

How to change the Facebook background color

To change the Facebook color in many different colors, we need to install the Color Changer for Facebook extension on Chrome.

Facebook has recently changed the interface, including updating Dark Mode for Facebook without the need to install additional utilities such as when you want to turn on the dark background on Facebook Messenger. And according to recent information, Facebook is testing the blue, red background interface next to the current white and dark mode interface. If you want to experience in front of the Facebook background color, you can install the Color Changer for Facebook utility.

The widget provides you with several background colors to change, such as changing the Facebook color to blue, or changing the Facebook background to pink. Some basic colors are still included in the utility such as changing the facebook background to black. The following article will guide you to change the Facebook background.

Instructions for changing Facebook colors

Step 1

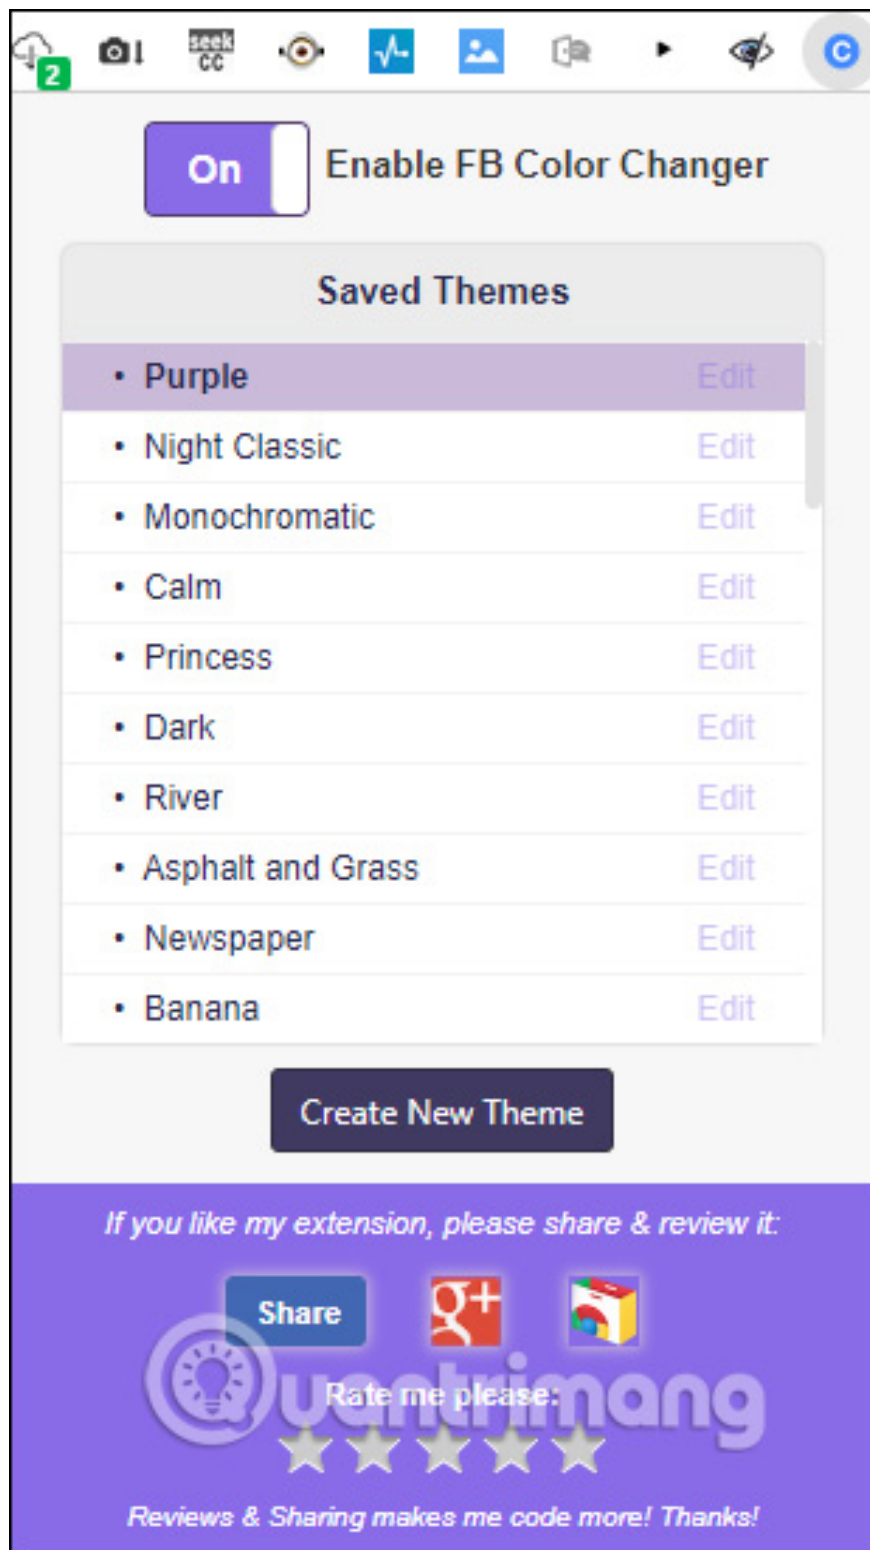

We install the Color Changer for Facebook extension the link below on Chrome browser.

