

How to change the Country of the App Store account area on iPhone

Changing country regions for App Store accounts will help you download any application or game that is not supported in Vietnam.

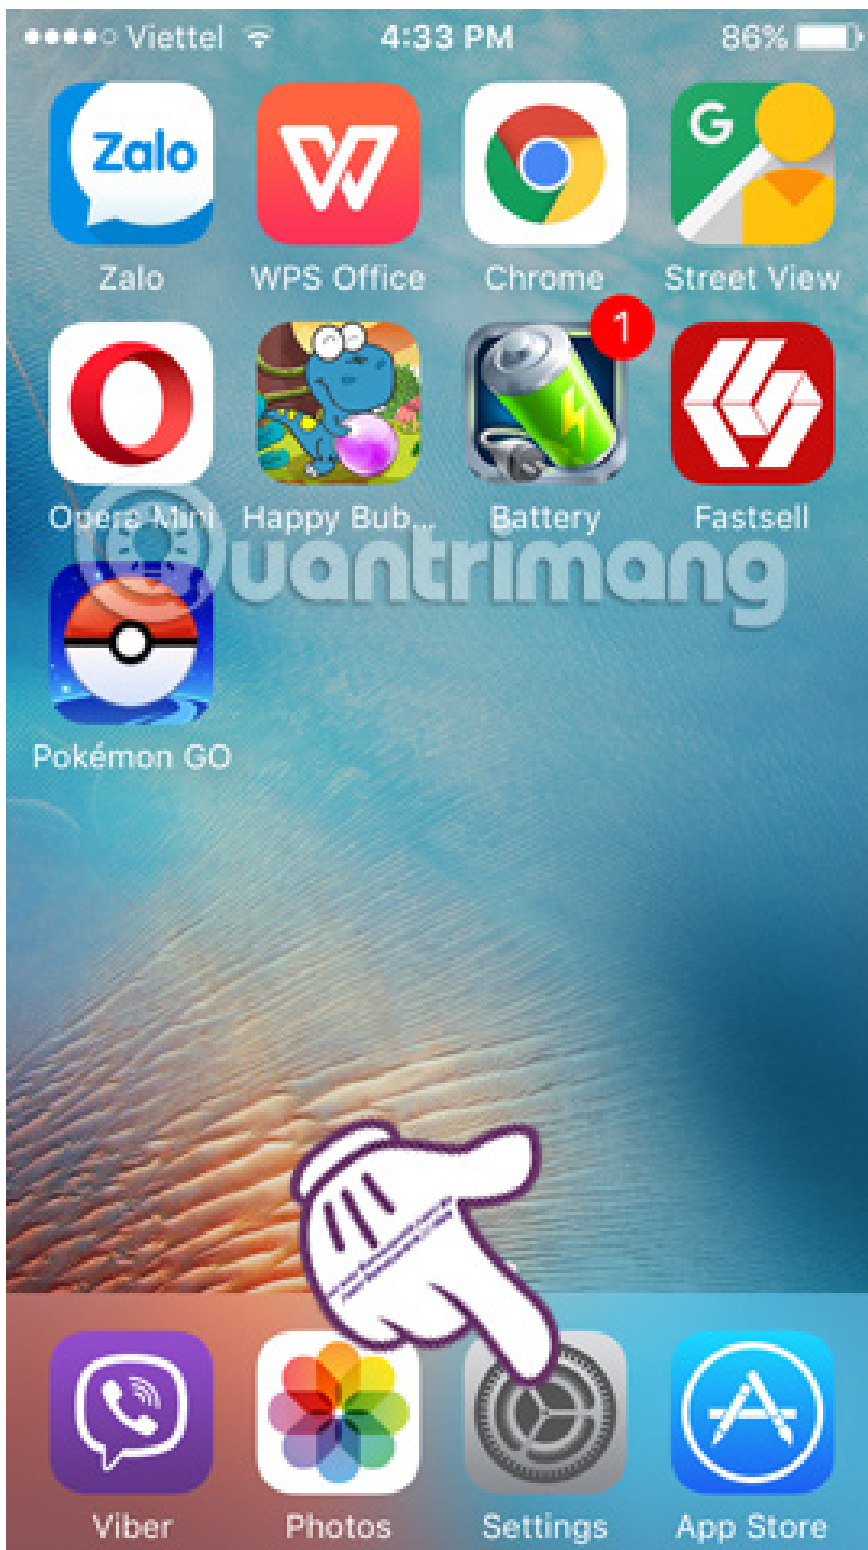

When we go to the App Store to download certain apps or games, we can't find the app to download. This is because the application is not in the region or Supported country by the region in which you have registered an account. Therefore, the best way is that users will have to transfer App Store addresses from Vietnam to any country, so that they can download the application or game they want.

Changing the Country area will be done right on your iPhone, iPad device without creating a new account, or installing any other support application. If you do not know how to do it, you can follow the tutorial below of Network Administrator.
