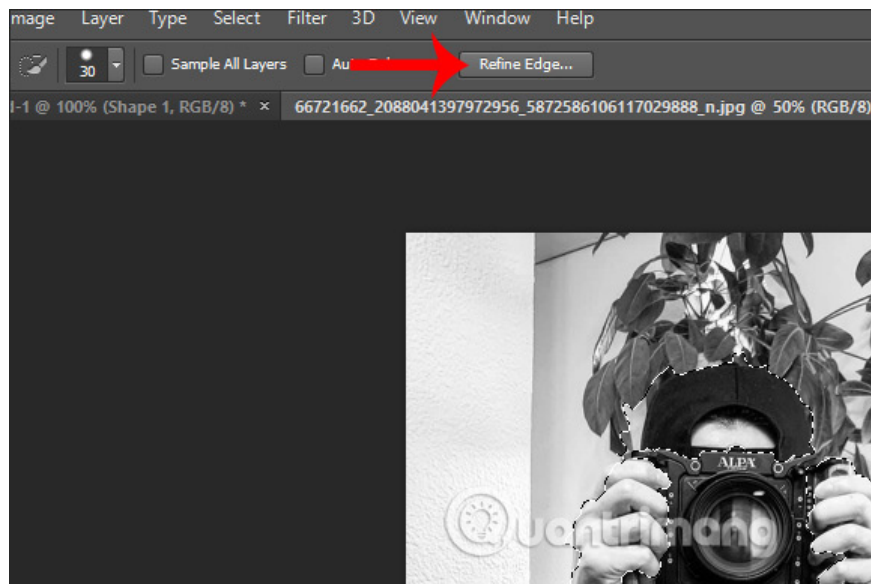

Next, press **the Shift key** and **click on the image details to select the subject area** . If the image is more detailed, click on each detail. If you want to remove the extra image details then click Alt and then click on the detail you want to remove.

