

How to change the bookmark icon on Google Chrome

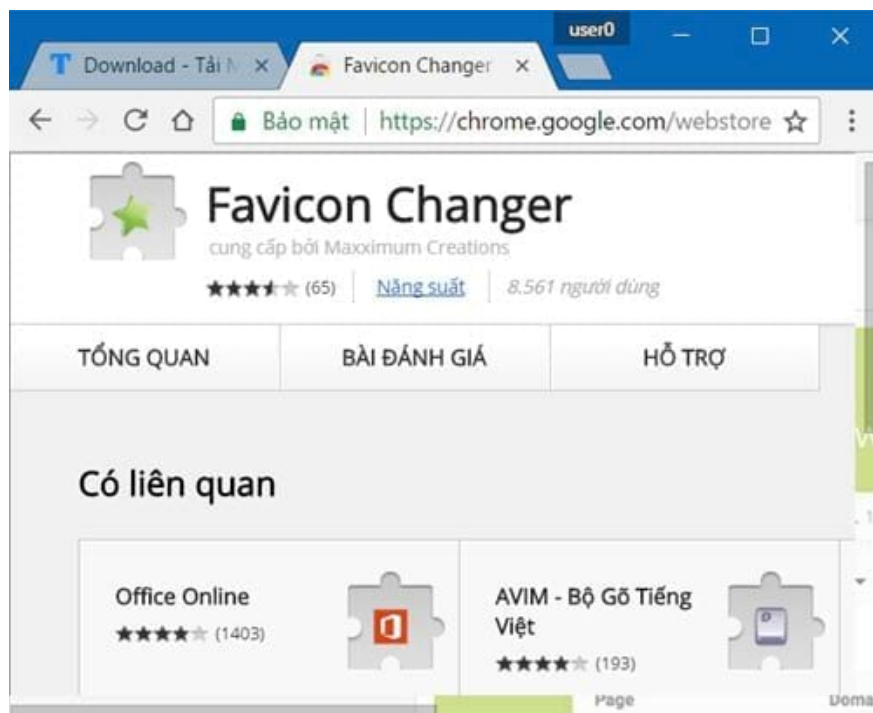

You've probably found the bookmark icons on Google Chrome outdated and boring. Now, a new app helps you change these icons simply, easily, and in a fun way.

Changing bookmark icons on Chrome isn't a new feature, but it's appealing because you can customize the icons to your personal preferences.

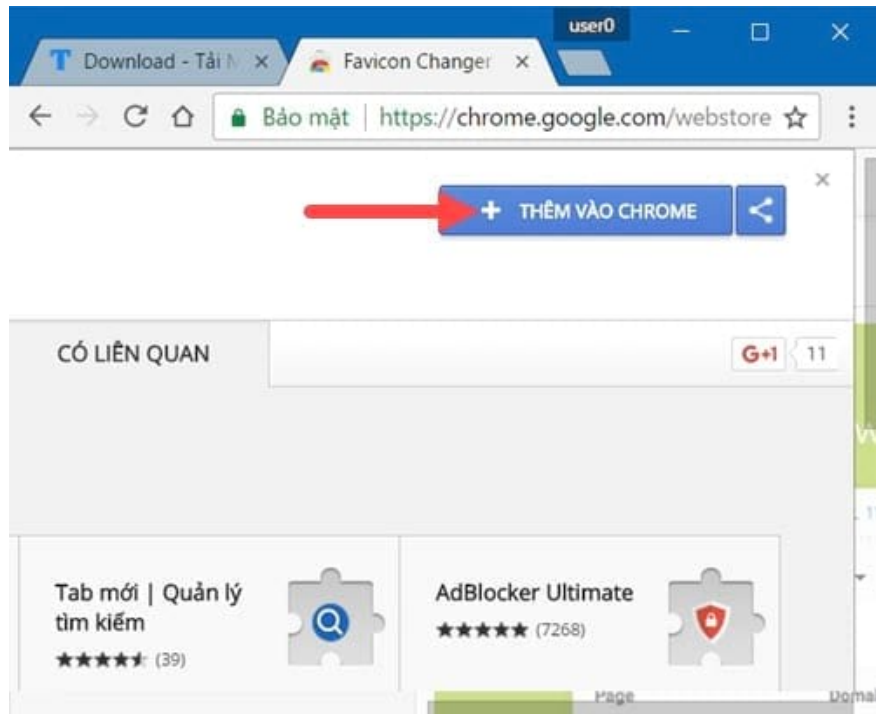

How to change the bookmark icon on Chrome, replace the icon on Chrome.