Download the Color Changer for Facebook Chrome extension

<https://chrome.google.com/webstore/detail/color-changer-for-faceboo/lceicedmdibidgpnncleapoiednopgldo>

Step 2:

After downloading, click **the C icon of the utility** in the toolbar to make adjustments. By default, the On mode is enabled on the gadget. Below are the **color options** for you to change the Facebook background.

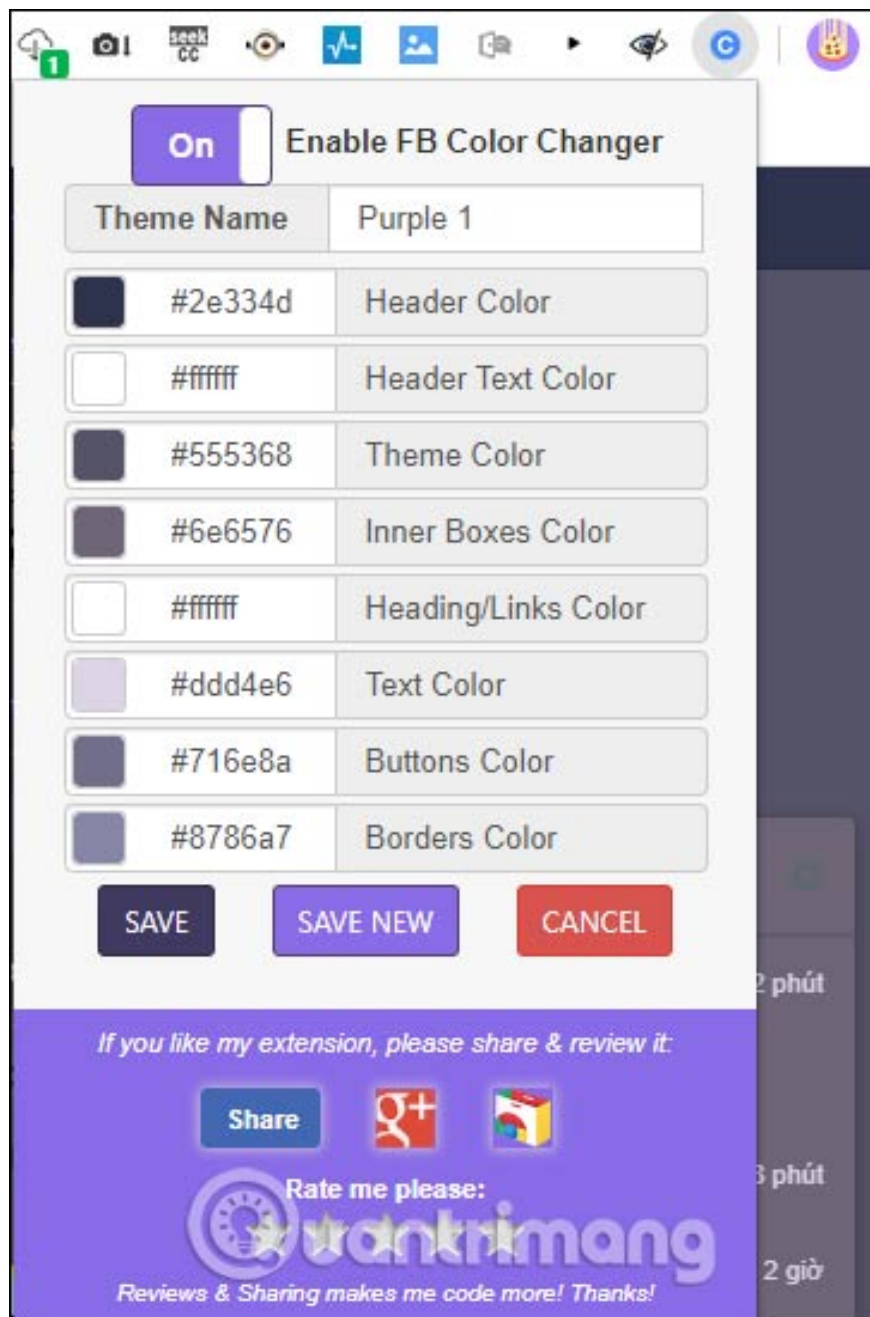

You just need to click on the background color to apply to Facebook.