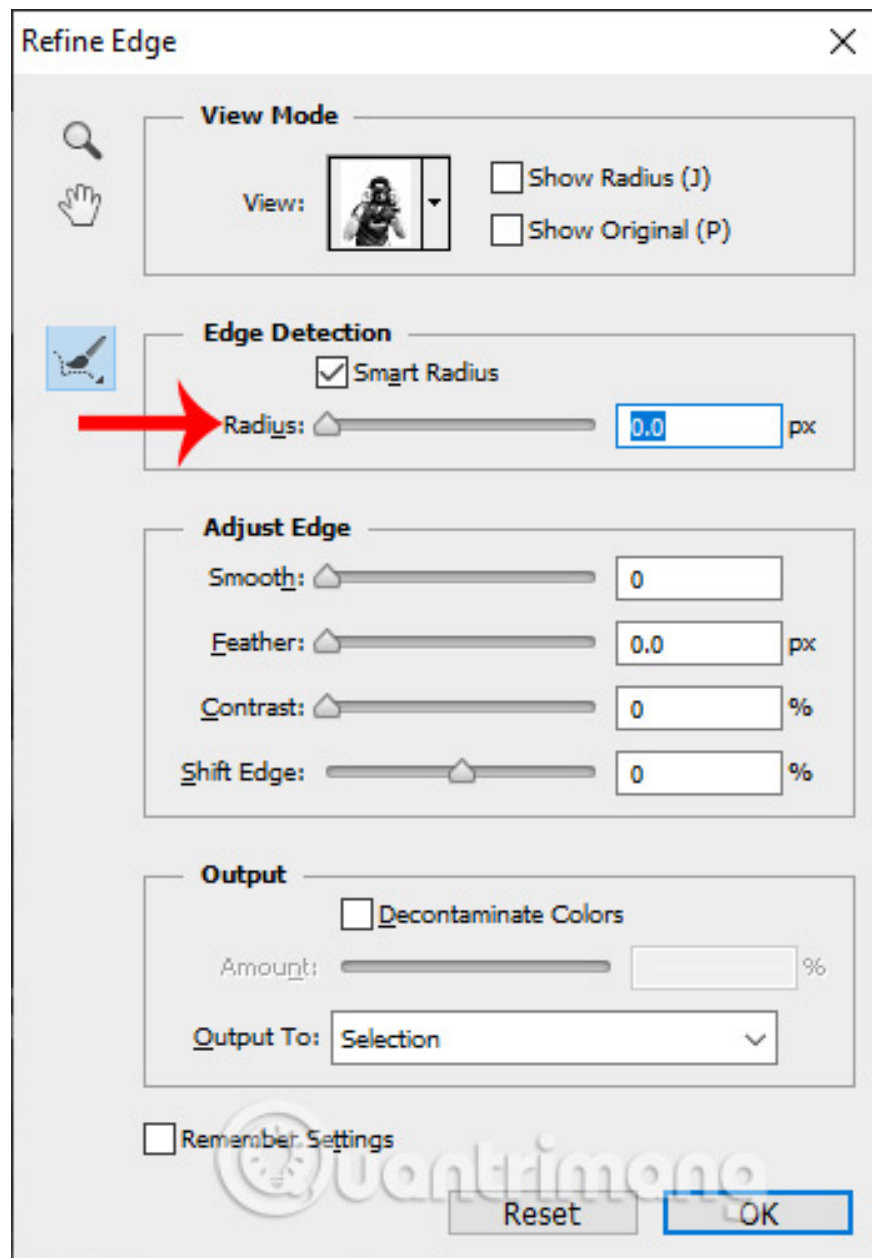

Step 2:

After selecting the area, click on **Refine Edge** above.

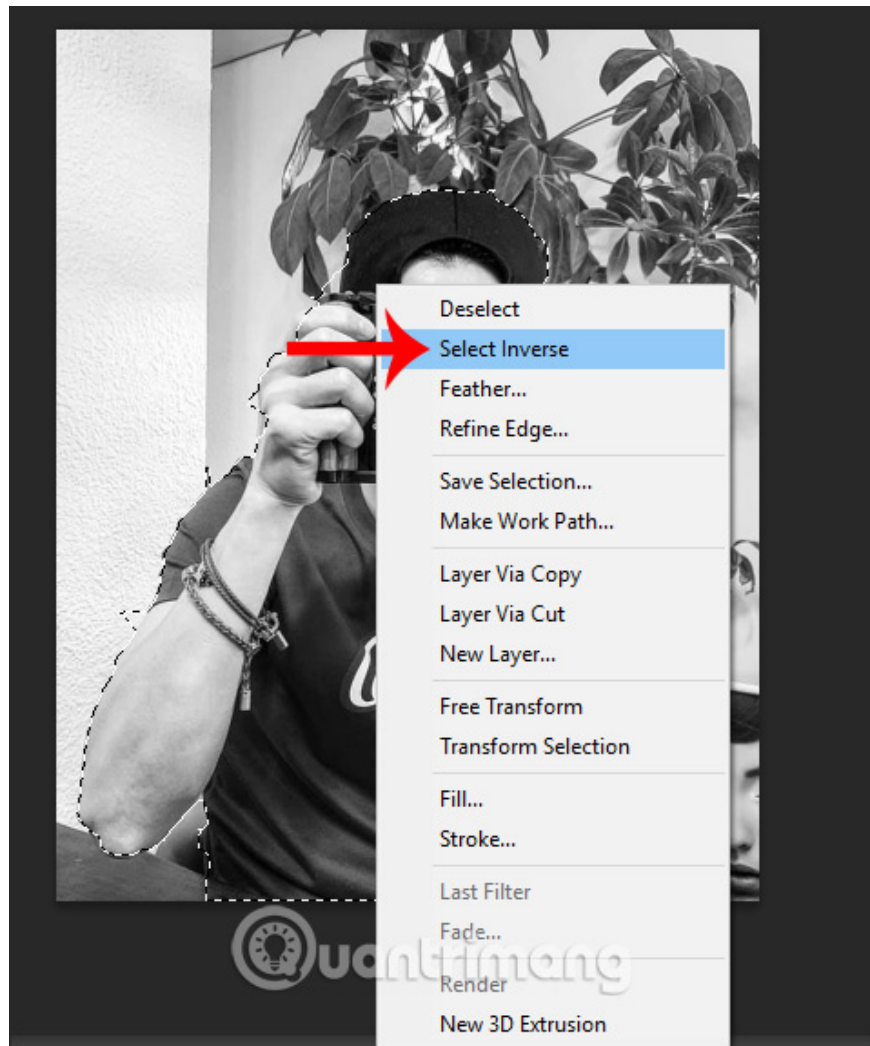

Display the new user interface **in the Smart Radius box** , then customize **the Radius bar** below to create the standard contour at your disposal, then click OK.

