

How to change the default zoom level on Edge Chromium

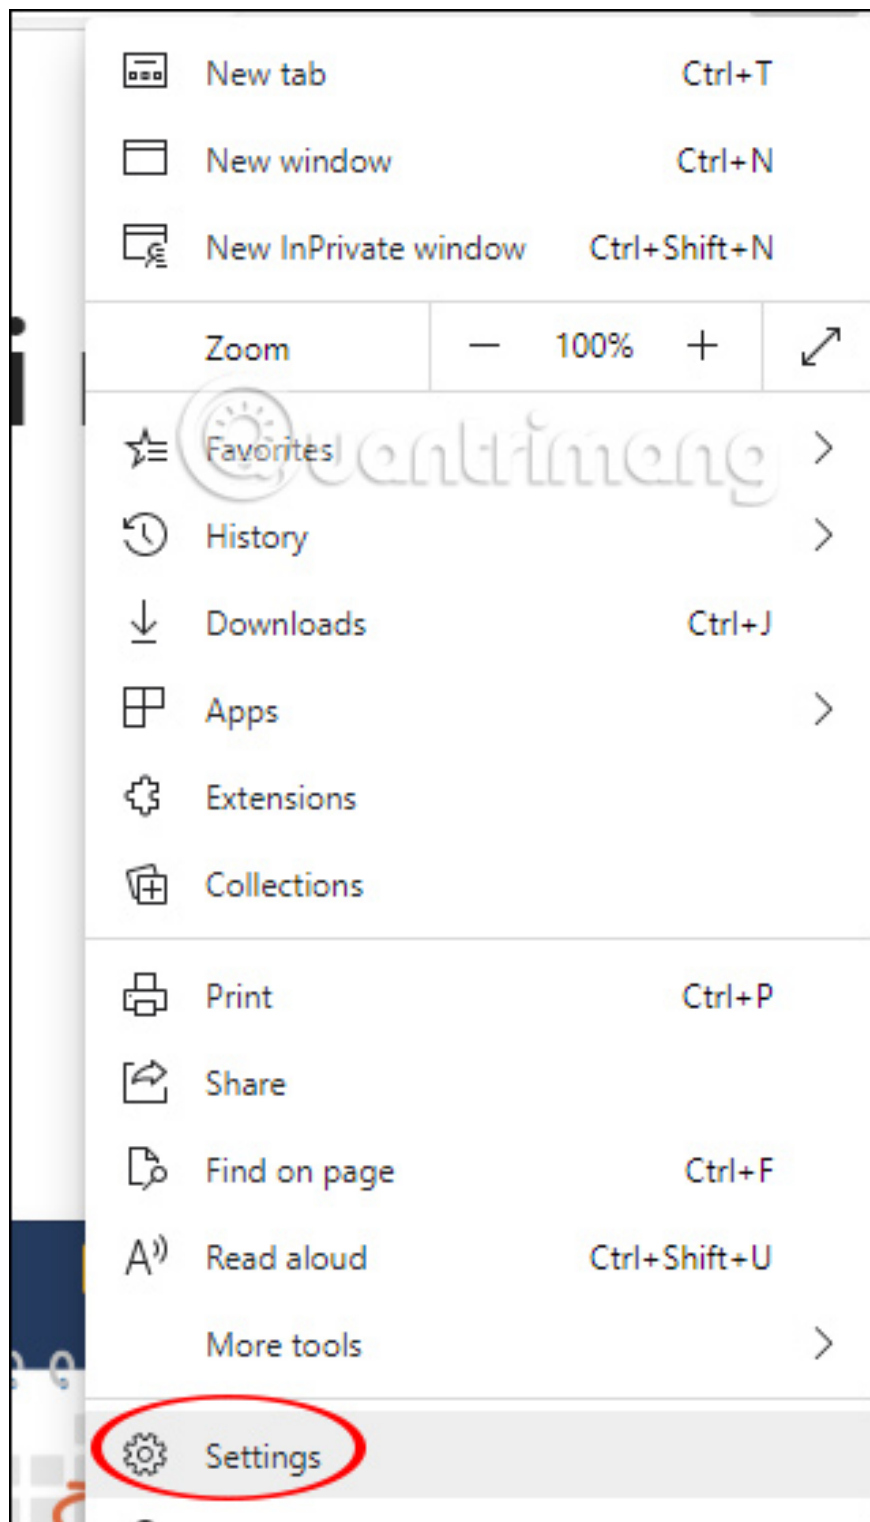

When changing the default zoom level on Edge Chromium, the browser will always show at the zoom level you have changed.

