## Instructions for using LockScreen Wallpaper Synchronizer

### Step 1:

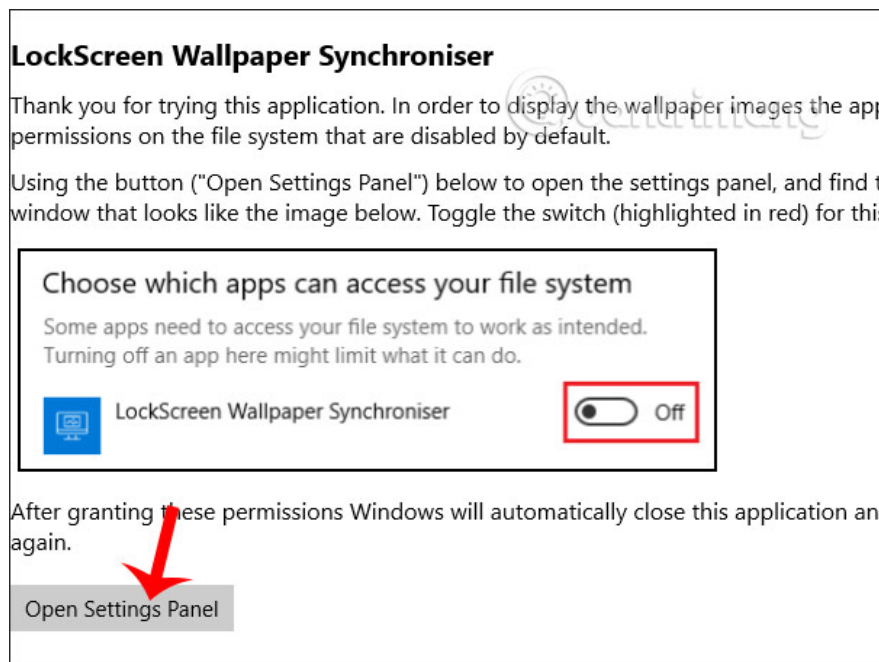

Users download the LockScreen Wallpaper Synchronizer application for Windows 10 according to the link below.

1. Download LockScreen Wallpaper Synchronizer

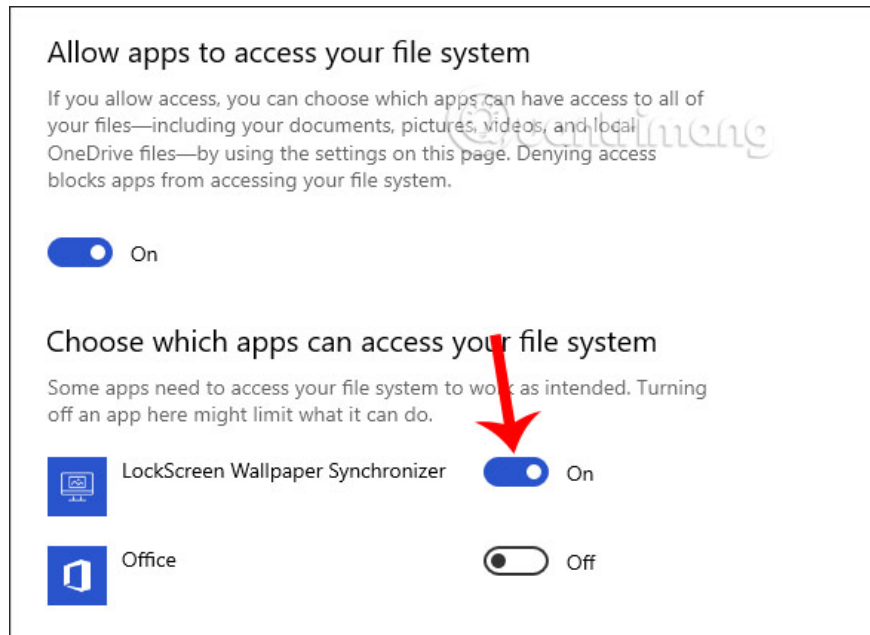

## Step 2:

Display the interface of the application. In order for the application to automatically change the wallpaper with the lock screen on the computer, users need to grant permission for the application to access the file system. Click **Open Settings Panel** at the bottom of the interface.

