

How to change the color and size of the mouse pointer on Windows 10

Windows 10 now allows you to increase the size of the mouse pointer and change its color. Want the mouse pointer to be black? You will be satisfied. Want a big red mouse pointer for easy viewing? You can do that.

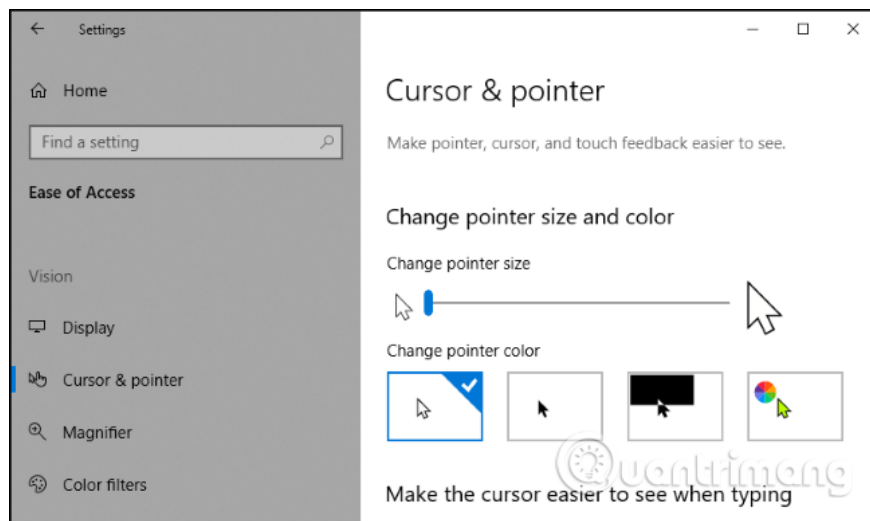

Windows 10 now allows you to increase the size of the mouse pointer and change its color. Want the mouse pointer to be black? You will be satisfied. Want a big red mouse pointer for easy viewing? You can do that.

1. How to change mouse settings in Windows
2. Instructions to change the interface of the mouse cursor on Windows
3. Create snow effect when moving mouse on Windows

This feature has been added in Windows from the May 2019 update. Previously, you could customize the mouse cursor theme, but now you can do it without installing a custom cursor theme. half.

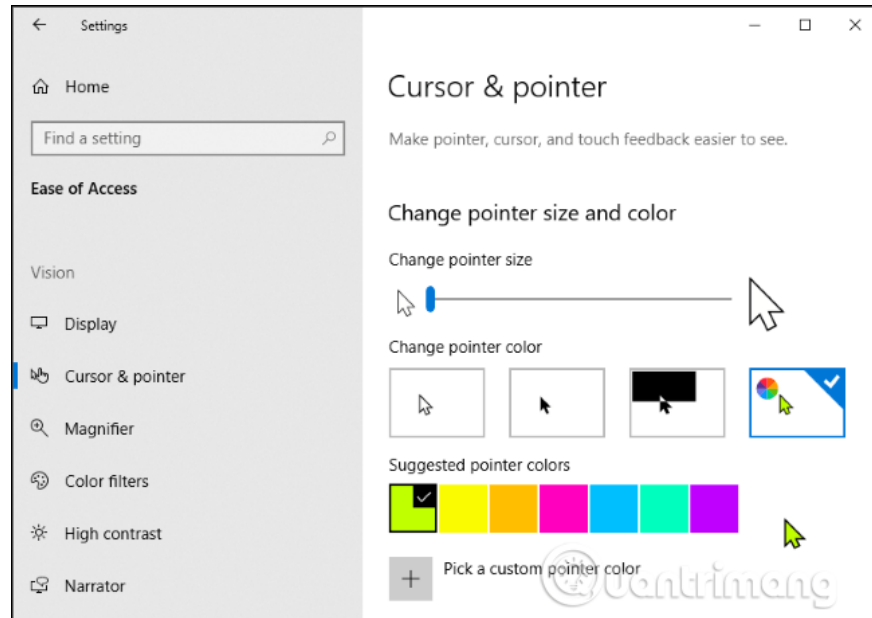

To find this option, go to **Settings > Ease of Access > Cursor & Pointer** . You can press Win + I to quickly open the **Settings** application.

To resize the cursor, drag the slider in **Change the Pointer Size** . By default, the mouse pointer is set to size 1, this is the smallest size. You can choose sizes from 1 to 15 (very large).

To change the cursor color, go to **Change Pointer Color** . Here, you will have 4 options: white with black borders (default), black with white borders, inverted colors (for example, the cursor will turn black on a white or white background on a black background) or The color you choose with the black border.

If the color is selected, the neon color is selected by default. However you can choose any color you like. When selecting colors, the **Suggested Pointer Colors** palette will appear, select **Pick a Custom Pointer Color** and choose the color you want.

From this settings panel, you can also make the text entry pointer thicker to make it easier to see when typing. If your computer has a touch screen, you can also control touch feedback visually when touching the screen.

I wish you all success!