Edge Chromium browser defaults to 100% webpage zoom. If the user wants to zoom in on the site for a better view then you need to do it manually each time. If you want to change the default zoom level to your own zoom size on Edge Chromium, just adjust it in the settings. The Edge Chromium browser allows you to change the zoom level to your liking. The new zoom level can be applied to all web pages on the browser, or we can set a different zoom level for each site. The following article will guide you how to change the default zoom level on Microsoft Edge.

Instructions to change the zoom level on Edge Chromium

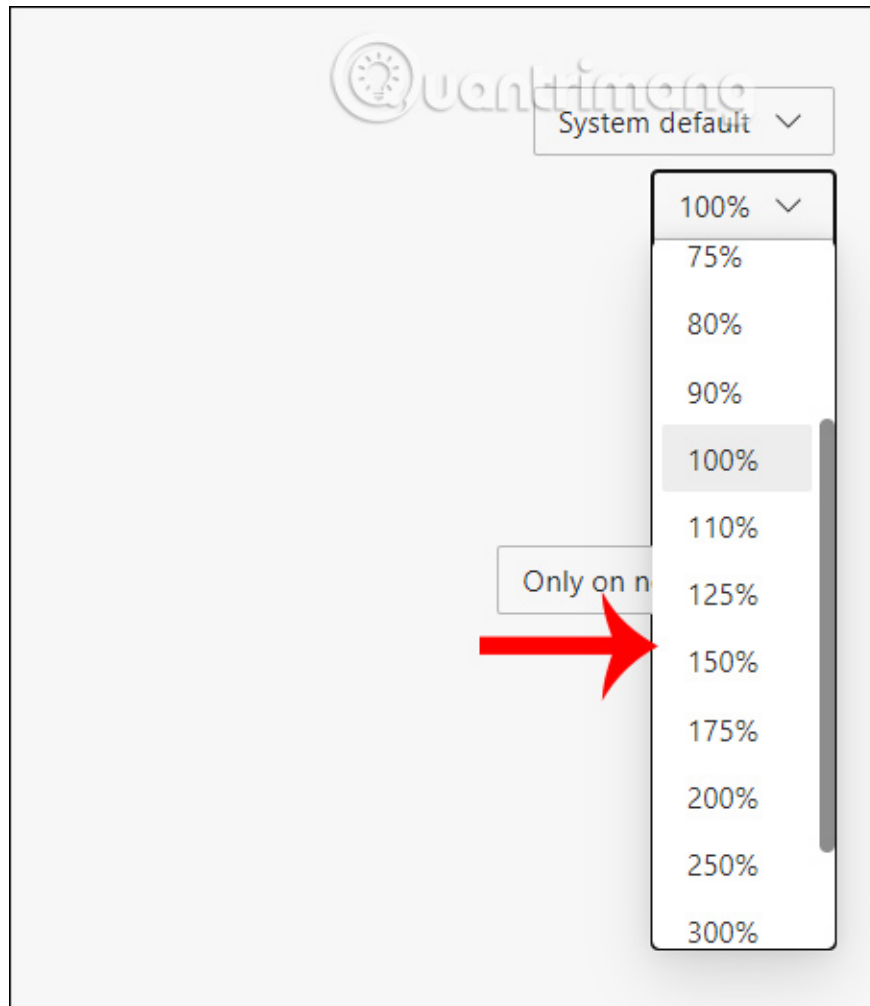

Step 1:

At the interface on Microsoft Edge we click **the 3-dot icon** and select **the gear icon** , select **Settings** .

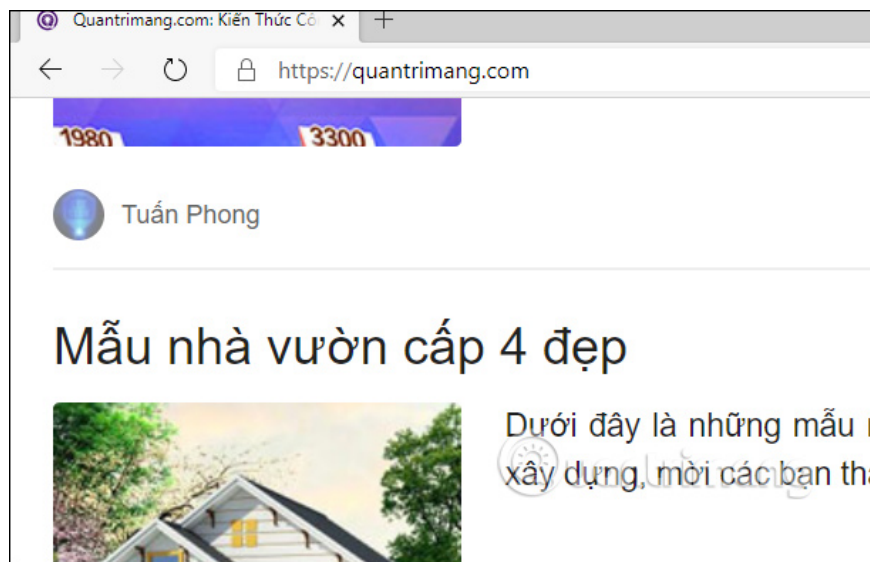

Step 2:

