

How to change the clock position on the status bar of Samsung phones

By default we cannot change the clock position on Samsung Galaxy phones. But with the Good Lock application from the Galaxy Store, users can choose another location for the clock on the status bar.

On Samsung Galaxy phones, the clock is displayed on the left side of the status bar. By default, we cannot change this clock position through the settings available on the phone. But with the Good Lock application from the Galaxy Store, users can choose another location for the clock on the status bar according to their needs. Below are instructions to change the clock position on the status bar of Samsung phones.

Instructions for changing the clock position on the status bar of Samsung phones

Step 1:

You access the Galaxy Store on your Samsung phone and find the Good Lock application. Or you immediately click on the link below to install the application.

Step 2:

At the application interface, click on the Make up tab and click on **the download icon next to QuickStar** to perform the installation.

RIGHT

Before changing the position of the clock

Changing the position of the clock and increasing system icons can overlap each other. This simple problem has nothing to do with the original behavior of your cell phone.

I recommend you hide a number of the indicator icons before changing the position of the clock.

Thank you!

Statusbar icons can overlap with a front camera due to the clock position. Thus, [Middle] is not available here.