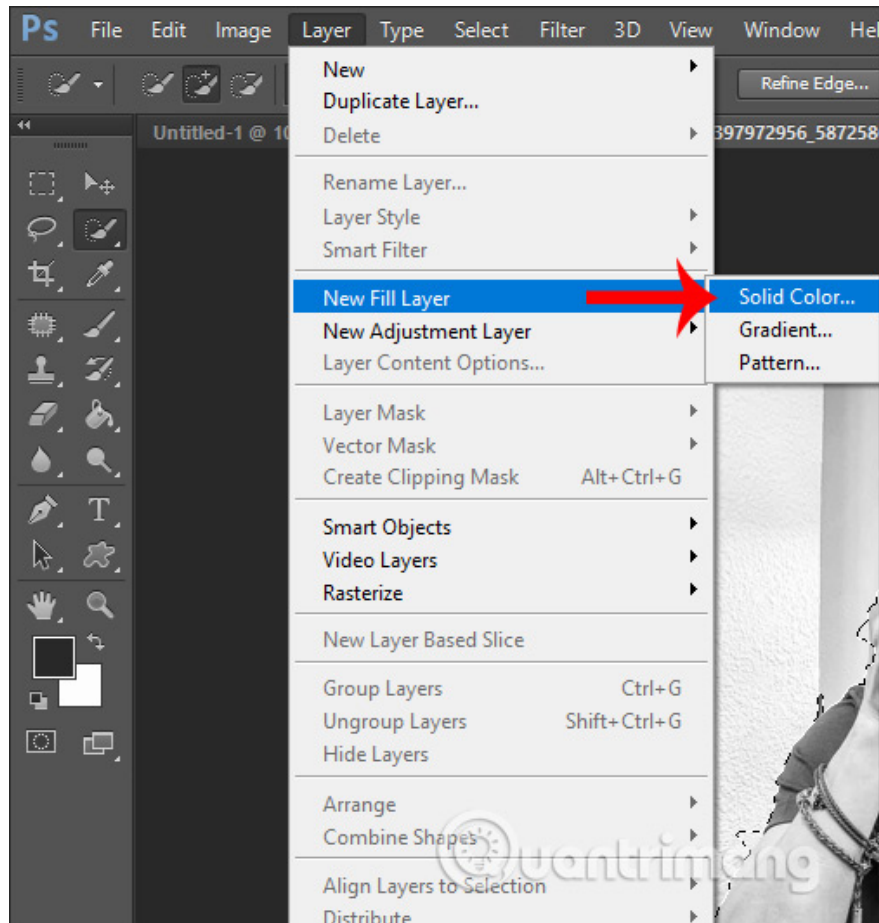

Step 3:

Right- click on the **background** to display the list as shown below, click on **Select Inverse** .

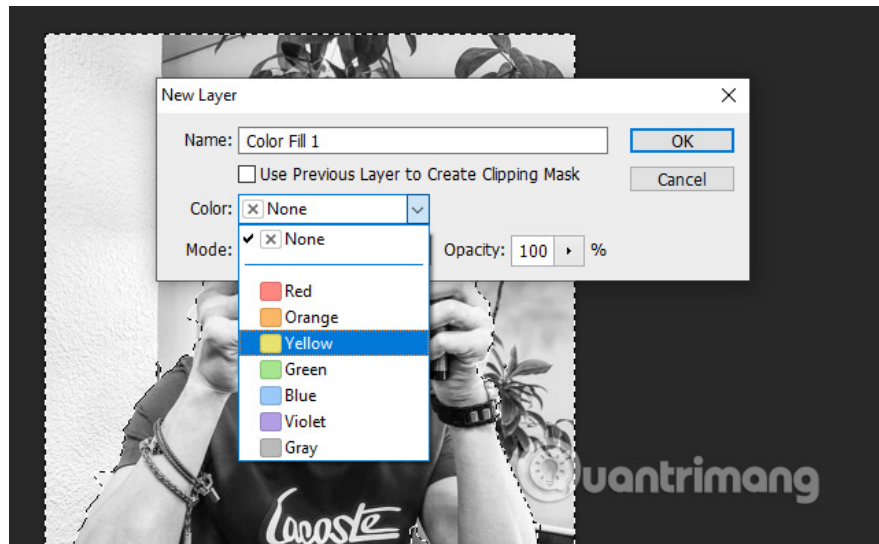

Step 4:

Click on the **Layer** then select **New Fill Layer** , then choose **Solid Color....**

Next in **the Color section**, the user also selects the background you want and press OK. Then you also choose the color you want to change for the background image of the current image.

The image results have been removed from the background and replaced with new colors.

So to change the background on Photoshop we have a lot of ways to do it, with many different content. You can change the background for new images in Photoshop, or change the background for existing images.

I wish you all success!