Step 1: You need to install the Favicon Changer add-on.

Step 2: After installation is complete, you will be redirected to the app store containing Favicon Changer.

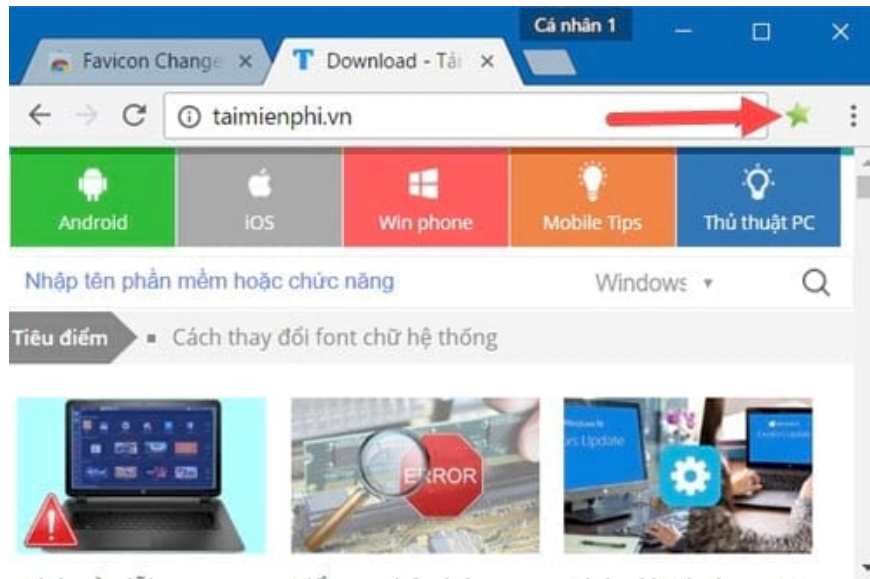

Next, look at the top right corner and click **Add to Chrome**.

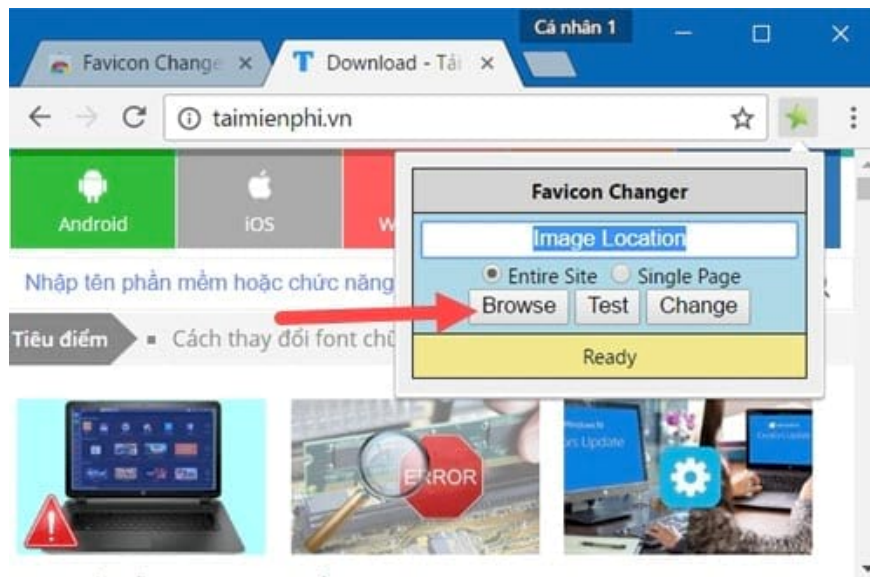

Step 3: The system will prompt you to confirm again; click Add **extension** .

Step 4: After adding the extension to Chrome, simply click on the new star icon that appears.

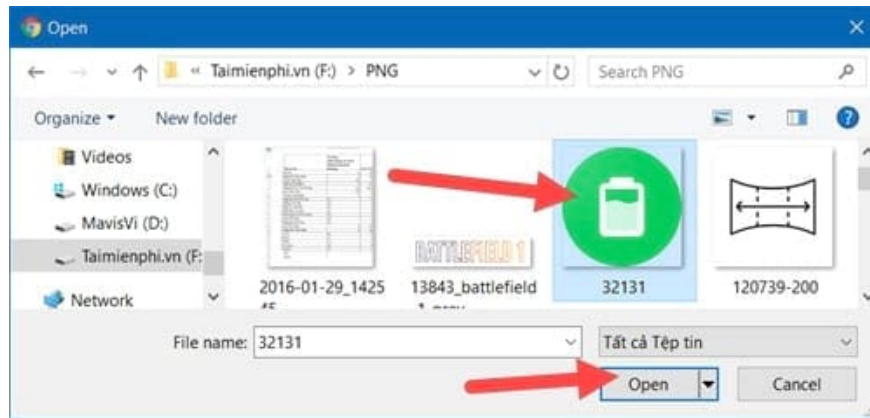

Step 5: The basic Favicon Changer interface will appear; click **Browse** to select an image.

