

How to change the new look on the beautiful Google Chrome iOS browser

In the article below, Network Administrator will guide you to read the activation of the new interface of Google Chrome browser on iOS extremely simple and beautiful.

Recently, Google continually launched users with many new designs on its services, especially Chrome browser. If you are bored with the default interface of Google Chrome on iOS, try refreshing them, maybe you will get many good ideas through it. The way to enable the new interface on Chrome is extremely simple, anyone can do it. If you are looking to do this, please refer to the instructions below of Network Administrator.

Actions to activate the new interface for Chrome browser on iOS:

Step1 : To activate the interface on Chrome, first you need to open the Google Chrome browser on your iOS device (when you activate the interface you should update to the latest version)

1. Download the latest Google Chrome browser to your device

Step 2 : Here you access the chrome: // flags link, the system will now take you to the browser's feature setting page.
