

How to change the font on Skype

On Skype provides a font board with many different typefaces, along with effects or font sizes to choose from. If you do not want to use the default font, you can change the new font.

You use Skype regularly and get bored with the default font of the software. If so, it can be changed to another font, with a list of fonts that Skype provides to users.

Previously, Network Administrator instructed you to read style chat on Skype, can write bold, italic or chat underlined text. However, in order to chat with text created like this, you must remember that the command to do it like to write in bold, requires an asterisk, or italics, with an underscore. If you don't want to do many steps, and just change the font in the simplest way, you can use the font volume that Skype provides immediately.

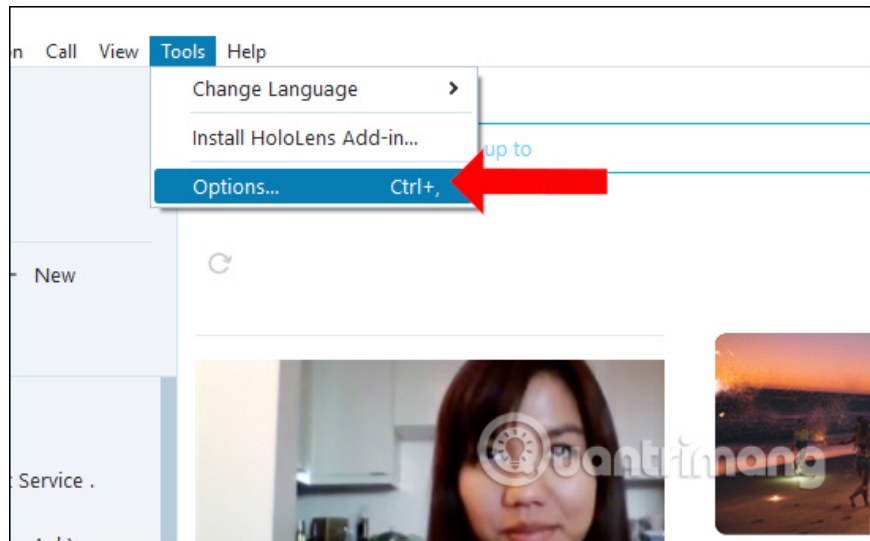

When you apply to a new font, the chat font in the chat frame will change, and the text on the title or menu will remain the same. The following article will guide you how to change the font on Skype.