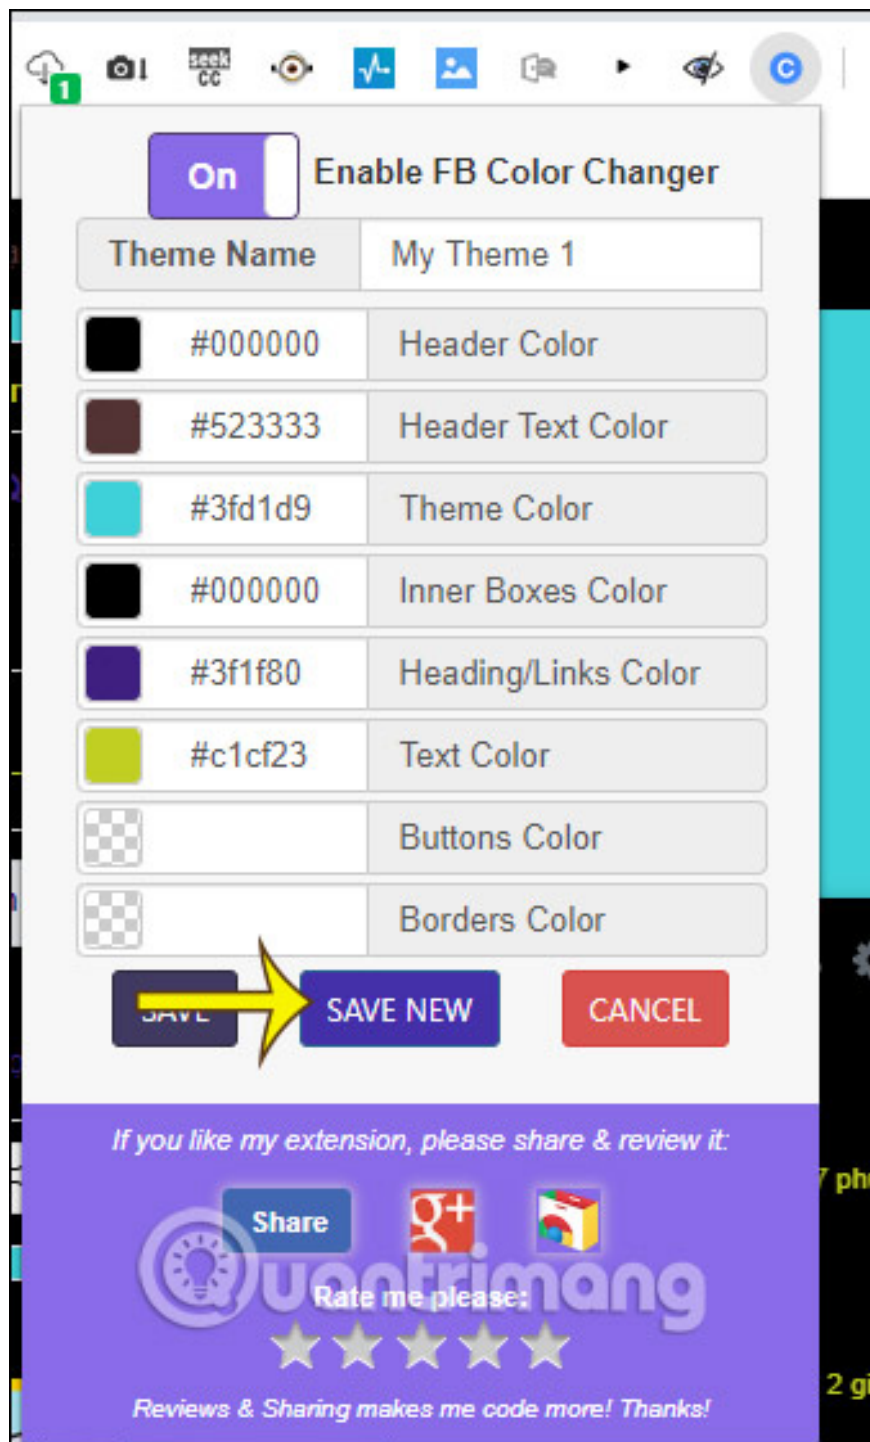

Step 3:

At each color in the list will have more **Edit section** for you to adjust the color code as you like. If you have changed, **click Save** to save.

Step 4:

If you want to **create a new background color for Facebook** , click **Create New Theme** . We **name the theme** , then **select the color of** each content. Finally **click Save new** to save the newly created theme. If you want to turn off the Facebook background color, switch the widget to Off mode.