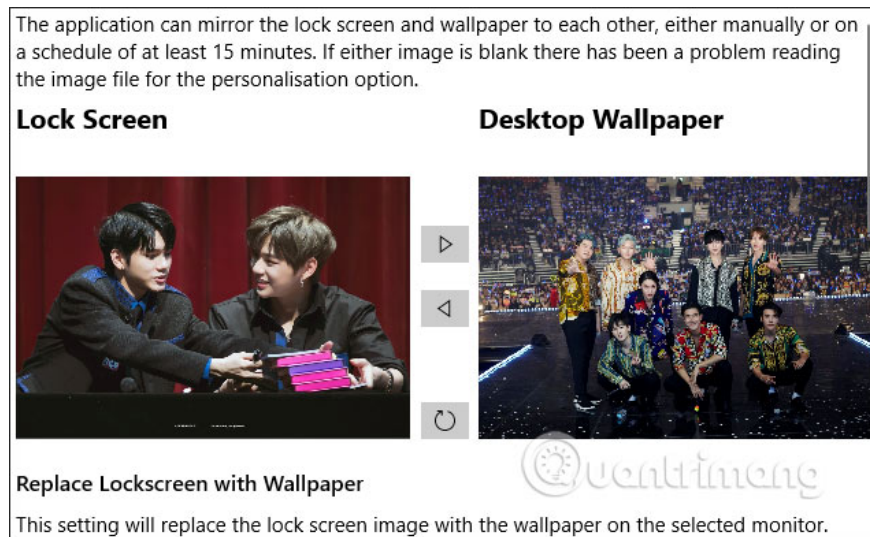

Switch to the new interface, we **enable On at LockScreen Wallpaper Synchronizer** to license the application.