Switch to the setup interface of the Edge Chromium browser. Here we click on **the Appearance group on the left side of the screen**. Then look to the content to the right, **Zoom to adjust the zoom level or minimize the browser** you want.

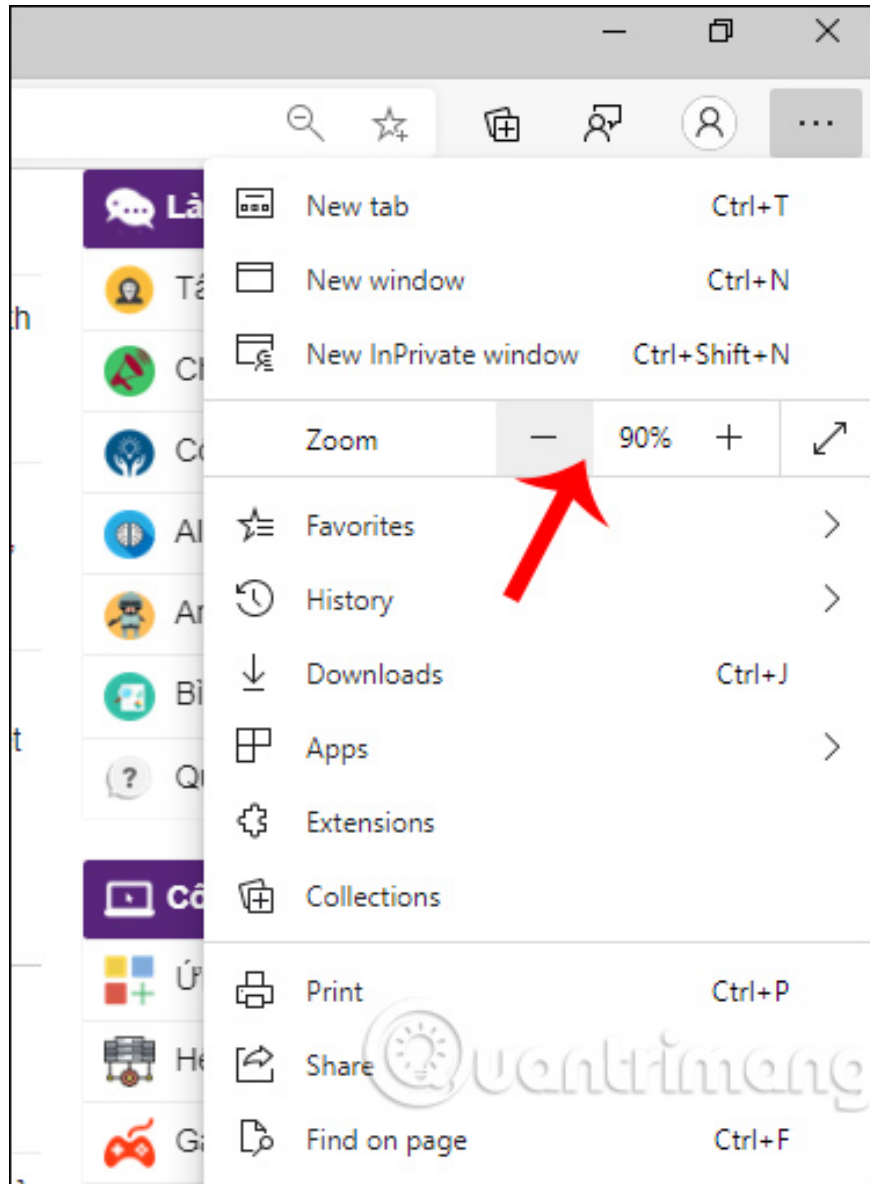

The **browser** immediately **applies a new zoom level** .

Step 3:

In case the user wants to set a specific zoom level for a website, we only need to **set the zoom level separately for that website** . Visit the website and select the zoom level you want via the plus sign or -. The browser automatically remembers the zoom level for the web page you have set, to display at later visits.
