## Instructions to change iPhone boot sound

### Note:

To be able to change the sound when starting iPhone, force your device to jailbreak. If you are using iOS 10, you can refer to the steps to jailbreak iOS 10 for iPhone and iPad using Cydia Impactor tool.

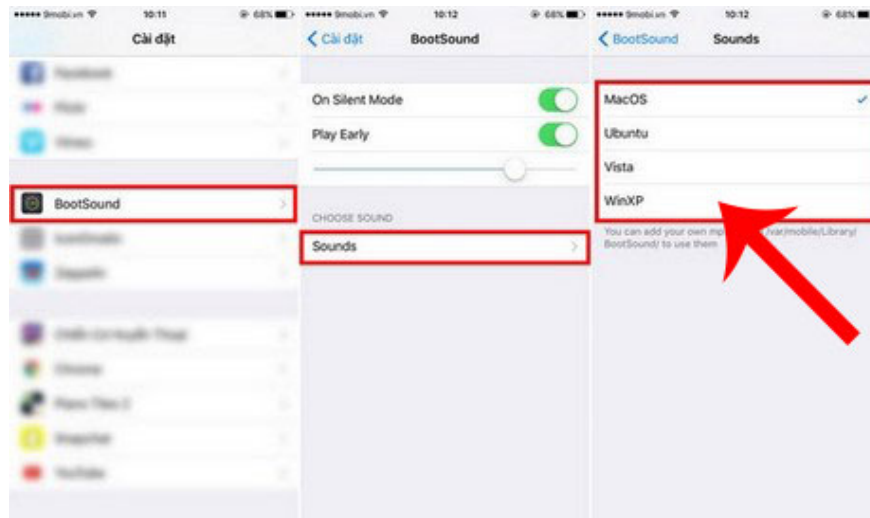

### Step 1: Download and install BootSound

The first thing you need to do is add the BootSound application, launch Cydia on iPhone and then enter the keyword **BootSound** in the search box and Click **Install** . Confirm the installation to proceed with setting it up, finish the installation process and click **Start** .

## Step 2: Activate and use BootSound

Using BootSound is very simple, you go to **Settings**> **Settings in iPhone**> select **BootSound**> **BootSound enabled** . Select the **Sounds** item you will be allowed to choose the sound according to your preferences. Try out all sound pack lists in this menu and select a sound you find best to complete the iPhone boot sound change.

So you know how to change the sound when starting iPhone, right? Hopefully with this iOS trick, you will no longer be bored with the iPhone's default sounds. Also, for jailbroken iPhone devices, you can install Malipo tweak if you want to change iPhone phone charging sound.

I wish you all success!
