

How to change the language for Cortana in Windows 10

Cortana is a cloud-based personal assistant that works on Microsoft devices and many other services. Cortana can provide a range of features, some of which are personalized.

Cortana is a cloud-based personal assistant that works on Microsoft devices and many other services. Depending on the capabilities of the device and the version of Cortana you are using, Cortana may offer a range of features, some of which are personalized.

1. Instructions to enable Cortana and use this virtual assistant on Windows 10

Cortana on Windows is available in certain regions and languages. If Cortana is not available for your Windows device, you can still search for files on your device in the search box on the taskbar. Cortana is also available on other platforms, such as Android and iOS.

Cortana uses the same language as your regional language by default, but you can specify specific regional languages for Cortana.

The following is a list of regions where Cortana is available and the corresponding languages that Cortana is optimized for each.

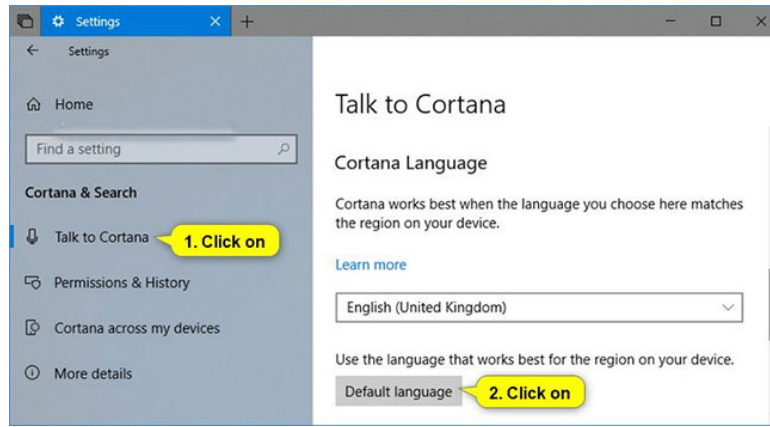

1. Australia: English
2. Brazil: Portuguese
3. Canada: English / French
4. Chinese: Chinese (simplified)
5. French: French
6. German: German
7. India: English
8. Italian: Italian
9. Japan: Japanese
10. Mexico: Spanish
11. Spanish: Spanish
12. United Kingdom: English
13. United States: English

This guide will show you how to change the Cortana language to a specific regional language in Windows 10.

Note : This guide is not available with the new Cortana Beta application.

Here's how:

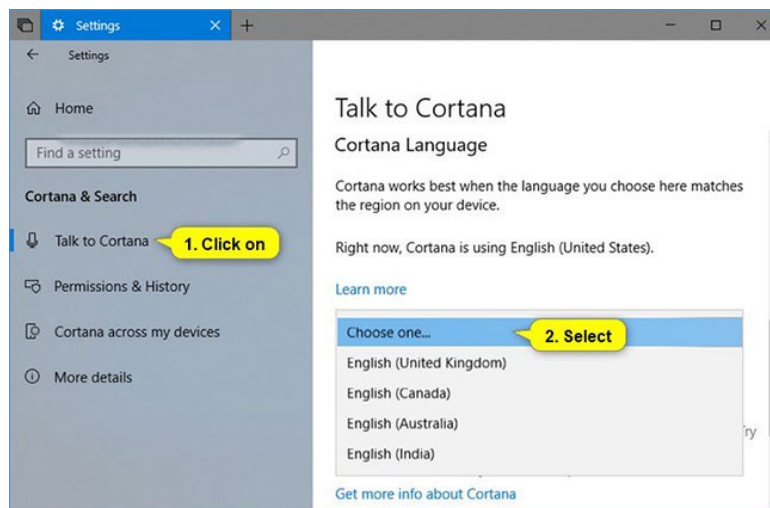

1. Open **Settings** and click on the **Cortana** icon .
2. Follow step 3 (default) or step 4 (to change) below for what you want to do.
3. To restore the default Cortana language, click **Talk to Cortana** on the left and click the **Default language** button in the Cortana language settings on the right.

Click the Default language button

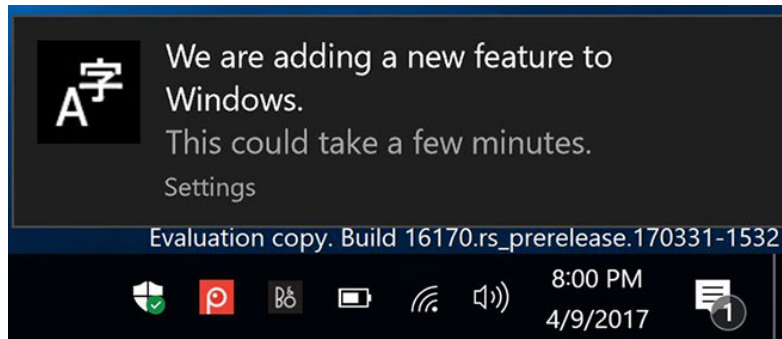

Note : The **Default language** button will only be available if you have previously changed the Cortana language.

4. To change the Cortana language, click **Talk to Cortana** on the left and select the language you want in the drop-down menu of **Cortana language** settings .

Click Talk to Cortana on the left and select the language you want

The corresponding voice pack from optional features will be automatically downloaded and installed to the PC, if it is not already installed.

The corresponding voice pack from the optional features will be automatically downloaded