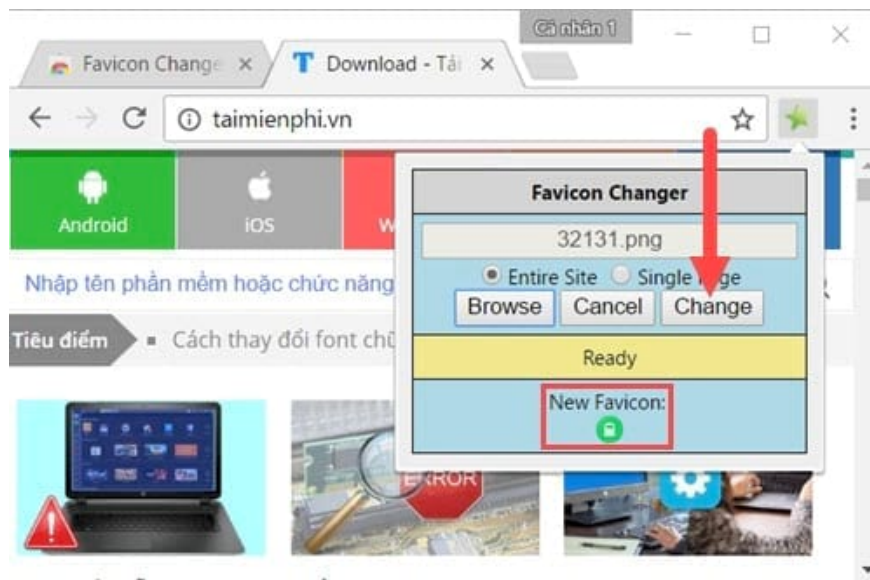

Step 6: Select the image in PNG format and click **Open** .

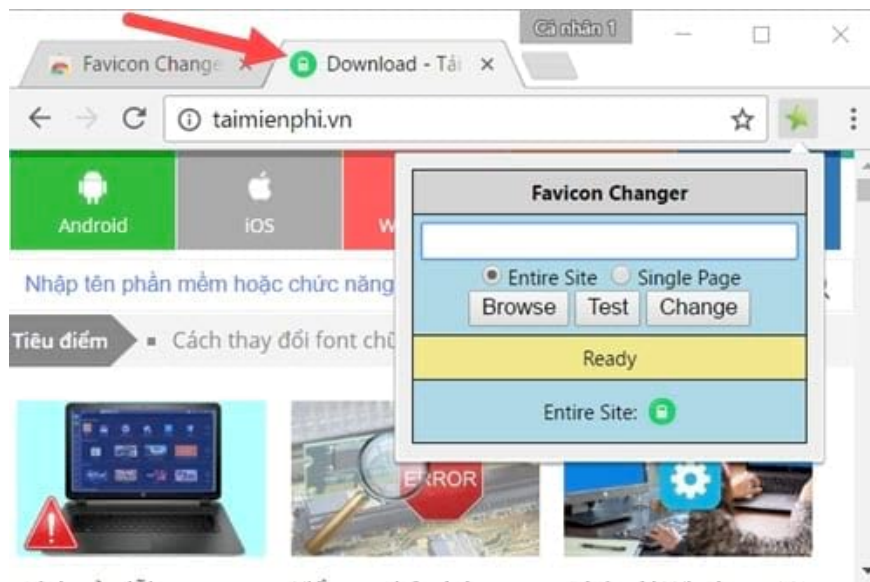

Note: Please select the PNG image format, as this type has the fonts removed and the software only accepts this format.

Step 7: The **New Favicon** window will then appear; click **Change** to make the change.

You've just changed the bookmark icon on Chrome; you can see it in the title bar.

So, you've successfully changed the bookmark icon on Chrome. Hopefully, this trick will help you avoid boredom when using Google Chrome. You can also apply this method to the C?c C?c browser, as it uses the same source code as Chrome and supports Chrome add-ons.

Using Chrome for an extended period will help you accumulate experience and learn how to use it faster with keyboard shortcuts. Memorizing **Google Chrome keyboard shortcuts** will help you use it proficiently and easily experience similar browsers.