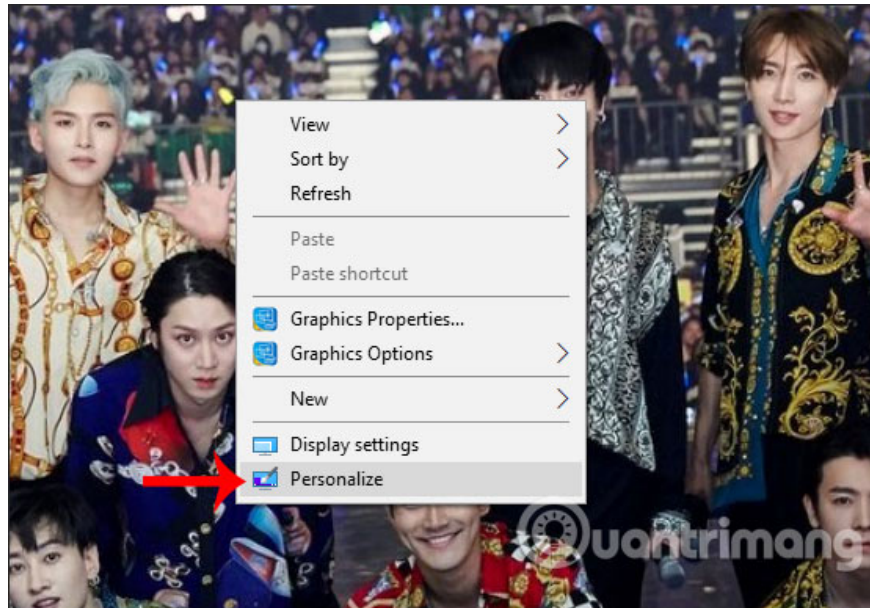

**Step 3:**

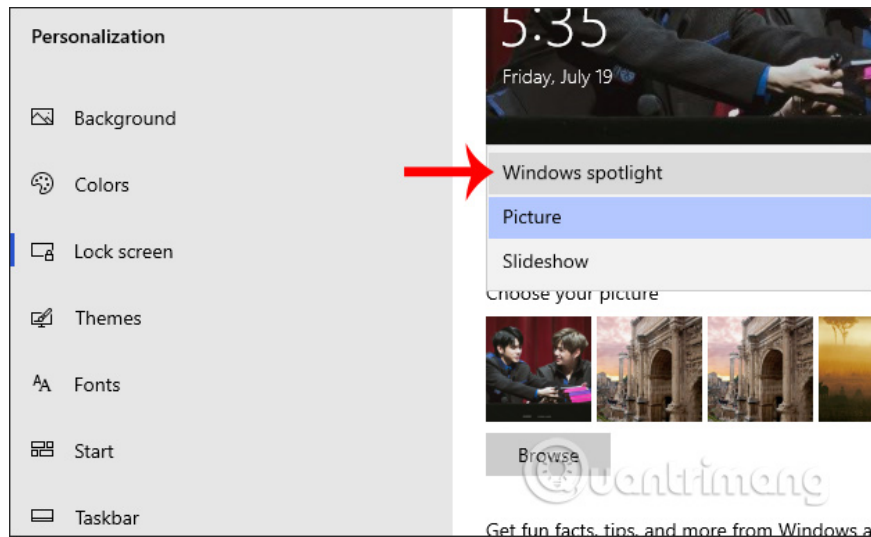

Access the app again and users will see the image for the lock screen (Lock Screen) and the desktop wallpaper (Desktop Wallpaper) in use.

In case the user wants to **use the Windows Spotlight image** for the desktop wallpaper, right-click on the computer screen and select **Personalize** .

Next, select **Lock screen** and click on **Background** and select **Windows spotlight** .

#### Step 4:

To replace the computer wallpaper with the lock screen image, users can do it manually or automatically.

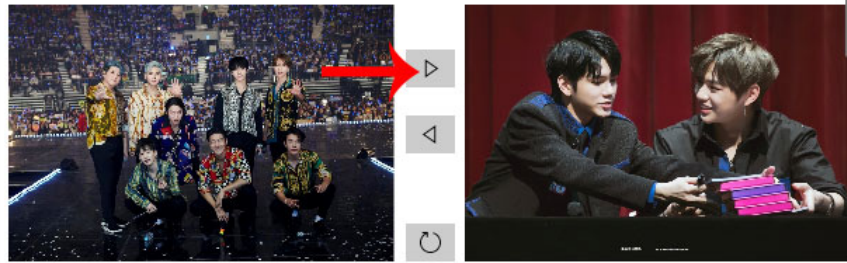

If **done manually** , you **press the right arrow** to replace the desktop wallpaper with the lock screen wallpaper.

And vice versa to change the lock screen wallpaper with desktop wallpaper, click the arrow to the left.

The application can mirror the lock screen and wallpaper to each other, either manually or on a schedule of at least 15 minutes. If either image is blank there has been a problem reading the image file for the personalisation option.

**Lock Screen**

**Desktop Wallpaper**

**Replace Lockscreen with Wallpaper**

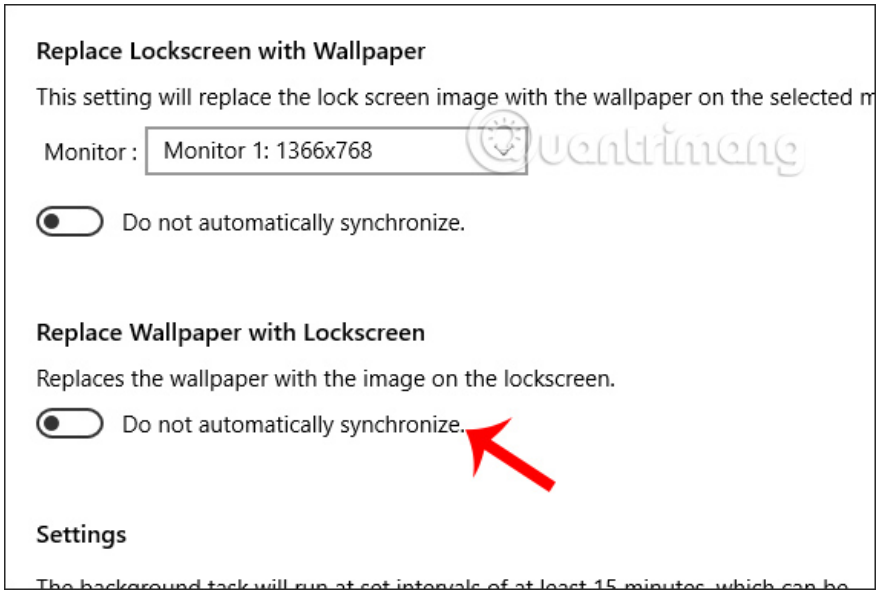

This setting will replace the lock screen image with the wallpaper on the selected monitor.

Monitor :

**Step 5:**

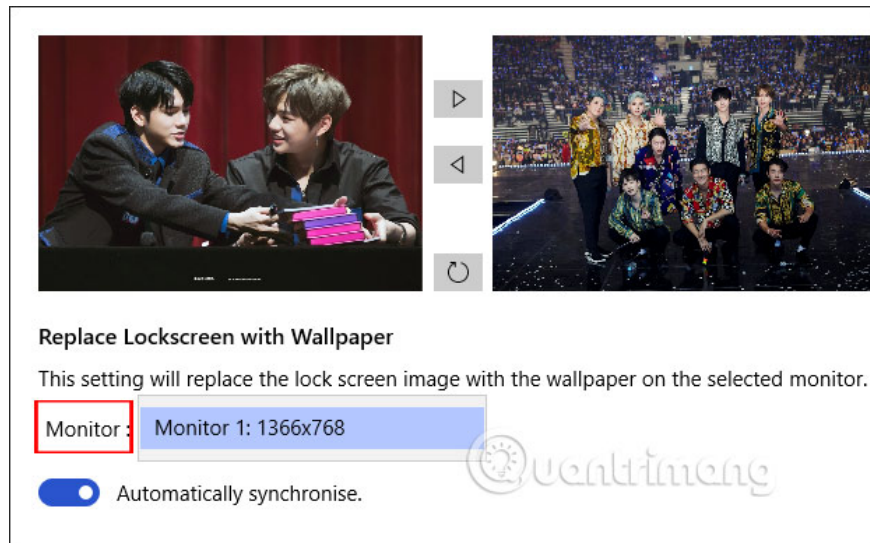

To **change the wallpaper automatically** users have 2 options to Replace Lockscreen with Wallpaper to replace the locked wallpaper with desktop wallpaper and Replace Wallpaper with Lockscreen to replace the desktop wallpaper with the locked wallpaper.

Activating automatic mode by pressing **the right button at Do not automatically synchronizes** .

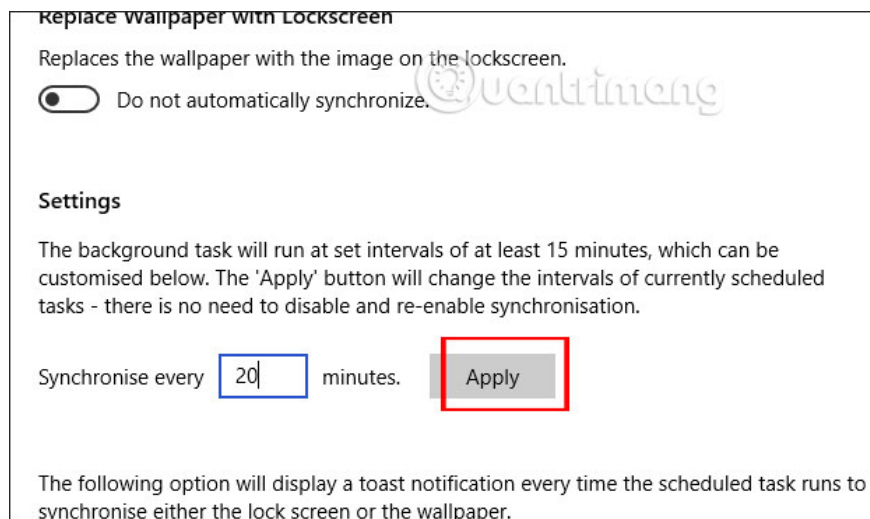

**Step 6:**

In case you want to apply automatic change mode to **multiple computer screens** , then at **Monitor** we select the computer screen to use to change.

### Step 7:

By default the wallpaper after 15 minutes will automatically change for each other. If you want to **increase that time**, in the **Settings** section, **enter the time you want to use** and click **the Apply button** to apply. The number of minutes to change must be more than 15 minutes.

Only LockScreen Wallpaper Synchronizer application and simple implementation, computer wallpaper and lock screen are changed many different topics. Windows Spotlight wallpapers will bring a new look to your computer.

I wish you all success!
